These projects are along the eastern corridor linking Thakot in the north to the Gwadar Port.

The officials said there were many missing links in the existing alignment that have to be bridged by the end of next year to make the Gwadar Port operational under the China-Pakistan Economic Corridor (CPEC).

Under the programme, China wants to develop its under-developed western parts and will also have access to strategically located deep-sea Gwadar Port to secure commercial sea lines.

During the Chinese president's visit, which is expected to begin from Monday, the financing agreements will be signed by Finance Minister Ishaq Dar and China's commerce and trade minister. Dar will cut short his Washington visit and reach Islamabad on April 19.

The Chinese president's visit will also play a critical role in restoring the regional power balance that foreign policy experts say has tilted in favour of India after President Barack Obama's trip to New Delhi.

In the short term, both the countries have agreed to make the eastern route operational, which is easy to build besides being the safest among the three alignments. All of them are planned to be made operational in the next 15 years. They said there will be multiple nodes on the corridor, which will connect all the provinces.

Eastern line

The alignment has now been agreed with the starting point at Kashgar China and Khunjerab Pakistan. It will pass through Thakot-Mansehra-Islamabad-Lahore and Multan.

From Multan, the route will be linked to Hyderabad through Rohri and Dadu. The Hyderabad-Karachi portion will be linked through M-9. Karachi then will be linked to Gwadar through N-10 East Bay Express Way along the coastal line.

The framework agreement will ensure concessionary Chinese financing to make the eastern corridor fully operational.

Under the corridor, 487km Karakoram Highway Phase-II will be constructed from Raikot-Sazin-Thakot-Mansehra to Islamabad at a cost of \$3.5 billion. During the visit, an agreement will be signed for roughly \$1 billion concessionary financing for constructing 120 km of the 487km road.

The financing agreement will also cover the 387km Multan-Sukkur route to be constructed at a cost of \$2.6 billion. China will give a 90% concessionary loan.

The East Bay Express Way costing \$148 million will be part of the framework

agreement, the officials added. Financing for the New Gwadar International Airport is also part of the broader agreement.

At Sukkur, the corridor is divided into two categories. The one along the eastern line will lead to Karachi and connect Gwadar through the coastal highway.

The second one will go through the centre of the country via Dera Allahyar to Khuzdar and touch the western route.

The western line passes through some restive areas of Balochistan. The officials said the western corridor was part of a long-term plan that was under process and will be completed by 2030.

There has been opposition to the eastern corridor by some political forces and the government is trying to overcome these challenges, said the officials.

“The opponents of the fate-changing project like CPEC are the enemies of Pakistan,” said Minister for Planning and Development Ahsan Iqbal.

He said the country has to learn from Chinese development experience and stop politicising mega development projects through political statements.

The officials said the CPEC will equally benefit all the provinces. In Khyber-Pakhtunkhwa, an 802km road and rail network will be constructed. In Balochistan, a 3,366km road and rail network will be constructed as well.

The \$130-million breakwater construction at the Gwadar Port and \$28 million for dredging of berthing areas and channels at the port are part of the package to be signed by both the sides.

China will also fund infrastructure development at the Gwadar export processing zone, necessary facilities for fresh water treatment at Gwadar and upgradation of the Gwadar Hospital.

All Day

China gets operation rights at Gwadar port for 40 years -- The Nation

Beijing: China has been granted operation rights for 40 years at a port in Gwadar, a strategic deep-water seaport in Pakistan, Hong Kong-based Pheonix TV reported.

Infrastructure construction is nearly complete and the port could be put into full use by the end of the year, Dostain Khan Jamaldini, chairman of the Gwadar Port Authority, was quoted as saying. It could serve as a vital economic hub linking China and Pakistan, he said.

Gwadar, on the shores of the Arabian Sea in Pakistan's western province of Baluchistan, occupies a strategic location between South and Central Asia and the Middle East, being situated at the mouth of the Persian Gulf, just outside the Strait of Hormuz, gateway for about 20 per cent of the world's oil.

It is also the end of the China-Pakistan Economic Corridor, which runs about 3,000 kilometers from Gwadar to the northwestern Chinese city of Kashgar, an important part of the ancient Silk Road linking China with Eurasia and Africa.

Oil from the Middle East could be offloaded at Gwadar and transported to China through the corridor, cutting the current 12,000 km journey to 2,395 km.

The TV station quoted Riaz Mohammad Khan, advisory board member of the Centre for International Strategic Studies as saying: "The port will turn the tables it will really benefit Pakistan and China."

The economic corridor is an under-construction development connecting Gwadar to China's Xinjiang via roads, railways and pipelines to transport oil and gas. It will act as a bridge for the new Maritime Silk Route that envisages linking 3 billion people in Asia, Africa and Europe, part of a trans-Eurasian project proposed by President Xi Jinping in 2013.

"Oil from the region to China will be facilitated," said Pakistani President Asif Ali Zardari in 2013 when China was given the contract to operate the port. Gwadar would become a hub of trade and commerce in the region, bringing together the countries of Central Asia and lending new impetus to Pakistan-China relations, he said.

China is expected to invest \$1.62 billion in the Gwadar project, including construction of an eastern expressway linking the harbor and coastline, an international airport, breakwater and nine other projects expected to be complete in three to five years.

Gwadar will soon start building a container terminal measuring 1,200 metres and a 300-metre-long cargo terminal, that can harbor four berths.

When fully operational, Gwadar will promote the economic development of Pakistan and become a gateway for Central Asian countries, including Afghanistan, Uzbekistan, linking Sri Lanka, Iran and Xinjiang to undertake marine transport.

All Day

Gwadar to become trade point for many shipping routes in region -- The Shipping News

With its sparkling blue waters, Gwadar is set to become a vital trading point as it connects many shipping routes hence Pakistan and China are keen to turn it into a symbol of their expanding cooperation in future.

The coming visit of the Chinese president Xi Jinping next week will be an occasion when the two friendly countries are expected to give it a further fillip in boosting their economic and cultural cooperation.

"The Chinese government has declared Gwadar a crucial trade point for China-Pakistan Economic Corridor (CPEC) which has great potential to turn Pakistan into a hub of regional cooperation and enhance its regional power, Chairman Gwadar Port Authority (GPA), Dostain Khan Jamaldini said.

Several projects including Gwadar Economic Free Zone, Gwadar International Airport and West Bay Expressway would change the destiny of the people of the country, he said.

Gwadar is a port city of Balochistan, located at the mouth of Persian Gulf and outside the Straits of Hormus. It is near to the key shipping routes used by the mainline vessels in the region with connections to Africa, Asia and Europe and enjoys high commercial and strategic significance.

GPA chief said that Gwadar Economic Free Zone would be the first ever social economic zone that will help reap the mammoth economic benefits for Pakistan.

GPA Chairman noted that, "We have arranged several meetings of foreign entrepreneurs with Gwadar Chamber of Commerce and Quetta Chamber of Commerce to engage our business community with the foreign businessmen to reap maximum benefits.

He said many Chinese companies have agreed to sign MOUs with Balochistan's trader to improve the bilateral trade. Gwadar port is set to be handed over to Chinese company soon which has shown willingness to make it fully operational, he informed.

Gwadar Port is a gateway of China-Pakistan Economic Corridor, a mega project which would connect southern Pakistan to China's Northwest region of Xinjiang via highways and Railways.

The economic Corridor will run about 3000 km from Gwadar (Pakistan) to Kashghar (China) with estimated cost of \$ 45 billion.

The CPEC project would serve as primary gate way for trade between China and the Middle East and Africa.

"China our time- tested friend and trade partner wanted outlets for its trade to rest of the world through Pakistan," Balochistan Minister for Planning and Development Doctor Hamid Achakzai said.

"CPEC playing its vital role in regional integration would serve as a driver for connectivity between South Asia and East Asia," he said adding China was offered several outlets to expand its trade to Afghanistan and Middle East.

"This is the era of trade as we encourage traders of Balochistan to get benefit of the Gwadar Port as economic free zone, international Airport and West Bay Expressway are shortly being inaugurated," Mr Hamid said.

Significance of Gwadar in carrying out the CPEC project increases manifold as China plans to build oil storage facility and a refinery at Gwadar, with oil transported to its Xingjiang Uighur region via road and pipelines.

This will help China move energy and goods to inland China without going through the Strait of Malacca, which could be blocked by the US or India.

"CPEC is equally important for the people of Pakistan mainly for dwellers of Gwadar," Behram Baloch, a local journalist said. "Corridor project is one of the massive uplift projects of Pakistan that will give boost to the economic growth".

Behram said, "Some international forces don't want success of the CPEC project and all political parties should be taken on board to make the project a success".

Besides CPEC project, Chinese government also plans 21st century Maritime Silk Road, and One Belt One Road projects which would have transformative impact on Pakistan's economy and lifestyle of an ordinary man in the country.

Member of Chamber of Small Industries and commerce and President Gem and Jewelers and Merchant Association, Ramzan Dehwar called for engaging business community of Balochistan in Gwadar giving them international exposure.

"Ports are considered vital sources of economic growth in the world and we have to realize the essence of maritime economics. The connectivity which Gwadar enjoys

has even not blessed to Dubai and Singapore,” he said and emphasized the need to implement Master Plan of Gwadar in letter and spirit.

Pak, China strategic partnership to go beyond usual limits -- BR

ISLAMABAD: Pakistan and China are enjoying strategic partnership that would continue to grow with time, especially in the wake of huge investment in various sectors expected to pour in after the visit of Chinese president next week.

China and Pakistan's strategic partnership has transcended the changes of time and domestic politics and served as an example of very strong state-to-state relations.

China is making sincere efforts for improvement of infrastructure in Pakistan through investing in different areas that would help improve the life of the people. It has also started real investment on mega projects which are important for the bilateral ties and drastic improvement of the socio-economic status of the people of Pakistan.

In the last couple of years, Pakistan had consolidated its strategic partnership with China and as time-tested and all-weather relationship with China has been transformed into a strong strategic partnership, with focus on trade, investment, energy infrastructure and connectivity and counter-terrorism cooperation.

China, which already helped in the construction of Karakoram Highway is also working to upgrade it as part of a proposed economic corridor between the two countries.

China had already took control of Pakistan's Gwadar port, that had provided it access to the Arabian Sea and Strait of Hormuz, a gateway for a third of the world's traded oil.

Pakistan plans to establish industrial parks and economic zones along the proposed Kashgar-Gwadar China-Pakistan Economic Corridor that will also be helpful in bringing revolution in the region to increase the status of China in the area.

The new trade corridor will provide Chinese traders a link to deliver their goods to the international markets through the Gwadar Port. The economic corridor is being developed as part of a strategic partnership between the governments of China and Pakistan.

The proposed sites of freight terminals and industrial parks included Sust, Gilgit, Abbotabad, Loralai, Kohlu, D.G. Khan, Bhakkar, Rajanpur, Kashmore, Jaccobabad, Khuzdar, Basima, Punjgur, Turbat and Gwadar.

Like the previous Pakistani leaders, Prime Minister Muhammad Nawaz Sharif is also giving top priority to improve ties with China and engaging leading Chinese companies for the improvement of various sectors in Pakistan.

Nawaz Sharif who conducted his first visit to China after assuming office of the Prime Minister and established a China Cell at the Prime Minister Secretariat to follow up and expedite the projects being signed with China.

During the latest visit of Prime Minister Nawaz Sharif to China, the two countries signed different agreements to strengthen economic and diplomatic ties.

The two countries had also agreed to enhance bilateral cooperation in the fields of maritime security, search & rescue and disaster relief at sea, combating piracy, maritime scientific research and environmental protection that will further cement the bilateral ties in the context of regional strategic ties.

Nawaz has urged Chinese investors to invest in Pakistan, particularly in the energy sector to resolve energy crisis.

Chinese consider Pakistan as a safe haven for Chinese investment, therefore, China-Pakistan's trade and economic cooperation has seen good progress in past many years.

Pakistan and China are also working to increase their bilateral trade to \$20 billion from the present figure of \$12 billion within next couple of years. These projects will increase the strategic value of China in the region and allow China to play even more effective role in its development and prosperity. The most important linkage will be linking Pakistan's Gwadar Port on the Arabian Sea with Kashghar in Xinjiang province in Northwest of China.

Over the years, China and Pakistan have insisted on mutual respects and trust for each other in exchanges and cooperation and provided timely help and valuable assistance to each other at critical moments, which has left many touching stories. China has always supported Pakistan's efforts to safeguard her independence, sovereignty and territorial integrity with practical, sincere and selfless actions to help Pakistan steer out crisis situations.

Relying upon good and strong relations with Pakistan, China is opening up its

Western part for economic progress and the province of Xinjiang would be a critical link of cooperation with Pakistan.

Pakistan-China friendship at all levels, including government to government, people to people, youth to youth, politicians to politicians are very strong and exemplary.

Pak-China friendship is unique and state-to-state relations are very strong and these could be used for ensuring everlasting peace in the region.

Besides Pakistan's support to China's core interests of Tibet and Taiwan remains unwavering, mutual collaboration in regional forums like SCO, CICA and Heart of Asia has stepped up in these recent years.

China is poised to offer investments and loans to the tune of \$ 35 billion for energy and other infrastructure projects over the next 8-10 years.

**Gwadar-Nawabshah pipeline deal to be signed during Xi's visit --
Pakistan Today**

Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi has said that Pakistan will sign the agreement with a Chinese company to build gas pipeline from Gwadar to Nawabshah which is the main part of Iran-Pakistan gas pipeline project.

President of China Xi Jinping will pay a two-day visit to Pakistan from Monday (April 20-21).

Talking to Iran's state news agency, the minister said the gas pipeline project would cost about 3 billion dollars and will be built by CPPB (China Petroleum Pipeline Bureau), a part of CNPC (China National Petroleum Corporation).

According to the minister the building of the pipeline would start shortly after both sides sign the agreement and the project will be completed in 30 months. He added that Pakistani side was insisting on completing the project as soon as possible.

The pipeline project from Gwadar-Nawabshah is over 700 kilometers.

The minister went on to say that the pipeline from Gwadar to Iran border (about 80 km) will be built by two Pakistani companies SNGPL (Sui Northern Gas Pipelines Limited) and SSGC (Sui Southern Gas Company) and it will be completed before Gwadar-Nawabshah pipeline.

The deadline for the Iran-Pakistan gas pipeline agreement expired on December 31, 2014. Iran has almost completed its portion of the project but Pakistani side has yet to begin the construction of the pipeline on its territory.

**Pakistan has to keep pace with China on economic corridor: Iqbal --
Dawn**

Pakistan has to keep pace with China on economic corridor: Iqbal

Ahsan Iqbal said a major chunk of \$35-37bn was purely Chinese investment in IPPs (independent power projects) mode. Pakistan will purchase electricity from these projects, while the remaining \$8-9bn will be Chinese concessional loans for infrastructure development like roads, ports and railways. -APP/File

Ahsan Iqbal said a major chunk of \$35-37bn was purely Chinese investment in IPPs (independent power projects) mode. Pakistan will purchase electricity from these projects, while the remaining \$8-9bn will be Chinese concessional loans for infrastructure development like roads, ports and railways. -APP/File

ISLAMABAD: With Pakistan and China expected to sign agreements worth \$50 billion during the forthcoming visit of President Xi Jinping, Planning and Development Minister Ahsan Iqbal has said Islamabad will have to move with Beijing's pace on operationalising the China-Pakistan Economic Corridor (CPEC); otherwise China could choose some other route and engage some other partner.

Mr Iqbal, who is steering the multi-billion dollar programme with the National Development and Reform Commission of China, was speaking at a seminar on the CPEC here on Friday.

"It is Pakistan's responsibility to complete the Khunjerab-Gwadar route at a pace that can supplement China's economic priorities attached to the CPEC," he said. "It is the shortest but not the only supply chain available to China."

The foreign ministry has said President Xi will visit Pakistan on April 20-21 at the invitation of the president and the prime minister. This will be his first foreign visit this year.

According to an official, the CPEC was originally estimated at about \$45 billion but the size was revised to \$50bn because of addition of some projects and cost escalations.

Ahsan Iqbal said a major chunk of \$35-37bn was purely Chinese investment in IPPs (independent power projects) mode. Pakistan will purchase electricity from these projects, while the remaining \$8-9bn will be Chinese concessional loans for infrastructure development like roads, ports and railways.

He said that although final terms and conditions were yet to be agreed upon, interest rate on the loans would be the lowest in the international market. He said the Chinese government would provide subsidy to its banks while awarding contracts to its companies for these projects.

\$50bn agreements likely during Chinese president's visit

Answering a question, the minister said the army would raise a special force for the security of Chinese workers to be engaged in various projects under the CPEC.

He said all major political parties had promised to extend their full support to the China-Pakistan economic cooperation at a recent meeting presided over by the prime minister. He said Pakistan needed continuity of policies, political cohesion and stability and peace in the country to complete the projects at a fast pace.

In a presentation, a senior official of the planning and development ministry said the two sides would sign government-to-government infrastructure deals of over \$4bn. About \$10.5bn commercial deals will be signed in the energy sector for 7,250MW power generation.

The Chinese president will perform the groundbreaking of about 10 projects. These include \$44 million cross-border fibre optic data communication system project between Khunjerab and Islamabad, digital terrestrial

multimedia broadcast pilot project in Muree, \$1.4bn Orange Line Mass Transit for Lahore, Cultural Centre in Islamabad, a small and medium hydro research centre, Pak-China FM-98 channel, 720MW Karot hydropower project, 200MW wind power projects and 900MW Zonergy solar power project in Bahawalpur.

The two sides will sign an inter-governmental framework agreement for construction of Karachi-Lahore motorway's Multan-Sukkur section at a cost of about \$2.6bn, Karakoram Highway Phase-II's Thakot-Havelian section (\$920m), Gwadar east-bay expressway (\$230m) and Gwadar international airport (\$140m). The finance ministry will sign financing agreements of the four key projects which will make the eastern route operational.

A framework agreement for financing development of industrial parks will also be signed. The State Oceanic Administration of China and Pakistan's Ministry of Science and Technology will sign a protocol on the establishment of China-Pakistan Joint Maritime Research Centre.

A land lease deed for Gwadar port and Gwadar free zone will be signed between China Overseas Port Holding Company and Gwadar Port Authority. A joint feasibility study for upgradation of the main railway line and a framework agreement on Gwadar-Nawabshah LNG terminal and pipeline will also be signed.

China will extend commercial loans for executing 7,250MW projects, in addition to two coalmining projects in Thar. An agreement will be signed between Thar Power Company and a Chinese company for building two coal-fired power plants of 660MW at a cost of \$900m.

Sino-Sindh Resources Limited will sign a \$900m coalmining project at Thar Block-II and \$1.9bn Thar coal power projects of 1,200MW. Nishat Group will sign 1,320MW coal-based power projects to be set up in Rahimyar Khan. Agreements for setting up two 1,320MW power projects in Muzaffargarh will also be signed.

Shandong Ruyi Group and Huaneng Shandong Power Generation Company will sign agreements for setting up 1,320MW coal-based power plants in Sahiwal at a cost of \$1.6bn and 870MW hydropower project in Suki Kenari with \$1.8bn to be sponsored by China Gezhouba Group.

The Foreign Office said the Chinese president would be accompanied by a large delegation, including First Lady Madam Peng Liyuan, senior ministers, functionaries of the Communist Party, government officials and chief executives of business houses.

The government will confer on President Xi the country's highest civil award, Nishan-i-Pakistan, at a special ceremony to be held at the Aiwan-i-Sadr.

All Day

Pakistan, China celebrating 64 years of friendship -- ARY

Visit of Chinese President Xi Jinping in 2015 is set to mark a new record in Pak-China friendship

(Web Desk) -- Pakistan-China friendship is regarded as one of the great examples of long-lasting alliances in world history. People have compared the strong bond between the two countries to be deeper than oceans, higher than the Himalayas and 'sweeter than honey'.

The friendship which is now 64 years old has broken boundaries and barriers beyond the conventional diplomatic relationships.

A cursory glance at the history of association between two countries will give an insight as to how the friendship progressed from its early years of infancy:

In 1949, China emerged on the world map as a country under its revolutionary leader Mao Zedong. Pakistan was the third country worldwide and the first country in the Islamic world to recognize China.

1951 saw the beginning of formal diplomatic relations between the two countries. Many years have passed since and the relationship has grown by leaps and bounds.

The first high-level diplomatic encounter between heads of two states came amidst the year 1955, when Chinese Prime Minister Zhou Enlai met Pakistani counterpart Muhammad Ali Bogra in a conference at Indonesia.

In October 1956, Pakistani Prime Minister Hussain Shaheed Suharwardi went to China on the invitation of Zhou Enlai. In December 1956, the Chinese Prime Minister reciprocated the gesture and came to Pakistan first time, in what is regarded as a milestone in Pakistan-China friendship.

In 1963, the two countries signed on the first trade agreement. In the same year, the two countries solved a territorial dispute with relative ease owing to the mutual goodwill between the two countries.

In 1964, Zhou Enlai visited Pakistan on a second tour while President Ayub Khan also visited China.

In 1972, Zulfikar Ali Bhutto visited China in a historical tour which set unprecedented heights in Pak-China relationship.

In 1980 Zia ul Haq went to China, Benazir Bhutto visited China in 1989 and 1995 while Nawaz Sharif also toured China upon assuming the position of Prime Minister.

Chinese Prime Minister Jiang Zemin came to Pakistan in 1996 to further strengthen the ties between the two countries.

2001 saw Chinese Prime Minister Zhu Rongji visit Pakistan as well.

Former President Pervaiz Musharraf visited China 8 times during his 11 year tenure.

Asif Ali Zardari visited China 7 times while former Prime Minister Yousuf Raza Gillani visited the neighbouring country 4 times during Pakistan People's Party tenure.

in the government.

During PPP's stint at the top, the visits of President Hu Jintao and Prime Minister Wen Jiabao are accorded significant historical importance.

And now in 2015, the visit of Chinese President Xi Jinping is being considered as a stepping stone to bringing the Pak-China relationship to an all-time high.

All Day

Pakistan, China to sign 69 accords of over \$46 bn -- The News

ISLAMABAD: Pakistan and China are going to sign around 69 deliverable projects of different stages having an estimated cost of over \$46 billion for energy, infrastructure, Gwadar development and telecom cooperation during the upcoming visit of Chinese President Xi Jinping to Islamabad.

Prior to the Chinese president's arrival in Islamabad, JinQi, head of board of directors, Silk Road Infrastructure Investment Fund, having a portfolio of \$40 billion, will also reach Pakistan to find ways and means to provide finances for the much-hyped Pak-China Economic Corridor (CPEC), a top official of the government told 'The News' in a background interview here on Friday. The head of China Development Bank will also arrive in Islamabad to sign financing deals under the CPEC initiatives.

Regarding different stages of around 69 projects under the CPEC, there will be five projects where ground breaking ceremonies will be performed, eight projects where inauguration will be done and for the remaining 56 projects, agreements will be signed during the Chinese president's visit to Pakistan, scheduled to start from the coming Monday.

The total portfolio under CPEC might cross \$50 billion mark because some new projects would be inserted into it and one such example was the development of infrastructure for the imported LNG. China has agreed to make the LNG infrastructure a part of CPEC and work on finding out the exact cost was underway.

Minister for Planning and Development Ahsan Iqbal said that Pakistan and China would accord formal framework during the upcoming visit of Chinese president under the CPEC for 2014 to 2030 by incorporating projects of short term, medium term and long term basis. "Instead of creating suspicion, Pakistanis should be thankful to China for making huge investments in our country," the minister said while addressing a conference titled China's Development Experience and Pak-China Economic Corridor (CPEC) here at the P-Block Auditorium on Friday.

The minister said that Pakistan would double its energy generation capacity over the next 10 years as with the Chinese help the government would develop 10 projects at Thar to generate 610MW from each and Gwadar Port would be developed in accordance with international standards.

He also said that the CPEC intended to ensure connectivity of three billion people by bridging between South Asia and Central Asia and Pakistan would become a centre of economic activities.

In return, the minister said, Beijing also expected that Islamabad would help integrate industrial and economic activities of the western China with regional countries and globally.

China, he said, would invest \$35 to \$37 billion for energy projects in the Independent Power Producers (IPPs) mode where investors would produce electricity and the government would buy the produced power. "China will not provide loans for the energy sector but they will invest here in Pakistan," he added.

The remaining portfolio of total committed amount of \$46 billion will be provided loans on concession, he said and added that infrastructure projects would be executed through bankable feasibilities.

“China will provide concessionary loans for infrastructure projects,” he said and added that these loans would be paid back during the next 15 to 20 years’ period. Pakistan, the minister said, would have to match its efforts with the Chinese side or Beijing also possessed some alternative routes to develop its western part.

“We will have to ensure political stability and continuity of policies in Pakistan in order to match with the Chinese efforts in order to make CPEC a success,” he made it clear and warned that if this opportunity was missed out, China would start considering alternative routes for developing its western part.

China wants to see Pakistan stand on its feet: Ahsan Iqbal -- Dunya News

ISLAMABAD – Federal Minister for Planning and Development Ahsan Iqbal on Sunday said that Pakistan-China friendship is everlasting and China wants to see Pakistan to stand on its own feet. He said every Pakistani is excited for Chinese president's arrival.

Talking to the media, Ahsan Iqbal said that the journey of Pak-China friendship has advanced in every era and every government tried to further ties.

He said all Pakistani governments have agreed to stabilize relations with China but Prime Minister Nawaz Sharif gave a whole new angle to the friendship.

Ahsan Iqbal said the government is transforming Pak-China friendship into a strong partnership. He said Pakistan will curb energy crisis with China's help, adding that coal energy projects to generate up to 6000 megawatts of electricity will be deployed.

The federal minister said that other energy projects will be from all sources including coal, water, solar and wind. He said these projects will help fulfill Pakistan's energy needs.

He said the projects will begin in next three to four years. He said that attention is also being given to the Karakorum Highway project, adding that its upgradation will be completed in two stages.

Ahsan Iqbal said that projects to increase functioning capacity of Gwadar port will also be initiated whereas the process on industrial cooperation projects is also ongoing.

He said that Pak-China economic corridor is not just a road but the vision of Silk Route will start a new dimension to the friendship between both countries.

Copper-and-gold project: 'Balochistan MPAs to decide Reko Diq future' QUETTA: The Balochistan Assembly will decide the future of the Reko Diq copper-and-gold project, said Chief Minister Dr Abdul Malik Baloch on Saturday. "I shall provide all the docume -- APP

QUETTA: The Balochistan Assembly will decide the future of the Reko Diq copper-and-gold project, said Chief Minister Dr Abdul Malik Baloch on Saturday.

"I shall provide all the documents of the project to every member," he said during the assembly session. He rejected all claims that the government had struck a deal with any company on the project.

Participating in a debate on the Kashgar-Gwadar project, CM Malik said Planning and Development Minister Ahsan Iqbal will be visiting Quetta on May 5 and the issue will be discussed then.

An adjournment motion was tabled by Pakhtunkhwa Milli Awami Party MPA Nasrullah Zehri and Deputy Opposition Leader Zamruk Khan Achakzai.

They said the Kashgar-Gwadar route is being altered and diverted to Punjab, bypassing the local Pashtun and Baloch areas. "The federal government has not properly guided the provincial government."

CM Malik said that when the federal minister visits Balochistan, all the MPAs will be taken into confidence on the meeting with him. He assured the house that the route of the economic corridor would not be changed.

He said the parliamentarians will also be taken into confidence on the Reko Diq issue, adding that he would bring all the documents to the assembly, which would decide the future course of action.

Gwadar land issues

The chief executive also asked Speaker Jan Muhammad Jamali to fix a date for a debate on the land allotment issues of Gwadar, adding that they would provide evidence to the MPAs as to what they are really doing on the Gwadar issue. "We shall compare our performance with the previous government's."

Malik asked the speaker to invite the MPAs of Gwadar and the opposition members to discuss the issue of Gwadar land allotment and their sale on throw-away prices. The speaker scheduled the debate for May 2.

Killa Saifullah deaths

The MPAs voiced grief over the death of five children in Killa Saifullah. They apparently died after being vaccinated for measles. The MPAs expressed mistrust in the investigating committee formed by the health minister.

Responding to the demand, CM Malik said the issue is technical. "We shall send the children's samples to the Aga Khan University Hospital in Karachi and to the Islamabad laboratory. Doctors can provide a more valid report."

All Day

CPEC, Gwadar Port high on agenda of Xi's visit to Pakistan -- Pakistan Today

Chinese President Xi Jinping will start a state visit to Pakistan on Monday, his first trip to the South Asian country since he assumed presidency in 2013.

During the visit, China and Pakistan will sign deals on a wide range of issues, from energy and infrastructure to education and culture, which will inject fresh and powerful impetus into the deepening of the China-Pakistan friendship and comprehensive cooperation.

And high on Xi's agenda would be talks over the China-Pakistan Economic Corridor (CPEC), which is planned to connect Kashgar in China's Xinjiang Uygur Autonomous Region to the south-western Pakistani port of Gwadar, Xinhua reported.

VITAL ENERGY LINK:

GwadarPort, a warm-water, deep-sea port, is located at the mouth of the Persian Gulf at Gwadar in the province of Balochistan of Pakistan.

Just outside the Strait of Hormuz, the port is adjacent to the key oil routes in and out of the Persian Gulf. It is also the nearest warm-water seaport to the landlocked, but energy rich, Central Asian republics.

During Chinese Premier Li Keqiang's visit to Pakistan in May 2013, the two countries agreed to build an economic corridor connecting the Pakistani port to China's Kashgar city in Xinjiang. The CPEC will shorten China's routes of oil and gas imports from Africa and the Middle East for thousands of kilometres, making Gwadar a potentially vital link in China's supply chain.

Khalid Mahmood, president of the Islamabad Council of World Affairs, said: "It can help China get connected with the Gulf region, Africa, Europe and other parts of the world in an easier way and in a shorter time. Meanwhile, for Pakistan, there will be more business and trade activities in the region. Pakistan will also become the centre of energy transmission from the Gulf," Mahmood said.

COOPERATION BEYOND PORT

China has implemented large-scale cooperation projects with Pakistan on electricity and new energy and has promoted the management of the port of Gwadar.

Syed Iftikhar Hussain Babar, secretary of the Pakistan Board of Investment, estimated that China's investment in Gwadar Port, including highways connecting the port and eastern coastline of the port, bulwarks of the port, anchorage dredging, a free trade zone and the new Gwadar international airport, would all be completed in three to five years.

Moreover, the CPEC project is not confined to the Gwadar Port infrastructure construction. China is also aiming to upgrade the 1,300-km Karakoram Highway, the highest paved international road in the world, which connects China and Pakistan across the Karakoram Mountains.

In addition to road and railway construction, the project also includes energy cooperation and investment programs. Xi's upcoming visit to Pakistan will lift the project to a new level, as China and Pakistan will sign extensive deals on energy, infrastructure, education and culture.

REGIONAL BENEFITS

This vision of the CPEC, once realised, will have great strategic significance for the development of China, South Asia and Central Asia as well as for peace and stability in the region.

For China, the project with Pakistan links China's strategy to develop its western region with Pakistan's focus on boosting its economy, Ma Jiali, researcher with the China Institute of Contemporary International relations, told Xinhua.

The construction of the economic corridor will also help improve the security situation in the poverty-ridden province of Balochistan of Pakistan, which is in the front line of the anti-terrorist war. Moreover, when Gwadar Port is completed, it will become a crucial port for landlocked Central Asian countries, such as Afghanistan, Uzbekistan and Tajikistan, and a transfer centre of those countries' cargo transportation to countries such as Sri Lanka, Bangladesh, Iran, Iraq and other destinations.

Grand scheme: Govt to spend Rs26b on Gwadar airport upgrade -- The Express Tribune

ISLAMABAD: The federal ports and shipping minister has said the government will soon upgrade the Gwadar airport to international standards.

Talking to the media in Islamabad on Sunday ahead of the Chinese president's visit to Pakistan, Kamran Michael said that Rs26 billion have been set aside for the project, which will be inaugurated soon.

He said the Gwadar port was a key project for Pakistan and would have significant impact on the economic development of the country. "This port is the deepest of all ports in the Persian Bay, Arabian Sea and the ports in the Bay of Bengal."

The deep-sea port at Gwadar is at the mouth of the Persian Gulf. It has been operational with three berths, each having a length of 200 metres.

Michael said in the light of an agreement signed in 2013 with the Chinese, the operational matters at the port were handed over to China, which would handle the port in consultation with Gwadar Port Authority.

He added the government was also working on a project of "East Bay Expressway" – a road network connecting the Gwadar port with other cities.

"This road may be called the main artery of the Gwadar port, as entire traffic and commercial operations will be carried through this network," he said. "This will help the investors for easy access to the free trade zone."

The minister claimed the port authorities had acquired 2,281 acres land for building roads, as the port was the gateway to China and the progress of the country and the region was related to it.

With Chinese President Xi Jinping coming to Pakistan today, the port would be high on his agenda in talks over the China-Pakistan Economic Corridor, which would connect Kashgar in China's Xinjiang region to Gwadar.

Pak-China ties: Worlds' largest bank to open branches in Punjab -- Express Tribune

The world's largest bank, the Industrial and Commercial Bank of China (ICBC), will open its branches in the Punjab. The first branch of the bank will be opened in Lahore.

A memorandum of understanding (MoU) in this regard was signed between the Punjab government and the ICBC administration on Sunday. Chief Minister Shahbaz Sharif and ICBC chairman Jiang Jianqing were present at the event.

According to the MoU, the bank will bring Chinese investment to the province and manage financial investment from other countries where it has strong presence.

The bank will also provide financial advisory to the government. It will provide technical cooperation to the government in automobile, agriculture and several

other sectors. It has assets of \$3.062 trillion.

The ICBC will provide consultative services to the Punjab government in foreign investment sector.

Welcoming the agreement, the chief minister said that the pact would play a key role in the promotion of investment in the province. "A new era of Pakistan-China friendship is going to start," he said. Jianqing said that the bank was ready to play the role of a financial advisor for investments in Pakistan.

Chinese experts meet CM

Heads of Chinese investment companies and experts in energy, infrastructure, transport and other sectors also met Sharif on Sunday. Promotion of cooperation in various sectors including energy and investment was discussed at the meeting.

Talking to Chinese investors, Sharif said that the Chinese announcement of investing \$46 billion in Pakistan was historic. "There is no other example of such extraordinary investment in the history of the country. Historic agreements will be signed during the visit of Chinese president to Pakistan. These include energy sector projects costing \$20 billion. After the completion of energy projects by the end of 2017, 10,400 megawatts of electricity will be added to the system," he said.

The chief minister said that projects for generating 2,500 megawatts of electricity were being carried out in the Punjab.

Up-grade of transmission lines

An agreement regarding up-grade of transmission lines of Quaid-i-Azam Solar Park was signed between the National Transmission and Distribution Company (NTDC) and a Chinese company on Sunday. The chief minister was present on the occasion.

Separately, a high-level delegation of Global Mining Company and Shanghai Electric Corporation China called on the chief minister.

The chief minister said that that Pakistanis would remember the extraordinary cooperation and role of China in resolving the energy crisis.

"The upcoming visit of the Chinese president will open up a new era of development and prosperity in Pakistan," he said. The chief minister said that coal-based power plants were being set-up in Sahiwal that would generate 1,320 megawatts of electricity.

Pakistan, China ink 51 MoUs -- BR

Pakistan, China ink 51 MoUs, Agreements include energy, infrastructure, security, economic development

ISLAMABAD – Pakistan and China on Monday decided to lift bilateral ties to all-weather strategic partnership of cooperation, hours after Chinese President Xi Jinping arrived here for his first state visit.

During the delegation-level talks held at the PM House, President Xi and Prime Minister Nawaz Sharif agreed to bring their relation to a new height.

According to the Chinese sources, they agreed for the up-gradation of bilateral relations in all fields of common interest. They decided to gear up for an expansion of cooperation in various fields, with the China-Pakistan Economic Corridor high on the agenda.

The corridor is a planned network of roads, railways and energy projects linking southwest Pakistan's deepwater Gwadar Port with northwest China's Xinjiang Uygur autonomous region.

At least 51 memorandums of understanding (MoUs) and agreements in different sectors, including energy, infrastructure, security and economic development were signed between the two countries.

Prime Minister Sharif and Chinese President Xi Jinping witnessed the signing ceremony held at the PM Office. Both the countries signed the MoUs on the joint statement between China and Pakistan on establishing the all-weather strategic cooperative partnership.

Both the sides also exchanged notes of feasibility study of the demonstration project of the DTMB between both the governments. The exchange of notes on provision of anti-narcotics equipment, law enforcement equipment and feasibility study of Gwadar Hospital, was also made between both the countries.

Pakistan and China also signed MoUs on provision of Chinese governmental concessional loan for second phase upgradation of Karakorum Highway (Havelian to Thakot), Karachi-Lahore Motorway (Multan to Sukkur), Gwadar Port East Bay Expressway Project and Gwadar International Airport. The MoUs have been signed between China's Ministry of Commerce and Pakistan's Ministry of Finance.

Both the countries also signed protocol on banking services to agreement on trade in services between the two countries and MoU on provision of Material for Tackling Climate Change between National Development and Reform Commission of China and Pakistan Ministry of Finance. A framework agreement was signed on cooperation on major communications infrastructure project between both the countries.

Pakistan and China also signed MoUs on cooperation between NDRC of China and Pakistan's Ministry of Planning, on pro bono projects in the port of Gwadar region, establishment of China-Pakistan Joint Cotton Bio-Tech Laboratory, and framework agreement between the National Railway Administration of China and the Railways Ministry of Pakistan on joint feasibility study for upgradation of ML1 and Establishment of Havelain Dry Port of Pakistan Railways.

A protocol was also signed on the establishment of China-Pakistan Joint Marine Research Centre between State Oceanic Administration of China and Pakistan's Ministry of Science and Technology. Both the countries also signed MoU on cooperation between the State Administration of Press, Publication, Radio, Films and Television of China and Pakistan's Ministry of Information and Broadcasting.

Protocols were signed on establishment of sister cities relationship between Chengdu City Sichuan and Lahore, Zhuhai and Gwadar and Karamay City and Gwadar.

Financing agreement was signed relating to the 870MW hydro-electric Suki Kinari Hydropower Project between EXIM Bank of China, Industrial and Commercial Bank of China Limited and SK Hydro (Private) Limited, EXIM Bank of China and Port Qasim Electric Power Company (on Port Qasim 1,320MW coal-fired power plant) and framework facility agreement for 720MW Karot Hydropower Project between China Development Bank Corporation, EXIM Bank of China and Karot Power Company.

The two sides also signed terms and conditions in favour of Sindh Engro Coal Mining Company for Thar Block II 3.8Mt/a mining project, Sindh, arranged by China Development Bank Corporation. Giving wide coverage to President's Xi visit to Pakistan, the Chinese media highlighted the fresh efforts, being made by the two governments for consolidating the decades' old partnership.

Pakistan, China share common future, says President Xi Jinping -- Daily Dunia

Prime Minister Nawaz Sharif and President Xi Jinping addressed the press conference

(Web-Desk) -- Top dignitaries including Chinese President Xi Jinping and Prime Minister Nawaz Sharif unveiled the agreements that took place between the two governments on Monday.

The projects that are being displayed during the exhibition include Quaid-e-Azam solar power project, Engro Thar coal power project, Qasim coal power plant, extension of Metro bus project in Lahore, establishment of Pak-China friendship radio channel FM 98 with help of Pakistan Broadcasting Corporation and Chinese authorities and laying down of optical fiber between the countries among other projects.

Dignitaries that signed the agreements with their counterparts include Ahsan Iqbal, Ishaq Dar, Sartaj Aziz, Khawaja Asif among other high-ranking officials.

Addressing the press conference, PM Nawaz Sharif remarked that Pakistan's friendship with China is deeper than oceans, sweeter than honey and stronger than steel.

Highlighting the friendly relationship between the two countries, the PM said that a number of projects had been agreed upon during President Xi Jinping's historic visit to Pakistan.

The PM further added that it was cornerstone of Pakistan's foreign policy to pursue good relationship with its neighbour.

Chinese President Xi Jinping also addressed the press conference and said that the current trade agreements between the two countries will help propel the relationship into a strategic partnership.

The Chinese President said that his government will continue his unwavering support for uplifting the economy of Pakistan adding that he will endeavor to step up on measures to increase economic partnership between the two countries.

He also praised Pakistan's effort for countering terrorism in the region, promising to help the country to in its mission of eradicating terrorism.

China Pakistan to build airport at border -- News Tribe

According to the civil aviation authority department of China, it will be the first project of China in Tashkurgan city of Xinjiang province at Karakoram Highways near Pakistani border.

Also it will be the first airport to be built at the Pamir Mountain.

This airport will be at an elevation of 3200 meter above sea level.

According to the Chinese news agency, this airport will have immense strategic importance.

Up till now china's highest airport is at an elevation of 4,411 meter above from sea level.

Tashkurgan is a small trade town of China and its population is almost 50 thousand.

This area possesses enormous importance with respect of Pak-China economic cooperation.

This airport will be ranked at number 18 in the list of world highest airports.

All Day

Pakistan has cashed in on China's desire to have a short land route to the Arabian Sea while China has taken advantage of Pakistan's longing for economic linkages with China -- Daily Times

Since the end of the Cold War in 1991, Pakistan has been boasting its geostrategic location in South Asia, claiming to be a gateway to Central Asia. We thought that the world needed to access the markets of the Central Asian Republics through Pakistan. Unfortunately, that dream remained unfulfilled because of the perpetual unrest in Afghanistan. Perhaps Pakistan did not realise the significance of becoming a gateway to East Asia where the People's Republic of China is located. In the context of Pakistan's geostrategic location, becoming a gateway to China is its first success. However, this is not an isolated move; Pakistan made a sagacious decision to side with China by recognising it as a state in 1950. After that, the interests of both Pakistan and China have coincided, both regionally and internationally.

Pakistan, under President General Pervez Musharraf, decided to enhance cooperation with China in the year 2000. The immediate reason could have been the isolation of Pakistan in the world after Kargil and the economic sanctions imposed on Pakistan. This cooperation was motivated by economic and defence related issues. Pakistan wanted to join East Asian regional economic organisations such as the Shanghai Cooperation Organisation, as China showed interest in Gwadar port. In 2002, Pakistan allowed China to start the construction of Gwadar port. After Musharraf, the leadership of the PPP also focused on enhancing economic cooperation with China and, in March 2008, the inauguration of Gwadar port took place. In the same year, both countries signed an agreement to construct a railway track along the Karakoram Highway to link the rail network of China to Gwadar.

In 2011, on the 60th anniversary of bilateral relations, both countries celebrated the Pak-China Friendship Year. In February 2013, the management of Gwadar port was handed over to the state run Chinese Overseas Port Holding Company and, in July, both countries approved the Pak-China economic corridor project to link Gwadar port with the western part of China. In short, Pakistan has cashed in on China's desire to have a short land route to the Arabian Sea while China has taken advantage of Pakistan's longing for economic linkages with it. Shared economic interests have brought both countries closer and have helped them expand cooperation beyond just the defence sector, though the flow of this collaboration is more from China to Pakistan than vice versa.

China now seems more confident about Pakistan's cooperation in enhancing its economic capacities through the possible traffic (of both goods and oil) coming from Gwadar port. In the past 15 years, Pakistan has resisted the pressure mounted by India and the US to deter it from sharing the fruits of Gwadar port with China. It is quite unprecedented that a country allows its neighbour existing on one border to establish a satellite on its other border. Pakistan has done that. This step will not only help Pakistan reap economic benefits but will also make China more economically competitive.

After Hong Kong joined China through the transfer of sovereignty from the UK to China in 1997 the focus of Eastern China has been industrial growth under a capitalist economic model. In the course of development, the western parts of China have been lagging behind. In this context, the supply of goods and oil through Gwadar port is bound to accelerate the speed of industrial development in western China, which will also enhance its exports to the world and link it to the Gulf and Africa. Incidentally, Pakistan's western half is also less developed than its eastern half. Hence, the Pak-China economic corridor will bring prosperity to the western halves of both the countries.

A point is being bandied about on whether China's longing for extraterritorial presence will be viewed in terms of places or bases. Friends of China place their bets on the former while the rivals of China consider it to be the latter. For instance, Pakistan is believed to have offered China a place in Gwadar to establish and

enhance China's competitive economic and commercial edge over the rest of the world. However, China's rivals, especially those that are concerned about its naval power, believe that China is seeking bases in the Indian Ocean through what is called a 'string of pearls', of which Gwadar is one pearl only (the rest of the pearls are the islands belonging to Sri Lanka, Bangladesh, Maldives and Somalia) to enhance the reach of the Chinese navy. Rivals try to infer China's intentions from its actions but are biased because of their own apprehensions.

One of the reasons for this effort to misunderstand China may be because it is unprecedented in history that a country has named its rise "peaceful development", as China has asserted. China advocates development characterised by mutual trust and benefit. Perhaps the rest of the world believes that economic well-being is counter intuitive to mutuality and cooperation. There must be rivalry causing a loss to one party and benefit to another. However, China believes in win-win cooperation, as it has asserted. The lesson for Pakistan to learn is that the world has gone economic. Now, financial establishments matter more than defence establishments and financial spending has greater value than defence spending. Countries that remained in isolation for centuries are striving hard to come out of the morass of loneliness. Cooperation, not rivalry and conflict, is the key to success in the future.

Bahawalpur to have world's largest solar power plant: Pak-China -- Pakistan Today

Pakistan awarded a \$1.5 billion contract for its largest solar power project of 900MW to a Chinese company by the name of Zonergy, which has the biggest solar power plant of only 170MW back home, according to local media sources.

After meeting with Prime Minister Nawaz Sharif and Water and Power Minister Khawaja Muhammad Asif on Wednesday, Zonergy Company Limited President Yu Yong told reporters that his company's total portfolio in China was of 1,200MW worth plants, with the largest being in Xinjiang, according to local media outlets.

He said the company had an association of over 17 years with Pakistan. Previously, it had been engaged in telecommunication sector through another company ZTE since 1998, according to sources.

He explained that Zonergy was not a subsidiary of the ZTE, but one of the largest shareholders in the ZTE was also the largest shareholder in Zonergy.

Pakistan, Iran agree to increase bilateral trade to \$5 billion -- The News

Pakistan, Iran agree to increase bilateral trade to \$5 billion

ISLAMABAD: At the time of souring relations in the wake of the lingering Yemen crisis, Pakistan has formally informed the Iranian authorities that for the Iran-Pakistan (IP) gas pipeline, Gwadar to Nawabshah gas pipeline was a part of the Pak-China Trade Corridor and was slated for early implementation.

"Pakistan will arrange construction of the remaining portion of gas pipeline from Gwadar to Iran border, thus paving the way for the import of Iran's gas by Pakistan," Federal Minister for Commerce Khuram Dastgir Khan told Tehran on Wednesday.

According to an official announcement made by the Ministry of Commerce here, the seventh meeting of Pak-Iran Joint Trade Committee was held in Tehran. Minister for Commerce Engr. Khurram Dastgir Khan headed the Pakistani delegation while the Iranian side was led by the Minister for Industry, Mines and Trade Mohammad Reza Nematzadeh.

The two sides reviewed the present trade level and agreed to formulate a five-year trade-facilitation plan to fulfill the shared vision of Prime Minister Nawaz Sharif and President Rouhani to increase the bilateral trade from dollars 1 billion to dollars 5 billion. Both sides also agreed to form a working group to devise substantial widening of the 2006 Pak-Iran Preferential Trade Agreement.

The two sides also reiterated the need for joint investment in agro-food processing and infrastructure, particularly in the field of establishing effective rail, air, road and sea links between the two countries, as well as opening new border trade-posts at Mand-Pishin and Gabd-Reemdan.

Pakistan's commerce minister enunciated Prime Minister Nawaz Sharif's vision to achieve shared prosperity through economic integration: enhancing trade, investment and connectivity of infrastructure, banking systems, customs and visa.

Engr. Khurram Dastgir Khan expressed concern on arbitrary and unilateral import bans, high textile tariffs, and import authorisation system. He emphasised early elimination of all non-tariff barriers between the two countries under the 2006 Preferential Trade Agreement.

On IP gas pipeline, Pakistani commerce minister said Gwadar to Nawabshah gas pipeline was part of Pak-China Trade Corridor and was slated for early implementation. Pakistan will arrange construction of the remaining portion of gas pipeline from Gwadar to Iran border pipeline, thus paving way for import of Iran's gas by Pakistan.

The Iranian commerce minister assured that hurdles and obstacles in the way of bilateral trade would be removed through effective measures. He offered maximum facilitation for Pakistan's private sector to hold and participate in trade exhibitions in Iran.

The last Joint Trade Committee meeting was held in Islamabad in 2011. Earlier, Pakistani Commerce Minister Engr. Khurram Dastgir Khan met Iranian Minister of Economy and Finance Dr. Ali Tayyab Nia. The two sides focused on urgently establishing a banking channel to expedite trade. Engr. Khurram Dastgir Khan also called on Akbar Torkan, Advisor to President of Iran and Secretary Supreme Council of Iran's Free Trade, Industrial and Special Economic Zones. Both sides mooted proposals for a joint free-trade zone between the ports of Chabahar and Gwadar and a trade corridor to link Chabahar, Gwadar and Chaman.

APP adds: Iranian Minister of Economy and Finance Ali Tayyebnia said that he was pleased with success of the two countries' Joint Economic Commission in expansion of economic relations and trade ties, expressing hope that effective steps will be taken soon to implement the agreements reached by the commission, IRNA news agency quoted.

Highlighting the role of peace and stability in boosting the trade ties in the region he said that broad cooperation between Iran and Pakistan could play a decisive role in strengthening the regional peace and stability.

The Iranian minister said that Iran considers no limits for expansion of comprehensive ties with Pakistan, highlighting the great significance of border trade to boost ties.

All Day

China's \$46 billion economic corridor to Gwadar buys Pakistan key spot on chessboard -- WorldTribune.com

China's \$46 billion economic corridor to Gwadar buys Pakistan key spot on chessboard

UNITED NATIONS — The rhetoric reached the heights of the Himalayas, the pomp and pageantry evoked that of an operetta, but the political optics delivered a clearly focused political message: Pakistan has a firm and reliable friend in the People's Republic of China.

The high profile visit to Pakistan by China's paramount leader Xi Jinping brought more than political bromides from Beijing to beleaguered Pakistan; China has put \$46 billion in infrastructural investment on the table for its long-time South Asian ally.

The reasons for the renewed coziness between Islamabad and Beijing are plenty: a common border, shared political interests concerning both the dangers of Islamic radicalism, and concerns in both capitals that American political inroads into neighboring India, Pakistan's historic rival, need a counterbalance.

Gwadar1What ties the bow together is China's ambitious geopolitical New Silk Road and New Maritime Silk road economic initiative connecting the Middle Kingdom with Eurasia by land and Southeast Asia by sea.

China's \$46 billion infrastructural investment in Pakistan is set to build a network of roads, railroads, and port facilities which are part of the New Silk Road connecting China to Europe through Central Asia. The ambitious plan for a 1,800-mile highway allows the PRC backdoor overland access to the port of Gwadar but through Pakistan's restive Baluchistan region.

Though Pakistan has been courted by Washington as a vial ally in the war on terror and as a key player in Afghanistan, the relationship was often stormy and beset by political mood swings on both sides. Between 2009 and 2012, former Secretary of State Hillary Clinton proposed a \$7.5 billion economic program for Pakistan which was largely unfocused and part of the Obama Administration's widely flawed "AfPak" security policy plan which was deemed a failure.

Since 2002, U.S. aid to Pakistan has reached \$31 billion, about two thirds of which is security assistance, according to the Congressional Research Service.

The real question becomes whether Pakistan's economy will be able to effectively absorb so much aid over a short period without wasteful and massive corruption.

Without question, Beijing is playing for higher stakes and putting more money on the table. The unspoken concern by the Chinese is that Islamic radicalism is already spilling across the Pakistan border into China's restive Xinjiang province where a large Muslim population is tightly controlled by the communist authorities. Addressing the Parliament in Islamabad, PRC President Xi Jinping recalled the historically close ties with Pakistan, one of the first Islamic states to recognize the People's Republic in 1951 during its era of diplomatic isolation.

"The invocations of enduring friendship are music to the ears of a country accustomed to being vilified globally for so many years now," wrote an editorial in Pakistan's major daily newspaper Dawn. China, opines Dawn "commands the credibility amongst the leadership and the populations " in the region.

Setting up the China-Pakistan Economic Corridor has a clear commercial logic but equally a military one. The Port of Gwadar, being developed by PRC engineers since 2013, would be the terminus of the long overland line from Xinjiang in China's remote and landlocked West. Yet Gwadar, once ruled by Oman but sold to Pakistan in the 1950's, is quite close to the Persian Gulf and Straits of Hormuz sea-lanes through which over forty percent of the world's petroleum flows. Interesting Through its presence in Gwadar, China seeks to surround India. Separate reports indicate that China has sold Pakistan 8 submarines. The deal for the diesel Yuan-class subs is reported to be \$5 billion. The PRC is already Pakistan's largest weapons supplier and equally played a key role in developing its nuclear weapons program.

As in fitting tribute, as Xi Jinping's 747 aircraft left Pakistani airspace, it was escorted by eight Pakistani JF-17 fighters, a military jet co-produced with China. Beijing's renewed relationship with Pakistan has reached a new intensity and is based on common economic and security interests. How much these ties will impact on India and the USA throughout the region are yet to be seen.

John J. Metzler is a United Nations correspondent covering diplomatic and defense issues. He is the author of *Divided Dynamism the Diplomacy of Separated Nations: Germany, Korea, China* (2014).

Will make an international airport in Gwadar, corridor will be game-changer in the region, says PM -- Dunia News

LONDON: (Dunya News) – Prime Minister Nawaz Sharif has on Thursday said that the Pakistan-China Economic Corridor will change the fate of the region. He said that Gwadar will be made an international city and an international airport will also be constructed there. He said that there will be no load shedding in the country by 2017, reported Dunya News.

Talking to media outside his residence in London, PM Nawaz Sharif said that he discussed the Yemen conflict in detail with the Saudi authorities. He said Pakistan and Saudi Arabia enjoyed extra-ordinary mutual relations and Pakistan kept Saudi security very dear.

Talking about Chinese president's visit to Pakistan and the economic corridor, PM Nawaz said that Xi Jinping's visit to Pakistan was extremely successful. He said that projects will be started throughout the country and they will positively affect the region. "Thousands of jobs will be created with this economic corridor. Power projects will be established on Bin Qasim Port, in Thar and at various other places of the country", he said.

PM said that Pak-China economic Corridor will not benefit any province in particular. "Projects in all provinces will be started", he added. "Work has been started on Hazara Motorway. We are also establishing a coal power project in Azad Kashmir", he said.

PM Nawaz also said that all economic indicators were improving. "Our GDP is improving, foreign exchange reserves are increasing, inflation is at 14-year low and we are strengthening our economy with each passing day. These new projects will further help enhance Pakistan's economic strength", he said. He said that power prices have been reduced in the country. He urged the media to inform the people that petrol prices have been lowered and electricity prices have also been reduced. "There will be no load shedding in two years time. We are installing new power projects that will help curb the energy crisis", he said.

Responding to a question about NA-246 by-poll, PM said that there is a pattern. "We had won the Nankana Sahib seat by around 5000 votes in General Election 2013. Our candidate died and his daughter was awarded the ticket for by-poll. She won by some 28,000 votes. Same happened yesterday in Karachi where Muttahida Qaumi Movement (MQM) won", he said.

Earlier: PM Nawaz arrives in London after Saudi Arabia visit. PM completed his Saudi visit, will meet David Cameron and will stay in London for 5 days.

After completing his Saudi Arabia visit on Friday, Prime Minister Nawaz Sharif arrived in London on a 5-day visit. Pakistani High Commissioner Syed Ibn Abbas and British government officials gave him a warm welcome at Heathrow Airport. Prime Minister will meet British counterpart David Cameron tomorrow, Dunya News reported.

Earlier, PM Nawaz met Saudi king Shah Salman Bin Abdul Aziz in Saudi capital Riyadh. Yemen conflict was discussed during the meeting and the two leaders expressed concern over growing security threats in the Middle East.

According to a statement issued from Pakistan Foreign Office (FO), PM reiterated his resolve during his meetings with the Saudi government officials that Pakistan gave top priority to Saudi Arabia's defence and security and could never stay silent on threats to Saudi Arabia. Nawaz Sharif made it clear that any aggression on Saudi Arabia will be dealt with strongly and effectively. He said that Pakistan

strongly condemned the overthrow of Yemeni government at the hands of Houthi rebels.

The statement issued by FO demanded Houthis to leave all occupied territory including Sanaa. PM also met Shah Salman Bin Abdul Aziz earlier along with delegations before meeting him one-on-one and also met Saudi Vice Crown Prince, and Interior Minister, Muhammad Bin Nayef and Defence Minister Prince Muhammad Bin Salman as well.

Defence Minister Khawaja Muhammad Asif, Army Chief General Raheel Sharif, Special Advisor to PM Nawaz Sharif Tariq Fatemi and Secretary Defence also accompanied Nawaz Sharif on the visit to Saudi Arabia.

China reaffirms commitment on economic corridor -- Dawn

ISLAMABAD: The Peoples Republic of China has reaffirmed its commitment for the multi-billion dollar project of China-Pakistan Economic Corridor (CPEC), the fate of which was sealed during Chinese President Xi Jinping's momentous visit to Pakistan earlier this month.

This was stated when China's Ambassador to Pakistan Sun Weidong called on Prime Minister Nawaz Sharif at the prime minister house on Thursday where he presented a letter from the Chinese president to the premier, a statement issued from the PM House said.

In the letter, Chinese President Xi Jinping upheld Beijing's commitment for the implementation and success of the economic corridor, the culmination of which is expected to further reinforce the friendship between the "iron brothers".

Jinping also conveyed his thanks to the prime minister for the hospitality extended to him by Islamabad and the excellent arrangements made to ensure a successful visit.

During Xi's much talked-about visit, Pakistani and Chinese officials signed a series of more than 50 accords to inaugurate the China-Pakistan Economic Corridor, which will create a network of roads, railways and pipelines linking China's restive west to the Arabian Sea through Pakistan.

The project is part of Beijing's "Belt and Road" plan to expand its trade and transport footprint across Central and South Asia. It will give China easier access to Middle Eastern oil via the deepwater port of Gwadar.

Chinese mega projects to start in Gwadar -- The Nations

Islamabad: China will start five mega projects worth Rs60 billion in Gwadar next year, an official of the planning commission said.

The projects include health, education, infrastructure, communication, an industrial zone and two thermal power projects of 300 megawatts. A simultaneous work on a water drainage project, a technical training and water treatment plants, will also be carried out to facilitate the residents of Gwadar.

The Chinese government will also establish a hospital, at a cost of Rs10 billion to provide the state-of-the-art treatment facilities to the area residents.

All Day

Pakistan-China Economic Corridor: a cost-benefit analysis -- Express Tribune

ISLAMABAD: The Pakistan-China Economic Corridor (PCEC) has been rightly termed a game changer. A careful cost-benefit analysis is required to assess for whom it will be the game changer. The key parameters should be additional business and additional savings.

Every day, China spends around \$18 million on import of 6.3 million barrels of oil as shipment costs from the Middle East, accounting for 80% of its all oil needs, routing through the Strait of Malacca covering a distance of 9,912 miles. By cutting a corridor directly from Kashgar to Gwadar, it will bring these costs significantly down to one-third of the current levels as new distance will be 3,626 miles to Central China, whereas only 2,295 miles till West China.

Even if China were to use PCEC only for 50% of its current level of oil supplies, it will save around \$6 million every day, almost \$2 billion every year.

It is true that these savings are peanuts to the Chinese economy, however, the greater gain may lie in the strategic outreach via Gwadar as its Maritime Silk Route.

There is another benefit that will accrue to China. As half of Chinese exports are destined on its Western side, it will also gain tremendously by saving on its containerised traffic costs.

China is one of Pakistan's largest trading partners; the two-way trade exceeded \$16 billion last year, marking an annual growth of 12.57%. While our exports to the United States and European Union earn us trade surplus, our imports from Chinese contribute to enlarging the trade deficit.

The Chinese president has promised \$46 billion investment to Pakistan and the planning minister has stated that out of that amount, \$11 billion has been set aside for infrastructure work on the corridor, while the remaining \$35 billion will be directed towards energy projects.

In all likelihood, the \$11-billion amount for infrastructure purposes is a Chinese loan whereas the \$35-billion investment for the power sector is yet to be converted into a concrete term sheet.

Consider this example. According to the Ministry of Finance, the Executive Committee of National Economic Council, in 2014, approved Karachi-Multan-Lahore Motorway Project – construction of Sukkur-Multan section (387 kilometres) – with a rationalised cost of Rs259.353 billion or \$2.59 billion.

Ten per cent cost of the project will come from the Public Sector Development Programme and 90% of the cost as credit financing through the government of China. This will be part of PCEC.

In the form of PCEC, Pakistan will acquire a new asset in terms of infrastructure. However, it has to first mobilise its own industry and trade sectors to make the best use of the corridor. Else, it will be a road and pipeline largely meant for Chinese business – on Pakistan's taxpayers' cost – and now protected by the Pakistan Army on our cost.

The term-sheet for Chinese investment in the power sector does not seem very promising at the moment. The federal government's sovereign guarantee has been called in several times by IPPs over the last few years. The Chinese may not give it its due value.

The next alternative for them as a guarantee is a revolving letter of credit backed by the government. That is almost a non-starter for the government as it will imply special privileges to Chinese investors and no bank can offer revolving letter of credit for the life cycle of a power project, running over decades. The government should refuse such requests.

What Pakistan needs to do?

If Pakistan cannot overcome its power crisis, and prepare a trade-centric economic vision, we stand to benefit little from PCEC in terms of additional business opportunities apart from temporary jobs. One scenario for our planning and finance ministers is to consider imposing a toll tax on Chinese oil shipment and trade traffic. Another possibility is to negotiate infrastructure projects on the basis of build-own-operate-transfer instead of an outright loan.

China needs us. Pakistan should embrace this huge opportunity with a pragmatic, and business-like cost-benefit analysis instead of confounding this transaction with metaphors of oceans, mountains, honey and now iron. It's about hard cash which the finance minister badly needs for the country. We should not leave too much cash on the Chinese Wall.

All Day

Step forward: Lahore prepares to welcome Chinese consulate -- APP

LAHORE: In a bid to facilitate the business community establish close contacts with their Chinese counterparts, a Chinese consulate will be opened in Lahore.

This was stated by Pak-China Joint Chamber of Commerce and Industries President Faisal Shah Afridi.

According to Afridi, the consulate will help the business community obtain the country's visas, which would go a long way in facilitating the province that is already seeing heavy investments from the Chinese side due to the China-Pakistan Economic Corridor (CPEC).

"This is a step forward by China to speed up Punjab-based investment projects promised under the CPEC."

Afridi said China will then be in a position to assist its companies in relocating to Lahore and other parts of Punjab.

For instance, the Lahore Orange Line Mass transit, to be executed with the help of the Chinese at an investment of \$1.6 billion, will require 5,000 professionals and labourers.

Additionally, the Industrial and Commercial Bank of China bank has signed \$4.23 billion worth financial agreements with different companies to execute other projects in Punjab.

Meanwhile, Afridi said that there was a need to train the Pakistani workforce that lacks in specialised expertise.

"Pakistan is in dire need of expertise — something majority of our workforce lacks," said Afridi.

"We are also turning our training institute into a university to meet future labour demands."

Afridi added that as president of PCJCCI and a stakeholder in the Economic Zone, which is currently involved in 11 joint ventures with China, he remained optimistic over the partnership agreement between the two countries.

"Pak-China economic relations are not dependent on any particular government. They will largely remain unaffected by political change."

All Day

Pak China ties: More power to SEZs -- BR

Haier is deemed as a case study for private players at home for joint ventures with Chinese companies under the umbrella of China Pakistan Economic Corridor. It is a success story of entrepreneurial partnerships between the two friendly nations, established 13 years ago in Lahore.

Haier Pakistans turnover was Rs46 billion last year employing around 5,000 workers and managers, and it is the top Air conditioning brand in the country. The complex started with assembling home electronic appliances and within couple of years backward integration took place to improve the supply chain by producing parts as well, BR Research learnt in its recent visit to Haier factory at Raiwand Road.

The vacant area in the complex is dedicated to a special economic zone created for Chinese investment in Pakistan with local partners. Chinese government has created numbers of SEZs across the globe and Haier-Ruba is one of them which mean Sino official machinery is supporting and promoting this SEZ in Pakistan. The idea was initiated in 2006 but the development could not expedite due to poor law and order situation at home and lack of concentration on SEZs.

Lately, Chinese Presidents visit to Pakistan emphasized on two SEZs - one is in Gawadar to develop port for shortening Chinese goods shipping route to the rest of world, and the second one is Haier-Ruba. The existing land available at the complex visited by BR Research has 300 acres which is too short for the kind of Chinese investment (loans) sought in the region. The group is in the process of acquiring land of 2,000-5,000 acres near motorway exit of Faisalabad to provide ample space for Chinese ventures.

In the initial stage, the idea is to build space for construction material to cater need of industrial, power and road infrastructure development. The premises will not only spur industrial activity but will also provide vocational training space for developing requisite skilled workers for respective industries.

One primary objective of these SEZs from Pakistans perspective is to bridge the trade gap between the two countries. According to Shah Faisal, CEO Ruba SEZ, Pakistans import from China (including unofficial numbers) is \$13 billion while exports are only \$ 2billion. The FTA between the two countries is further exacerbating the trade deficit.

China has given multi-product access under SEZs to Pakistan and upon capitalizing the opportunity, Pakistan can produce at home and send it to China. The need of the hour is to seek opportunities of producing goods that don't only substitute imports but can also be exported to China.

Haier-Ruba SEZ is eyeing to develop those industries that can substitute imports from China. Another idea is to nurture industries adding value to Pakistans own raw materials which can enhance export potential within the country. The third stage is to have buyback agreements from China to bridge the \$10 billion plus trade deficit from China.

Over ten thousand MOUs have been signed between Pakistan and China since the inception of the country. Exceptions aside, majority remained on paper.

Here is hoping some of the projects envisaged in \$45 billion Chinese money will be executed in the coming years irrespective of whosoever is ruling the country. The few projects which are likely to commence soon include Lahore Metro train (orange line) mass transit system. The cost is estimated at \$1.6 billion but experts fear that it may well escalate to \$2.7 billion. The first phase of 27 KM is likely to complete within a year.

Then Industrial and Commercial Bank of China operating in Pakistan has signed \$4.32 billion worth of financial agreements (not MOUs), enthusiastically proclaimed by Shah Faisal who is also president of Pakistan China Joint Chamber of

Commerce.

The SEZ has worked on the maiden assembly line of Laptops and Mobile Phones which is expected to be commenced this calendar year. The next in line is manufacturing of Chinese branded cars in Pakistan. This will give competition to existing Japanese brands and the first car to be launched will be in the 660 CC category, which is likely to be priced at less than Rs0.6 million per unit. Let the game begin.

Pakistan to start exports during next week from Gwadar Port: Kamran Michael -- APP

Minister for Ports and Shipping, Kamran Michael has said Pakistan was going to start exports from Gwadar Port for first time, during next week whereas till now it was being used for imports only.

He stated this while addressing the Pakistani community and media at a reception organized by Pakistan High Commission London, according to a message received here on Thursday.

Pakistan's High Commissioner to UK, Syed Ibne Abbas welcomed the Minister as well as the community to the High Commission.

He requested the Minister to inform the community about the benefits of Gwadar Port and Pakistan China Economic Corridor (PCEC).

The High Commissioner also congratulated Zubair Gul, who was present on the occasion, on his appointment as Commissioner for Overseas Pakistanis.

Addressing the community, the Minister said, "Pakistan China Economic Corridor, for which \$ 46 billion Chinese investment has been agreed upon, will bring about unprecedented development and prosperity to the people of Pakistan."

In order to enhance the efficacy of Gwadar Port, he said, 2281 acres of land has already been earmarked where tax-free industrial zones and ware houses would be established.

"Pakistan's economic future is linked with successful operation of Gwadar Port as it would help increase our exports and generate economic activity in the region. All this is according to the vision of Prime Minister Muhammad Nawaz Sharif."

The Minister invited the expatriate community to take advantage of the investment opportunities in Pakistan and assured them of the safety of their investment

He also appreciated the role of Pakistani diaspora in the development of the country.

In his brief remarks on the occasion, Zubair Gul, Commissioner for Overseas Pakistanis said that he would put in his best efforts to serve the overseas Pakistanis without any discrimination.

Welcoming suggestions from the community to improve the functioning of his office, he assured the community that he would remain accessible to them to solve their problems.

Gul expressed his gratitude to the Prime Minister for reposing confidence in him.

Around 100 community members and media persons attended the reception.

First export ship to embark on journey from Gwadar Port -- Express Tribune

"The idea is to encourage production of export-quality fish to increase foreign exchange," he said. PHOTO: FILE

"The idea is to encourage production of export-quality fish to increase foreign exchange," he said. PHOTO: FILE

ISLAMABAD: The first consignment, comprising fish exports, is expected to depart from Gwadar Port on Monday, formally kicking off commercial activities, said Federal Secretary for Ports and Shipping Khalid Pervez.

The Chinese Overseas Ports Holding Company is responsible for operation of the port; officials from the company would be present on the occasion along with others including Federal Minister for Ports and Shipping Kamran Mischeal.

On Sunday, the Chinese Overseas Shipping Company (COSCO) will bring empty containers to the port before they will be loaded with fish, marking the formal inauguration of export from the deep sea port.

The Chinese have taken control of the activities for export of their products to Central Asian countries and Middle East in the long run, part of China-Pakistan Economic Corridor Project, which was recently kicked off by Chinese President Xi Jinping during his last-month visit to Pakistan.

Import activity from the Gwadar Port began in 2009. Since then, cargoes containing fertilisers and wheat have been imported through this port by the government.

However, the private sector has yet to start its export/import from the Gwadar Port, hindered because of the connecting roads being under construction. The Economic Coordination Committee of cabinet had decided in 2009 that the Trading Corporation of Pakistan(TCP) should use Gwadar for the import of wheat and fertiliser via the newly establish port aimed at starting the operation gradually.

A senior officer in the Ministry of Ports and Shipping said that the Gwadar Port has been given to the Chinese company on the basis of the 'Land Lord Port Concept' on 9% gross revenue for the next 40 years. He explained that the company will pay Pakistan from its gross revenue and not on the net profit.

The officer said that at this stage, fish cargo can only be exported via Gwadar port as there are only fish processing factories in the area.

The officer believed that it will take decades for the port to become profitable due to the geographical location of Gwadar.

Port Qasim, he mentioned, had become formally operational in 1979 and reached its breakeven point after two decades despite being situated in the business and industrial hub of the country.

First export ship leaves Gwadar -- Dawn

GWADAR: The Gwadar Port, which started its operations about eight years ago, for the first time on Monday handled commercial containerised cargo for export of seafood.

M V Zi Jingson, a bulk-break vessel of the China Overseas Shipping Co (Cosco), which reached Gwadar port's outer anchorage late Sunday evening, was allotted berth on Monday to load reefer containers, laden with sea-food.

The export shipment will be unloaded at Jebel Ali, Dubai, from where a larger ship will carry these reefer containers to Far-East with its expected destination to Malaysia and China.

The managing director of local company, Abdul Basir Qadir Bukhsh, whose first export shipment was handled at Gwadar port, told Dawn that for the last 20 years his company had been exporting seafood through Karachi.

Federal Minister for Ports and Shipping Kamran Michael, speaking at a ceremony organised at the Gwadar port to see off the ship, assured that the government is committed to develop the port area for the benefit of the local people.

He said that the government holds Gwadar Port and the Gwadar City at the top of its development agenda as success of China-Pakistan Economic Corridor (CPEC) depends on it.

The minister said soon Gwadar will be connected with its hinterland through motorway M-8 and National Highway N-85, thereby providing connectivity to upcountry and beyond to Afghanistan and Central Asian states and western China.

The minister said that CPEC is the shared vision of the two friendly countries – Pakistan and China – and a very important pillar under the Chinese leadership's vision "One Belt – One Road" which is compatible with Pakistan leadership's "Vision 2025."

Gwadar Port Authority (GPA) chairman Dostain Khan Jamaldini, highlighting the available facilities and services at the Gwadar port, said presently it was being run by China Overseas Ports Holding Co (COPHC).

He informed the dignitaries, who specially flew from Karachi with newsmen to attend the ceremony, that the Gwadar port had been handling imported cargo belonging to government, like wheat and fertiliser.

He said it was for the first time that the local catch of seafood was being exported from this port which is a significant development.

The significance of this shipment is that it comprises fish from Gwadar's coastal area. The locals depend on fishing for their livelihood.

The next ship will depart on 18 of this month carrying another shipment of fish, he informed. The export of fish will revolutionize the lives of local fisher men, he said. He said that 2,281 acres had been acquired for establishing a tax-free zone.

Gwadar port starts operations for commercial export -- The News

GWADAR: Gwadar port started its long-awaited operations for containerised shipment services on Monday as the first private container vessel berthed at the deep sea port.

The MV ZI JING SONG container vessel was the first reefer container vessel to berth since the port's completion in 2007. With this, Gwadar Port has begun using its existing multipurpose terminal.

The containerised shipment service will initially focus on export of local fish to international market.

First export ship leaves Gwadar Port -- CCTV

As a key project of the China-Pakistan Economic Corridor plan, the Pakistani Gwadar Port for the first time handled commercial container cargo for export on Monday.

The Gwadar Port started its operations about eight years ago, and mainly dealt with import goods. A Chinese ship is carrying containers of seafood to Dubai, from where a larger vessel will transport the goods to Malaysia and China. It is the first ever export shipping handled at the port.

The Gwadar Port is the third largest port in Pakistan, and a key project of the China-Pakistan Economic Corridor. China Overseas Ports Holding Company started running the Gwadar Port in 2013, and helped improving its operations.

Besides foreign trading, the port is also working on improving infrastructure construction and promoting fishing sector development. It's expected to bring more vigour to the local economy.

Govt to consult provinces before setting up CPEC's industrial zones -- APP

Govt to consult provinces before setting up CPEC's industrial zones

ISLAMABAD: The government on Wednesday said all provinces will be consulted before finalizing the sites for establishment of industrial zones under the China Pakistan Economic Corridor (CPEC) project.

Federal Minister for Planning and Development Ahsan Iqbal in a detailed briefing given to the leaders of parliamentary parties at a meeting chaired by Prime Minister Muhammad Nawaz Sharif said all provinces would be taken on board on CPEC project.

The meeting was especially convened at the PM House to apprise the parliamentary leaders about China Pakistan Economic Corridor and remove the apprehensions of provinces about the project.

The Minister dismissed the impression that the route of CPEC had been altered to pass through Punjab ignoring other provinces.

Instead, he said, the working group which was responsible to demarcate the sites for industrial zones was yet to be formed.

"After the formation of the said working group, all provincial governments would be asked to suggest the areas feasible for industrial parks in their provinces," he said. He mentioned that other four working groups on energy, communication network, Gwadar Port and infrastructure were already functional and comprised members from China and Pakistan.

The Minister said that CPEC was not just the name of a road or a route, rather it was a portfolio of projects having complete framework.

"The CPEC is an umbrella which includes the projects of energy, industry, Gwadar port and infrastructure worth 46 billion dollars," he added.

Ahsan Iqbal said there would be three principle alignments to access Gwadar upto Khunjrab that would pass through the eastern, central and western parts of the country.

He said the operational connectivity of Gwadar would be made by upgrading the existing road network and construction of missing road links.

He mentioned that work on Gwadar-Sorab missing link and on the 650 kilometre road from Quetta, Qila Saifullah and Zhob to Gwadar was being carried out by Frontier Works Organization (FWO) for last two years.

He said the connection road of N-85 would be completed by 2016.

The government will sign agreements with Asian Development Bank (ADB) tomorrow for upgradation of N-50 from Dera Ismail Khan and Quetta besides N-70 from Loralai and Multan.

He said a portion of Karakorum Highway was being constructed with China's assistance, while the N-85 and N-8 were being built-up with the Pakistan government's own resources and in collaboration with Asian Development Bank (ADB).

About 65 percent work on Gwadar-Hoshab and 30 percent work on Sorab to Hoshab has been completed. The 110 kilometre Khuzdar-Besima section has also

been included in CPEC, he added.

About the priority projects of 10,700 mega watt under CPEC, the Minister said Quaid-e-Azam solar park (1,000 mega watt), Dawood project (50 mega watt), Sukki Kinari (870 mega watt) and Gwadar coal power project topped the list.

He said Gaddani power project, Jetty infrastructure and Hubco project were among the second line projects.

He said Pakistan and China had also agreed on further five billion dollar on the transmission of electricity.

The Minister clarified that no loans were being taken for completion of energy projects and added that entire process was being carried out transparently.

He said no new motorway projects were being initiated under CPEC.

Gwadar port: export activity formally begins -- BR

Federal Minister for Ports & Shipping Senator Kamran Michael stated that export activity at Gwadar port formally began and in this regard an export ship carrying 23 tons of fish left for Dubai. This ship will dock at Jabal Ali Port of Dubai from where deepwater fish of Pakistan will be exported to the rest of the world. The Federal Minister has said that Gwadar deepwater fish has no match in the world.

In his statement the Federal Minister said that Gwadar Port was being merely used for import purposes before this day and fertilisers and wheat was being imported through this port. He said that 23 ships have imported fertilizers and wheat till today. Michael said that the next ship will depart on 18th of May, carrying another shipment of the highest quality fish. Federal Minister stated that two million people will get their livelihood from this port once it will become fully functional. Michael said that according to direction of Prime Minister, local Baloch will be given priority in jobs.

Federal Minister stated that 2281 acres of land has been acquired for establishing a free zone and he had invited the entire world to invest here as it is completely tax-free zone. In his statement, the Minister has said that "Halal Food Industry" is going to be set up at Gwadar and Halal Food would be transported to the rest of the world. According to spokesperson of Ministry, Federal Secretary Captain Khalid Pervaiz (ret'd), Chairman Gwadar port Authority Dostain Jamal Dini, CEO of Chinese project and Deputy Councillor General were also present at the inauguration ceremony.-PR

Ahsan reveals three routes of corridor -- Dawn News

ISLAMABAD: Planning and Development Minister Ahsan Iqbal said on Thursday that Pakistan and China had agreed to "fill in the blanks" in the existing route between Gwadar and Kashgar under the CPEC project, adding that no new alignment had been considered over the past two years.

Talking to journalists, he said the leadership of the two countries had signed a memorandum of understanding on the China-Pakistan Economic Corridor (CPEC) on July 5, 2013 and constituted a joint working group to make decisions on connectivity of routes from Gwadar to Kashgar.

Take a look: Special committee to oversee CPEC project

In line with the Chinese wisdom, he said, Section 3 of the MoU required that a long-term plan should be developed under the principle of scientific planning and work on the easiest sections of the project should be given priority.

Minister insists no change has been made in original plan

Under this philosophy, the working group decided to expand the existing motorway through construction of its Multan-Sukkur section by the Chinese government and Karachi-Hyderabad section by the Pakistan government.

The minister disclosed three routes of the economic corridor. According to him, the western route originating from Gwadar will pass through Turbat, Panjgur, Nag, Basima, Sorab, Qalat, Quetta, Qilla Saifullah and Zhob and reach Dera Ismail Khan before leading to Islamabad. A couple of sections of the road between Gwadar and Quetta are currently at an advanced stage of construction.

The second (central) route will originate from Gwadar and reach Dera Ismail Khan via Basima, Khuzdar, Sukkur, Rajanpur, Layyah, Muzaffargarh and Bhakkar.

The third route will include Gwadar, Basima, Khuzdar, Sukkur, Rahimyar Khan, Bahawalpur, Multan and Lahore/Faisalabad and then reach Islamabad.

The minister said the road from Islamabad to Khunjerab had to be improved to the standard of Khunjerab-Kashgar road.

In reply to a question, he said the confusion over the location of industrial parks or economic zones along the economic corridor was politically motivated because no decision had been made on that yet. "So far only four joint working groups on energy, long-term planning, Gwadar port and transport and infrastructure have been formed and are working. The fifth group on industrial parks or economic zones is yet to be constituted."

He said it was illogical to talk about the sites of industrial zones when the body to decide their location had not been formed.

He said all the parties and provinces had been asked to suggest sites for industrial zones that would be considered on scientific and economic grounds by the joint working group.

He said the rail project as part of the CPEC was a long-term project to be taken in hand after 'early harvest' projects were completed in two to three years, followed by medium-term projects to be completed in 2020.

He said Gwadar to Khunjerab rail link was included in the long-term projects which would be completed by 2030.

Pak-China friendship touches new heights: Envoy -- APP

Islamabad - Chinese Ambassador to Islamabad Sun Weidong said that Pakistan and his country embarked on historic journey of peace and prosperity by signing milestone agreements during president Xi's visit to Islamabad last month. He said after the signing of historic agreements, the two countries are committed to

implementing them in the best possible forms and as quickly as possible. The Pakistan-China Economic Corridor envisaged in the recently signed agreements would be mutually beneficial. This would usher in era of prosperity and economic development in all parts of Pakistan.

The ambassador was addressing the 14th Chinese Bridge – Chinese Proficiency Competition at the National University of Modern Languages, Islamabad.

Ambassador Sun Weidong said friendship between Pakistan and China touches new heights with the passage of time. He was confident that it would continue growing from generation to generation. He noted that the Chinese youth using internet introduced a new term 'Iron Brothers' to portray the depth and strength of the friendship between the two countries.

The Chinese ambassador said Pakistan and China believe that they should continue efforts to further strengthen their multidimensional cooperation. He said the ultimate objective of China is to promote peace and prosperity not only for its own people but the whole world.

Regarding President Xi's recent visit to Pakistan, he said it opened a new chapter in the bilateral relations. "Pakistan is the top priority of Chinese diplomacy," he added. He highly lauded the role of NUML in strengthening Pakistan, China cooperation by promoting Chinese language and culture. He welcomed the opening of NUML International Center of Education (NICE) at the Shinjiang Normal University, Urumqi, China.

Director General NUML Brig. Azam Jamal in his welcome address said the NUML takes pride in contributing to friendly relations between Pakistan and China.

"It was a matter of pride for NUML that it signed an MoU and an agreement in the presence of Chinese president during his last month's visit to Islamabad. He said the NUML's project to set up international centre of education at Shinjiang Normal University, Urumqi, China is the only project from Pakistan to China as part of the Economic Corridor while all other projects are from China to Pakistan.

Rector NUML Maj. Gen. (Retd) Masood Hassan and Director General Brig. Azam Jamal joined the Chinese ambassador to distribute prizes among the winners of the competition.

CHINA PURSUES 1+ 4 FORMULA IN IMPLEMENTING CPEC PROJECT -- Pak Observer

Monday, May 18, 2015 - Islamabad—China is committed to pursue 1 + 4 formula while implementing economic corridor project and making its contribution for socio-economic development of Pakistan as an iron-friend. In all the statements appeared so far from Pakistani and Chinese side, the main focus was laid on equal benefit to the people of Pakistan under the PCECP. A senior Chinese diplomat in Islamabad while explaining the 1 + 4 formula says, 1 means benefit to the people of entire country and 4 means priorities areas i.e. Gwadar Port, energy, infrastructure and industrial development. It was made clear by the Chinese leaders while launching Pak-China Economic Corridor project (PCECP) that it meant to ensure equal benefit to whole of Pakistan.

Chinese President Xi Jinping in his article written on eve of his recent visit to Pakistan said, , “We need to form a ‘1+4’ cooperation structure with the Economic Corridor at the center and the Gwadar Port, energy, infrastructure and industrial cooperation being the four key areas to drive development across Pakistan and deliver tangible benefits to its people.” There should be no doubt to this effect that all the regions of the country will receive equal benefit under this fate-changing project, he added. Meanwhile, establishment of special security division of Pakistan army for the protection of Chinese workers has raised high the confidence of the Chinese companies to make maximum investment in the country. According to the Chinese companies which are engaged in various China-funded projects in Pakistan, the decision of handing over the security of Chinese workers to the army was received well by the Chinese workers and they are now more inclined to work in Pakistan,

The establishment of a special division also reflected the commitment and support of the security forces towards the China-Pakistan economic corridor project (CPECP), said a senior official of Chinese company which is working with an energy-related project in Pakistan. It was decided during the recent visit of President Xi Jinping that Pakistan military will train over 12,000 personnel who will be inducted into the special division. This high-profile force will help to provide foolproof security to the Chinese workers. As per the decision, ranger’s personnel will also be part of this security plan in addition to the army unit. The Chinese diplomat appreciating the decision to the effect said that our concern about the security of the Chinese workers was well attended by the government of Pakistan. Both the governments, he said will be working together for promoting a peaceful environment to implement the CPECP on fast-track basis. While appreciating the counter-terrorism measures recently taken by Pakistan, the official said ‘terrorism is our common enemy’ and it has to be rooted out through joint efforts. The official assured that the Chinese government will provide all possible support to Pakistan to promote peace and tranquility in the country for its socio-economic development.

Stating that Pakistan and China are enjoying exemplary relationship in all spheres of life, the official further said people of the two countries enjoyed shared destiny and their enhanced cooperation is meant to improve the living conditions of their people across the board. They have taken a pro-active approach for fostering their mutually beneficial cooperative partnership on the basis of win-win situation, he added.

The recent visit of President Xi has created new opportunities for the two countries, bringing their strategic partnership to a new height. It was an historical visit that has also given a new direction to the development of their multi-dimensional relationship, he added. He referred to the joint declaration issued after the visit, which he said provided a comprehensive overall framework for addressing their common problems, and promoting peace and development in the region. Following his highly fruitful visit, the two countries are now laying greater focus on quick implementation of CPECP, which a flagship project of the Belt and Road initiative.—INP

Mammoth Rs 359.4b budget allotted for 19 CPEC projects -- Pakistan Today

The government on Tuesday finalised a mammoth Rs 359.4 billion for 19 development projects under the China Pakistan Economic Corridor (CPEC) for next financial year's Public Sector Development Programme (PSDP).

This was decided at the Annual Plan Coordination Committee (APCC), chaired by the Minister for Planning Ahsan Iqbal. The APCC helped finalise the development outlay for the next financial year.

According to the details, overall the development spending is estimated to be over Rs 1,400 billion during the next financial year, including a Rs 838 billion provincial component. The total cost of projects under CPEC is estimated to be Rs 1.122 trillion, while during the next financial year the allocation will be Rs 359.4 billion, out of which Rs 234.4 billion have been allocated for road and infrastructure projects while Rs 125 billion have been allocated for LNG based power projects. The government has allocated Rs 200 billion for highways, Rs 40 billion for railways while higher education gets an allocation of Rs 21 billion.

The allocation approved under CPEC projects is Rs 7 billion for New Gwadar International Airport, Rs 1 billion for land acquisition of Karachi – Lahore Motorway, Rs 76 billion for 387 km long Multan – Sukkur Motorway, Rs 10.6 billion for Lahore – Abdul Hakeem Road, Rs 12.4 billion for Sukkur – Hyderabad Road, Rs 74.5 billion for Raikot – Havelian – Islamabad Road, Rs 28.5 billion for KKH Thakot-Havelian Road, Rs 6 billion for Thakot to Havelian Road, Rs 4 billion for Construction of Break Waters (CPEC), Rs 4.7 billion for Construction of Eastbay Expressway, Rs 900 million for Dredging of Berthing Areas and Channel for Additional Terminal, Rs 1.2 billion for Infrastructure Development for EPZA and GIEDA, Gwadar, Rs 3 billion Necessary Facilities of Fresh Water Treatment and Supply Gwadar, Rs 984 million for Pak-China Technical and Vocational Institute at Gwadar, Rs 2 billion for Upgradation of Existing 50 Bed Hospital to 300 beds Gwadar, Rs 290 million for Comprehensive Feasibility Study for Upgradation of Mainline, Rs 1.2 billion for Installation of 300 MW Coal Fired Power Plant at Gwadar, Rs 62.5 billion for LNG Based Power Plant at Balloki, Rs 62.5 billion for LNG Based Power Plant at Haveli Bahadurshah.

The government has projected a GDP growth rate of 5.5 per cent for 2015-16 backed by a projected growth of 3.9 per cent in agriculture, 6.4 per cent industry, with six per cent in large scale manufacturing sector, 8.3 per cent in small and household, 8.5 per cent in construction industry and six per cent in electricity generation and gas distribution, and 5.7 per cent in the services sector.

Inflation is projected to rise to six per cent in 2015-16 compared to a provisional estimate of 3.6 per cent in the current year.

Pak-China Sign An Important Deal In Railways -- Dawn

LAHORE – Pakistan and China sign an important deal on the transportation of coal through Railways. The ceremony of signing MOUs in underway in Lahore.

The Railways Minister Khwaja Saad Rafique attends the ceremony. The minister said that different proposals are under consideration for the development of railways sector.

“1320 MW of electricity would be added to the national transmission through Sahiwal-Coal Project.” Saad added.

Talking about the current plans in upgrading the services, he said that the E-Ticketing would soon be employed for the convenience of passengers.

Khwaja Saad Rafique said that 55 new railway engines would soon be purchased to replenish the overgrowing needs of the sector.

Commenting on the CPEC, he said that the project would be completed as per the plans at all costs.

Construction sector: PCJCCI, Chinese delegates review opportunities for JVs -- BR

Pak China Joint Chamber of Commerce and Industry (PCJCCI) President Shah Faisal Afridi has said introduction of cost effective, space efficient and environment friendly Chinese construction material could bring a revolution to the construction sector of Pakistan. He stated this while meeting four-member Chinese delegation headed by Xiaoming Cheng Board Chairman, Shandong Building Materials Group. Other members were Zhang Pei Hao, General Manager Marketing, Tony Hu, Sales Manager and Xiao, Vice President Yantai Chamber of Commerce and Industry.

The delegation visited the chamber's office to review opportunities for joint ventures in the construction industry that would further supplement other related industries such as cement, iron, steel, timber, wood, marbles, tiles and stones, plastics, fibres, furniture and electrical appliances.

Welcoming the Chinese delegation, Shah Faisal Afridi said the construction industry of Pakistan is one of the prime source of employment generation in Pakistan and the second largest industry of Pakistan followed by textile sector, which is providing jobs to millions of unskilled, semi-skilled and skilled work force. But, the industry still has a huge untapped potential due to lack of latest infrastructure needs in Pakistan, he added.

Referring to a World Bank study, he speculated that the growth in the construction industry of Pakistan this year would be higher than the previous year due to increased foreign investment and the improved law and order situation that is helping the industry to grow at a faster pace. This year the construction industry grew by 11.3 percent so far against the set target of 5.7 percent while the share of the industry in GDP at 2.4 percent by raising the annual growth to over 10 percent because of the growth in construction industry, he mentioned.

He was hopeful that the visit of Chinese entrepreneurs would produce fruitful results as it would help in exploring potential areas of mutual collaboration. Xiaoming Cheng, Head of the Chinese delegation said that Chinese entrepreneurs were encouraged to find out tremendous possibilities of investment and joint ventures in Pakistan in the field of construction industry. This is the time to transform the good historic ties into thriving trade and economic relations between the two countries. He further invited the members to visit Taitou Town, Shouguang, China where he has developed innovation production facility centre that he want to relocate partially to Pakistan due to rising labour costs in China.

Zhang Pei Hao, General Manager Marketing, Shandong Building Group said that as per market research conducted by our team, there is a huge untapped potential that requires concerted efforts along with giving special prices for widespread introduction. He also presented proposals for joint ventures in building materials, PPR pipes and fittings, interior designing, electrical equipment including elevators and excavators, mobile and mobile accessories, innovative and smart lifestyle products, security solutions and tourism sector.

Parties give go-ahead to China-Pak corridor -- Dawn

ISLAMABAD: Doubts expressed by the political leadership over the China-Pakistan Economic Corridor were partially addressed by the government on Thursday and an all-party conference held at the prime minister's office gave a go-ahead to the project.

The remaining concerns will be addressed by a bipartisan/bicameral parliamentary committee which the government agreed to constitute for a regular oversight of the project.

The government also agreed to set up joint working groups having representation of all provinces to give their views and suggestions on economic and industrial hubs to be built along the corridor.

All concerns over western alignment linking Gwadar with Khunjerab addressed

An APC on the matter held earlier remained inconclusive because of the Safoora Goth carnage having taken place on the same day.

Thursday's meeting decided to first take up the corridor's western alignment which would pass through Balochistan and Khyber Pakhtunkhwa connecting Khunjerab with Gwadar to address concerns of the two provinces.

MNA Asad Umar, of the PTI, told Dawn, "Our concerns about project-wise details and three alignments of the corridor have been addressed."

The government's decision to constitute a special parliamentary committee and working groups is a way forward for forging political consensus.

He said his party would raise its concerns at the parliamentary committee and working groups about the nature of investment and actual terms and conditions under which the Chinese money would be invested.

Shah Mehmood Qureshi, who led the PTI delegation, highlighted the same issues.

Talking to newsmen after the meeting, MQM leader Dr Farooq Sattar said his party had only agreed to the western alignment and it would give its input once central and eastern alignments would be discussed.

JUI-F chief Maulana Fazlur Rehman said his party had agreed to the western alignment which was the real project.

ANP chief Asfandiyar Wali Khan said the meeting had agreed to build the route for which his party had been campaigning.

The western alignment, passing through Thakot, Mansehra, Hassanabdal, Peshawar, D.I. Khan and Quetta, will connect Khunjerab to Gwadar.

It appeared that the efforts of Planning and Development Minister Ahsan Iqbal, who along with his special assistant Asim Niazi, had one-to-one meetings with heads of all political parties had paid off.

"The minister spent hours briefing parliamentary heads and chiefs of political parties at their residences on the nitty-gritty of the project," a government source told Dawn.

The planning minister told the politicians that about \$46 billion of Chinese investment would not be distributed among the provinces because it was meant for energy, road and rail projects.

He clarified that the Lahore's Orange Line project was not part of the corridor.

Mr Iqbal said no new road would be constructed, but the existing road network would be improved for better interconnectivity so that the entire country benefitted from the project.

He said roads along the three major alignments would be upgraded for an improved North-South connectivity.

Prime Minister Nawaz Sharif thanked the political leadership for their support to the project which, he said, would help Pakistan achieve its cherished dream of becoming a developed country and would also benefit other countries in the region.

He said having a difference of opinion was a healthy tradition which helped to reach better decisions.

Leader of the Opposition in the National Assembly Khurshid Shah of the PPP, Shah Mahmood Qureshi of the PTI, Asfandiyar Wali of ANP, Farooq Sattar of MQM, Maulana Fazlur Rehman of JUI-F, JI chief Sirajul Haq, BNP leader Dr Jehanzeb Jamaldini, Mushahid Hussain Sayed of the PML-Q, Mehmood Khan Achakzai of the

PkMAP, Hasil Bizenjo of NP, Ijazul Haq of PML-Z, Aftab Ahmed Sherpao of QWP, Senator Prof Sajid Mir, Syed Ghazi Jamal and Shah Jee Gul from Fata and Peer Ejaz Hashmi attended the conference.

Chief Ministers Qaim Ali Shah of Sindh, Pervez Khattak of KP and Dr Abdul Malik Baloch of Balochistan, Leader of the House in the Senate Raja Zafarul Haq, Defence Minister Khwaja Asif, Finance Minister Ishaq Dar, Information Minister Pervaiz Rashid, Petroleum Minister Shahid Khaqan Abbasi, Planning Minister Ahsan Iqbal, Railways Minister Saad Rafique, Minister for Safron retired Lt Gen Abdul Qadir Baloch, Special Assistant to the PM on National Affairs Irfan Siddiqui, Special Assistant to the PM on Foreign Affairs Tariq Fatemi, Special Assistants Barrister Zafarullah Khan and Khwaja Zaheed Ahmed also attended the conference.

Ahsan Iqbal succeeds in hammering out consensus on CPEC route --

The News

ISLAMABAD: It was minister for planning and development Ahsan Iqbal who worked tirelessly to evolve consensus among the political parties on China-Pakistan Economic Corridor (CPEC) route.

Prior to the all parties conference chaired by Prime Minister Nawaz Sharif on Thursday Ahsan Iqbal held a series of meeting with the leaders of all political parties to allay their concerns. Those he met included JUI (F) chief Maulana Fazalur Rehman, ANP chief Asfandiyar Wali Khan, senior leaders of the PTI Shah Mehmood Qureshi, Dr Shireen Mazari and Asad Omar, chief of PkMAP Mehmood Khan Achakzai and chief of Qaumi Watan Party Aftab Ahmed Khan Sherpao.

Sources said Ahsan Iqbal assured them that the chief ministers will be taken on board and working group will be established with representatives from all provinces to examine the sites for industrial parks/economic zones and prepare feasibility studies for presentation to the Joint Working Group in July 2015.

He assured Asfandiyar Wali Khan that presently no new road is being constructed under CPEC but only the existing network of roads is being upgraded. He informed Asfandiyar Wali Khan and Mehmood Khan Achakzai about the projects that would be initiated in KPK and Balochistan which include early harvest projects, Gwadar Eastbay Expressway, New Gwadar International Airport, Gwadar Projects (school, hospital, marine works, infrastructure, social sector projects) 660 MW coal-based project, Hub 300 MW coal-based project, Gwadar 600 MW solar project, and upgrading of railways and road network.

Minerals Processing Zones in Balochistan include Khuzdar (Chromite, Antimony, Chaghi (Chromite), Qila Saifullah (antimony, chromite), Sandak (gold, silver), Reko Diq (gold), Kalat (iron ore), Lasbela (Manganese), Gwadar (oil refinery), Muslim Bagh (chromite), Industrial Economic Zones/Parks in Quetta, Dostan, Gwadar, Khuzdar, Uthal, Hub, Dera Murad Jamali.

The mega projects in KPK include Early Harvest Projects KKH Phase-II (Thakot-Havelian), Havelian Dry Port, Fiber Optic Data Communication System (Khunjerab-Islamabad), 870 MW Hydro power project, Suki Kinari, Mansehra and Potential projects includes Swat Expressway, Hydro Projects Shogosin 132 MW Chitral, Balakot 300 MW, Shigokuch Dir 102 MW, etc), Chashma Right Bank Canal, Outer Ring Road, Peshawar.

Ahsan Iqbal said that CPEC-Khyber-Pakhtunkhwa Potential Economic Zones/Industrial Parks include Minerals Economic Processing Zones Dargai (Chromite), North Waziristan (Chromite), Kurram (Antimony), Waziristan (copper), Chitral (Antimony), Besham (iron ore, lead), Nizampur (iron ore), Mohmand (Marble), Industrial Economic Zones/Parks, Hattar, Gadoon, Ghazi, D I Khan, Jaloza, Nowshera, Banu, Chitral, Risalpur.

The Early Harvest Projects of Gilgit-Baltistan include KKH Fiber optic Data communication system (Khunjerab-Islamabad). The CPEC-Gilgit Baltistan Potential Economic Zones/Industrial Parks include Minerals Economic Processing Zones, Gilgit (copper, antimony), Diamer (iron ore), Gilgit (herbs, herbal medicines), Gilgit (handicraft), Gilgit (wood industry) and Industrial Economic Zones/Parks at Gilgit and Sakardu.

For Sindh, he said, the projects include Thar, Port Qasim, Thatta power projects, power transmission lines and LNG pipelines, Peshawar-Karachi motorway while potential projects include water supply for Karachi city, mass transit system for Karachi and provision of reliable electricity to Karachi

while Potential Economic Zones/Industrial Parks in Sindh include Minerals Economic Processing Zones, Thar (coal), Lakra (coal), Industrial Economic Zones/Parks in Sukkur, Larkana, Karachi, Bin Qasim, Korangi Creek and Khairpur.

In Punjab early harvest projects include energy projects in Sahiwal, Bahawalpur and Salt Range; power transmission lines and LNG pipelines, Peshawar-Karachi motorway work, while Potential Economic Zones/ Industrial Parks in Punjab include Minerals Economic Processing Zones in Salt Range (antimony), Chiniot (iron ore), and Industrial Economic Zones/Parks in Sialkot, Gujranwala, Rawat, Lahore, Sundar, Multan and Vehari.

Ahsan Iqbal told the political leaders that working group comprising representatives of the provinces would study the feasibility of setting up of viable economic zones along the Western, Eastern and Central routes.

He invited the representatives of political parties for their input and suggestions in this regard. He said the projects along the Western alignment would be completed by 2016.

Pak SMEs can use CISMEF to explore Chinese business opportunities -- The Nations

Islamabad - The 12th China International SME Fair (CISMEF) would be held in October 2015 with the aim of boosting cooperation and development of SMEs in China and other countries and it is an ideal platform for Pakistani SMEs to attend the Fair and explore opportunities of business matchmakings with Chinese and other countries SMEs.

Liu Zhigen, Vice Governor, Guangdong Province of People's Republic of China said this during his separate visits to Board of Investment and Islamabad Chamber of Commerce and Industry.

Chinese entrepreneurs of SME sector have shown interest to establish business collaborations with Pakistani counterparts.

SMEs were representing various sectors including economic, information technology and communications.

Addressing the local business community, Liu Zhigen, Vice Governor said that Guangdong Province was home to a lot of industries with matching facilities.

Liu Zhigen said Pakistani and Chinese businessmen should strengthen liaison in areas of mutual interest to promote bilateral trade and economic relations between the two countries.

This way, they could also compete more effectively in the international market.

He said entrepreneurs of both countries should share expertise, experiences and resources for mutual benefits.

He said maximum number of Pakistani SMEs should visit China to attend 12th China International SMEs Fair and find out opportunities of business expansion and joint ventures.

He also invited a delegation of ICCI to attend the said fair.

In his welcome address, Muzzamil Hussain Sabri, President, Islamabad Chamber of Commerce and Industry highlighted the investment potential in various sectors of Pakistan's economy.

He said that economy of Pakistan was in a recovery mode and time was ripe for Chinese investors to enhance investment in Pakistan, especially in energy, information technology, infrastructure development and exploration of natural resources.

During the visit to Board of Investment, Iftikhar Babar, Secretary, BOI briefed the delegation about the available investment opportunities in Pakistan in all sectors of the economy specifically in power, energy, infrastructure, mining & minerals and machinery etc.

The Secretary, BOI informed that Pakistan is committed to provide an investment friendly regime to investors by offering lucrative fiscal incentives and conducive business environment to foreign investors.

The Secretary, BOI said that China and Pakistan have entered into a comprehensive plan of Pak - China Economic Corridor.

Pakistan China trade and economic relations have a great scope for further expansion.

Pakistan and China as strategic partners and have been cooperating in various fields of mutual interest.

The recent visit of the Chinese President will further cement the existing relations and open new avenues of investment, trade and cooperation.

All these strengths offer Chinese investors and business community unlimited business opportunities.

Liu Zhigeng, Vice Governor, People's Government of Guangdong Province thanked BOI for cooperation and briefing regarding the investment opportunities available in Pakistan.

Liu Zhigeng has shown keen interest in different areas of investment specifically in transport and information technology sectors.

He also invited Secretary, BOI to participate in their incoming International Investment & Trade Fair in Guangdong, China.

Pak's acquisition of nukes smashed India's dreams: Aziz -- Pakistan Today

Pak's acquisition of nukes smashed India's dreams: Aziz

Adviser to the Prime Minister on Foreign Affairs and National Security Sartaj Aziz on Sunday said that Pakistan's acquisition of nuclear power "smashed India's dreams".

Aziz was addressing a gathering of the Nazaria Pakistan Council where he also said that Pakistan's enemies would not succeed in sabotaging the China-Pak Economic Corridor (CPEC).

"Pakistan's adversaries have started their conspiracies to sabotage the Pak-China Economic Corridor, but make it clear that enemies' nefarious designs will never succeed."

He also said India's desire for regional hegemony would not be allowed, and stated that economic prosperity and self-reliance are imperative to a strong defence.

The adviser said Pakistan — and the entire region's future — was dependent on the completion of the CPEC.

Talking about the war on terrorism, Sartaj Aziz said Pakistan has to fight a war against evil ideologies, including extremism and terrorism, which are harming the country.

Aziz's assertions follow statements by the Pakistan Army that Indian spy agency Research and Analysis Wing (RAW) is involved in terrorism in Pakistan.

Prime Minister Nawaz Sharif chairing a meeting of the National Economic Council (NEC) at the PM House on Monday. All four chief ministers attended the meeting. PHOTO: PID

ISLAMABAD: After achieving political consensus, the government has made small changes in China-Pakistan Economic Corridor (CPEC) projects and allocated 12% of the approved Rs171 billion for construction work on the western alignment.

Headed by Prime Minister Nawaz Sharif, the National Economic Council (NEC) approved next year's federally funded development programme including over two and a half dozen CPEC-related projects. The approved NEC plan shows that the government has included Rs942 billion worth of CPEC projects in the 2015-16 budget and allocated Rs171 billion for spending in the year.

However, the Annual Plan Coordination Committee (APCC) that met on May 26 had proposed CPEC projects valuing Rs842 billion and suggested an allocation of Rs194 billion. After the APCC meeting, an All Parties Conference was held where all political parties agreed to construct the western alignment of the CPEC first.

China wants to build a trade link through Pakistan aimed at using the Gwadar Port for strategic and commercial purposes. After a year of controversy, political factions have eventually reached a consensus on the alignment of the corridor route.

Western alignment

The NEC's plan shows that 12% or Rs20.8 billion worth of CPEC projects will go to the western route. Of the five schemes that have been shown on the western route, construction work on four has already started. One dated back to 1999 and was nearing completion, work on second commenced in 2007, the third was approved in 2010 and the fourth approved last month.

The fifth project is general in nature called the land acquisition and construction of CPEC projects. The total cost of this project is Rs60 billion and Rs10 billion has been allocated.

A lion's share of Rs95 billion or 57% of CPEC allocations will go to projects on the eastern corridor. An amount of Rs31.8 billion or 18.7% of the allocation is proposed for the northern alignment, which is the link for all the routes.

The Ministry of Ports and Shipping will receive Rs6.8 billion or 4% of the allocation for Gwadar-related projects while the Ministry of Interior will get 2% of the allocation or Rs3.5 billion for raising 28 civil armed forces wings for ensuring security of the CPEC route and Chinese workers.

Eastern alignment

The NEC has approved Rs60.2 billion for the construction of a 387km Multan-Sukkur section of the eastern route. The total cost of this project is Rs259.3 billion. For the 296km Sukkur-Hyderabad section of the eastern route, the NEC allocated Rs10.5 billion. The total cost of the project is Rs148 billion.

It approved Rs20 billion for a 230km Lahore-Abdul Hakeem road section.

Northern alignment

For the northern alignment, the NEC cleared Rs31.8 billion or 18.7% of the CPEC allocation. For the construction of 120km Thakot to Havelian section, the NEC approved Rs23.5 billion. The total cost of the project is Rs95.4 billion. For the acquisition of land for this project, the NEC allocated another Rs6 billion.

The council approved Rs2.3 billion for construction work on the Burhan-Havelian road section, with a total estimated cost of Rs39.5 billion.

Similarly, for construction of the Islamabad-Mianwali-Dera Ismail Khan road, which will link eastern and central routes, the NEC approved Rs10 billion. The total cost of the project is Rs68 billion.

For the construction of an approach road to the New Gwadar International Airport, the NEC approved Rs503 million and allocated Rs30 million for the new fiscal year.

In order to complete work on the Gwadar Port, the NEC approved eight projects worth Rs41.6 billion and allocated Rs6.8 billion for the next year. These projects include construction of break way waters, capital dredging of berthing areas, infrastructure development for the Export Processing Zone Authority, Pak-China Technical and Vocational Centre and upgrading of the existing 50-bed hospital to 300-bed at Gwadar.

The NEC also approved Rs4.7 billion allocation for the construction of Eastbay Expressway that will link Gwadar with the coastal highway.

Economic corridor will help to bring peace and stability in the region:

Hua Chunying -- Dunya News

Spokesperson of China's Foreign Office Hua Chunying said on Tuesday that Pakistan-China Economic Corridor is not against any country, she was addressing a press conference in Beijing. She said that Pakistan and China are making a framework for the economic corridor in order to increase co-operation in all fields, she further said that this will be an important project under China Belt and Road project.

Hua Chunying said that Pakistan-China Economic Corridor will prove to be extremely helpful in the development of Pakistan and China and also for the peace and stability of the region. Talking about Kashmir, she said that the roots of Kashmir issue are in the history of Pakistan and India and it should be solved through dialogue and table talk.

Economic cooperation to open corridor of prosperity: Chinese CG -- The Nations

Chinese Consul General in Lahore Yu Boren has said the Pak-China economic cooperation will open new corridors of prosperity for the people of Pakistan and appreciated contributions made by the Technical and Vocational Training Authority to provide skilled training courses.

He admired efforts by the Pak-China Joint Chamber of Commerce and Industry and the Technical Education and Vocational Training Authority (TEVTA) for initiating the Chinese language courses. "This course will be beneficial for realizing the need of overcoming the communication barriers between both the nations. It will also helpful for the youth who will learn Chinese language in getting jobs in Chinese companies who are investing in Pakistan," he said.

He also said, "China is committed to helping Pakistan and putting it on the path of prosperity. China is helping Pakistan in evolving a win-win strategy for developing joint ventures. A more developed China will make greater contribution and bring more opportunities to the world, he said adding that the year 2015 was marked as a special year for the "friendly partnership for common development" between China and Pakistan."

His comments came in the inaugural ceremony to launch the Chinese language courses at the TEVTA Secretariat on Tuesday which also drew in Deputy Counsel General Wang Dauxue, Chairperson TEVTA Irfan Qaiser Shaikh, Chief Operating Officer TEVTA Jawad Ahmed Qureshi, Secretary General Pak-China Joint Chamber of Commerce and Industry Salah-ud-Din Hanif and other dignitaries of both organisations.

Chinese Consul General Yu Boren while addressing the participants said that the purpose of this language programme is to make the already technically skilled labour force of Pakistan more acceptable in the Chinese market. He asserted that it was the right time to make better choices and take progressive initiatives by imparting Chinese language and work ethics to the trained labour force of Pakistan which would increase its competitiveness and effectiveness in the large economy of China. Imparting language training to Pakistani labour with the collaboration of China would enhance labour capacity utilization and preference over untrained workforce. This trained workforce having a competitive edge could be preferably hired by countries that are expanding their manufacturing sector by relocating it in other viable countries, he added.

Wang Dauxue, in his address, quoted an old Chinese saying "Long distance never separates close friends and true neighbours don't necessarily live next door". He said China and Pakistan had different social and cultural traditions, but the people of the two nations had expressed an earnest wish to enhance friendship. He said that, "I believe China and Pakistan will work more closely to push forward bilateral relations and strengthen coordination and cooperation in the international affairs".

Authority Chairperson Irfan Qaiser Sheikh said, "TEVTA is doing its full efforts to provide trained manpower in shortest time as per requirement of the Industry. On the recommendations of relevant Industry, TEVTA is starting new short courses. TEVTA is signing memoranda of understanding with different organisations to introduce new courses to meet the requirement shortage of trained manpower. Expertise of our manpower on Chinese Language will provide better working environment with Chinese stakeholders in Pakistan."

PM emphasizes on Pak-China relations -- The Nations

Islamabad: Prime Minister Muhammad Nawaz Sharif has said that Pakistan and China are Iron Brothers co-operating closely in all domains with the common vision to build a better future for the peoples of the two countries and promote regional peace.

He was talking to a delegation of Research and Development International, a new joint China-Pakistan think tank on China-Pakistan Economic Corridor (CPEC)

today.

The Prime Minister welcomed the establishment of the think tank which comprises of leading scholars, public figures and business groups from China.

Nawaz Sharif said the corridor is the flagship project of the "One Belt and One Road" initiative, since both the Belt and the Road have their meeting point in Pakistan.

He was confident that the agreements and the MOUs signed during the visit of the Chinese president will forge an ever stronger relationship between the two countries.

The delegation congratulated the government on achieving a historic consensus on the corridor project in the recently held All Parties Conference.

The Prime Minister said a parliamentary committee has also been formed to oversee the corridor project and to speed up the process of its building.

The delegation informed the Prime Minister that the Research and Development International plans to establish China Pakistan Information Corridor as well, in order to support and supplement the CPEC, which would be a one window operation to provide necessary information to all.

The Prime Minister was informed that Chinese authorities are deliberating to hold China-Pakistan Economic Corridor forum every year in the Karamay city of Xinjiang.

China backs Pak membership of Nuclear Suppliers Group -- The Nation
BEIJING: China on Wednesday said it backed Pakistan's "engagement" with the Nuclear Suppliers Group (NSG) but at the same time maintained that acceptance of the Nuclear Non-Proliferation Treaty (NPT) was a standard to admit new member-states in the 48-nation grouping.

"China has noted Pakistan's aspirations for the NSG membership. Pakistan has taken steps towards its mainstreaming into the global non-proliferation regime," Chinese Foreign Ministry spokesperson Hua Chunying told a media briefing.

"We support Pakistan's engagement with the NSG, and hope such efforts could be conducive to the authority and effectiveness of the international non-proliferation regime. We wish to strengthen communication and coordination with Pakistan," she said. At the same time, she said, "It is the long-standing consensus of the international community that the NPT is the cornerstone of the regime".

She was replying to a question on how China views Pakistan's aspirations for NSG membership at the NSG plenary meeting being held in Argentina. "In fact, besides Pakistan, there are other non-NPT states who have expressed similar aspirations," she said in an apparent reference to India's interest to become NSG member.

National Highway Authority spent Rs1.342 trillion on 72 projects in 2014-15 – Gwadar handed 6.279 million tons -- ARY News

The 2014-15 Economic Survey of Pakistan released this evening by Finance Minister Ishaq Dar provided the following details about Pakistan's communications sectors, especially the roads network, railways and ports

Pakistan's total road network is around 263,942 Kms which carries over 96 percent of inland freight and 92 percent of passenger traffic.

Length of the NHA (National Highways Authority) road network is around 12,131 kms and comprises of 39 national highways, motorways, expressway and strategic roads.

During 2014-15, the NHA executed 72 development projects costing Rs 1,342 billion.

3-n10-pakistan

The M-9 highway in Balochistan

The Government of Punjab and the Federal government jointly completed the Rawalpindi-Islamabad Metro-Bus service project with a total cost of Rs44.21 billion.

The network of Pakistan Railway comprises of 7,791 route kilometres, 452 locomotives, 1,732 passenger coaches and 15,948 freight wagons.

During the financial year 2014-15, 90 kms of track has been rehabilitated besides doubling of 57 kms track. pakistan-railways

PIA's expenditure decreased by 38 per cent and its operating revenue increased from Rs. 95.771 billion to Rs 99.519 billion in 2014.

During July-March, 2014-15, the Pakistan National Shipping Corporation companies earned revenue of Rs12.20 billion compared to Rs 11.37 billion over the corresponding period of last year.

During July-March 2014-15, the total cargo handled at Gwadar Port stood at 6.279 million tons against 5.764 million tons over the corresponding period of last year showing a growth of 8.9 percent.

China to set up massive industrial park at Gwadar -- The Nations

ISLAMABAD - Chinese will establish a massive Industrial Park at Gwadar, which will house an oil city and petroleum refining zone beside dozens of other technical and logistical installations.

Chinese City of Karamay and Gwadar have decided to enter in a sister city relationship.

A Memorandum of Understanding for Framework Draft Plan in this regards was signed today by Babu Gulab, Chairman District Gwadar, and Zhang Hongyan, Mayor Karamay Municipal government Xinjiang People Republic of China.

A sister city, county or state relationship is a broad-based, officially approved, long-term partnership between two communities, counties or states in two countries.

According the agreement Xinjiang Petroleum will develop Gwadar Karamay Industrial Park, the industrial park will include two parks, hi-tech and petro chemical industrial park, four sectors including trade, tourism and catering, agriculture processing and training of occupational skills and three routs including wharf, highways and air route.

Both parties are willing to further enhance friendship and mutual trust in order to create a friendly exchanges and cooperation platform in various fields such as culture, education, health, science and technology, economy.

Other parts of the agreement included teaching training in Karamay, doctor training, short courses for students in science & technology, Chinese language training etc.

Under the agreement Karamay will develop an oil city where they will set up petroleum refining zone, petroleum engineering and technical service zone and logistics center.

Moreover building material area, logistic and warehousing area, high tech zone, commodity wholesale district, food processing zone, machinery and equipment rental area will be also part of the industrial park.

About further details of the agreement an official of the Gwadar Development Authority (GDA) told The Nation that Chinese told us that they will require about 10 km area for setting up the industrial park.

The GDA coordinator, Nawabzada Zakir, said that it is a long term project and the MoU will be implemented in 6 phases.

The Chinese official have told us that the project is in very beginning stage and they will obtain the whole information about the area, investment environment etc and will start work step by step.

He said that the Chinese told us "we will put ourselves in Pakistan shoes to solve its primary concern".

The Chinese delegation has invited the official of district government Gwadar to visit Karamay to further the idea of the industrial park.

A 15-member team consists of Chairman Gwadar Port Authority, Chairman District Council, DG Gwadar Development Authority will be visiting Karamay on 15 July, he informed.

No one can come between Pak-China love: Chinese envoy The Chinese ambassador to Pakistan Sun Weidong has said that no other country holds value between Pakistan and China relations, adding that the Pakistan-China Economic Corridor would be completed at a -- **Pakistan Today**

The Chinese ambassador to Pakistan Sun Weidong has said that no other country holds value between Pakistan and China relations, adding that the Pakistan-China Economic Corridor would be completed at all cost.

Talking exclusively to the media on Thursday after the address of the joint session of the Parliament, the Chinese envoy said that no one should doubt relations between Pakistan and China. He said no third country, which is attempting to damper relations between the two countries, would be allowed to succeed and neither it holds any value.

He said that Pakistan-China Economic Corridor would be completed at all cost and it will prove to be beneficial to the entire region, and not only Pakistan. He said that the corridor would open avenues of employment for all the people in the region.

Regarding Kashmir issue he said that Kashmir is a disputed area and China desires a solution for it according to UN resolutions.

Regarding the president speech to the joint session, the Chinese envoy said that his speech was appropriate, adding that the Government and Parliament should make their decision in light of the president's address so that a new era of development could open.

All Day**Budget: Rs700bn for development -- Dawn**

The government on Friday announced Rs700 billion Public-Sector Development Programme (PSDP) for 2015-16 with major emphasis on water and power, temporarily displaced persons, highways, railways, education, Pakistan Atomic Energy Commission, PM Youth Loan Programme and ports and shipping.

The allocation was higher by 29.1 per cent from this year's PSDP of Rs542bn.

WATER AND POWER: An amount of Rs142.2bn was allocated for this sector, with Rs30bn in water and Rs112.2bn in power.

The budget document said that 13 major water projects are hoped to be completed this year including Drawat Dam, Raine Canal, Shadi Kaur Dam etc.

Major allocations include Rs4bn for construction of break waters, Rs300 million for capital dredging of berthing areas and channel for additional terminal for China-Pakistan Economic Corridor (CPEC), Rs500m for infrastructure development of export-processing zone at Gwadar, Rs3bn for Gwadar fresh water treatment and water supply.

The government has earmarked Rs112.2bn for power sector and planned to add 14,400MW to the national grid by 2017-18. It also hopes to fetch 10,400MW under CPEC project by the year 2018.

Besides more than 4,000MW thermal projects would be initiated in public-sector including 425MW Power Project Nandipur; 1,320MW Coal-fired Power Plant Jamshoro; 2,400MW LNG-based Power Plants at Haveli Bahadur Shah and Balloki.

HIGHWAYS: National Highway Authority (NHA) was allocated Rs159.6bn against this year's Rs111.5bn, an increase of around Rs48bn (43pc).

Of the allocated amount, Rs14.6bn was earmarked for on-going projects and Rs86.8bn for other new projects and Rs58.1bn under new initiatives of CPEC.

RAILWAYS: Another major chunk of Rs40bn was allocated for railways but the increase is nominal when compared to this year's Rs39.6bn allocation.

The railways authorities claimed that the work would continue on projects of rehabilitation and doubling of track, procurement and manufacturing of locomotives, passenger coaches.

PORTS AND SHIPPING: Allocation of Rs12bn was made for this sector from this year's Rs2.576bn, a significant increase of around 366pc.

Additional allocation of Rs9.3bn has been made in this sector for CPEC projects.

PM YOUTH LOAN PROGRAMME: The programme attracted a sum of Rs20bn against this year's allocation of Rs7bn.

HIGHER EDUCATION COMMISSION: The government earmarked Rs20.5bn for 191 development projects of different universities for research development, infrastructure development, programmes, scholarships programmes, establishing of new varsities etc.

PAKISTAN ATOMIC ENERGY COMMISSION: The commission was allocated an amount of Rs30bn from this year's Rs42bn, a decline of 28.57pc.

All Day**CPEC fetches sizeable amount in PSDP -- The Nations**

ISLAMABAD - The China-Pak Economic Corridor (CPEC) - a development megaproject which aims to connect Gwadar Port to China's Northwestern region of Xinjiang via a network of highways, railways and pipelines - has fetched Rs1961 million in the Public Sector Development Programme 2015-16.

Out of the total estimated cost of Rs3554 million of the project, the government

would be spending Rs155 million as of June 30, 2015 and further Rs1961 million have been allocated in the PSDP 2015-16. The allocation shows government's interest in completing the project which is considered central to Pak-China relations, on priority basis. The project will run about 3,000 km from Gwadar to Kashgar in China.

The CPEC projects as shown in the PSDP include feasibility study (PC-II) for the construction of new rail link from Havelian in district Haripur to Pak-China border (682km) (Rs1 million); feasibility study for up-gradation of existing Main Line-II (Rs 300 million); comprehensive feasibility study for upgradation/rehabilitation of mainline-I and new dry port at Havelian (Buldhair) district Haripur (Rs270 million); acquisition of land for new dry port at Buldhair, district Haripur (Rs300 million); and PC-II for feasibility study to connect Gwadar with Karachi and feasibility study from Gwadar to Basima and from Basima to Jacobabad via Khuzdar (Rs10 million).

The CPEC project, according to the experts, will prove to be a game-changer and for this purpose work on Raikot-Islamabad road will also be launched during the next fiscal year. For this purpose, Rs29 billion have been allocated. Similarly, Rs10 billion have been allocated for the construction of Islamabad-DI Khan road.

The Corridor is an extension of China's proposed Silk Road initiative, which would go a long way in making Pakistan a richer and stronger economic entity than ever before, the experts believe.

The CPEC-related development schemes put in the PSDP 2015-16 also include a vast network of roads.

According to the Programme, Western Alignment (CPEC) include Gwadar-Turbat-Hoshab Section (200km) of Gwadar-Ratodero Road (892km) M-8 including Khuzdar-Shahdadt-Kot-Ratodero (143km)-(Gwadar-Turbat, Khuzdar in Balochistan and Kamber, Shehdadt-Kot and Larkana in Sindh). Rs2,800 million have been allocated for this project. Similarly, Rs2500 million have been allocated for widening and improvement of N-85, Hoshab-Nag-Basima-Surab Road (459km) (Khuzdar,Paniquir); Rs3,000 million for Zhob Mughal Kot 81km N-50; Rs2,000 million for rehabilitation of DI Khan Mughal Kot 50km section N-50 and Rs10,000 million for land acquisition/construction of Western Alignment and other CPEC projects.

As far as Northern Alignment of CPEC is concerned, Rs2,300 million have been allocated for construction of Burhan-Havelian Expressway (59km); Rs20,500 million for Thakot to Havelian (120km) (Construction) (phase-I) and Rs5000 million for Thakot to Havelian (120km) (Land) (Phase-I).

Similarly, Rs10,000 million have been allocated for the construction of Islamabad-Mianwali-DI Khan CPEC route including land acquisition and technical study.

JF-17 programme a symbol of Pak-China friendship: China Aviation Industry -- Express Tribune

Chairman Aviation Industry Corporation of China (AVIC) Lin Zuoming assured his all-out support to enhance the capabilities of JF-17 aircraft, Radio Pakistan reported.

Chief of Air Staff Marshal Sohail Aman, during his visit to the Headquarters of Aviation Industry Corporation of China, expressed his satisfaction over the JF-17 programme.

The programme was also deemed by the marshal as a symbol of the Pak-China friendship.

Read: China to deliver 50 more JF-17 Thunder jets to Pakistan

It was announced earlier during the year that China would deliver another fifty JF-17 Thunder fighters to Pakistan over a period of three years.

During a recent visit by Chinese President Xi Jinping to Pakistan, it was also asserted by both sides that the jets were a symbol of friendship.

The close friendship has come under scrutiny by India who have termed the China-Pakistan Economic Corridor (CPEC) 'unacceptable'.

200 Pak engineers to get thermal engineering training in China -- The Nations

LAHORE - Presiding over a high level meeting held here to review progress of Sahiwal coal power project, Punjab Chief Minister said that initial design of this 1320MW project has been prepared and an agreement reached with Pakistan Railways for transportation of coal from Karachi.

The Chief Minister told the meeting that overcoming energy crisis is top priority of the government since promotion of industry, trade and economic activity is not possible without it.

All out resources are being used for ending shortage of electricity.

Shahbaz Sharif said that work is continuing on generation of energy through coal, hydle, wind, solar, gas and other alternate sources.

He said that two coal power projects of 660MW each are being set up in Sahiwal and a total of 1320MW electricity will be generated from this project.

The Chief Minister said that the project will be implemented transparently by ensuring high quality and speed.

He said that this project of national importance will be completed in 2017.

He said that Punjab government will impart training of thermal engineering to 200 Pakistani engineers in China from its own resources.

He directed that a comprehensive programme with regard to training of Pakistani engineers in China should be evolved and presented within seven days.

Shahbaz Sharif said that setting up of thermal engineering department in Engineering University Lahore should also be considered.

He said that the decision of imparting training to Pakistani youth in thermal engineering discipline in China by a Chinese company is a welcome step.

The Chief Minister said that he will personally monitor the progress of Sahiwal coal power project and also visit the site soon.

Head of the project Song Taiji gave briefing to the meeting.

Addl Chief Secretary Energy, Commissioner Sahiwal Division, Chairman PPDC, concerned authorities and officials of Chinese companies working on Sahiwal coal power project attended the meeting.

Pak-China friendship follows no boundary: CM Shahbaz -- Dunya News
Pak-China friendship follows no boundary: CM Shahbaz

Chief Minister of Punjab (CM) Shahbaz Sharif on Tuesday has termed China-Pakistan Economic Corridor (CPEC) as vital to the region's progress.

While talking at the ceremony in Lahore, CM Punjab stated that the visit of Chinese president Xi Jinping has created a new history.

He said that the previous government has failed to utilize the China relations in a positive sense but the government of Pakistan Muslim League-Nawaz (PML-N) has given new dimension to Pak-China friendship.

CM Punjab expressed that Pakistan-China friendship is more than the marked boundaries as it's between two nations without following the barrier of borders.

He further vowed to stand by the China at any cost.

CPEC is a gift from Chinese investors for Pakistan, we should employ it for the development of the country, he added.

Moreover, Shahbaz Sharif invited the political leaders to be united for nation's progress.

No tax on export of Halal meat through Gwadar port -- The Nations

Federal Minister for Ports & Shipping Senator Kamran Michael has said that there will be no export tax on export of Halal meat through Gwadar port.

In a statement issued here on Tuesday, the minister said that the Government is encouraging the investors and exporters for 'Halal Meat Industry' as there is huge demand of Halal meat in international market.

Michael said that Government has exempted the investors and industrialists from all kind of import and export taxes, adding that exporters who may get clearance from export bureau and launch their Halal Meat Industry till 2016, they will be exempted from taxes for next four years.

Michael has said that Central Asian States are earning \$3 trillion only through Halal meat sector while Pakistan earns least from this sector but present Government is the first one to pay heed towards this.

Federal Minister has stated that the lives of local fishermen will be changed with the commercial exports of fish from Gwadar port.

Michael remarked that for the first time, Baloch would be benefiting directly through this export.

The Minister said that the foreign exchange reserves have started increasing with export of deep sea water fish, adding that government is taking special steps for expanding the export of fish at maximum level.

Pak-China sign agreement for MSA patrol vessels -- Daily Times

ISLAMABAD – Pakistan and China signed a landmark agreement on Wednesday for construction of six patrol vessels for Maritime Security Agency (PMSA).

The agreement was signed on Wednesday during a ceremony at the Ministry of Defence Production (MoDP) in Rawalpindi. Documents were signed by M/s China Ship Trading Company (M/s CSTC) and the Pakistani government on behalf MoDP. According to the agreement, four ships will be constructed in China while the remaining two will be built at Karachi's Shipyard and Engineering Works under Transfer of Technology.

The spokesman for MoDP said that acquisition of new ships was a step towards PMSA's capacity building by the government which will boost the agency's operational preparedness for protection of resources in Pakistan's Exclusive Economic Zone and fishery protection. The spokesman further said that new ships will be used for maritime law enforcement operations against drug trafficking and illegal immigration.

All Day

Motorways will be built in Sindh, KP and Balochistan: Nawaz Sharif -- Pak Tribune

Motorways will be built in Sindh, KP and Balochistan: Nawaz Sharif

ISLAMABAD: Prime Minister Nawaz Sharif on Thursday while addressing the National Assembly said that motorways will be built in Sindh, Khyber Pakhtunkhwa and Balochistan as well.

The budget discussion at the House enters its third day as Premier Sharif shed light on the country's infrastructural development projects.

"We initiated [the motorway] in Lahore and from there we went to Peshawar," PM Nawaz recalled. "It was not supposed to end in Lahore...it was to be built till Karachi and Gwadar."

In response to points raised by Pakistan Peoples Party's (PPP) Nawab Ali Wazan, the premier said that progress on the Hyderabad-Karachi motorway is underway.

He further said that in the past, the project came to an end when his government had previously ended in the early 90s. He added that in 1997 his government again conceived of a project to build a motorway till Karachi.

Similarly, the premier said that there will be a motorway from Lahore to Multan and Multan to Sukkur, which comes under the Pak-China Economic Corridor (PCEC).

"Our government also made a coastal highway from Gwadar to Karachi," PM Nawaz said. "We have started construction in Gwadar and want to make it Pakistan's best city and district."

He went on to stress importance of Gwadar and making it a duty-free port.

"Gwadar should be given the status of a free port and a new administrative system and unit should be developed there," PM Nawaz said. "Like Gulf countries, Gwadar should also become a duty-free port and have the same progress as countries like Singapore, Dubai and Hongkong."

The premier also acknowledged PPP's efforts and mentioned the Attabad Lake. "A tunnel is being constructed a few kilometres away from the lake, on which around Rs27 billion are being spent," he said.

He acknowledged that PPP started the project and said it was a positive move.

The opposition in both houses of parliament had on Monday refused to participate in the debate on the budget unless the government agreed to arrange live coverage of all speeches through the state-run PTV, forcing a day's postponement of the debate.

Leader of the Opposition Khursheed Ahmed Shah was temperate in criticising the government for missed targets in the outgoing financial year and perceived deficiencies in the new budget while opening the debate in the National Assembly.

The federal cabinet last week approved the budget for the fiscal year 2015-16 (FY2015-16), with a total outlay of Rs4.313 trillion, which is 9.1 per cent higher than the revised 2014-15 outlay of Rs3.9tr.

Finance Minister Ishaq Dar while presenting the budget for fiscal year 2015-16 on the floor of the National Assembly said a growth rate target of 5.5pc had been set for the upcoming year, which he said is budgeted to reach 7pc by the end of PML-N government's tenure in 2017-18

Before announcing the budget, the minister briefed the cabinet about the salient features of the budget and said measures have been proposed which may enhance exports, industrial growth, and employment.

All Day

A new administrative unit should be made for Gwadar, says Nawaz -- Daily Times

ISLAMABAD: Prime Minister Nawaz Sharif on Thursday told the National Assembly that a special status should be given to Gwadar to make it a model port, and a new administrative unit should be established for it.

"Gwadar should be made a duty-free port like in Gulf countries, Singapore, Hong Kong, etc, and for this purpose, we should sit together to frame new laws. I will approach the opposition parties in this regard. We want to make Gwadar the best port, city and a district," the prime minister expressed these views while speaking on the floor of the National Assembly on Thursday.

The prime minister said that Gwadar should not only be a gift to Pakistan but to the entire region. He said that Tajikistan and other countries are keen to connect with Gwadar. "We will increase Tajikistan's connectivity with Gwadar," he said.

The prime minister said that load shedding would end within three years, adding that two big energy projects of 650MW each – based on coal – had been launched in Thar. The Thar coalmine will also be developed and its coal will be used in these projects, he said, and added that two projects of 1,320MW would be completed at Port Qasim and Hub.

Leader of opposition in the National Assembly Syed Khursheed Ahmed Shah said that the PPP government had handed over Gwadar to China and PML-N government has continued this policy, which was good for the country. He said that continuity in policies was required to take Pakistan forward on the path of development.

The opposition leader maintained that there is 10 to 12 hour of load shedding in cities and 18 to 20 hours in the rural areas. He acknowledged that people of some areas where load shedding duration is high are not paying electricity bills. However, he said that it was the responsibility of the government to control line losses and electricity theft.

Finance Minister Ishaq Dar informed the lawmakers that the Moody's Investor Service has upgraded Pakistan's sovereign credit rating from Caa1 to B3.

He said that Moody's had downgraded the country's credit rating to Caa1 on July 13, 2012. However, Moody's has upgraded Pakistan's rating, which shows macroeconomic stability in the country.

Taking part in the budget debate, Pakistan Tehreek-e-Insaf member Ali Muhammad Khan gave an emotional speech on problems being faced by common man in rural and far-flung areas of the country. He said that the budget does not reflect the needs of the poor people, low ranking government officials, students, farmers and labourers.

"The budget is just a jugglery of words and offers no relief to ordinary people," he said, adding that the government should pay a little focus on building schools, colleges and hospitals as well, along with the motorways and metro buses.

PML-N member Dr Ramesh Kumar, however, defended the budget, saying the government has presented a balanced budget despite all the odds. He said that economic indicators have improved a lot as compared to the previous government and the effects would ultimately trickle down to improve the living standard of the ordinary citizens. Several members took part in the budget debate.

Speaking on the occasion, Information Minister Senator Pervaiz Rashid said that PTV National would broadcast live proceedings of parliament.

The minister said that PTV National had been assigned the task to broadcast live proceedings of the budget session keeping in view the desire of members of the National Assembly and Senate from both treasury as well as opposition benches.

The minister said he had issued instructions that equal time must be given to members of the National Assembly and Senate, as proceedings of both the houses were going simultaneously.

Pervaiz Rashid expressed the hope that members of parliament would be satisfied with the decision, as their voice would reach to the people of the country.

**Hub: Will connect Gwadar port with Central Asia, says PM Nawaz --
Dunya News**

Prime Minister (PM) Nawaz Sharif said on Friday that military operation will be launched till eradication of terrorism. He said that perpetrators of tragedy of Safoora Chowrangi will be caught and justice will be served soon, reported Dunya News.

Addressing the inauguration ceremony after ground breaking at Hub oil refinery, PM Nawaz said that the condition of the country is improving and expressed hope that all terrorists will be caught.

Calling the current military operation a 'well calculated' decision, PM Nawaz said that operation Zarb-e-Azb had been launched after deliberation and much thought.

He said that North Waziristan had become peaceful once again.

PM expressed determination that culprits behind the tragedy of Safoora Chowrangi will be caught and speedy justice will be served.

Talking about energy crisis, PM said that coal plant is being set up at Thar while the crisis is expected to end in 2017.

PM Nawaz said that Gwadar port will be developed as free port and will be connected with Central Asia.

Talking about the construction of oil refinery in Balochistan, PM Nawaz said that construction of refinery is an important achievement which will increase oil output.

CPEC, Gwadar port to be built at any cost: COAS -- The Nations
KARACHI - Chief of Army Staff General Raheel Sharif has said that the world endorses security concerns of Pakistan.

The country, he said, is willing to cooperate with other nations for peace but not at the expense of 'our national interest, sovereign rights and national pride'.

Addressing the passing out parade of Pakistan Navy cadets, the army chief said ceasefire violations, bloodletting in Balochistan, Fata and Karachi manifest enemy's hostile intent, in a clear indication to India's anti-Pakistan activities.

"We are ready to pay any price to protect our nationhood and safeguard our interests, be it Kashmir, development of new ports or exploitation of natural resources.

"We are acutely aware of our enemy's campaigns and will defeat its designs," he declared.

Talking about China Pakistan Economic Corridor (CPEC), he said that CPEC holds enormous potential for transforming lives of our region's people.

"CPEC with Gwadar port as its catalyst will be built and developed as one of the most strategic deep-sea port in the region at any cost whatsoever," Gen Sharif said.

"The entire nation expresses resolve to eliminate the menace of terror and operation Zarb-e-Azb is delivering decisive results.

The terrorists are now resorting to desperate actions.

Battle against terrorism won't be won by Armed Forces alone and it is encouraging to see the entire nation is pursuing this national effort with great sense of purpose."

While congratulating and extending felicitations on achieving this milestone, the army chief advised the passing out Midshipmen and cadets to always ensure that "interests of the state and the service is prime for you and never let your personal feelings stand in the way to your commitment to the national duty bestowed upon you".

Earlier in his welcome address, Commandant Pakistan Naval Academy highlighted the salient features of the officers' training.

He apprised the audience that the commissioning term comprises of 86 Midshipmen, including 48 from Pakistan and 38 from brotherly countries like Saudi Arabia, Bahrain and Nigeria.

He added that 43 cadets from Short Service Commission Officers batch were also being passed out.

The commandant highlighted that cadets from Bahrain, Jordan, Libya, Maldives, Nigeria, Palestine, Qatar, Saudi Arabia, Sri Lanka and Yemen are also undergoing training at Pakistan Naval Academy.

Later, COAS Raheel Sharif gave away prizes to the winners and those attaining distinction.

Midshipman Fazal Qadeer was awarded the coveted Sword of Honour for his overall best performance.

Midshipman Syed Mubashir Shah won the Academy Dirk.

Lieutenant M Bilal Asif, Cadet Arsalan Tariq, MSC Perera (from Sri Lanka) and Cadet Muhammad Shahid (SSC) were given Quaid-e-Azam Gold Medal, Chairman Joint Chiefs of Staff Committee Gold Medal, Chief of the Naval Staff Gold Medal and Commandant's Gold Medal, respectively.

The ceremony was attended by a large number of senior military officers, ambassadors, defence attaches of various countries, civil dignitaries and parents of passing out midshipmen and cadets.

China, Pakistan should build railways to link with South Asia: Official -- Economic Times

BEIJING: China and Pakistan should build a railway network in further to a due \$ 46-billion mercantile mezzanine to boost trade with South Asia and Arabian Peninsula, a tip Chinese central said.

"We should ready to build a railway between China and Pakistan as shortly as possible," He Sanqiu, conduct of ride in Kashgar was quoted as observant by state-run Xinhua news group today.

Kashgar, a Chinese city in flighty Xinjiang region, borders Pakistan-occupied Kashmir (PoK), that will be connected with a 3,000-kilometre-long China-Pakistan Economic Corridor (CPEC) with Pakistan's pier city of Gwadar.

The corridor, due to pass by a PoK, is objected by India due to a doubtful standing of a region.

The news pronounced that a construction of roads, railways and pipelines opposite Pakistan is approaching to take around 15 years.

Rail is "the easiest way" to couple Kashgar with South Asia, a Arab Peninsula, and even tools of easterly Africa around a Arabian Sea and a Indian Ocean, He Sanqiu said.

There are copiousness of opportunities to boost trade, including industrial parks, cultivation and tourism, he said.

China and Pakistan have skeleton to boost trade to around \$ 20 billion within 3 years from a stream \$ 16 billion.

The mercantile mezzanine will emanate new business opportunities for enterprises in many mercantile sectors, Sun Weidong, Chinese envoy to Pakistan said.

Gwadar Port Zone completes land acquisition process for free zone ISLAMABAD: The Gwadar Port Authority has completed land acquisition process for free zone (FZ) and its execution is expected to start soon. The funds for acquisition of land to be han -- Express Tribune

ISLAMABAD: The Gwadar Port Authority has completed land acquisition process for free zone (FZ) and its execution is expected to start soon.

The funds for acquisition of land to be handed over to concession holder for establishment of FZ has been provided through Public Sector Development Programme (PSDP) as with FZ development the port throughout in trans-shipments, export and import will enhance significantly.

The same time the company is going to establish a large exhibition centre adjacent to Port for display of Chinese and Pakistani products. This would be the first Zone in Pakistan, spread over an area of 9.23 sq km, adjacent to the port.

According to a budget document, Gwadar port offers lots of opportunities to prospective investors. Chinese investors have taken keen interest in establishing Marine Silk Route and establishment of heavy industries in the industrial zone.

In this regard, banks from China and Pakistan are working on concept of development of Special Economic Zones in Punjab and Balochistan and the investors, especially the Chinese, are planning to establish a steel mill and a cement factory in Gwadar.

Moreover, under China-Pakistan Economic Corridor (CPEC), the Gwadar Port is said to be strategically important to China because it will bring closer Middle Eastern ports to China through Karakoram Highway (KKH) linking Gwadar with

Kashgar.

Under CPEC, Gwadar Port is considered as gateway of CPEC, and Gwadar city as one of the pivotal cities of the corridor.

The first special economic zone (SEZ) of CPEC is being developed in Gwadar city. The government-to-government CPEC agreements have created bright prospects for optimum operationalisation of Gwadar Port and harnessing the benefits of regional trade connectivity through this naturally deep-sea port by Pakistan, China, Central Asian Republics and Afghanistan.

To resolve the port connectivity with the highway network, "Gwadar Port Eastbay Expressway" project has now been agreed upon for funding under CPEC. The project has been approved by ECNEC at an estimated cost of Rs.14 billion and its execution has been started.

The proposed expressway will connect the Gwadar Port with the Mekran Coastal Highway, passing along the east bay of Gwadar City, with a total length of 18.98 Km, including 4.3 Km along -the-shore/off-shore and 14.6 Km on -shore sections. A rail link along this expressway is also part of the project.

Pakistan wins first JF-17 order at Paris Air Show: PAF -- Express Tribune

PARIS: After high expectations for a deal to pull through, Pakistan was successful in securing its first ever export order for its JF-17 Thunder fighter on Monday at the first day of the International Paris Air Show.

Air Commodore and Pakistan Air Force officer dealing in sales and marketing, Khalid Mahmood said "A contract has been signed with an Asian country." However the name of the country was not disclosed and deliveries are likely to begin in 2017.

The report added that 80 people were promoting the JF-17 in Paris this year, reflecting a significant marketing push.

Read: Pakistan eager to secure first ever-order for the JF-17 at Paris Air Show

Due to security concerns and client sensitivities, Mahmood chose not to specify the name of the customer and the number of aircraft it will obtain from Pakistan.

Further, speaking to AFP from the Paris Air Show by phone, Air Commodore Syed Muhammad Ali said an order for the plane had been finalised but declined to give details.

"That's the case, we've finalised the order," he said, citing sensitivities for not naming the client, the number of aircraft or the date of delivery.

Mahmood further stated that the sales for the JF-17 had been delayed due to the political turmoil in numerous countries in the Middle East.

Having brought three aircraft to the show this year, one of them will make its flying debut.

Commenting on the success of the show, Mahmood said the choice of venue in terms of meeting prospective customers from French speaking countries is a good one.

Read: China to deliver 50 more JF-17 Thunder jets to Pakistan

Analysts believe the major selling point of the JF-17 is its cost, which is likely to be substantially less than the \$16-18 million cost of an US-made F-16.

The latest models of the jets, which are locally produced in cooperation with China, are lightweight multi-role aircraft capable of Mach 2.0 (twice the speed of sound) with an operational ceiling of 55,000 feet.

With a total 11 countries including Pakistan, China also markets the aircraft.

Updating the guests and media on Pakistan's induction of the type, he claimed that a total of 54 examples of JF-17 have been delivered till date. Out of which the first 50 were delivered in a Block I configuration and an update of these to a Block II standard is underway.

The Block II configuration features improved avionics and better software, and adds a fixed air-to-air refuelling probe. The JF-17 is powered by a single Klimov RD-93 engine.

An addition of Block III configuration with 50 aircraft and 46 aircraft delivered in the Block II configuration is expected to push Pakistan's fleet to 150 examples, aiming to be delivered by the end of 2018.

"Though the aircraft's developers are still working out the specifications of the Block III aircraft, upgrades are likely to include an active electronically scanned array (AESA) or Passive electronically scanned array (PESA) radar", Mahmood said.

Further, the configuration could also include an infrared search and track (IRST) sensor, stations under the forward fuselage for various pods, and expanded precision weapons capabilities.

With the aim to serve mainly as a trainer, a two-seat variant is also planned by the developers. Pakistan produces 58% of the airframe and China 42%.

Pakistan was eager to secure its first-ever order for the JF-17 at the international event as Canada's Bombardier is particularly hungry for sales, after its new C Series aircraft struggled through development delays and difficult market conditions.

Airbus has also confirmed it will display its A400M military transport plane for the first time since a fatal crash in Spain last month caused by a massive engine failure.

With air passenger numbers set to double to six billion annually by 2030, the world's premier air show in Paris will next week focus on green issues even as the aircraft sales war remains centre stage.

The Paris Air Show brings together some 315,000 visitors and 2,260 exhibitors from 47 countries, with much of the attention focused on which big manufacturers, particularly Airbus and Boeing, will land the most orders.

Pakistan's large and well-funded military has long been a major importer of defence equipment, particularly from China.

The Paris Air show runs from June 15 to 21, with the final three days open to the public.

**Pakistan launches project to connect Gwadar Port with Central Asia --
Dispatch News Desk**

ISLAMABAD, Pakistan: Prime Minister Nawaz Sharif has said that the federal government is launching a mega project to connect the southern Gwadar port with the Central Asian states and then to the Western route of China-Pakistan Economic Corridor (CPEC).

While speaking on the floor of the National Assembly in Islamabad on Tuesday, the prime minister said that all the link roads from Gwadar to Central Asian city of Tirmiz in Uzbekistan will be completed to connect Pakistan with all central Asian countries Uzbekistan, Turkmenistan and Tajikistan through Afghanistan.

The prime minister said that Quetta-Chaman route will be completed by the end of next year. He said that Chaman-Kandahar-Mazar-e-Sharif-Tirmiz road connection will be developed.

Sharif said that work on Peshawar-Torkham-Jalalabad motorway is going on. He said that the Frontier Works Organization (FWO) is constructing this project and will soon be completed. He said that it will be extended from Jalalabad to Kabul-Mazar-e-Sharif and Tirmiz.

Nawaz Sharif said that with the completion of these routes, Balochistan will be opened and will be connected with all parts of the country. He said that these are big communication projects which will connect the whole country. He said these projects are necessary for integrity, unity and cohesion of the country and ending sense of deprivation of Balochistan.

Chinese Embassy compound inaugurated amid applause, celebrations -- Pak Observer

Islamabad—Amid appreciation and applause, Chinese Ambassador to Pakistan Sun Weidong, accompanied by Speaker National Assembly of Pakistan Sardar Ayaz Sadiq, inaugurated on Tuesday the new building of the Embassy of People's Republic of China in Islamabad, the federal capital.

Situated at Zhu-Enlai Avenue, it is the largest Chinese embassy overseas (area-wise)

While addressing hundreds of participants including large number of ambassadors, politicians, bureaucrats and celebrities during launching of new compound of Chinese Embassy, Chinese ambassador termed the compound as symbol of friendship between China and Pakistan.

The completion and launching of new compound is testimony to the all-weather friendship between China and Pakistan, he said adding that it was the largest compound of Chinese Embassy (by land area) across the globe.

Speaking about China Pakistan Economic Corridor, Chinese envoy said the construction of China Pakistan Economic Corridor maintains a good momentum.

"The CPEC, as a significant initiative, is based on the principle of broad consultations, joint contribution and shared benefits," Chinese ambassador said.

While speaking highly of incumbent government for allocating huge chunk of prime land in the heart of Islamabad exclusively for building new compound of Chinese Embassy, Chinese ambassador said the new compound was 'as huge as Pakistan-China friendship.'

Followed by national anthems of China and Pakistan, Chinese ambassador delivered a short speech in which he vowed to continue Chinese support for Pakistan in the fields of defence, education and economy.

" We will continue to support Pakistan through thick and thin. The CPEC will benefit 180 million people of Pakistan. We will continue helping our Pakistani brothers in the future," Weidong said.

Hundreds of participants, who especially came to attend launching ceremony of the new Chinese Embassy, appreciated his speech.

Shahbaz Sharif, Chief Minister Punjab, Senator Rehman Malik , Khawaja Asif, Minister for Defence, Ahsan Iqbal, Minister for Planning and Development , Pervez Rashid, US Ambassador Richard Olson, Federal Minister for Information and Broadcasting, Sikander Hayat Bosan , Federal Minister for National Food Security and Research and others attended the event.

Speaking on the occasion, Ayaz Sadiq congratulated Chinese ambassador and his government on launching huge compound of Chinese Embassy in Pakistan. Terming Pakistan-China friendship as unique example in the world, Sadiq said government of Pakistan was grateful to China for investing heavily in Pakistan.

"We are grateful to our Chinese friends for extending their support. Pakistan-China friendship is unique example in the world," Ayaz Sadiq said.

The New Chinese Embassy, China's largest ever diplomatic Mission overseas, is the most beautiful spacious building of Islamabad

China maintains large diplomatic missions abroad including Washington, New York and New Delhi. Its mission in New Delhi has over 300 personnel, according to officials. With the launch of new compound of Embassy, Chinese mission in Pakistan becomes the largest one.

Earlier this year, China agreed to construct two nuclear reactors to generate 1100MW electricity which is expected to cost \$6.5 billion in addition to the four medium size reactors. The agreement was signed during Chinese president Xi's two-day visit to Pakistan earlier this year.

On 29 April 2015, Prime Minister Nawaz Sharif announced to build new Gwadar city with the Chinese cooperation whose effects will reach entire country, adding further, that China's investment in Pakistan under China-Pakistan Economic Corridor project envisages construction of motorways and installation of energy projects.

China-Pakistan Economic Corridor is a landmark project, which will connect Pakistan's deep seaport Gwadar with China's Xinjiang region bordering with Gilgit Balochistan.

"Both the Pakistan and China are discussing a number of mega projects under the rubric of Economic Corridor in several fields like energy, infrastructure and connectivity which would revitalize Pakistan's economy," Nawaz Sharif said last month.

Pak-Chinese JF-17 Knocks At World Fighter Aircraft Market -- Defence World

Pakistani-Chinese JF-17 Thunder fighter might be the beginning of the end of western dominance of the global fighter aircraft market.

The JF-17's international flight debut at the Paris Air Show 2015 was further enhanced by the absence of US fighters such as the F-16 and F/A-18. In addition the Eurofighter Typhoon, Saab Gripen and BAE Systems Hawk too did not take to the Skies.

The JF-17, flown by Pakistani air force pilots was the only new fighter at the flying displays. It stole the show with its deft flying and the lone announcement for fighter aircraft order at the show.

The Pakistani marketing team announced the sale of the low-cost, lightweight, single-engine, multi-role combat jet JF-17 to an Asian country on Monday. The fighter estimated to be priced at \$20 million apiece is cheaper than any western fighter aircraft and might be just about twice that of the light attack and surveillance aircraft, Embraer Super Tucano which costs an approximate \$10.6 million apiece.

The JF-17 costs a fourth of the American-built F-16s (estimated \$80 million apiece) and a third of Swedish Saab JAS Gripen (estimated \$61 million) and fifth of Eurofighter Typhoon and Dassault Rafale (estimated \$95 million apiece).

Pakistan has ordered 50 of JF-17s to be delivered in the next six months costing anywhere between \$1 billion and \$1.25 billion.

Although the aircraft has not been selling like hotcakes on the international budget fighter market, Yesterday's deal might be the start of sales to other countries.

Pakistan had offered 16 JF-17 jets under a tender for the Bulgarian Air Force in March this year.

Senate body for increasing allocation for CPEC in PSDP 2015-16 -- APP

ISLAMABAD: Senate special Committee on project of China-Pakistan Economic Corridor (CPEC) on Wednesday decided to write a letter to the federal government proposing to increase allocation of funds in Public Sector Development Fund (PSDP) 2015-16 for both western and eastern routes of CPEC.

Senator Taj Haider who is also convener of the committee said keeping in view the importance of the project, more allocation was needed to complete it as soon as possible.

He said the purpose of forming this committee was to present various recommendations to address grievances and objections of concerned stakeholders.

Taj Haider said in order to listen to the grievances of the local stakeholders of Gwadar, a meeting would be held in Gwadar during first week of July 2015 in which all concerned stakeholders would be invited to address their concerns.

Senator Usman Kakar said the government was not fully implementing the decision of All Parties Conference (APC) on CPEC as it was depicted in the PSDP where the eastern route has given more priority over the western route.

Senator Kabir Ahmed said Gwadar was the central point of CPEC but it was being neglected and no energy and other development projects were being launched in this area.

He demanded to launch special package for well being of the local people of Gwadar as most of the local people were living under the poverty line.

Senator Chaudhry Tanvir said currently Gwadar was totally dependent upon Iranian electricity and it was not connected to the national grid so the government should link Gwadar with the national grid immediately.

He proposed to construct a railway line from Dalbandin to Gwadar so that this area could be linked with the rest of the country through railway line. Senators Nehal Hashmi, Karim Ahmed Khawaja, Mian Muhammad Ateeq Shaikh, Muhammad Talha Mehmood, Iqbal Zafar Jhagra and Hidayatulla also participated in the meeting.

300 Pak-China co-developed JF-17 Thunder to be sold -- Web Desk
BEIJING (Web Desk) – Three hundred JF-17 Thunders, co-developed by Aviation Industry Corporation of China (AVIC) and Pakistan's Air Force (PAF), are expected to be sold with in next 10 years.

Yang Ying, president of China National Aero-Technology Import & Export Corporation (CATIC), revealed during a press conference jointly held by China and Pakistan, reported People's Daily Online.

Chief project director of JF-17 fighter project of PAF, Marshal Arshad Malik said, "The JF-17 Thunder is cost-effective and its potential is unrivaled among fighter jets at the same level."

To date PAF has established three JF-17 fighter squadrons and plans to equip them with at least 250 JF-17 fighters in the next few years.

China and Pakistan signed a deal to develop the fighter in 1998. The first batch of JF-17 Thunders was delivered to Pakistan in 2007.

4,000 cops to guard Chinese -- The Nations

LAHORE - The Punjab police department on Saturday announced more than 4000 vacancies of Constable in the Specialised Protection Unit (SPU), a unique and highly-trained force to provide security cover to the foreigners, particularly the Chinese.

"At least 4076 constables will be recruited in the Punjab Police's Specialised Protection Unit (SPU) with the purpose to provide foolproof security to the foreign experts working on various government projects in the province," a police spokesperson confirmed on Saturday.

These vacancies are being advertised in the national dailies during the next couple of days, the spokesperson added.

According to official sources, at least 918 posts will be advertised for Lahore region, 245 for Sheikhpura region, 546 for Rawalpindi, 227 for Sargodha, 170 for Sahiwal, 350 for Multan, 274 for DG Khan, 266 for Bahawalpur and 471 constables will be recruited for Faisalabad police region.

These constables will be recruited in pay scale 5 and five percent quota has been fixed for minorities and 10 percent for retired army personnel.

After proper professional training, these constables would be deployed at development project sites to provide security to the foreign experts.

Hundreds of Chinese nationals are working on various development projects across Punjab.

Since China has pledged over \$40 billion investment, which is being seen by economists as a "milestone in the history of Pak-China relations", more Chinese are expected to arrive in the energy-hungry country to share their expertise.

Therefore, the authorities are establishing a well-equipped and highly-trained special unit to provide protection to the foreign experts, an official explained.

This Specialised Protection Unit (SPU) of the provincial police had been formed to protect foreigners working in the province.

The project was expected to be fully functional by June 30 but financial constraints and bureaucratic mess delayed the progress, official source believe.

The government had decided to form a new unit to ensure foreigners' security in March 2014.

The initiative has been taken after proper working since many foreign experts were reluctant to work on the development projects citing security concerns.

The SPU will provide foolproof security to foreign engineers and technicians working on projects across the province.

According to officials, this is the responsibility of the state to provide best security to win the confidence of foreign companies, encouraging them to invest in Pakistan.

At present, hundreds of police commandoes are deployed at Nandipur Power Plant, Iron Ore Plant Chiniot, Jinnah Barrage near Mianwali and at Quaid-i-Azam Solar Plant in Bahawalpur.

The SPU headquarters are being established at Farooqabad Police Lines.

According to the proposed plan, the SPU will be headed by a police officer of the rank of Deputy Inspector General (DIG) with two SSPs, and four SPs.

Once the recruitment and training is completed for the unit, it will be made independent from the district police.

The SPU officials would be provided Elite Police Force training and their salaries would be equal to those of the EPF personnel.

"SPU staff will not be transferred to other branches," police sources said.

A senior police officer said that the SPU was expected to take over the security of almost all development projects where foreigners are working.

The provincial government had allocated Rs1.2 billion for procurement of automatic weapons, vehicles, wireless sets, night vision goggles and other modern security gadgets for the force to make it operational.

Chinese desk set up at foreign security cell -- Dawn

KARACHI: The Sindh police on Monday announced setting up of a 'Chinese desk' at its foreign security cell amid growing presence of the neighbouring country's professionals in the province working on more than 100 projects after reinvigorated economic relations between the two countries.

To design a security plan for the hundreds of Chinese professionals and visitors in Sindh, IGP Ghulam Hyder Jamali presided over a meeting at the Central Police Office (CPO) which led to the new plan and appointment of a high-ranking officer to look after that.

"The foreigners' security cell would be strengthened further," said a CPO statement issued after the meeting. "This was decided at a high-level meeting held at the CPO, which reviewed security matters pertaining to Pak-China Economic Corridor projects as well as other projects already going on in Sindh besides the security of Chinese citizens."

The meeting was informed, the statement said, that currently Chinese citizens were busy with their professional duties at 109 projects being carried out in different parts of Sindh.

"The Sindh IG directed the AIG operations that a Chinese desk be established at the AIG operations office with a monitoring room to further strengthen the security of foreigners, especially Chinese," added the statement. "The meeting decided to strengthen further the foreigners' security cell. It was also decided to set up a separate cell for the security of Chinese workers at the Pak-China Economic Corridor projects."

The Sindh IG also issued orders for a committee to execute all decisions taken during the meeting regarding security of foreigners, mainly the Chinese nationals, in the province, added the statement.

"The additional IG informed the meeting that the Karachi police were introducing an emergency alert system for security of Chinese and foreign workers at various ongoing projects in the metropolis," it said.

Sri Lanka might become the first customer to acquire the JF-17 Thunder fighter jet from Pakistan. -- Defense World

According to Pakistan based 92NewsHD reports, Sri Lanka might order around 18-24 lightweight multi-role jets, which are locally produced in cooperation with its ally China.

The report confirms Pakistan's claim of selling its JF-17 Thunder fighter to an Asian country at the Paris Air Show 2015 earlier this month.

The news report suggests that Sri Lanka might be the first to purchase the JF-17 arose earlier this month when a photo of the office of a Sri Lankan air force commander revealed a scale model of the JF-17.

The JF-17 is developed jointly by the Pakistan Aeronautical Complex and the Chengdu Aircraft Corporation of China is also known as FC-1 Xiaolong in China.

Sri Lanka has seven J-7 fighter jets and nine Y-12 transport aircraft acquired from China and has an additional order for two MA60 transport aircraft.

Desalination plant of 2 MGD at Gwadar starts functioning -- BR

On the directives, of Chairman NAB, Qamar Zaman Chaudhry, NAB Balochistan took cognisance to expedite the completion of mega project of Desalination Plant of 2 MGD at Karwat (Gwadar). In order to ensure safe and cheap portable water to the 0.25 million people of tehsils, Gwadar and Jevni. The project was pending for a long time. Due to NAB efforts, the mega project of Desalination Plant of 2 MGD at Karwat (Gwadar) has started functioning for the last three months and people of Gwadar and Jevni are being provided safe and cheap portable water to the 0.25 million at their doorsteps.

The project was initiated in 2006. However, the project kept on delaying on one pretext or the other till the NAB Balochistan on the directions of Chairman NAB, Mr Qamar Zaman Chaudhry took the cognisance of the undue delay in the completion of the project. Subsequently upon taking cognisance, an inquiry was authorised against the officials of BDA and the contractors of the project. Relevant record was collected, concerned were examined and ground check was conducted. Finally, the officials and contractors agreed to resume the work.

It is important to mention here that there was no pipe line laid for the supply of water to the city of Gwadar and adjoining areas. Due to NAB's efforts, Public Health Engineering (PHE) Department, Balochistan managed to lay the water supply pipelines in the city. Currently, the PHE Gwadar is ready to manage the supply of water from the plant to the public. The contractors are also bound to operate and maintain the plant for one year after commissioning. The people of Gwadar and Jevni, Balochistan have welcomed Chairman NAB and NAB Balochistan's humanitarian efforts for provision of safe and cheap portable water to the 0.25 million at their doorsteps.

Economic corridor: Pak, China to establish tech school -- Express Tribune

Pakistan and China will jointly establish 'IIU New Silk Road School of Technology'. This was agreed in a meeting between a Chinese delegation led by educationist Din Hai Tao and International Islamic University Islamabad (IIUI) Rector Dr Masoom Yasinzaï. The delegation also consisting of Chinese entrepreneurs offered faculty and management support for the school.

The meeting mainly focused on utilisation of the corridor in developing skilled youth in Pakistan through bilateral cooperation. A memorandum of understanding was also signed according to which China would provide cooperation through universities.

The participants discussed ways of developing platforms of vocational training, scholarships, exchange of students and faculty and other opportunities.

A joint committee would soon be formed so as to arrange a conference on 'Pak-China Economic Corridor' in which intellectuals, famous success stories and core leaders of both the countries would participate.

"Pak-China Economic Corridor is a revolutionary step and its materialisation and operationalisation would be a 'win-win' situation for both the countries" Yasinzaï said.

The rector also apprised that more than 700 on campus Chinese students are acquiring education at IIUI.

"Educational institutions should focus on creating human resource relevant to the needs of society. IIUI is working on same vision because knowing the needs of society is like having solution to the problems" he added.

Chinese delegates said that different organisations of international repute in China are ready to give opportunity to Pakistani students to broaden their exposure and skills.

They also endorsed the suggestion of the rector that at least 50 students from Pakistan's different areas be selected and given opportunity to learn in China.

Din Hai Tao invited the IIUI rector to visit China and assured all possible support in expanding mutual cooperation. Delegates were later given souvenirs by the rector.

China opens new compound in Islamabad, the largest in all Chinese embassies across the world: Ready to jointly plan, construct economic corridor with Pakistan: -- Daily Times

ISLAMABAD: China on Tuesday said it is ready to make joint efforts with Pakistan in planning and constructing the China-Pakistan Economic Corridor (CPEC).

"We share the same dream of achieving economic growth, social progress, people's well-being and national peace and prosperity," Chinese Ambassador to Pakistan Sun Weidong told the inauguration ceremony of the new building of the Chinese embassy in Islamabad.

The new compound is the largest one by land area among all Chinese embassies in the world.

The ambassador said that the CPEC, as a significant part of the Belt and Road Initiative, is based on the principles of broad consultation, joint contribution and shared benefits.

"It is a corridor that covers Pakistan and benefits the Pakistani people and combines the complementarities of both countries for win-win cooperation and common development," he said, and added that the corridor will help strengthen

regional connectivity and promote peace, stability and development.

"We are fully confident that the future of China-Pakistan relationship is broad and bright. We'd like to work with Pakistan with unremitting efforts, to translate the grand blueprint formulated by our leaders and our shared dreams into reality in the years to come," he said.

The ambassador said Chinese President Xi Jinping paid a successful state visit to Pakistan this year. The two leaders made the plan for the future direction of China-Pakistan relationship together, he said. "Now, the China-Pakistan substantive cooperation is in full swing and the construction of China-Pakistan Economic Corridor maintains a good momentum," he said, and added that the China-Pakistan relationship is now faced with historical opportunities.

In his remarks about the new compound, the ambassador expressed his thanks to the Pakistani government for providing such a space and termed it as the new reflection of the China-Pakistan friendship.

The New Compound, backed by the grand Margalla mountains in the north, faces Rawal Lake in the south which brings a broad view of a magnificent and diversified landscape. The ambassador informed the audience that the design of the new compound originated from the typical Huizhou architecture style, one of the major traditional Chinese architecture schools.

On the overall layout, the New Compound takes the advantage of the background mountains and stands in harmony with the surroundings, he added. On the visual effect, it is simple and plain with dark blue tiles and white walls. On the space utilization, it is rationally distributed with rhythm.

He said, "On the interior decoration, it is inclusive and full of cultural heritages. Overall, it is gracious yet cordial, grand yet delicate. It can be regarded as the combination of traditional Chinese culture and modern design."

Sun Weidong said that it will serve as a window and platform for all the friends to have a better understanding of the Chinese culture and civilisation. He termed the completion and launching of the compound as testimony to the all-weather friendship between China and Pakistan.

He said that the land, premises and ancillary facilities of the original compound of the Chinese Embassy will be returned to the Pakistani government.

He said that on the approval of the Pakistani government, the permanent address of the new compound of the Chinese Embassy in Pakistan will be "No. 1, Zhou Enlai Road, Diplomatic Enclave (Extension), Islamabad".

Premier Zhou Enlai, the founder of China-Pakistan friendship, is also the great Chinese leader who has been deeply loved by peoples of two countries. "We feel very proud to have the Chinese Embassy in Pakistan located on the road named after our beloved leader," he added. He said the New Compound was just a piece of blueprint years ago, but after continued efforts, it has now turned into reality, adding, "I think that is also true with the development of China-Pakistan relationship."

Speaker National Assembly Sardar Ayaz Sadiq was chief guest on the occasion who formally inaugurated the new compound.

Punjab Chief Minister Shahbaz Sharif, Minister of Planning, Development and Reform Ahsan Iqbal, Minister of Defence Khawaja Asif, Minister of Information Pervaiz Rashid, Minister of National Food Security & Research Sikandar Hyat Bosan, Minister of States & Frontier Regions Abdul Quadir Baloch, Special Assistant to Prime Minister on Foreign Affairs Tariq Fatemi also attended.

Speaker Ayaz Sadiq said the new compound would become a icon of the Pakistan-China friendship. He said that the magnificent state of the art compound of the

Pak, China agree to expedite work on solar power park -- Daily Pakistan
ISLAMABAD (Web Desk) – Pakistan and China have agreed to gear up work on generating 900 megawatts of electricity in Bahawalpur Solar Power Park.

The understanding came at a meeting between Punjab Chief Minister Shahbaz Sharif and a Chinese delegation in Lahore today, Pakistan Broadcasting Corporation cited.

In his remarks on the occasion, the chief minister said the solar power park project is part of China-Pakistan Economic Corridor project. He said the project will be completed by 2016 while 300-megawatt of electricity will be generated from the power park by the end of this year.

Deepening partnership: Pakistan looks to Russia for satiating energy demand -- Vision Tribune

In an effort to meet the burgeoning demand for electricity and gas, the government has found a new partner – the energy-rich Russia that has vast reserves of oil and natural gas.

In recent years, energy supply has become a major challenge for Pakistan where hours-long outages and gas rationing have been part of the daily life of ordinary people and industrial and commercial concerns.

Though some initiatives have been taken by the present and past governments to clinch major energy deals like the Iran-Pakistan (IP) and Tapi gas pipelines and Central Asia-South Asia 1,000-megawatt power import programme, implementation work on these has not yet begun.

The energy projects agreed as part of the China-Pakistan Economic Corridor (CPEC), however, have become encouraging and may be executed on a fast track.

Read: Pak-Russia ties: Big room for enhancing trade, says envoy

Now that Prime Minister Nawaz Sharif is going to Moscow on July 9, Pakistan is likely to sign a \$2-billion energy deal with Russia for laying a liquefied natural gas (LNG) pipeline from Karachi to Lahore, officials say. However, the partnership may spark angry reaction from India.

“We are trying to sign an LNG pipeline accord with Russia in a government-to-government arrangement during the visit of prime minister to Moscow,” Petroleum Minister Shahid Khaqan Abbasi said while talking to The Express Tribune.

Sharif would be in the Russian capital to attend a summit of the Shanghai Cooperation Organisation (SCO) and in talks on the sidelines, the two countries are expected to ink the \$2 billion accord.

Indian premier Narendra Modi is also likely to attend the SCO gathering and he may express concern over the Russian investment in Pakistan. He has already reacted against the CPEC agreement.

During the SCO meeting, Pakistan and India are expected to get permanent membership of the regional forum as Russia and China are pleading the cases of the two South Asian states. At present, Pakistan and India have observer status in the SCO.

In addition to financing the pipeline, Russia has also agreed to export LNG in a bid to help ease energy shortages in Pakistan. This issue will also come up for discussion during the talks.

The two sides have already signed an initial deal in the form of a protocol and finalised an agreement during earlier talks in Moscow. Under the partnership, Russia will provide \$2 billion to lay a 1,100km pipeline from Karachi to Lahore for supplying LNG that will be imported from Qatar and other countries. Pakistan will award the contract to Russia without inviting bids.

Read: Defence union: Pakistan, Russia to conduct joint military drills

In the 1970s, Russia had helped to set up a steel mill in Karachi and also supported Oil and Gas Development Company, which is still using old Russian machinery in exploring oil and gas.

Pakistan is currently working on two LNG pipelines as an alternative to the shelved IP gas pipeline project including the Gwadar pipeline and the south pipeline from Karachi to Lahore.

The government has signed a deal with China for the award of the \$3-billion

Gwadar LNG pipeline and terminal project.

Earlier, Pakistan had invited China and Russia to lay the IP gas pipeline but both hesitated because of western sanctions on Iran.

According to officials, a commercial deal will also be inked with a Russian firm following the pact between the two governments.

"The Russian side is very positive about helping Pakistan in tackling the energy crisis," an official said. "It will start LNG exports in 2016."

An LNG terminal has started functioning in Karachi with the first LNG shipment brought by the private sector at the end of March.

At present, the pipeline network has the capacity to transport 320 million cubic feet of LNG per day and the government is striving to build an additional pipeline.

Pak, China to join hands to promote research in agri sector -- Daily Times

Pak, China to join hands to promote research in agri sector

ISLAMABAD: The Pakistan Agriculture Research Council and the China Lanzhou University plan to establish the Ecological Cycle Agriculture Research and Development Centre with an aim to promote research and development in the agriculture sector.

A four-member Lanzhou University delegation led by Science and Technology Department Director Dr Ruijun Long on Monday visited the National Agriculture Research Centre (NARC) where it was briefed in detail about the working of PARC, NARC and their research and development projects.

PARC Chairman Dr Iftikhar Ahmad, members and secretaries of the council, NARC Director General Dr M Azeem, International Centre for Integrated Mountain Development (ICIMOD) Pakistan Country Representative Dr Jesra and other senior officers of the council were also present on the occasion.

Speaking on the occasion, Dr Ruijun said that the Lanzhou University president is scheduled to visit Pakistan in September during which agreements for the development of agriculture and collaboration between the two institutions would be discussed in detail. He said that memorandums of understanding (MoUs) and agreements between the two organisations would also be signed during the visit.

He added that before this visit a renowned professor of the university is also scheduled to visit Pakistan in July. The aim is to enhance and strengthen collaboration between the two institutions in science and technology, he said. His university, he added, has been providing higher education to foreign students, which include students from Pakistan.

Speaking on the occasion, Dr Iftikhar Ahmad stressed the need for implementing the agreements for the benefit of both the organisations. He said that growth of the agriculture sector was important to ensure poverty alleviation. He expressed the hope that the centre would become a hub for promoting research and high learning.

It is pertinent to mention here that both the institutions have had signed an MoU for Biomass Energy Research and Application in 2013, expanding friendship and cooperative educational exchanges.

June 30, 2015 Continued

Tue

Earlier, NARC DG Dr Azeem gave a detailed presentation to the visiting delegation on the working and performance of NARC. He briefed the delegation about the research conducted at the center on various crops and other agriculture yields.

IIUI, CHINESE ISLAMIC COUNCIL INK MOU FOR TECHNOLOGY SCHOOL -- Pak Observer

Wednesday, July 01, 2015 - Islamabad—International Islamic University, Islamabad (IIUI) and Council of Islamic Chinese Relations of China (CICRC) have penned an MoU for establishing "IIUI New Silk Road School of Technology" at IIUI.

Chinese Council will provide full support for infrastructure, equipment and faculty members for the school, while Chinese faculty would impart technical training to the students of school to cater the needs of human resources for joint Pak-China projects under Pak-China Economic Corridor.

The MoU was signed here at Faisal Masjid campus of IIUI by the IIUI Rector Dr. Masoom Yasinzaï, and Dr. Ding Houfei, President, Council of Islamic Chinese Relations in presence of Vice President Academics (IIUI) Dr. Mohammad Bashir Khan, Director General (IIUI) Gulzar Ahmed Khwaja and Chinese delegates.

According MoU, both sides would jointly hold conference, seminars, lectures and exchange of faculty, students to share the experiences. Both sides agreed that a committee will be formed to ensure execution of the plans set to achieve the goals . It was agreed that exchange of research and cooperation in development of training strategies and programs would be extended by both sides.

Talking on the Mutual cooperation and importance of economic corridor, Dr. Masoom Yasinzaï said that IIUI and Chinese organizations' mutual cooperation in enhancing human resource can be proved as one of the pioneer steps for the success of the economic corridor.

He maintained that this opportunity can help in brining improvements in the education sector and it would also increase people to people contact between both countries.

Dr. Ding Houfei said on the occasion that different organizations of international repute in China are ready to give opportunity to Pakistani students where they can broaden their exposure and skills as well.

Meanwhile, An Iftar dinner was also hosted by Rector IIUI in honor of Council of Islamic Chinese Relations of China, on the sidelines of MoU.

China offers \$50 billion for hydroelectric projects in Pakistan -- The Economic Times

ISLAMABAD: China's state-run power company, Three Gorges Corporation (CTG), is keen to participate in a financing consortium to fund up to \$50 billion of hydroelectric power projects in Pakistan, a media report said.

This disclosure was made at the meeting of the Cabinet Committee on Energy on June 18. The CTG expressed interest in financing projects in Pakistan in conjunction with the International Finance Corporation, a World Bank subsidiary, the Express Tribune reported today.

"The offer comes on top of the \$46 billion in financing for power and transportation infrastructure being provided by the Chinese government and Chinese banks to Pakistan for the construction of the China-Pakistan Economic Corridor (CPEC)," the paper reported.

If the offer pans out, it would make China the biggest financier of infrastructure in Pakistan by far.

CTG owns and operates the world's biggest Three Gorges Dam, having a capacity of 22,500 megawatts, which is equal to Pakistan's total installed capacity of 23,500 MW.

Pakistan has a potential of producing up to 60,000 MW of hydroelectric power, of which 40,000 MW is located in a region called the Indus Cascade, which begins in Skardu in Gilgit- Baltistan and runs through to Tarbela, the site of Pakistan's biggest dam, in Khyber-Pakhtunkhwa.

The biggest project the government has already identified and begun preliminary work on is the Diamer Bhasha dam, which would require USD 15 billion to construct and would have a nameplate capacity of 4,500 MW.

Pakistan is trying to end crippling energy crisis and already started several projects to tackle the power outages by the end of 2017.

All Day

Way cleared for launch of Chinese-led Asian Infrastructure Investment Bank (AIIB) -- The Nations

On Monday 29th June, 50 countries including Pakistan signed the Articles of Agreement (AOA) for the formal launch of Chinese-led Asian Infrastructure Investment Bank (AIIB) at an impressive ceremony held at Beijing, which determined each member's share in the proposed capital and the Bank's initial Capital. The AIIB will begin with an authorized capital of \$50 billion, eventually to be enhanced to \$100 billion. The signatories apart from Asian and Latin American nations included UK, Germany and Australia who opted to join the new financial institution despite US opposition to its launch. Seven members are expected to sign by the end of the year when the Bank is set to start its operations. The establishment of the Bank conceived by China became a reality when 21 Asian countries formally signed the MOU for setting up of the Bank on 20th October 2014. Pakistan has been actively associated with the member countries in consultations at all levels to draw up Articles for Agreement since the signing of the MOU.

Finance Minister Ishaq Dar who represented Pakistan at the signing ceremony, dilating on the significance of the AIIB said, "We believe that the bank will be an important platform to convert the abundant savings available in the region into investment, to help regional economies achieve sustainable and rapid development and thereby contribute to the world economy. Pakistan hopes to draw financial support for communication and energy infrastructure projects including projects for construction of roads, dams and power generation". It is indeed hard to disagree with what he has said.

The AIIB as per IMF objectives to promote international economic cooperation, international trade, exchange rate stability and to meet balance of payments needs of the member states, aims at providing finances to the member countries for the development of necessary infrastructure which is considered a vital ingredient for nudging the process of sustained economic growth in the developing countries. It would provide finances to the member countries on less stringent conditions than the IMF and also create a healthy competition among the lending institutions to the benefit of the borrowing countries. China is inclined to make the lending process hassle free, to ensure that the borrowing countries do not have to jump through hoops to get their money.

The US virtually enjoys a veto in the major decisions and policies of the existing international lending institutions by being a major contributor, especially the IMF. Thus, the policies framed by these agencies are heavily tilted towards serving the interests of the developed nations and geared to strengthening the existing global economic order. They lack recognition of the cultural sensitivities and moorings of the borrowing nations. The US and its allies view the establishment of AIIB as a threat to the existing international financial institutions. They fear that the establishment of AIIB would relax their hold on the economies of the developing countries of Asia and also undercut the international institutions like the World Bank, IMF and ADB by relaxing fiscal discipline and good governance. US reportedly also used its influence with Australia and few other countries of the region to stay away from venture. The US fails to acknowledge the fact that the Chinese President on the eve of signing of MOU in October 2014 stated in unequivocal terms that the new bank would use the best practices of the World Bank and ADB and other existing multilateral development institutions.

The AIIB would surely enhance the international stature of China. The US is also worried about any move by China to shift world attention from the existing lending institutions as both are engaged in a fierce competition for pre-eminence in Asia. Some circles believe that the establishment of AIIB was China's reaction to being continuously relegated to second class status at the existing institutions. China also is supporting another alternative institution, the New Development Bank sponsored by BRICS countries. The idea being that if US and its allies would not make room for China at the table then Beijing could take its own initiative.

The IMF loans have political repercussions as they are given on very stringent conditions that almost dictate the borrowing countries as to the policies initiatives it should take to improve the health of the economy. It is more discernible in Pakistan where the IMF is insisting on enhancement in the prices of electricity and gas, phasing out subsidies and increase in regressive sales tax which the government finds very unpalatable in view of its political fall out because they directly affect the poor masses. Pakistan is currently spending a big chunk of its budget on debt servicing.

The establishment of AIIB is indeed a very imaginative and prudent move on part of China and member countries. China's phenomenal rise as an economic power has generated excessive savings which can be productively employed for the benefit of all the countries of the region. The move also has the potential of building strong economic linkages and creation of a regional economic fraternity contributing to the health of the regional economies as well as the global economy.

Pakistan will greatly benefit from the establishment of AIIB as it desperately needs resources to build necessary infrastructure to revive its economy as well as to kick-start a process of sustained economic development. It also needs enormous resources to tide over the energy crisis in the country and ensure energy safety in the years to come. The entire focus of the Pak-China Economic Corridor initiative under which China would be making an investment of US\$ 46 billion, is also on building the infrastructure, which would not only provide easy access for Chinese

products to the littoral states of the Indian Ocean and beyond but also help in a big way to boost the economy of Pakistan. The decision by Pakistan to join hands with China and other Asian countries in the establishment of AIIB stems from the new narrative evolved by the present government for building economic and political linkages with neighbours and Asian countries. Pakistan's security and economic progress is inextricably linked to the region where it belongs. Therefore the emphasis on finding solutions to the security and economic challenges confronting it, through collective efforts of the countries of the region is a pragmatic and visionary initiative.

All Day

Pakistan, China expand economic dimension of their ties: Dar -- AAJ TV

ISLAMABAD: Finance Minister Mohammad Ishaq Dar has said that Pakistan and China have greatly expanded the economic dimension of their relationship as a key priority.

The China-Pakistan Economic Corridor (CPEC) was a flagship initiative in this regard which would speed up economic cooperation and connectivity, he said in an interview withh CCTV NEWS (China).

"We have several institutional mechanisms in place such as Pakistan-China FTA and the Pakistan Joint Economic Committee as well, which would boost trade and investment in the years to come."

Ishaq Dar said that two countries had upgraded their strategic partnership to an "All-Weather Strategic Cooperative Partnership", formalized in the joint statement issued during the visit of Chinese President Xi Jinping's to Pakistan.

The political leadership-level interaction had increased, which would of course further deepen this relationship, he remarked.

Highlighting the significance of Asian Infrastructure and Investment Bank (AIIB), the minister said that the bank would provide financing support to developing countries in Asia, including Pakistan, for infrastructure development in order to promote regional connectivity.

"We believe that the bank will be an important platform to convert the abundant savings available in the region into investment to help regional economies to achieve sustainable and rapid development thereby contributing to the world economy," he added.

The minister said that Pakistan had been supporting the initiative right from the initial announcement for the establishment of AIIB.

The bank, he said, would provide additional financing to support the establishment of infrastructure projects, including construction of roads, dams, power projects etc.

He expected that the bank would cooperate with the existing multilateral development banks by providing co-financing for the development of infrastructure projects in the member countries.

However, he said that the bank would also aim to be leaner and faster than the existing institutions and it would provide some healthy competition.

The AIIB, he added, would distinguish itself from other multilateral development banks (MDB) like the World Bank (WB) and the Asian Development Bank (ADB) because MDBs major focus was on poverty reduction while the AIIB would focus on infrastructure development and regional connectivity.

Ishaq Dar said,"A regional bank provides an excellent framework for decisions about projects and financing, particularly those with cross-border implications at regional level."

Pakistan, he said, had always extended support to China at regional and international fora.

"We believe this is another of China's sincere efforts to help out developing countries that are left out of the race for economic development otherwise due to lack of support from international financial institutions," he added.

He said the banks, which had been previously shouldering responsibilities for lending, were already overburdened and therefore, there had to be some new institution that could come in handy at this critical juncture.

Infrastructure development and poverty alleviation was needed for nations like Pakistan in Asia to ward-off the dangers of extremism and “I think AIIB is a hope for all of us in Asia,” he noted.

Replying to a question about China-Pakistan Friendship Year, Dar said that Pakistan-China friendship was all-weather and time-tested.

“It is an evergreen relationship that has its roots in the hearts and minds of the people of Pakistan and China. It has been the constant endeavour of our government to add more depth and breadth to this all-important relationship,” he added.

As strategic partners, he said, Pakistan and China had always enjoyed excellent cooperation across a diverse range of areas and sectors.

However, he said, “Our two governments have placed a special emphasis on enlarging the economic footprint of this relationship. We believe that the peoples of both countries should enjoy the fruits of this special relationship.”

As a result, he added, both the countries were cooperating on a number of people-centric projects.

The highlight of these projects, of course, was the China-Pakistan Economic Corridor (CPEC), which “we regard as a game changer for our countries as well as the region at large,” he said.

Dar said that the Corridor and its related projects would deliver jobs and prosperity to millions of people in both countries.

Replying to another question regarding Chinese President’s visit to Pakistan in April this year, he said this was President Xi Jinping’s first visit after assuming office in March 2013 and the first by a Chinese President since November 2006.

“This visit was the hallmark of “Pakistan–China Year of Friendly Exchanges: 2015” .

The highlight of the visit, he said, was the signing of over 50 agreements/memorandums of understanding relating to key development projects in infrastructure, energy and communication sectors, under the umbrella of the China-Pakistan Economic Corridor (CPEC) in the governmental and private sector.

Important agreements relating to areas of cooperation outside the CPEC were also concluded, which would go a long way in changing the destiny of the people of the two countries, he added.

Ishaq Dar said that the CPEC was being conceived as a lynchpin of plans by both China and Pakistan to deepen their economic cooperation.

Early implementation of the CPEC would be transformational for Pakistan’s economy and dovetail perfectly with China’s strategy of developing its inland and western regions, he added.

He said that China’s interest in the project was also strategically driven by President Xi Jinping’s visionary concept of integrating regions and countries across the globe under the Silk Road Economic Belt and the 21st Century Maritime Silk Road Initiative.

“It envisages deepening policy coordination amongst countries and regions, extending and improving infrastructure connectivity in all its forms – road, air, sea, rail, telecommunications, energy etc. – across regions, fostering trade and investment flows and, last but not the least, enhancing people to people connectivity. The CPEC fits naturally into this vision of a ‘Road and Belt’ with Gwadar and Karachi serving as its southern nodes and an outlet to the Arabian Sea and the Persian Gulf,” he added.

The minister said that regional and sub-regional economic integration as a means to bolster growth, investment and trade in countries had a long chequered history.

However, he said, the recent history of regional economic integration had had some unmistakable successes.

In fact, this had been one of the major successful developments after the Second World War, he added.

Ishaq Dar said that the regional integration in Europe brought success in terms of regional growth, economic development, investment and trade and more importantly fostered peace in the region.

“Hence Asia can also benefit by following the same pattern. In this respect, the Corridor can provide an integrating platform for over three billion people in Central, West and South Asia, the Middle East and Africa regions”, he added.

He said that the increase in trade, investment, digitalization and financial flows would bring peace and prosperity to the region through enhancement in the competitiveness of the economies of the countries, contribute to reducing regional disparities and social inequality, and improve life expectancy and quality of life in every country and in the region.

Thus in real terms, he added, it could re-open the economic artery blocked for years as said by my Chinese brother.

“This shall become even more relevant when we look at future forecasts that Asia and Pacific region’s share in world GDP between 2010 and 2050 is expected to rise from nearly from 28 to more than 52 per cent, with China accounting for 20 per cent and India for 16 per cent,” he remarked.

Replying to yet another question, Ishaq Dar said that Pakistan had always been upfront and committed towards the issues dear to China’s core interests matching the consistent support, friendship and cooperation provided by both countries to one an

Pakistan's economy better than India's: Bloomberg -- Dunya News

LAHORE: – Pakistan’s economy has been declared better than India’s in Bloomberg report published on Friday. Pakistan has been included among the Top 10 emerging economies of the world, reported Dunya News.

According to the report published by Bloomberg, economic reforms and good relations with the international monetary organizations gave boost to Pakistan economy. It said that the success is better than India’s.

Report says that the payment of loans’ issue was resolved after Prime Minister Nawaz Sharif took over the government. It said that the construction industry also improved, leading to better ratings for Pakistan by Moody’s and Standards and Poors.

Bloomberg report says that interest rate is at 42-year lowest in Pakistan. It says that Nawaz Sharif government kept the economy afloat despite protests in the country. Pakistan wrote a new chapter in the history of reforms, privatization and economic progress, it says, and has become the best undiscovered investment opportunity of the world for investors with a 232-billion dollars economy.

Report goes on to say that Karachi Stock Exchange (KSE) saw 16% improvement during the last one year and is among the 10 best performing stock markets of the world. It says that progress has been observed in cement, construction and steel sectors. It said that the biggest of companies are trying to double their volume.

Appreciating the government reforms, the report says that a 27% increase was

seen in the government expenditure on infrastructure, inflation came down and buying power of Pakistanis increased due to better incomes after Nawaz Sharif government took control in 2013. It says that the current government has also focused on rural progress along with the urban due to which suburban centers are growing fast in the country.

The report also acknowledged China's support for Pakistan, saying that China once again proved to be Pakistan's best friend by investing in 45-billion-dollar economic corridor project. Quoting the business circles in Pakistan, the report says that almost all the fields have observed three-time growth which is a clear indicator of economic progress.

Chinese assure timely completion of Sahiwal coal power plant -- Daily Times

LAHORE: Punjab Chief Minister Shahbaz Sharif, in connection with Sahiwal coal power projects, held a videoconference on Monday from Lahore with president of Hauneng Shandong power generation group in China.

Besides President of Hauneng Shandong, other senior officers of the group also participated in the conference and assured completion of 1320-megawatt coal power project in Sahiwal within stipulated period. Talking to the President of Hauneng Shandong power generation group through video conference, the chief minister said that two power plants of 660 megawatt electricity based on coal are being set up in Sahiwal with the cooperation of China and work is being carried out speedily on this project.

He said that the Sahiwal coal power project is of vital importance for overcoming energy shortage and instructions have been issued to concerned federal and provincial institutions to dispose of all matters relating to the implementation of the project speedily. The chief minister said that Pakistan and China are bound together in strong ties of friendship, which are unprecedented. He said that friendship between the two countries is strengthening with the passage of time.

He said that the visit of Chinese president to Pakistan has promoted historic economic cooperation between the two countries and economic package of China is a big gift for Pakistan. He said that the sincere efforts to remove darkness from the country with the cooperation of China are being furthered speedily as energy projects play an important role in the strengthening of industrial sector of the country as well as national economy. He said that all out efforts are being made for completion of energy projects speedily and Sahiwal coal projects are of vital importance in this regard. He said that he is personally monitoring the pace of progress on these projects regularly.

He said that 1320-megawatt coal power project will start producing electricity from 2017. The Chief Minister expressed satisfaction over the progress made on this project so far and thanked Hauneng Shandong and Ryui group for their invaluable cooperation. He also invited President of Hauneng Shandong group to visit the site of Sahiwal coal power project. President of Hauneng Shandong power group said that work on Sahiwal coal power project will be continued in accordance with the expectations of Chief Minister Shahbaz Sharif and it will be completed within timeline. He said that orders have been given for the purchase of turbines, generators and boilers and all necessary machinery will reach the site of the Sahiwal coal power project before schedule.

Provincial Minister Col.(R) Shuja Khanzada, Inspector General Police, Additional Chief Secretary Energy, Secretary Home, Chairman Punjab Power Development Company, Chairman Punjab Information Technology Board, Secretary Energy, concerned authorities and the head of Chinese team working on Sahiwal coal power project participated in the conference from Lahore while Commissioner Sahiwal RPO, DCO and DPO also attended the conference through the video link. In the conference held through video link various matters regarding Sahiwal coal power projects were considered in detail.

Shahbaz Sharif has said that the entire nation is united for elimination of terrorism and extremism. He said that Pak army has set glorious examples of valor and courage in the war against terrorism. He said that the unprecedented sacrifices of the martyrs will not go waste and Pakistan will become a haven of peace. He expressed these views while talking to assembly members of various districts who met him, here today. Shahbaz Sharif said that the steps taken against terrorism under National Action Plan are yielding positive results and the war against terrorism, extremism and sectarianism is being fought on every front. He said that Pakistan Army has hit terrorists hard through operation Zarb-e-Azb. The chief minister vowed that making Pakistan a safe and peaceful country is the mission of every Pakistani.

He said that terrorists are enemy of the country and the nation and they will be eliminated at all costs. He said that the terrorists will find no place to hide in Pakistan. He said that Pakistan will be made a peaceful country with the power of unity of the nation. Those who met the Chief Minister included MNAs Tahir Iqbal Chaudhry, Mian Alam Dad Laleka, Rana Zahid Hussain, Abid Raza, Advisor Arshad Saeed MPA, former minister Abdul Waheed Arain, Begum Faiza Mushtaq MPA and former MPA Dewan Mushtaq.

Pak, China working on 120 MW power plant in Muzaffargarh -- The Nations

Muzaffargarh: An energy unit is being executed with the Chinese assistance at a sugar mill, to produce 120 megawatt electricity from coal and sugarcane husk.

Chinese Ambassador to Pakistan Sun Weidong visited the Unit that is likely to be completed by February next year, at a cost of 27 billion rupees. The Envoy was briefed that completion and subsequent commissioning of the project would open windows for other sugar mills in the country, to set up their own power plants. He was informed that surplus electricity from this unit would be added to the national grid, with the help of Multan Electric power company.

Speaking on the occasion, the Chinese Ambassador said that his country would continue to help Pakistan in different fields, including power and agriculture sectors.

Good tidings: Iran deal brightens IP gas pipeline prospects -- Express Tribune

ISLAMABAD:

Pakistan has welcomed the landmark nuclear deal signed between Iran and global powers in a move that Islamabad hopes will help remove Western sanctions against doing business with Tehran, the biggest obstacle hindering the completion of the multibillion-dollar Iran-Pakistan gas pipeline project.

“Pakistan welcomes the important comprehensive nuclear agreement reached between the Islamic Republic of Iran and the P5+1,” said Foreign Office spokesperson Qazi Khalilullah, hours after the historic agreement. The P5+1 refers to the five permanent members of the United Nations Security Council – the United States, Britain, France, China, Russia – plus Germany.

As an ally of Western powers, but also a neighbouring country of Iran that sees Tehran as a potential major supplier of cheap energy, Pakistan’s diplomatic stance on the matter has always been a delicate balancing act. “As a neighbouring country, we have also reiterated that reciprocal confidence-building measures relating to Iran’s nuclear programme auger well for peace and security in our region,” Qazi said.

Read: Iran, big powers clinch landmark nuclear deal

Within hours of the announcement of the deal, a discussion was under way in a Senate panel in Islamabad about how the deal would affect economic ties with Iran, specifically the fate of the IP gas pipeline. At a meeting of the Senate Special Committee on Gas Infrastructure Implementation, Petroleum Minister Shahid Khaqan Abbasi sounded an optimistic note about the project with the expectation of sanctions being lifted against Tehran.

“It is our international commitment that we will connect the gas pipeline with Iran. From the Gwadar side we have already started it. With the [expected] relaxation of sanctions, both [Pakistan and Iran] will conclude work on the gas pipeline,” said Abbasi, responding to questions from senators about why work on the gas pipeline had been halted.

Pakistan faces a massive shortage of natural gas as the gap between demand and supply often exceeds 2,000 million cubic feet per day (mmcf). The IP gas pipeline would supply 750 mmcf at rates cheaper than the liquefied natural gas (LNG) Pakistan would most likely begin importing from Qatar. Work on the badly needed pipeline, which was supposed to have commenced operations by December 2014, was halted under intense US pressure, as well as internal fears within the Pakistani banking system that failure to comply with US and European sanctions would result in the country being cut off from the global financial system.

As a result, Pakistan began an alternative plan, building an extended pipeline that would connect Gwadar to the natural gas pipeline hub at Nawabshah.

This new pipeline, meant to transport imported LNG from Gwadar port to the northern parts of the country, would have the potential to be extended to Iran once the sanctions were lifted. Iran tacitly agreed to this plan, and has not yet pressed any late fees on Pakistan for failing to complete the project on time.

“Pakistan never stopped work on this project but sanctions against Iran remained a major stumbling block in executing the project,” said Abbasi.

Combined, the two projects are expected to have a cost of Rs1 trillion (\$9.9 billion). “We are hopeful to start work on the Gwadar LNG pipeline in September this year from Nawabshah,” Abbasi told The Express Tribune.

At this early stage, it is not yet clear how soon the sanctions would be lifted, a fact

that the minister took note of. "We will have to see the modalities of lifting sanctions against Iran, whether they are lifted in phases or in one go," he said.

GIDC bill

The Senate committee also discussed the gas infrastructure development cess (GIDC). Abbasi told the lawmakers that the government has stopped collecting the GIDC from consumer gas bills for the last three months, as a result of which it has only been able to achieve half its Rs272 billion collection target.

Read: IP gas pipeline: Iran threatens to slap penalties for delays

The committee will take up the GIDC bill after Eid. Lawmakers in the Senate have already criticised the government, urging it to present the bill in the Council of Common Interest (CCI) for consultation with the provinces before its passage. Abbasi told lawmakers that Rs100 billion would be collated annually through this levy and it would be used for gas infrastructure, adding that no province is self-sufficient in gas.

All Day

IP pipeline most feasible of energy projects -- The Nation

ISLAMABAD - Iran Pakistan gas pipeline 'Peace Pipeline' is the most feasible of all the projects and the government should start work on it immediately, as it is cheapest and cleanest alternative to the imported expensive LNG, imported coal and furnace oil, official source told The Nation.

The commissioning of the Iran Pakistan gas pipeline also dubbed as "Peace Pipeline" will end reliance on the, most expensive fuel in power sector, furnace oil and will silence various camps currently lobbying for the import of oil and coal, an expert of the Planning Commission said on the condition of the anonymity. Besides, the pipeline will also reduce the importance of the imported coal which the country was planning to import in desperation to meet acute energy shortage. If clean fuel is easily available why one will consider the import of dirty fuel (coal), which is hard to transport, environmentally hazardous and with fluctuating prices, the expert said.

The US-Iran deal has created a hope for Pakistan to quench its thirst for the cheap energy and the government is required to fully and immediately exploit the situations, emerged of Iran nuclear deal. After the indigenous energy resources, the official said, the Iranian gas pipeline is the second priority. "Half of our natural gas deficit of 1500 mmcf will be filled with the construction of Iran Pakistan gas pipeline which will transport 750 mmcf" the official maintained adding that he doesn't believe on the shortage figure of 2000 mmcf figure as it seems too exaggerated. Natural gas is the cleanest burning fossil fuel and is being used throughout the world to reduce carbon dioxide emissions. Compared to coal, natural gas produces far fewer carbon dioxide emissions and sulfur emissions.

Similarly on the LNG side the starting of work on Iran Pakistan gas pipeline will provide an upper hand to Pakistan in its price negotiations of LNG with Qatar or any other country of the world," the official maintained. Now the government should public the prices of LNG, as we will still need LNG import but on Pakistan's terms, the expert maintained adding that Pakistan is a huge market for the gas but we need to avoid long term and expensive agreement for the LNG import.

Pakistan was planning to import 500 million cubic feet per day (mmcf) of LNG from Qatar which will ultimately reach to 2000 mmcf in coming three years, but after the IP commissioning the country will have a shortage of 750 mmcf of gas so we only need to import one-third of the earlier planned import, the expert said.

The federal Minister for Petroleum and Natural Resource has earlier told the Senate Special committee that Pakistan has never stopped work on Iran Pakistan pipeline and work from the Gwadar side have already started. "Connection of the pipeline with Iran is our international commitment and we have to fulfill it" the minister said adding that Pakistan never stopped work on this project but sanctions against Iran were a major hurdle in its execution.

Work on the pipeline was supposed to have completed by December 2014, was halted under intense US pressure. As an alternative plan, it was decided that a 700 km LNG pipeline from Gwadar would be laid to connect it to the main natural gas pipeline at Nawabshah. A LNG terminal has been proposed at Gwadar. The Gwadar-Nawabshah pipeline would also be ultimately extended by 71 kilometers towards the Iranian border for transportation of gas. According to Minister of Petroleum Shahid Khaqan Abbasi, the two projects are expected to have a cost of Rs 1000 billion.

First conceived over 20 years ago, the 1682km pipeline will transport gas from Iran to Pakistan and China is currently financing the construction of a gas pipeline from Nawabshah to Gwadar.

Once that is built, Pakistan has reportedly agreed to finance the project. The pipeline, to be completed in two years, would eventually supply Pakistan with enough gas, 750 mmcf, to fuel 4,500 megawatts of electricity generation, which is country's current electricity shortfall.

Under the IP contract, Pakistan is bound to pay a penalty as it failed to complete the construction of its portion of the pipeline by December 31 2014. But Iran tacitly agreed to the alternative plan, of constructing Gwadar-Nawabshah pipeline, and has not yet pressed any late fees on Pakistan. Iran has already completed the 900 km section of the pipeline on its territory.

Now Pakistan needs to accelerate work on the project as earlier due to sanction no international lender was ready to fund the project but now the scenario has totally changed and beside China other countries and institutions will be ready to provide

the money for the early completion of the project, the expert maintained.

China-funded LNG project to turn into Iran-Pakistan gas pipeline:

Abbasi -- Pakistan Today

With Iran's nuclear deal finally secured, Pakistan is hoping to be one of its first benefactors by using the China-funded LNG pipeline to complete the much delayed IP gas pipeline project.

According to Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi, the solution to Pakistan's energy woes lies in importing more natural gas to adequately meet its energy needs.

"Gas is 50 per cent of Pakistan's total energy needs today," he told Voice of America.

However, Pakistan may not be able to complete the IP gas pipeline project without financial assistance from China as the expected cost to complete it is a hefty amount of \$2 billion.

China is likely to fund 85 per cent of the \$2 billion required to build a liquid natural gas terminal at Gwadar and to install a 700 kilometre-long pipeline to other areas.

The LNG project is expected to start in October this year and will take 30 months to build. "The same pipeline will turn into the Iran-Pakistan gas pipeline when the time comes," said the petroleum minister.

"So as soon as we see that the sanctions are lifted or being lifted, there is only [an] 80 kilometre stretch of pipeline that we have to build. And that can be built in about six months," Abbasi explained.

Gwadar is at the heart of China, Pakistan Economic Corridor (CPEC) which will connect the port city to western China's autonomous Xinjiang region with a network of highways, railways and pipelines.

The \$46 billion CPEC will connect China to the sea which would drastically reduce shipping times and costs from its mainland to the Middle East and Europe.

Government officials believe that trade with Iran will significantly improve after the sanctions are lifted, with crude oil, petrol and diesel being some of the hot commodities.

Further, the Iranian oil that was previously being smuggled into the country will now be formally brought to the market, they said.

The Iran-Pakistan gas pipeline had long been stalled owing to the imposition of international economic sanctions on Iran in response to its nuclear development programme.

Pakistan's energy crisis has worsened in the past years, calling for drastic measures to improve the crippling energy sector so it can boost the country's frail economy.

Unannounced power outages are common not only in rural but urban areas as well and the recent heatwave, that hit the country's southern parts, made matters worse.

Over Rs 20,000m allocated for Western alignment of CPEC -- Radio Pakistan

Government has allocated twenty thousand and three hundred million rupees for Western alignment project under China-Pak Economic Corridor (CPEC).

An official of National Highway Authority (NHA) said in Islamabad that twenty-eight hundred million rupees have been allocated for Gwadar-Turbat-Hoshab section of Gwadar-Ratodero Highway.

He said twenty five hundred million rupees have been earmarked for widening and improvement of Hoshab-Nag-Basima-Surab Highway.

Three thousand million rupees have been approved for Zhob-Mughal Kot section of Kuchlak-Zhob-D.I.Khan.

The official said ten thousand million rupees have also been allocated for land acquisition and construction of western alignment and other CPEC projects.

To a question, the NHA official said that western alignment of China-Pakistan Economic Corridor (CPEC) would become operational by December next year.

He said that Balochistan province will be the biggest beneficiary of CPEC.

China renews pledge to complete CPEC at any cost -- The Nations

ISLAMABAD - China has reaffirmed its total commitment to complete China Pakistan Economic Corridor (CPEC) at all costs after Pakistan's political leadership took ownership of multibillion dollars project that would benefit the two brotherly neighbouring countries.

This resolve came from within China's powerful ruling party - Communist Party of China (CPC) - and that too with a greater sense of gratification over the manner Pakistan's political leadership took a consensus decision about CPEC's western alignment.

"It's really gratifying that all the political parties in Pakistan have consensus on this project. CPEC will be built with consensus within 'one belt one road' framework", Chen Fengxiang, CPC's Vice Minister for International Department, has reaffirmed. Chen, who spoke to The Nation in Beijing on July 9, was of the view that the China-Pakistan relations have reached historical level as CPEC will help further cement bilateral ties between the two nations.

China had to secure ownership of CPEC from mainstream political parties in Pakistan for a number of reasons.

There could be many reasons to that, but there are three factors which are chiefly responsible to push Beijing to secure political ownership for the CPEC project.

One of the three reasons is that it wanted to create a political framework which it would use to negotiate with other countries which will become part of the project called 'one belt, one road'.

The 'one belt, one road' project is also part of Chinese 21st century vision of reviving the old Silk Route that would connect 54 countries through land, rail and sea routes. The second factor for securing political backing for the CPEC is to ensure that all political parties are on the same page, and have consensus on the \$40 billion plus project to be completed by 2030.

China had proposed the idea of CPEC to Pakistan in September, 2013 when Pakistan People's Party Parliamentarian (PPPP) was in power with party's co-chairperson Asif Ali Zardari, as President of Pakistan.

The proposal was deliberated threadbare by China and Pakistan and both the countries eventually agreed on North-South route connecting all the four provinces through highways with Gwadar port and Kashgar, the western most Chinese city. Apart from PPPP, the ruling party in China has also cultivated good friendly ties with almost all the political religious parties of Pakistan and deepened party to party cooperation on various issues of mutual interest including eradication of terrorism. Yet, the PPP and CPC enjoy unique relations largely for the historic ties between the two political entities of China and Pakistan.

The CPC was gratified on the role of PPP for hosting an All Parties Conference (APC) on the controversial issue of route change that helped evolve a broad based national consensus on developing the western alignment of the CPEC first.

This was followed by another APC convened by the Prime Minister Nawaz Sharif which after deep deliberations also agreed to undertake the western alignment.

A high level PPP delegation, led by former deputy speaker of the National Assembly Faisal Karim Kundi, has recently visited China, conveyed to the CPC leadership of the decision about the western alignment.

"Despite differences among the political on other issues, all the political parties in Pakistan are on one page when it comes to China", Faisal Karim Kundi told Vice Minister Chen Fengxiang.

The 4000 km road being constructed between Gwadar and Kashgar as key component of the 'one belt, one road' that would eventually connect as many as 54 countries has been designed by the Chinese government.

Despite major challenges Beijing has opted for the CPEC to be undertaken first because of its feasibility.

Pakistan Army has set up a special security division for the security of Chinese nationals working on the CPEC.

According to National Highway Authority (NHA), the construction work on highway connecting Gwadar port with upcountry on the western alignment is in progress as Frontier Works Organization (FWO) has completed more than 500 kilometers road. Similarly, work on various patches of the western alignment is also in progress including the strip from Burhan motorway intersection to Havallian and upto Thakot. Work on a number of bridges and tunnels is also being executed.

Gwadar port, CPEC to be completed at all costs: Army Chief -- Dunya News

PANJGUR) – Army Chief General Raheel Sharif said on Saturday that Gwadar port and China-Pakistan Economic Corridor (CPEC) will be completed at all costs. General Raheel said that army is well aware of nefarious plans of enemies and will crush such intentions with full force, reported Dunya News.

According to Inter-Services Public Relations (ISPR), roads constructed are a part of CPEC. 502 out of 870 kilometres worth of roads have been constructed.

Admiring Frontier Works Organization's (FWO) work, General Raheel Sharif said that Gwadar port and CPEC will be constructed at all costs adding that Gwadar port will be an important port in the defence of country.

General Sharif said that army is well aware of the nefarious plans made against Gwadar port. The army, he said, will spare no expense and leave no stone unturned to realize the dreams of the country.

He also praised law enforcement agencies in the province saying that their crackdown against terrorists and their activities is commendable.

General Raheel Sharif paid tribute to the people of Balochistan adding that the country thanks the people of province for extending full support for completion of development projects.

Pakistan and Belarus would sign agreements for agriculture -- Pakistan Observer

Wednesday, July 29, 2015 - Islamabad—Among other engagements, Pakistan and Belarus would sign at least three agreements for agriculture cooperation during the upcoming visit of Prime Minister of Pakistan to Belarus. A four-member high-level delegation of Belarus scientists have had detailed discussions with the scientists of Pakistan Agricultural Research Council (PARC) to explore the areas of agriculture and livestock cooperation.

Both the countries are having huge potential for cooperation as Pakistan is agricultural country whereas Belarus has also advanced its agriculture sector through the use of scientific technology. The focus of the cooperation could be on promotion of biotechnology, crop productivity, livestock and agriculture machinery. Speaking on the occasion Chairman PARC, Dr. Iftikhar Ahmad highlighted the importance of agriculture sector in the world, saying that there were about 16000 scientists in Belarus for population of just 10 million.

However, the situation is reverse in Pakistan where just 600 scientists were working for its 200 million population. He urged the Belarus delegation to highlight the importance of agriculture sector during the upcoming visit of Prime Minister of Pakistan to Belarus. He said that scientific cooperation would help transfer of knowledge, adding that Pakistan has an opportunity to enhance agriculture cooperation with Belarus and take advantage of latest technology that country has produced.

He said that during the upcoming visit of Pakistan PM, three agreements related to agriculture sector would be signed with Belarus to promote agriculture sector of the country on modern lines.

He said that cooperation with Belarus would also help Pakistan to take full advantage of Pak-China Economic Corridor and establish agricultural sciences parks on the thoroughfare. He also urged the NARC management to set up new institute for bio-technology and nanotechnology to have positive impact on agriculture sector. In his detailed presentation, Belarus delegate Academician Secretary, Department of Biological Sciences of National Academy of Sciences (NAS) Belarus, Mikhail Nikiforov said that Belarus has developed several crop technologies that could be utilized for the betterment of Pakistan agriculture sector.

PCJCCI seeks proactive role of Pakistan in SCO -- Pakistan Observer

Lahore—Shah Faisal Afridi, President Pak-China Joint Chamber of Commerce and Industry, while commenting on full membership of Pakistan in Shanghai Cooperation Organization (SCO), has said that it will enable Pakistan to diversify its foreign policy and play a more effective role in stability of the region. Afridi has the appreciated the government efforts on this achievement and expressed the hope that Pakistan's permanent status in the SCO would prove to be milestone in achieving the millennium development goals set for Pakistan.

Mr. Afridi urged upon the government to play that being permanent member of Shanghai Cooperation Organization (SCO) Pakistan should play a proactive role in the formation of an integrated and connected Eurasia. "It's time to work with the "Shanghai Spirit" he asserted and said that SCO could not be undermined in this complex world order as it covers 60 percent of the total Eurasian landmass and nations having world's largest energy resources. Faisal Afridi pointed out that SCO had created a new model of international relations encouraging partnership instead of alliance.

Terming the SCO as "fully in tune with the realities and requirements of the 21st century", he said that SCO had introduced a new model for future of the international relationships. He mentioned that as this is going to be an Asian Century, "the regional and world powers couldn't ignore Pakistan in any kind of framework that places a focus on peace and development within the geographical arena of SCO" added Afridi.

While evaluating Pakistan's quest for full membership, he explained that Pakistan had the requisite credentials — a constructive role in Afghanistan, determination to fight against forces of terrorism, extremism and separatism, a promising and

prospective energy and trade corridor for the region, historical and cultural ties with Central Asian Republics, close strategic and economic ties with China, and growing relations with Russia — that supported Pakistan's claim to full membership of the SCO. As members of the SCO, Pakistan should have to observe the 'Shanghai spirit'.

Afridi said that Pakistan is a natural ally of the SCO, ideally located where it can be a source for regional economic integration within and between SCO member states. Chinese assistance in developing the China-Pakistan Economic Corridor in Pakistan (CPEC), developing Gwadar Port and Kashgar as a special economic zone, upgrading the Karakorum Highway (KKH) and linking Gwadar with Kashgar and Central Asia via the KKH are steps being taken with the SCO's efforts to create trans-continental overland connectivity, he added.

Afridi further elaborated that the main goals of the SCO bloc are to strengthen mutual confidence and good-neighborly relations among the member states moreover the bloc seeks cooperation among the states in energy, transportation, tourism, environmental protection as well as joint efforts to maintain and ensure peace, security and stability in the region, added Afridi.

He explicated that the six member states of SCO was covering a territory hosting more than one-quarter of the world's population and the forum was not an alliance directed against any other state or region. "Over the last decade, its activities have expanded to include military cooperation, intelligence sharing and counter terrorism drills in order to combat three evil forces: separatism, extremism and terrorism" added Afridi.

He said that the SCO's membership would be in Pakistan's interest. "If Pakistan plays its cards well it would enhance Pakistan's stature in the diplomatic ranking of the region". Pakistan's membership of the SCO would not only provide an opportunity to Pakistan in influencing the regional security architecture to its benefit but it could also be able to acquire an important position in the SCO's 2015 to 2025 vision. He advised that Pakistan should prepare itself well to avail the openings and opportunities offered by the SCO because the SCO has proven its effectiveness in conflict resolution and the conflict prevention mechanism.

Hashoo Group to expand its five-star hotel in Gwadar -- APP

ISLAMABAD: Chian-Pakistan Economic Corridor (CPEC) will benefit both the countries. Gwadar, owing to ideal location of its deep Sea Port, is expected to develop into a regional hub, serving the incoming, outgoing commercial traffic, and also facilitating in transit and intra-transit trade from many countries.

Once the connection between Gwadar Port and Kashgar through the Indus and the Karakoram Highway materialises, it will serve Pakistan and China's economic interests as well.

According to press release, Hashoo Group invested over Rs2 billion including construction of 'five-star hotel in the region by the name of Zaver Pearl Continental Gwadar to cater to the needs of its customers who are mostly government officials, foreigners, businessmen, bankers, tourists etc'.

Located on the cliff-top of the Koh-e-Batil in the beautiful surroundings of Arabian Sea and clear beaches, the hotel has 114 bedrooms equipped with modern facilities, 3 restaurants offering variety of cuisines, coffee shop, banquet facilities, health club & SPA, 24 hours business centre, and car rental facilities available for both in-house and walk in clients. The hotel is a gem unmatched with any other facility in the region.

Further, given the scenic attraction of Gwadar with its long stretch of golden sunny beaches, it is soon expected to become a tourist resort for the national and international tourists.

The Makran coastal highway has linked Gwadar with Karachi, which has improved access to the Hotel. Additionally there is also an air link to Gwadar from other cities. The new road network for being built for Pak-China Economic Corridor will give access to this city from Southern Punjab and KPK and this will result in influx of tourist visiting Gwadar.

Keeping in view the recent increase in economic activity in the area and the promising future prospects of the Gwadar, the Hashoo Group is planning expansion of its existing 5-star Hotel initially by adding 40 deluxe rooms by complete phase II of the Hotel for which drawings, foundation and piling work is ready. This will not only provide additional accommodation but will also be instrumental in uplifting the economic situation in the region. Further the Hashoo Group is also planning to add another 300 rooms accommodation by putting up Hotel Apartment Building on the adjacent Hotel Land for which initial studies are underway.

New era of Pak-China relations starts during current tenure: CM -- BR
LAHORE: Punjab Chief Minister Muhammad Shehbaz Sharif said on Wednesday that a new era of economic relations between Pakistan and China had started during the current tenure of Prime Minister Muhammad Nawaz Sharif.

Talking to a delegation from Ji Ning City China led by Secretary Ji Ning Municipal Party Committee Ma Ping Chang, he said Pak-China friendship had been stood strong every hour of trial.

Promotion of cooperation in energy particularly mining sector was discussed during the meeting.

The chief minister said bilateral relations were touching new heights of friendship and cooperation.

Mentioning the China-Pakistan Economic Corridor (CPEC), the chief minister said the historic economic package besides investment given by China was a great gift for Pakistan.

He said the historic economic package of 46 billion dollars during the visit of Chinese President to Pakistan was a glorious example of everlasting friendship between both the countries and Pakistani people could never forget this favour.

The CM said the CPEC would not only bring prosperity in Pakistan but the in the whole region.

Shehbaz Sharif said a huge amount of 33 billion dollars had been allocated for energy projects under CPEC.

He said the work on the project under CPEC in Punjab had been started briskly, adding the construction of 1320 megawatt coal power project plant had been started in Sahiwal and this project would start producing electricity in 2017.

Similarly, he said, a 900 megawatt solar project was being set up in Bahawalpur which would be completed in 2016.

He said that Chinese companies were making investment in all these projects, adding the CPEC projects would be completed through round-the-clock work and no hindrance in this regard would be tolerated.

He said that there should be maximum exchange of delegations for the promotion of bilateral relations and the both nations should benefit from the experiences of each other.

Head of Chinese delegation Ma Ping Chang speaking on the occasion expressed his willingness to extend cooperation with the Punjab government.

He said that Chinese consider Lahore as their second home. Acknowledging untiring efforts of Shehbaz Sharif, he appreciated development in Punjab province.

Chairman Shandong RuYi Group Qiu Yafu, Executive President Shandong Group Zhai Meng Giang and senior officials of various companies were included in the delegation while Provincial Minister for Minerals Ch Sher Ali, Secretaries Minerals, Energy and concerned officials were also present.

Economic relations: MoU to promote Pak-China trade -- The Express Tribune

The Punjab Board of Investment and Trade and the China Overseas Investment Federation on Wednesday signed a memorandum of understanding (MoU) to utilise their resources to enhance trade between the two countries.

The MoU stated that the two organisations would evolve a plan for generating investment opportunities in infrastructure, agriculture, livestock, renewable energy, mining, information technology and textile sectors of the two countries.

They agreed to arrange trade fairs and exchange visits in this regard.

PBIT chairman Abdul Basit said that under the MoU emerging Chinese enterprises would be invited to invest in the province. He said the PBIT would facilitate such enterprises.

The COIF delegation was headed by its executive president, Marshall Zhenb.

Representatives of several Chinese companies in the infrastructure and energy development, security services, industrial investment and asset management sectors were part of the delegation.

Need stressed to increase trade with China, Germany -- Pak Observer

Karachi—Patron-in-Chief of Pak China Club and chairman of Al-Karma Towel Industries Mahtab Uddin Chawala has said that trade of Pakistan with Germany and China needs to be further increased. Talking at a dinner hosted at his house in honour of Pakistani ambassador in Germany Syed Hassan Javed and Consul General of China Ma Mayau he said Germany and China have a major role in the trade and commerce of the region; therefore, increasing trade volume with these both important countries is in the interest of Pakistan. Consul General of China Ma Mayau said on the occasion that bilateral trade with China is being increased. He said increasing investment is also amongst our priorities.

Chawala said there are vast opportunities of investment in Pakistan in different sectors like energy and infrastructure and the traders of China and Germany should invest in these lucrative sectors. On the occasion the president of Pak China Club Javed Rashid Asghar Arian said tariffs should be positively adjusted keeping the local industrial situation in Pakistan. He said reduction in tariff is a must for increasing trade relations with Pakistan. Pak China Club senior Vice President Rehan Uddin Chawala said with the exchange of trade delegations with both Germany and China new vistas of trade would be opened.—INP

Pak, China Sign USD Two Billion Agreements in Field of Energy, Health -- Outlook

Pakistan and China have signed 20 agreements worth USD 2 billion in the field of energy, communication, social services, agriculture, health, education and infrastructure, state media reported today.

The agreements were signed yesterday as the two-day meet of the China Pakistan Economic Corridor (CPEC) Karamay- Xinjiang Forum concluded in China.

Associated Press of Pakistan reported that the MoUs were signed in sectors of energy, communication, social services, agriculture, health, education and infrastructure at the Karamay Government Municipal Auditorium.

A consortium of 35 Chinese companies was also formed that will invest in Pakistan, pushing forward the CPEC.

The next meeting of the forum would be held in October this year in Beijing.

Minister for Planning, Development and Reforms Ahsan Iqbal proposed cooperation in space technology between Pakistan and China as part of the historic

declaration, saying it will take the bilateral relations to new heights.

He assured the Chinese that Pakistan was committed in implementation of the economic corridor in letter and spirit.

"I give an open invitation to Chinese firms to contact us directly in case of any problem they face in Pakistan; we will eliminate all obstacles in the way of CPEC," he said.

The CPEC was announced when Chinese President Xi Jinping visited Pakistan earlier this year. The USD 46 billion ambitious project would link western China with Gawadar seaport on the Arabian Sea in Balochistan province.

LCCI urges Pak-China businessmen to increase trade -- Daily Times

LAHORE: The Lahore Chamber of Commerce and Industry (LCCI) has urged the Pakistani and Chinese businessmen to speed up their efforts to enhance two-way trade volume.

While talking to the Chinese businessmen on Thursday, LCCI Vice President Mahmood Ghaznavi said that businessmen of both the countries should identify new areas for joint ventures.

He said that the Pak-China Economic Corridor (CPEC) would start a new era of trade and economic cooperation, adding that Pakistan's private sector should avail this unique opportunity to the maximum.

The LCCI vice president said that CPEC is an ample proof of unbreakable Pak-China historic friendship. He said that both the countries are associated together in strong ties and their mutual relations are based on solid foundations. He said that economic globalisation and regional integration has provided enormous opportunities for further cooperation between China and Pakistan. "Pakistan is an ideal destination of foreign investment and is a top priority of the Chinese investors," he added. He said that Pakistan had made attractive investment policies that provide a lot of investment opportunities to the Chinese entrepreneurs to come and invest in Pakistan.

Mahmood Ghaznavi said that an obvious increase in frequency of the Chinese delegations to Pakistan makes it apparent that special significance is being given by China to Pakistan to further strengthen the relations.

He said that in context of the ongoing project of CPEC, the need and importance of private-to-private contacts has mounted. "Being the hub of business activities in Punjab, Lahore holds a special significance. Both public and private sector organisations are striving hard to fully exploit the trade and investment potential of Punjab in collaboration with the foreign investors," he added.

The LCCI vice president said that China is first choice of the Pakistani business community for joint ventures. "We hope that the state level cooperation between two countries will bring greater fortune to both of us. China is an important trading partner of Pakistan. It is the second largest importing country after UAE and regarding the top exporting countries of Pakistan, China comes at second place after USA," he added. He said that these stats are bound to improve in a decade or so because once the CPEC project becomes fully functional, a win-win situation would take place for both the countries, adding that in the meantime, we need to interact on regular basis for exploring avenues for trade expansion and opportunities for investments.

The LCCI vice president said that there are ample opportunities of trade for the Chinese businessmen in almost all the sectors or sub-sectors of economy. "Although our Chinese delegates would study the Pakistani market related to their focus areas but Pakistan has got a lot to offer being the closest trading partner of China," he added.

Navy conducts security exercise to protect Gwadar -- Daily Times
KARACHI – In order to check efficacy of security mechanism in place for the protection of the Gwadar port and associated infrastructure against any terrorist venture, the Pakistan Navy conducted coastal security exercise – Tahaffuz-e-Sahil.

In this exercise, the Special Operations Forces of the Pakistan Navy, marines, ships and aircraft participated. Apart from displaying high degree of professionalism, synergy was achieved amongst various stakeholders including the law enforcement agencies and other relevant organization.

Various scenarios cum contingencies related to asymmetric threats to port/infrastructure were exercised. During debrief of the exercise, Coast Commander Rear Admiral Syed Bashir Ahmad lauded efforts of all participants in making the exercise a success by achieving desired goals.

He emphasised on the need for continuous training and holding of such exercises regularly all along the coastal belt in coordination with all maritime stakeholders.

All Day

‘CPEC a key to region’s prosperity’ -- APP

ISLAMABAD: The China Pakistan Economic Corridor (CPEC) has not only set up the strategic framework for increasing cooperation between China and Pakistan but it would also contribute to development and prosperity of the whole region.

The important projects to be completed under the CEPC initiative includes the Gwadar Port, the second phase of the upgrading project of Karakoram Highway, Motorway project between Karachi and Lahore, Thakot Havelian Motorway, Gwadar Port Expressway, Gwadar International Airport and Karachi-Sukkur Motorway.

Reiterating the commitment and resolve of the Chinese government, Chinese Assistant Foreign Minister Liu Jianchao while briefing a delegation of journalists from Pakistan and Afghanistan who recently visited the Chinese Foreign Ministry in Beijing, said that the one of the purposes of building CPEC is to promote regional development, adding that it is important for the countries of entire region to support the initiative.

The Chinese leadership has been appreciating the ongoing military operation Zarb-e-Azb against terrorists and militants, as the maintenance of peace is vital for development of CPEC.

Commending Pakistan’s Armed Forces role, Liu Jianchao said, “China pays glowing tributes to the sacrifices rendered by the people, government and the armed force of Pakistan in fighting the menace of terrorism.”

He said that some terrorist elements were still present in Pakistan and they could damage the Pakistani government, its people and also CPEC, adding, “We will provide assistance to Pakistan to make sure that no force will be able to stop the development of CPEC.”

A senior Chinese diplomat also said that the CPEC is not limited to a road but it would connect the country with a number of motorways and infrastructure projects.

He said the visit of Chinese President Xi Jinping early this year had provided a strategic framework for broadening avenues of cooperation with Pakistan in diverse fields.

The state visit launched a new chapter in the bilateral relations and both the countries should take this opportunity to promote implementation of the projects announced during the visit, he added.

The two sides, during the visit, agreed to increase collaboration in areas of energy, finance, commerce, banking, industry and education.

The two countries agreed to formulate 1 plus 4 structure of cooperation comprising CPEC as the main component with important projects.

According to the economic experts, soon after taking oath of his office, Prime Minister Nawaz Sharif announced to initiate a number of projects in a bid to correct the ailing economy of the country.

Of the many projects, power seemed the most crucial sector, a sector that would strengthen other sectors of the economy. These projects have, enthusiastically, been taken on by the strategic cooperative partnership between Pakistan and China, now being referred to as the CPEC.

The CPEC is an under-construction development programme to connect Gwadar Port in southern Pakistan to China's northwestern autonomous region of Xinjiang via highways, railways and pipelines to transport oil and gas.

When the corridor is constructed, it would serve as a primary gateway for trade between China, Middle East and Africa.

The project received a major boost when control of Gwadar was transferred to China's state-owned China Overseas Ports Holding (COPH) in February 2013.

Built by the Chinese workers and opened in 2007, Gwadar is undergoing a major expansion to turn it into a full-fledged deepwater commercial port.

Pakistan and China have signed agreements for constructing an international airport at Gwadar, upgrading a section of the 1,300km Karakorum Highway connecting to Islamabad and laying a fibre-optic cable from the Chinese border to Rawalpindi.

With the development of the corridor, Central Asia, traditionally an economically closed region owing to its geography and lack of infrastructure, would have greater access to the sea and to the global trade network.

On November 2014, the Chinese government announced that it would finance the Chinese companies to build \$45.6 billion worth of energy and infrastructure projects in Pakistan as part of CPEC.

Documents show that China has promised to invest around \$33.8 billion in various energy projects and \$11.8 billion in infrastructure projects, which would be completed by 2017. The deal includes \$622 million for the Gwadar port.

Under the CPEC agreement, \$15.5 billion worth of coal, wind, solar and hydro energy projects would add 10,400MW of energy to the national grid of Pakistan.

Physically, the corridor is a 2,700km highway that stretches from Kashghar to Gwadar through Khunjab. But in essence, these road and rail links would further strengthen the bond of brotherhood, as highlighted by the two governments.

The project is also establishing several economic zones and physical links connecting Pakistan and China. Both the countries believe that this economic corridor would benefit new emerging regional cooperation in South Asia. According to a senior official in the planning commission, the CPEC is strategically important for both countries keeping in view the growing regional trade and investment collaboration.

All Day

Pak-China to coop in space-technology under CPEC -- The Observer

Monday, August 17, 2015 - Islamabad—Federal Minister for Planning and Development Ahsan Iqbal has proposed space-technology cooperation between Pakistan and China under the economic corridor project.

He made the proposal at the China-Pakistan Economic corridor (CPEC) Forum that was held this week at the Chinese city of Karamay in Xinjiang region. On his plea, the proposal was formally included in the historic Karamay's declaration which was later unanimously adopted at the end of Forum's two-day deliberations.

In his brief address at the concluding session, Ahsan Iqbal said bilateral cooperation in the field of space-technology will take the Pak-China relations to new heights. He emphasized that both the countries should launch joint space mission program comprising their astronauts as "this is the strength of the CPEC to increase more connectivity between the two friendly countries. It will shape up the future destiny of both the nations through communication linkages," the Minister added.

Chairman Senate Defence Committee Senator Mushahid Hussain Sayed, Senator Hasil Bizenjo, Senator Afrasiab Khattak, Senator Nuzhat Saddiq, Senator Nawabzada Saifullah Magsi, Minister for Planning and Development Balochistan Hamid Khan Achakzai, Pakistan's Ambassador to China Masood Khalid and other high-ranking officials witnessed the signing ceremony.

Chinese Ambassador to Pakistan Sun Weidong also attended the Forum and termed the meeting as highly successful in promoting understanding among the relevant stake-holders for implementing CPEC- a fate-changing project and to further deepening the Sino-Pak strategic partnership, particularly in the field of energy and communication.

DG FWO Major General Muhammad Afzal, Engineer-in-Chief FWO Khalid Asghar, Quartermaster General Major General Javed Mehmood Bukhari, DG NLC Major General Muhstaq Ahmed Faisal were also present on the occasion. It was decided that forum will work as a permanent platform and meet annually to review the project in a broader prospect, ensuring its implementation in letter and spirit.

Just before the passage of the Karamay's declaration senator Mushahid Hussain Sayed and from Chinese side member NPC standing committee Madam Baige Zaho, vice chairman NPC foreign affairs committee gave a detailed presentation on the achievements made during the two-day forum, participated by over 300 officials, business and public figures.

They recalled that the ancient Silk Road is the shared cultural heritage and historical wealth of countries along the Road that embodies the spirit of peace and cooperation, openness and mutual benefit. The CPEC consists of an integral part of the broad consensus reached between respective leaders during Chinese President Xi Jinping's landmark visit to Pakistan in April 2015.

The declaration stressed the principle of "Jointly building through consultation to meet the interests of all stake-holders. Concerted efforts should be made to achieve major goals in policy coordination, facilities connectivity, unimpeded trade, and financial integration aiming at promoting the common development of both countries and even the entire region.

Both sides called for strengthening capacity-building, promoting scientific research and innovation and consolidating people-to-people exchanges. They will vigorously promote communication and mutual learning in education, culture, tourism, media and sports fields.

"We attach great importance to a wide participation of the community and the public, particularly women and the youth, aiming at promoting mutual understanding and consolidating public opinion, so that pass on the torch of China-Pakistan friendship from generation to generation," the declaration added.—INP

China eases terms for Pak banks to open branches -- The News

ISLAMABAD: Beijing has agreed to slash down requirement from \$50 billion to \$15 billion for opening up of Pakistani bank branches in China under revised Free Trade Agreement (FTA) with Pakistan.

"Yes, China has reduced its requirement for opening up Pakistani bank branches from \$50 billion assets to \$15 billion and now Habib Bank Limited becomes eligible to open its branch after this relaxation," the State Bank of Pakistan (SBP) high-ups informed the Senate standing committee on finance here on Tuesday.

They said that it was expected that National Bank of Pakistan (NBP) would be able to meet this requirement paving the way for opening up its branches in China as well. The NBP had opened up 21 international branches in 19 different countries but its international operation had been facing losses because of Bangladeshi scam of Rs18.5 billion and \$80 million bad debt to Al Tuwairqi Group that could not succeed in running its business because of lack of availability of gas.

Chinese company to build cement plant -- APP

Under the agreement, the Chinese company will set up a cement plant in the Salt Range with an investment of \$350 million.

Under the agreement, the Chinese company will set up a cement plant in the Salt Range with an investment of \$350 million.

LAHORE: A memorandum of understanding (MoU) was signed between the Punjab government and Chinese cement company, Yantai Baoqiao Jinhong (YBJ), over establishing a modern cement plant in the Salt Range.

Punjab Chief Minister Shahbaz Sharif was the chief guest at the signing ceremony. Under the agreement, the Chinese company will set up a cement plant in the Salt Range with an investment of \$350 million. Secretary Minerals Arshad Mahmood and YBJ Chairman Li Baolu signed the document. Sharif said that this will stimulate Chinese investment.

Sharif said the Punjab government welcomes investment by Chinese companies in the cement industry. He said that all facilities are being provided to promote foreign investment and Punjab government will extend maximum cooperation in the establishment of the cement plant. Sharif further noted that this agreement will result in transfer of technology to Pakistan.

"The Punjab government wishes to benefit from Chinese technology in other sectors as well," said Sharif. "A number of Chinese companies are already investing in Punjab due to which economic cooperation and friendly relations between the two countries have strengthened."

Sharif said that China is investing billions of dollars in Pakistan under historic investment agreements. He said that mega projects are being established in energy, infrastructure, industry and other sectors under the China-Pak Economic Cooperation (CPEC).

The Chief Minister said that since the visit of Chinese President to Pakistan, a new era of economic cooperation between Pakistan and China has taken off.

Li Baolu said that his company wants to set up a state of the art cement plant in Punjab which will be environment-friendly and based on modern technology.

CPEC- a window of opportunity for Pakistan -- Express Tribune

ISLAMABAD: The China-Pakistan Economic Corridor (CPEC) is a window of opportunity for Islamabad to boost its economy, noted speakers attending an international seminar on Tuesday.

A day-long seminar on the "China-Pakistan Economic Corridor: Economic, Political

and Security Perspective” was organised by the Pakistan Institute for Peace Studies and chaired by Pakistan Council of China Executive Director Dr Fazalur Rahman.

Terming the project an uplift package from the Chinese government to boost Pakistan's economy, the executive director said, “China is much committed to launching this project and it is now up to the main stakeholders in Pakistan including the federation, provinces, civilians and military establishment to undertake sincere initiatives in order to make it a success.”

He acknowledged that confusion still persisted pertaining to the economic corridor and no one from the government had bothered to clear the air.

Former foreign minister Inamul Haq said the CPEC was a historic initiative and Pakistan needed to attract investors to invest along the long route of the corridor, which would create jobs and business opportunities for the locals.

“Most of the \$45-billion investment announced under the CPEC is in the energy sector, but there is no major project on the agenda for repairing the dwindling transmission lines,” he pointed out, saying these lines were the main cause of power crisis as 25% of the total installed energy capacity was wasted.

Haq voiced concern over the security challenges associated with the project as the chief minister of Balochistan had sought Rs2 billion for raising a special force, comprising 1,100 personnel, to safeguard the Gwadar Safe City project.

“Those who are against Chinese investment are working at the behest of foreign elements and must rather work for attracting investment to Pakistan in the same quantum as China wants to make,” he stressed.

National Defence University Assistant Professor Humayun Khan said the CPEC was a comprehensive package of competitive economic initiatives from China and the energy projects initiated would kick-start an industrial boom in Pakistan.

Shahzada Zulfiqar, a researcher and journalist, said there were widespread reservations in Balochistan about the project. “Baloch people have always been deprived of their due rights. Now, since the project has been initiated, and there is a lack of skilled workers in Gwadar, the Baloch fear that outsiders will come and fill the gap, leading to demographic changes which could be damaging for them,” he added.

J-10 fighter jets: Pakistan may be China's first customer -- Express Tribune

A military expert revealed on Tuesday that Pakistan may be the first buyer of China's J-10 fighter jet which was initially set to be sold to Iran after the lifting of UN sanctions.

Fu Qianshao, an aviation equipment expert with the People's Liberation Army Air Force, said that Pakistan may overtake Tehran in becoming the first overseas buyer of the multi-role aircraft, which Chinese experts claim is comparable to the latest version of the US' F-16 Fighting Falcon.

Citing Japanese website The Diplomat, the report said Pakistan had signed a deal for the purchase of 36 J-10 jets in 2009.

The report further stated that Pakistan, which jointly produces the J-17 Thunder fighter aircraft, had been showing interest to acquire the J-10 jets, while adding that China was wooing Iran to buy 150 J-10s.

“Once the sanctions against Iran are completely lifted, the country will definitely renovate its civilian and military aircraft fleets. The J-10 is a good option for the Iranians because it can fulfill all operations they want to conduct,” said Wang Yanan, Deputy Editor-in-chief of Aerospace Knowledge Magazine.

Fu added, "The J-10 is able to confront any of the third-generation fighter jets operated by neighbouring countries because it features supreme maneuverability, strong firepower and cutting-edge avionic equipment."

Pakistan, China to cooperate in space as part of Karamay declaration -- APP

PESHAWAR: The Chinese government has agreed to a proposal by the Federal Minister for Planning and Development Ahsan Iqbal, initiating the collaboration between Pakistan and China in space technology as part of the Karamay declaration under China-Pakistan Economic Corridor (CPEC).

At the Pakistan-China forum meeting held in Karamay-Xinjiang last week, Ahsan Iqbal, proposed space technology collaboration between China and Pakistan, an official of the forum told APP.

His proposal was approved and made a part of the Karamay-Xinjiang Declaration. The declaration was later approved unanimously after the two-day meeting.

At the concluding session, Ahsan Iqbal said that bilateral collaboration on space technology would take Pakistan-China relations to new heights. He stressed upon a joint launch of space missions which would consist of astronauts from both countries.

He said "CPEC will increase connectivity between the two friendly countries. It will shape up the future destiny of both the nations through communication linkages".

Chinese Ambassador to Pakistan, Sun Weidong, was also a part of the CPEC forum. He labelled the meetings as successful in increasing understanding among the related stakeholders for implementing CPEC. He also pointed out the field of energy and communication as a major part of the CPEC.

Over 300 officials, businesspersons and public figures were a part of the two-day forum.

Another decision made at the forum was to make these meetings a permanent platform that will meet every year to examine the project and present collaboration on broader aspects. The forum will also be used to ensure the project's true objective of promoting Pakistan-China relations.

2,281 acre land acquired for free trade zone in Gwadar -- The Nation
GWADAR: Authorities acquired at least 2,281 acre land for a free trade zone and the work is to be started within two to three months.

Gwadar Development Authority Chairman Dostain Khan Jamaldini said that the Expressway project will be started this year. At least Rs 14 billion have been reserved for the project, he added.

He also said that Gwadar International Airport's construction is going to start this year. Jamaldin further said that China-Pakistan Economic Corridor (CPEC) includes the potable water project in Gwadar.

The China-Pakistan Economic Corridor (CPEC) is a development mega project which aims to connect the Gwadar Port in southwestern Pakistan to China's northwestern autonomous region of Xinjiang, via a network of highways, railways and pipelines to transport oil and gas.

The economic corridor is considered central to China-Pakistan relations and will run about 3,000 km from Gwadar to Kashgar. Overall construction costs are estimated at over \$46 billion, with the entire project expected to be completed in several years.

'Pakistan's economy has all ingredients to grow like China's' -- BR
Korean Ambassador to Pakistan Song Jong Hwan on Wednesday said that Pakistan has all the required ingredients to grow like China. In a meeting at the Lahore Chamber of Commerce and Industry (LCCI), he said in 1980, China was exactly like Pakistan and today it has become the economic giant of the world. "I am sure that 10 years down the line, Pakistan would be a shining star on the world economic horizon," the diplomat said.

He was hopeful that the volume of trade between Pakistan and South Korea was bound to increase as both the governments are taking measures to get the desired results. He called for a proper sector-specific strategy to identify the challenges and problems coming in the way of bilateral trade between Pakistan and Korea.

While identifying numerous areas for mutual cooperation, he said there was a need for expertise-sharing as both the countries have a lot to learn from each other and he urged the Lahore Chamber to arrange a business delegation to South Korea so that Pakistani businessmen could have firsthand knowledge about opportunities there.

Lahore Chamber President Ijaz A. Mumtaz said, "Korea is an important trading partner of Pakistan. South Korea is the second biggest export destination of Pakistan in East Asia after China. It comes at 14th place among the top importing countries and at 16th place among the top exporting countries for Pakistan. The total volume of trade between Pakistan and Korea was around dollar 1.26 billion in 2013 but in the following year, it came down to almost dollar 1 billion."

It was mainly because of the substantial decrease in imports from Korea in last two years. He said that the imports dropped from dollar 859 million to dollar 658 million. Likewise, Pakistan's exports also fell from dollar 397 million to dollar 378 million in the same period. He said although the worth of bilateral trade was still above one billion dollar but there was a plenty of margin to improve it. It seriously calls for making joint efforts.

"The way different Korean companies are gaining success in Pakistan that day is not far away when Korea will outclass other countries in terms of foreign direct investment. We are ready to facilitate new Korean companies to study the market conditions in Pakistan", he added. He said Korea had already declared Pakistan as a priority destination for investment and business in recent meetings with business community. He said that the success stories of leading Korean business groups in Pakistan like Daewoo, Samsung, LG and Hyundai etc can serve as a strong reference to other Korean companies to invest here.

He said the forums like KOTRA Karachi could also play pivotal role in searching new business opportunities and building economic partnership between Korea and Pakistan in various fields. He said considering the size of Korean economy which was one of the trillion economies of the world and also ranked among the twenty largest economies, Pakistan can benefit by way of developing trade and economic relations with Korea.

"The quickest way to achieve the desired objective is to highlight the need of diversifying product lines of both countries through mobilising business forums, exchanging business delegations and participating in each other's exhibitions. For that purpose, market surveys and latest trends prevailing in both the countries must be gathered and shared with the representatives of private sectors," he added.

"A lot of development work is going on with respect to the Pak-China Economic Corridor. This project will cause to take place a lot of changes in political and economic scenario of Pakistan. Korea should forecast the newer opportunities which really promise good fortunes to foreign investors," he said.

PM says Pak-China nuclear cooperation will help country meet energy shortfall -- APP

Prime Minister Nawaz Sharif on Thursday noting the excellent cooperation between Pakistan and China in peaceful use of nuclear energy said it would help the country meet its energy shortfall.

Inaugurating the concrete pouring ceremony of the Nuclear Power Plant-II, the Prime Minister said he was pleased to note the pace of progress as he had performed the ground breaking of Kanupp-2 and Kanupp-3 in Nov 2013.

He said the event was significant as it showed the close collaboration between Pakistan and China in all areas, particularly in the field of peaceful use of nuclear energy.

He said it was during his previous government that Pakistan and China initiated cooperation in peaceful use of nuclear power through the construction of Chashma Nuclear-I.

He said it was the continuity of this cooperation that has led to addition of more nuclear power plants in the country with the Chinese cooperation.

He said under the China National Nuclear Corporation Chashma III and IV would start producing 630 MW more electricity by next year. He said Kanupp was successfully generating electricity over the past 43 years and contributing to national economy.

Prime Minister said he was grateful to China's Atomic Energy Authority, Export Import Bank of China and China National Nuclear Corporation (CNNC) for its support to Pakistan.

He said Pakistan's economic indicators were positive, investors confidence has been restored, country's image has been improved internationally and more people were getting employment as several new projects were being completed.

Prime Minister Sharif said Pakistan Nuclear Regulatory Authority (PNRA) was performing its assigned duty of keeping a close watch on the nuclear power plants in the country and ensuring safe operation of nuclear facilities, according to the international standards.

The prime minister said apart from his government's efforts to end loadshedding, equal importance was being given to eliminate terrorism from the country. He paid tributes to late Col Shuja, the home minister of Punjab, who embraced martyrdom in a terrorist attack in Attock.

Work on TAPI pipeline to begin in December -- Express Tribune
ISLAMABAD:

Federal Minister of Petroleum and Natural Resources Shahid Khaqan Abbasi has announced that heads of Pakistan, Afghanistan, India and Turkmenistan will inaugurate a multibillion-dollar transnational gas pipeline project in December this year.

The project, called Tapi pipeline, would be inaugurated on December 25 and would be completed in the next three to four years, said Abbasi while speaking at a press conference along with State Minister of Petroleum Mir Jam Kamal Khan here on Thursday.

He said Afghanistan would be the net beneficiary as it would earn \$500 to \$600 million in royalty on the shipment of gas through its territory.

The pipeline will run along a highway built in Afghanistan and a special security system will be installed to raise alarm before any incident to ensure the security of infrastructure.

Read: Pakistan, Turkmenistan to give big push to TAPI project

"It is believed that \$25 billion will be spent on the upstream and downstream sections of the pipeline," the minister said.

Upstream development will cost around \$15 billion whereas the downstream section will cost \$10 billion. Work on both will start simultaneously.

In the last meeting of the Tapi steering committee in Ashgabat, the stakeholders decided that a state-owned company of Turkmenistan would lead a consortium to oversee coordination in the construction, financing, ownership and operation of the 1,800km-long pipeline.

According to the agreement, Pakistan, India and Afghanistan will have 5% obligatory shares in the project, while the Turkmen company, being the lead financier, will have a 51% stake. The remaining 34% will be available to other partner countries.

"We will receive 1.32 billion cubic feet of gas per day, which accounts for 35% of our total production," Abbasi said, adding the government had collected Rs85 billion in gas infrastructure development cess, which would be spent on the pipeline.

Emphasising the importance of meeting energy needs, the minister said Pakistan would not only complete the Tapi pipeline, but work on the Iran-Pakistan (IP) gas pipeline and more liquefied natural gas (LNG) terminals in Karachi and Gwadar was also under consideration.

China is also constructing a gas pipeline in Pakistan while negotiations are under way with Russia for laying another pipeline at a cost of \$2.5 billion.

If the Tapi project was completed on time, the stakeholders would seriously consider building another pipeline from Turkmenistan, the minister said.

Replying to a query, he revealed that a Qatari delegation would arrive on August 24 to talk about LNG supply in a government-to-government arrangement.

Read: Consortium leader to be selected in September

A tender was floated for spot purchase of LNG, but no response was received and the only solution was LNG import through a long-term contract with Qatar, he stressed.

Speaking about prices, the minister said prices for LNG, IP and Tapi gas were at the same level when seen in the context of current crude oil prices.

IP pipeline

Abbasi voiced hope that the stalled IP pipeline project could be implemented now as sanctions against Iran were being lifted. In this regard, an LNG pipeline is being laid in Gwadar.

In reply to a question, he said oil price hedging was possible but local oil rates would go up. "People come to us for oil price hedging, but it may lead to a rise in local oil prices."

The price of diesel and petrol in Pakistan was cheaper by Rs35 per litre compared to prices in India, the minister said.

Gas prices

Abbasi announced that the government had decided to notify 5% to 6% increase in consumer gas prices, which would come into effect from September 1. However, the price increase would not be passed on to domestic consumers.

All Day

Pak-China trade: Importance of negotiating the FTA -- Express Tribune

KARACHI: Pakistan and China enjoy an all-weather friendship that has tested tribulations of geo-political and economic challenges.

Pakistan was one of the three countries that recognised Peoples Republic of China and both established embassies in their capitals in 1951.

On the trade front, Pakistan accorded the Most Favoured Nation (MFN) status to China in 1963 through a bilateral trade agreement which provided a level playing field to Chinese products imported in Pakistan. Since then, both countries have closely collaborated to deepen economic and trade relations.

Trade agreements

Bilateral trade links were further boosted during the visit of Pakistan's then president to China in November 2002 when both countries agreed to sign a Preferential Trade Agreement (PTA) that provided tariff preference to a limited number of products. The process moved forward when both sides signed a Free Trade Agreement (FTA) on the occasion of the Chinese President's visit to Islamabad in July 2007.

The FTA with China envisaged the gradual liberalisation of tariff on goods in various phases. In the first phase, which was from 2007 to 2011, both sides agreed on the elimination of tariff on 30% of the products. The second phase envisages liberalisation of tariff up to 90% of the goods from both sides.

The tariff concessions committed by Pakistan in the first phase of the FTA predominantly contained raw materials and intermediary goods. In return, China eliminated tariff on finished goods.

Read: Pakistan losing Chinese market after Beijing's trade deals

The government envisaged an economic integration model where Pakistan would import raw materials, components and intermediaries to boost domestic manufacturing and subsequently export these goods to China under the FTA at preferential tariffs.

In 2008, an incentive package for Chinese investors was included in the FTA to facilitate Chinese FDI in China specific investment zones in Pakistan.

To further enhance the width of the FTA, both sides also concluded a trade in services agreement where market access was agreed in a number of sectors by both sides.

The market access provided by China under the services agreement at that time was much more than China's WTO commitment as well as bilateral commitments with any other country.

Thus, Pakistan and China have laid a framework for trade integration that include elimination of tariff on goods, market access on services and promotion of investments.

The tariff liberalisation in the first phase has already been concluded in 2012 and now both sides have commenced negotiations for the second phase.

Reportedly, the negotiations are not progressing at a pace where both sides could see conclusion of these talks soon.

Concerns of local industry

One of the major impediments has been the concerns of the domestic industry in Pakistan that feels threatened from the competition of Chinese products.

The public sector is also apprehensive as elimination of custom duties would lead to substantial revenue losses as Pakistan heavily relies on taxation on international trade for revenue generation. According to the latest figures, 40% of the Pakistan's total revenue is from taxes on import of goods.

This obviously has created major challenges for the Pakistan's negotiating team to move forward with the negotiations. There are media reports that Pakistan has requested China to reconsider the tariff liberalisation done in the first phase instead of moving forward in the second phase of the FTA.

China is one of the most populous countries in the world and, according to IMF statistics, the world's largest economy in terms of purchasing power parity. China is also the world's fastest growing economy with a growth average of 10% in the last 30 years. China is also world fastest growing consumer market as well as second biggest importer in the world.

In 2014 China imported goods worth \$2 trillion globally in which the share of Pakistan was just 0.2%. Similarly China's global imports of service in 2014 were \$400 billion against Pakistan global exports of \$5.5 billion where the services destined for china were quite negligible.

Read: Pak-China relations: Army chief vows to protect CPEC

Importance of FTA

Pakistan and China are natural trading partners. The territories comprising the present state of Pakistan were once part of the historic silk route connecting China with the West where merchants traded in various commodities such as spices, silk and porcelain. The China and Pakistan Economic Trade Corridor also relies on these opportunities to revive the ancient silk route to facilitate China's connectivity with the West.

Economists have empirically proved that there are more welfare gains in preferential trade agreements for countries that are natural trading partners.

FTAs create opportunities especially for countries such as Pakistan that lack competitiveness to enhance their exports in the markets of larger economies through trade diversion created by tariff preferences in the FTAs.

Such opportunities also make countries attractive for foreign direct investments where investors take advantage of market access openings for setting up manufacturing units for export to lucrative markets like China under the FTA.

The way forward for Pakistan is to bring the FTA framework which commenced in 2004 to its logical conclusion by completing the liberalisation of tariffs. There would always be losses and gains in the process but to capitalise on the opportunity that Chinese market provides, the price would be worth paying.

China to set up body to monitor Pak projects -- The Nation

LAHORE: Chinese Deputy Prime Minister Zhang Gaoli on Tuesday expressed willingness to set up a high-level committee for the supervision of development projects underway in Pakistan with Chinese investment. He was talking to Chief Minister Shahbaz Sharif at the Great Hall of the People, Beijing.

Gaoli said that he would personally monitor the projects. He said the proposed committee would include senior officials of financial institutions and various Chinese government departments.

He said that development projects were underway in several countries with Chinese cooperation. "However, China's cooperation with Pakistan is unprecedented. China is extending full cooperation to Pakistan in energy, transport, infrastructure and health sectors. The China-Pakistan Economic Corridor will link Pakistan to economies of China and 60 other countries," the Chinese deputy PM said.

Sharif said that the government and people of Pakistan would come up to the expectations of the Chinese leadership with regard to the implementation of the economic package. "The recent visit of the Chinese president to Pakistan has taken Pakistan-China friendship to new heights," he said.

Federal Minister for Planning and Development Ahsan Iqbal, Pakistan's Ambassador to China Masood Khalid, Prime Minister's Special Representative Zafar Mehmood, Adviser to CM on Health Khawaja Salman Rafiq and Lahore Transport Company Chairman Khawaja Ahmad Hassaan were also present on the occasion.

The chief minister also held a meeting with the Exim Bank of China President Li Ruogu. It was agreed that funds be expeditiously provided to the Chinese companies investing in Pakistan. The chief minister expressed the confidence that there would be no shortage of resources for Chinese investors. "No compromise will be made on the standard, transparency and speedy completion of the projects. Work is being speedily completed on the coal-based power projects being set up in Sahiwal with the cooperation of China," he said.

Iqbal said that the special development package for Pakistan reflected Chinese government's confidence in the leadership of Prime Minister Muhammad Nawaz Sharif.

Earlier, a delegation of Shandong province of China, led by its Deputy Governor Xia Zing, met Shahbaz Sharif in Beijing and offered to declare Shandong and the Punjab twin provinces.

Talking to the deputy governor, Shahbaz Sharif said that people of the Punjab could learn a lot from Shandong's development experience.

Gigantic road projects to benefit masses: PM -- APP

ISLAMABAD - Prime Minister Muhammad Nawaz Sharif has said that unprecedented infrastructure building activity under the National Highway Authority Road Portfolio would greatly benefit people from all the four provinces.

Chairing a high-level meeting wherein he was given detailed briefing on the NHA Road Portfolio projects, the premier said that these projects, including the CPEC will cover all provinces and the whole country would benefit from the fruits of this gigantic structural development activity across the length and breadth of the country linking Gilgit-Baltistan, Azad Jammu and Kashmir to Karachi and Gwadar.

The PM was informed that an investment of \$1 billion from private sector in the road infrastructure projects would be achieved by the end of September 2015 and the overall communication network construction activity would contribute about 1 per cent to 1.5 per cent in the GDP.

He was further briefed that there would be an addition of 1,272km in the existing Motorways network with the completion of under construction and proposed projects.

The PM issued directions to complete all projects by December 2017, other than those projects which were scheduled for earlier completion. He further directed to prepare comprehensive plans for extending Pakistan's road infrastructure for connectivity with Central Asia in the first phase and later expanding road links to South Asia.

He also directed the NHA to prepare informative packages highlighting the road construction activity and the linkages created for the areas which were previously not connected to the Highway and Motorway networks. The prime minister appreciated the pace and quality of the work of NHA and directed to maintain the international standards in the quality of road construction. The 3,000-km corridor running from Pakistan's southern Gwadar port on the Arabian Sea to China's western Xinjiang region, was launched in April during President Xi Jinping's visit to Islamabad despite India's strong objections.

11 CPEC economic zones to be set up in Baluchistan -- The Nations

Islamabad: Federal Secretary of Board of Investment, Iftikhar Hussain Babar has said; eleven economic zones;out of total thirty-three of China-Pak Economic Corridor,eleven economic zones; (CPEC) will be setup in Baluchistan.

This, he said while talking to traders at Chamber of Small Traders and Small Industries in Quetta. He assured Baluchistan's traders that the federal government will extend cooperation to attract foreign investment in the province. Babar said that China Pakistan Economic Corridor would help in resolving unemployment issue as it would open new vistas of development in the region.

The China–Pakistan Economic Corridor (CPEC) is an ongoing development megaproject which aims to connect Gwadar Port in southwestern Pakistan to China's northwestern autonomous region of Xinjiang, via a network of highways, railways and pipelines to transport oil and gas.

The economic corridor is considered central to China–Pakistan relations and will run about 3,000 km from Gwadar to Kashgar. Overall construction costs are estimated at over \$46 billion, with the entire project expected to be completed in several years. The Corridor is an extension of China's proposed 21st century Silk Road initiative.

Economic corridor: China to extend assistance at 1.6 percent interest rate -- BR

China would extend assistance to Pakistan at 1.6 percent interest rate for infrastructure projects under the China-Pakistan Economic Corridor (CPEC), it is learnt. Member, Infrastructure and Regional Connectivity of Planning Commission Malik Ahmad Khan confirmed that China would extend assistance to Pakistan at 1.6 percent interest for infrastructure projects under CPEC. "We wanted China to reduce this rate from 1.6 percent to 1 percent. And the Finance Division is making efforts in this regard," he added.

Under the China-Pakistan Economic Corridor Projects (CPEC), China has promised to invest around \$11.8 billion in infrastructure projects and \$33.8 billion in various energy projects which will be completed by 2017 at the latest. According to sources, the corridor is a 2,700-kilometre highway that would stretch from Kashghar to Gwadar through Khunjrab. The CPEC will integrate the economies of the two friendly countries; it envisages several economic zones.

The sources said the first phase involves development of Gwadar Port which received a major boost when control of Gwadar Port was transferred to China's state-owned China Overseas Ports Holding in February 2013. The construction of an international airport is also envisaged under the first phase of the CPEC. Senior official sources revealed that during meetings of the Joint Working Groups (JWG) in Beijing on August 24 and 25, China asked the Pakistan Muslim League-Nawaz (PML-N) government to expedite its work on the Gwadar International Airport.

China has converted Rs 23 billion loans for Gwadar International Airport into a grant and extended an interest-free loan of Rs 13.5 billion for the construction of Gwadar East Bay Expressway. Member, Infrastructure and Regional Connectivity of Planning Commission confirmed that China has agreed to convert loans for the Gwadar International Airport into a grant and to extend an interest-free loan for the Gwadar East Bay Expressway; but added that the decision is not firm yet.

Sources added that it was also decided during the JWG meetings that the two major infrastructure projects would be completed by December 2017 - projects that are regarded as the catalyst that would enhance investment and development in Gwadar. The new Gwadar airport will be a modern airport of international standard and cater to the requirements of a bustling industrial commercial city. It will become a major hub for international flights operating in the region, sources said. The federal government has already completed the tendering process for East Bay Expressway and new Gwadar airport projects but the pace has been slow due to the required legal formalities. Since now China has taken up the responsibility for financing, things are expected to move at a much faster pace, sources revealed.

Pakistan and China have signed agreements for upgrading 1,300-kilometre Karakorum Highway connecting to Islamabad and laying a fibre-optic cable from the Chinese border to Rawalpindi. Sources said the Chinese government is dealing with Pakistan's military on a fibre-optic project and the two have already held a series of meetings. A meeting between the concerned military officers and the Prime Minister on this project is expected soon, sources added.

According to documents, the Eximbank China has agreed to provide the government a concessional loan at an interest rate of 2 % per annum for Cross Boarder Optic Fiber Project. The draft loan agreement has been cleared by the Finance Division. Pakistan will greatly benefit in terms of enhanced security and revenue from the state of the art optic fiber project between Pakistan and China for which a prominent Chinese telecom firm "Huawei" has been assigned the task. The optic fiber will be laid between Rawalpindi and Khunjrab, a distance of 820 Kilometers.

Malik Ahmed Khan said that there is no delay in Cross Boarder Optic Fiber Project and work on the project is continuing. Major infrastructure projects envisaged under the CPEC are Karakorum Highway up to Islamabad, Karachi-Lahore motorway, new Gwadar Airport, Gwadar Port with Kashghar through motorway and Motorway

Land for Gwadar Railway Station acquired: Saad Rafique -- Radio Pakistan

Railways Minister Khawaja Saad Rafique says land for Gwadar Railway Station has been acquired.

He was speaking at a meeting of Senate's Standing Committee on Railways in Islamabad, which was chaired by Sardar Fateh Muhammad Hassani.

Khawaja Saad Rafique said linking Gwadar with Quetta through rail will open new vistas of development in the province.

He told the meeting that Railways' land will be got vacated in the light of Supreme Court's orders.

Link to Gwadar Port: government to acquire 412 acres of land for railway container yard -- BR

Federal government would acquire 412 acres of land for railway container yard and construct railway line (25 kms) from sea port to Coastal Highway to Gwadar Port. According to documents available with Business Recorder, the land would be acquired for container yard measuring 1,900 X 600 meters and railway line of 25 kilometres from Gwadar Port to Gwadar railway container yard onward up to 25 kms at a point outside Gwadar limits, on Gwadar-Turbat-Hushab-Besima-Mastung rail link.

The proposed container yard will have capacity to handle about 500 railway bogie type freight wagons including marshalling of freight trains. The scope of work also includes establishment/construction of railway rest house of 3,400 square feet including allied facilities, erection of boundary stones for demarcation of acquired land and provision of logistic facilities for the required site engineer and staff.

Owing to increasing trend in land prices in Gwadar area, there is an immediate requirement for the acquisition of land for railway container yard, station other operational facilities and railway line from sea port up to coastal highway at Gwadar. The land will be kept reserved for developing of future rail link to Gwadar Port. The Central Development Working Party (CDWP) has proved this project with cost Rs 1.33 billion on August 31, 201. The original PC-1 of the project was revised and its cost increased from Rs 449.94 million to Rs 1.33 billion.

Pakistan Muslim League-Nawaz (PML-N) govt has allocated Rs 882 million in the development budget 2015-16 for this purpose. The project would be completed in two years. The original PC-1 of the project envisaging acquisition of 453 acres of land for railway container yard/station and double track line from container yard to deep sea port was approved by the CDWP in its meeting held on 25-02-2006 at the cost of Rs 450 million.

The cost of land was based on the rates furnished by the consultant at that time. Afterwards, Joint demarcation was carried out by the Pakistan Railways and Revenue Officials for the container yard and right of way up to 25 Km outside Gwadar Limit, for an area of 373 acres. The Secretary Board of Revenue, Government of Balochistan, Quetta was approached to intimate the cost of 373 acres of land, which was furnished as Rs 465 million. The approved amount of Rs 450 million was accordingly paid to Secretary (Revenue), Board of Revenue, Quetta during the year 2005-06 & 2006-07 against the demand of Rs 465 million. Gazette Notification under Section-4 of Land Acquisition Act was issued during October 2006.

Later on, a corrigendum dated 17-12-2007 was issued by EDO/Gwadar, through which the cost of land was increased to Rs 943.520 million and the area of land reduced from 373 acres to 285 acres, ie, restricting only to container yard. EDO (Revenue), Gwadar vide his letter No 434-38 dated 28-4-2008 informed that initial cost of the land amounting to Rs 450 million, furnished by Secretary Board of Revenue, Government of Balochistan is not valid, as the same was tentative and was estimated without due process. This necessitated revision of the PC-1. Now the revised cost is based on the recent mutations/sale deeds, including the cost of structures and trees etc. Commissioner, Makran Division at Turbat vide his letter No 169397/RB dated 25 June, 2010 has also provided copies of mutation showing the rates of land in the vicinity of container yard.

China leases 800 ha land at Gwadar port -- IHS Online

China has leased 809 ha of land at Gwadar port in Pakistan for 43 years to build the port's first free economic zone (FEZ).

Chinese media reported that Gwadar Port Authority has acquired 607 ha of land in June, and another 202 ha will be acquired soon. All requisitioned land is from Pakistan Navy and container depots in Baluchistan.

"Another 500 acres [202 ha] of land will be leased out to China very soon to complete their requirement for the construction of the first FEZ at Gwadar, so the total land of 2,500 acres [1,011 ha] will be provided to their companies," Pakistani government's top economic officials told local media.

The construction of infrastructure for the FEZ and economic processing zones will cost USD35 million, according to the port authority.

In April 2015 China won the right to operate Pakistan's Gwadar port for a period of 40 years, which will give China access to other Gulf countries.

Beijing and Islamabad decided to invest USD46.4 billion under the China-Pakistan Economic Corridor initiative, USD786 million of which would be used for different development projects at Gwadar.

Gwadar, located at the mouth of the Gulf and just outside the Strait of Hormuz, is the gateway for about 20% of the world's oil.

'Pakistan to get 5,600 megawatts electricity through five projects under CPEC' -- BR

"Pakistan will get around 5,600MW of electricity through five major projects under the China Pakistan Economic Corridor (CPEC) by the year 2017-18. Chinese companies are already working on these energy projects with full enthusiasm. The total cost of these projects has been estimated around US 10 billion dollars, being provided by the Chinese banks. Some of the cost will be supported by the companies themselves, which enjoy the complete support of the Chinese top leadership." This was stated by Pakistan's Special Envoy on CPEC Zafaruddin Mahmood in an interview with INP here on Tuesday.

These projects will be functional as Independent Power Plants (IPPs) under the power purchase agreement and there will be no liabilities on the Government of Pakistan as far as their construction is concerned. The Government of Pakistan will purchase the electricity as per relevant IPPs rules and regulations.

These projects are: Port Qasim 1320MW in Karachi, Hubco 1320MW in Balochistan, two units of coal based power plants at Thar each of 320MW, (two more units will be added in the second phase) 1000MW Quaid-e-Azam solar Park project at Bhawalpur, Sahiwal 1320MW Coal-fired project. Besides this, work is also in progress on Suki Kinari hydel power project of 800MW in KPK that will be completed by 2019-2020.

Zafaruddin Mahmood further said that the two sides are also working closely for construction of infrastructure development projects under CPEC. He hoped that work on KKH-phase-II, Karachi-Lahore Motorway (Multan-Sukkar section), Gwadar international airport and Gwadar East Bay Expressway will be started before the end of the year and completion is expected by the end of 2017. The Chinese government is providing mixed loans facility (including grant assistance, interest-free and concessional loans) to undertake these projects.

Another important area of bilateral co-operation under the CPEC is the development of special industrial zones. To this effect, a pilot project at Gwadar is being started. The project will include a commercial complex (hotel, exhibition hall, apartments, and shopping mall), fish and marble processing factories and a captive power plant. China Overseas Port Holding Company is investing for the project and the construction is expected to be started by the end this year.

Efforts are being made to make the pilot project operational by 2017. The special envoy said that the two sides remain in touch at various levels to ensure the implementation of CPEC in its true spirit. The CPEC, he said is major development in further consolidating Sino-Pak socio-economic partnership meeting the aspirations of their people.

‘Pakistan poised to rank among top 25 economies by 2025’ -- Dawn

ISLAMABAD: Federal Minister for Planning, Development and Reform Ahsan Iqbal said on Wednesday that Pakistan possessed the attributes of an advancing nation, and was well-positioned to rank among the world’s top 25 economies by 2025.

“The signs of a failing country cannot be attributed to Pakistan now that there is a clear vision, an independent judiciary, free media, and a growing civil society with a strategic economic roadmap standing on strong, democratic foundations,” he said, while addressing a national conference titled ‘Building Knowledge Based Economy in Pakistan’.

He said that his optimism was supported by the improving law and order situation, sustainable economic growth, and a favourable investment environment.

“At least the direction is right,” Iqbal said.

The conference was organised by the Islamabad Policy Research Institute (IPRI) alongside the Hanns Seidel Foundation.

Iqbal said that the ministry’s ‘Vision 2025’ emphasizes human resource development, regional connectivity, knowledge economy, inclusive growth, and shared prosperity.

He said that human resource development is at the top of the government’s priorities, and that education is being targeted through increased funding for higher education.

Iqbal also proposed a United States (US)-Pakistan knowledge corridor, which would allow Pakistan to benefit from the high quality science and technology education available in US universities.

“It is unfortunate that despite being a strategic partner, Pakistan was not given preferential treatment in terms of its students availing higher education opportunities in US universities,” he said.

Speakers at a subsequent panel at the conference discussed the reasons behind the stable economic growth enjoyed by countries such as Japan, South Korea, and Germany, despite the countries’ devastation due to war.

The panel highlighted how, in the 1950s when the Gross Domestic Product (GDP) of South Korea was less than Pakistan’s, their literacy rate was 62 per cent – something Pakistan has yet to achieve.

Senator Farhatullah Babar said that one major issue in Pakistan was the inconsistent policymaking by successive governments.

Dr. Usman Mustafa, from the Pakistan Institute of Development Economics (PIDE), said that the economy revolves around agriculture in its first phase, however, after the industrial revolution wealth became associated with manufacturing and commerce. He said that in the current era, wealth is linked with the ‘ownership of knowledge’ needed to produce goods and services.

“Not only are we talking about producing at low costs with better quality, there is now an increased demand for information,” Mustafa said.

The speakers, most of whom were economists, called for higher investments in research and development (R&D).

However, Dr. Tariq Bashir, from the Pakistan Council of Science and Technology, blamed both the government and stakeholders for not investing in knowledge generation, and said that the private sector should establish R&D centres for specific sectors to improve the competitive standing of exports.

Azhar Majeed, from the Federation of Pakistan Chambers of Commerce and Industry (FPCCI) said that the textile sector is facing severe challenges, and has remained stagnant for five years.

"But one of the most severe issues we face, apart from the energy crisis, is \$1.5 billion stuck with the Federal Board of Revenue for refunds," he said, adding, "Which industry would be willing to invest in R&D in such conditions?"

China acquires 809 hectares of land in Gwadar -- The Nations

LONDON: China has acquired 809 hectares of land on lease for 43 years in Gwadar.

According to UK defence magazine, IHS, China has acquired 809 hectares (1999 acres) land from Pakistan on lease for 43 years for construction of first Free Economic Processing Zone (EPZ) in Gwadar port.

As per the Port Authority, construction of basic infrastructure and EPZ will cost over Rs 3.65 billion. Citing a Chinese journal, the IHS wrote that Gwadar Port Authority (GPA) acquired 607 hectares of land in June and 202 hectares of land will soon be acquired. All the land has been acquired from Pakistan Navy and container depot Balochistan.

Referring to a statement given by the top economic managers of Pakistan to local media, the journal said more 500 acres of land will be leased out to China for construction of first free EPZ. This way, 2500 acres of land will be given to Chinese companies on lease. China attained the rights for carrying out work on Gwadar port for 40 years in April this year. This port will provide China access to Gulf States.

Gwadar-Nawabshah pipeline, LNG terminal: High-level Chinese delegation arrives -- BR

A high-level Chinese delegation has reached Islamabad to deliberate upon construction of 700 kilometres Gwadar-Nawabshah pipeline and Liquefied Natural Gas (LNG) terminal at Gwadar Port. Senior officials of the Ministry of Petroleum and Natural Resources told Business Recorder here on Wednesday that a delegation of China Petroleum Pipelines Bureau (CPP) had come to finalise the construction of Gwadar-Nawabshah pipeline.

The officials said the CPP would construct an LNG terminal at Gwadar Port with a capacity to handle 600 Million Cubic Feet per day of the commodity as well as laying the 700 kilometres pipeline which at a later stage, would be added by another 70 kilometres to transport gas from Iran under Iran-Pakistan (IP) gas pipeline project.

"A top level delegation of the Petroleum Ministry from September 2 to 7 visited China to discuss the matters related to Gwadar-Nawabshah pipeline and LNG terminal in Gwadar. Both the teams decided to expedite work on the projects," the officials maintained. "CPP will submit proposals by the end of ongoing month to Inter State Gas System (ISGS), after that both the companies will negotiate the terms and conditions of the contract and in March 2016, formal work on the laying of pipeline as well as LNG terminal will start and by the end of 2017, the project will be completed," a senior official who attended the meeting told this correspondent.

"The project will cost estimated two billions dollars of which 85 percent of the expenditures will be invested by CPP and rest by Pakistan," the official added. Gwadar is also the starting point of the China-Pakistan Economic Corridor (CPEC) project which was formally inaugurated during the presidential visit. The CPEC will conclude in China's province Xinjiang which is already an energy hub from where imported gas from Central Asia is channelled to China's industrial heartland.

Sources also said that Economic Co Ordination Committee (ECC) of the Cabinet in the next meeting is likely to consider a summary of the Ministry of Petroleum and Natural Resources to approve construction of second LNG terminal at Port Qasim

with a capacity to handle 500MMCFD of the commodity. "We are expecting that on October 6 Pakistan and Qatar will sign a long-term LNG Sales Purchase Agreement (SPA) of 400MMCFD on government to government basis," the officials added.

When the officials were asked why the government failed in inking final agreement with Qatargas to import the commodity on government to government basis, they said Port Qasim Authority (PQA) had failed in satisfying and clarifying the Qatargas officials on the depth of LNG channel. Officials said besides LNG channel depth the PQA was demanding \$1.2 million port fee from each LNG ship which is highest in the world. They said the channel's depth should be 14 meters but PQA had a 13-meter deep channel.

The PQA authorities quoted \$1.2 million for each cargo ship of LNG which is too high as compared to international standards as in Nigeria it costs \$0.75 million, in Qatar 0.125 million and in India 0.12 million. Sources said besides PQA's failure in developing the required channel depth for LNG cargos, the deal is also not been finalised, as the Ministry of Water and Power failed to persuade furnace oil-based Independent Power Plants (IPPs) to open letters of credit (LCs) and establish a payment mechanism for the commodity suppliers.

The Petroleum Ministry's responsibility was to negotiate rates and terms for LNG import and provide gas to Ministry of Water and Power for replacing furnace oil in power production. Sources also said that as per plan of the government, power sector had to use the imported LNG but private power plants did not open any Letter of Credit (LC) accounts as the power sector also linked to purchase of LNG to certain conditions.

**Pakistan, China sign 43-year lease for Gwadar Special Economic Zone --
The Nations**

Beijing: Pakistan has rented 2,300 acres to China for developing the first special economic zone in the deep sea port of Gwadar, CCTV reported today.

China has provided financial and technical support in the construction of the Gwadar port since March, 2002 at Pakistan's request. The infrastructure construction was completed in February. The SEZ and the port, is part of the China-Pakistan Economic Corridor that aims to connect Gwadar to China's Xinjiang via a transportation network. It will improve economic cooperation between the two countries.

The Pakistani government has granted the SEZ priority access to resources and preferential tax policies for investors.

Pak-China military relations will grow to unprecedented heights: COAS -- Geo News

RAWALPINDI: Chief of Army Staff (COAS) General Raheel Sharif visited Bahadur Ranges (Attock) and witnessed the closing ceremony of the Pak-China Special Forces joint exercise 'Warrior-III'.

According to an ISPR press release, Special Forces of Pakistan Army and Peoples Liberation Army (PLA) conducted a seven week long exercise with focus on counter-terrorism operations.

A senior level Chinese military delegation under General Li Fayi represented PLA on the closing ceremony.

Addressing troops, COAS congratulated all participants of exercise for displaying high level professional skills. He underscored that special relationship between Pak-China Armies which has transformed overtime will grow to unprecedented heights. "Both, China and Pak, will continue to work towards total elimination of terrorism in all its forms and manifestations."

COAS specially commended troops of SSG for their outstanding performance in Operation Zarb-e-Azb. He vowed to continue operations with the same momentum till the achievement of a Terror Free Pakistan.

PM opens Pak-China Friendship Tunnel -- The Nations

GILGIT - The federal government says it will focus on Gilgit Baltistan's prosperity and provide all possible resources for completion of development projects in the remote northern province.

Prime Minister Nawaz Sharif on Monday alleged that funds were not spent transparently in GB in the past otherwise the situation would have been different today.

Addressing Gilgit Baltistan Legislative Assembly (GBLA), he emphasised that each rupee should be spent with honesty.

"There should be no corruption in public spending."

He directed the chief minister to ensure transparency in the ongoing projects, adding that completion of these development projects will change destiny of the people of the area.

The PM expressed satisfaction that natural beauty of this land, striking peaks of glacier and exorbitant forest attracted hundreds of thousands of tourists this year. He said there was lot more tourism potential which needs to be explored.

He said security force will be deployed on the Karakorum highway from Gilgit to Mansehra to ensure peaceful and secure environment that would help promote tourism.

He said Pakistan-China Economic Corridor project envisages construction of road from Khunjrab to Gwadar, while a rail service will also be started.

Earlier, the prime minister inaugurated Attabad Tunnel on Karakorum Highway and realignment of the highway parts of which were submerged due to landsliding in January 2010.

The 24-km Attabad Tunnel, also named Pak-China Friendship Tunnel, in Hunza will benefit thousands of local commuters and help boost China trade.

As part of Karakorum Highway realignment, at least five other tunnels having accumulative length of over seven kilometres, 16 kilometres road section and two bridges – each one kilometre long— have been constructed in collaboration with China at a cost of \$275 million.

Govt urged to take private sector on board on CPEC matters -- The Nations

The Lahore Chamber of Commerce & Industry Wednesday organized a seminar on "China-Pak Economic Corridor – Private Sector" here at the Lahore Chamber of Commerce & Industry. Experts from various sectors of economy spoke on the occasion and threw light on the importance of private sector's role for the success of this game changing project. They were of the view that government should take private sector on board on China-Pak Economic Corridor related matters as business community is keen to play its greatest role for economic uplift of the country.

LCCI President Ijaz A. Mumtaz, Senior Vice President Mian Nauman Kabir, Chinese Consul General Yu Boren, Additional Chief Secretary, Energy Department Muhammad Jehanzeb Khan, Convener LCCI Standing Committee on Pak China Business Promotion Siddiq-ur-Rehman Rana, Former Vice Chancellor-UET & Chairman Punjab Curriculum Textbook Board Lt. Gen. ® Muhammad Akram Khan, Project Director – CPEC, Ministry of Planning, Development & Reform Maj Gen. ® Dr. Zahir Shah and former Finance Minister Dr. Salman Shah were the key speakers.

Experts said that China-Pak Economic Corridor would start a new era of progress and prosperity in the country therefore it should be handled through public-private partnership that would enable private sector avail this unique opportunity.

Former Finance Minister Dr. Salman Shah said that Pakistan is bound to become economically strong and independent with never ending chain of investments from China. It will only be possible if the respective private sector representatives play their due role much proactively.

LCCI President Ijaz A. Mumtaz said that objective of holding this seminar is to apprise the members about the trade & investment opportunities expected to occur right from the beginning and till the completion of this most vital economic corridor. He said that it will not be wrong to say that the economic benefits of this project are hard to estimate. China has already promised to invest more than 46 billion dollars in this connection. This project has the potential to work as a big push theory of Economics.

He said that although both the governments are closely collaborating in this project but at the same time, the private sectors of Pakistan and China are going to have a bigger role to play in this mega project.

Chinese Consul General Yu Boren said that China-Pak Economic Corridor is an overall cooperation platform with a focus on the long-term development of bilateral cooperation in various fields.

Govt pursuing IPGPP under alternative strategy: Senate told -- BR

ISLAMABAD: Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi on Friday informed the Senate that the government is pursuing the Iran Pakistan Gas Pipeline Project (IPGPP) under the Alternative Strategy approved by ECC of the Cabinet.

In Question Hours, he said that under the strategy, the government would complete around 700 kilometer pipeline to Gwadar deep seaport and Nawabshah.

He said Energy Terminal would be constructed at the site of Gwadar deep seaport. While the remaining 80 kilometers pipeline from Gwadar would take 4 to 6 months for construction soon after lifting of the international sanctions on Iran.

The Minister expressed the hope that construction of pipeline to Gwadar would be completed by December 2017.

Shahid Khaqan Abbasi further informed the house that Pakistan has signed Framework Agreement with China on April, 20 2015 in this regard. Chinese nominated company is expected to submit shortly following which EPC contract negotiations would start. Award of the contract was expected by December, he added.

He said as per the ECC decision, Iranian gas would be supplied to power sector through Sui companies.

To another question he said Pakistan was not liable to pay any penalty on this account as Iran had also not yet completed its segment of the pipeline.

Further elaborating, the minister said, that there were reports that around 250 kilometer pipeline on Iranian side was still pending.

Meanwhile Minister of State for Petroleum and Natural Resources Jam Kamal informed the Senate that the first five shipments of LNG were imported by PSO from the State of Qatar for the Gas companies and fertilizer sector customers.

He said the prices of petrol and diesel had decreased about 14% in International (Arab Gulf) market while in the country; the prices of same products were also reduced by 4 percent.

He said it was the responsibility of the OGRA to determine the price petroleum products.

He said exploration blocks were awarded to exploration and production companies for initial period of three years on the basis of firm work commitment.

He said that the companies were also required to fulfill their financial obligations during the period including rental, social welfare, training fund, marine research fee and production bonus.

The companies were also bound to give jobs to the locals, the minister said.

PAK, CHINA AGREE TO SPEED UP TALKS ON CPFTA-II --

Pakistan Observer

PAK, CHINA AGREE TO SPEED UP TALKS ON CPFTA-II

Islamabad—Pakistan and China, Thursday, agreed to expedite negotiations on China-Pakistan Free Trade Agreement-II (CPFTA-II) for early conclusion. Both the countries have also agreed to remove discrepancies in the trade data available with the two sides and decided put electronic data sharing systems in place on both sides before the end of this year which would help to deal with under-invoicing and mis-declaration

According to Ministry of Commerce, both sides came to this agreement in maiden meeting between Commerce Ministers of the two countries held in Beijing. This was decided in a meeting between Pakistani Minister for Commerce, Engr. Khurram Dastgir Khan and Chinese Minister for Commerce, Gao Hucheng in Beijing. This was the first meeting between the Ministers of Commerce of the two countries since negotiations on CPFTA-II started.

The Ministers decided that the Tariff Reduction Modality (TRM) for the second phase of CPFTA would be finalized soon. Pakistan reiterated stance that the second phase of CPFTA should be based on the principle of 'less than equal reciprocity in favor of Pakistan'. This principle entails that China would give tariff concessions to Pakistan which it has given to its other FTA trading partners while Pakistan may be allowed an adequate time period for reasonable reduction of tariffs keeping in view the prevalent conditions of Pakistani domestic industry.

SEZs on pattern of China can usher in industrial revolution: PCJCCI chief -- BR

President of Pak-China Joint Chamber of Commerce and Industry (PCJCCI) Shah Faisal Afridi on Friday said special economic zones on the pattern of China can bring industrial revolution in Pakistan.

While talking to a trade delegation from the Qingdao Commerce Bureau, China, here on Friday, Afridi said, "Pakistan is in a dire need of establishing the maximum number of special economic zones to tackle economic challenges being faced by the country since decades. The proposed SEZs on the pattern of China will strengthen the industrial base besides protecting the national economy from global financial recessions, thus enabling the government to use its resources at the targeted industrial areas."

He also said measures should be taken for creation of the zones on the Chinese style. "For attracting foreign direct investment, Pakistan must improve its internal security situation and promote cultural flexibility for assimilation of foreign investors," he added.

A latest World Bank report on these zones said, "As per estimates, there are approximately 3,000 zones in 135 countries today, accounting for over 68 million direct jobs and over US 500 billion dollars of direct trade-related value added within zones." He acknowledged that the Haier Ruba Special Economic Zone had faced challenging situation related to power, energy, law and order but still it is one and the only zone of its type in the country giving fruitful returns to the economy. He also admitted that the delegation had come with concrete proposals with reference to these zones.

Zhang Li, delegation chief said on the occasion that Haier was the first joint venture project of China and the expansion and development of Haier Ruba SEZ is on top priority list of Chinese government.

Zhang Li mentioned that SEZs play an instrumental role in the integration of China to the global economy and in its economic development. She informed that in China SEZs contribute to 20 percent of the total FDI. The delegates also visited the Haier Ruba Zone where they were informed that currently Haier-Ruba SEZ was covering wide variety of industrial sectors including electric appliances, power and energy, textile, furniture sector, software and technology and food processing. The Chinese delegation was assisted by the PCJCCI in arranging meetings with Punjab Industrial Estates Development and Management Company.

The delegation also visited Quaid-e-Azam Apparel Park that is working under the auspices of the management. The delegation which headed by Zhang Li, Deputy Director General of Qingdao Commerce Bureau, also included Sun Guoliang, vice general manager, Qingdao Huatong state-owned Capital Operation (Group) Co Ltd, Wang Da, President Qingdao Laoshan Mineral Water Co Ltd, Yuan Dezhao, Division Director Qingdao City Construction Investment Group Ltd.

Shehbaz asks Chinese firm to expedite solar power project -- Pakistan Today

Punjab Chief Minister Shehbaz Sharif said on Sunday the people of Pakistan and their future generations would never forget the historic economic package of China for them.

The chief minister made these remarks during his meeting with Yu Yong, the president of a prominent Chinese company in energy sector, where progress of the Quaid-e-Azam Solar Park project, Bahawalpur, under the China Pakistan Economic Corridor (CPEC) came under discussion.

Sharif said China was playing a commendable role in development of the various sectors of Pakistan and the people of Pakistan highly valued the cooperation and friendship of China.

He asked the Chinese company to further accelerate the work on the solar power project, and said under the CPEC, an investment of Rs 33 billion was being made only in the energy projects.

Sharif said China had proved to be a true friend of Pakistan by helping it overcome the energy crisis. He said the CPEC projects were an invaluable gift by the Chinese president and the government.

He said a solar project of 100-megawatt with Chinese investment under the CPEC would be completed next month while several projects would be producing energy till 2017.

The chief minister said a number of Chinese companies were working in Pakistan and Pak-China friendship had turned into strong economic cooperation. He said the economic package of billions of dollars given by China to Pakistan augured well for a bright economic future of the country.

Sharif said the people of the whole region including Pakistan would benefit from the CPEC projects and millions of new job opportunities would be created. He said no compromise would be made on the standard and transparency of the projects.

Yu Yong, on the occasion, said the chief minister had ensured transparency, speed and a high standard in the implementation of the projects which was highly commendable. He said the people of Punjab were fully benefiting from the practical measures and the development projects executed by the chief minister.

French think tank head favours Pak-France nuclear cooperation -- The Nations

ISLAMABAD - Director of the premier French think-tank Institute for International and Strategic Affairs has supported France's civil nuclear cooperation with Pakistan, on the pattern of the US-Indian civil nuclear agreement.

Dr Pascal Boniface, an eminent French intellectual, said that Pakistan as a country of 200 million people with nuclear weapons has a pivotal role to play in the most strategic part of the world'.

Delivering a guest lecture on 'France, Europe & Changing Global Scenario' at the Pakistan-China Institute, Dr Boniface criticised the Iraq War since it was 'destabilising for the Arab World', and he welcomed the Iran Nuclear deal terming it as a rare defeat for the powerful pro-Israeli lobby in the United States.

Senator Mushahid Hussain, Chairman of the Senate Defence Committee, who is recently-elected as Chairman of the Parliamentary Committee of the China-Pakistan Economic Corridor, was also present on the occasion, while the lecture was attended by the Ambassador of France, HE Mrs Martine Dorance, and Belgium Ambassador HE Verheyden, as well as a number of heads of think-tanks, university professors and scholars of international relations, former Foreign Secretary Riaz Khokhar and former head of ISI, Lt Gen (r) Asad Durrani. Ambassador Masood Khan, Chairman, Institute of Strategic Studies chaired the session.

Senator Mushahid praised the French role in world affairs, whose architect was the great French statesman, late President General Charles de Gaulle. He said that countries like France and China, together with Pakistan, would be key players in the emerging multipolar world. Lt Gen (r) Asad Durrani said that in today's world, there are two forces with a truly global outreach – the United States and Al Qaeda', with a capability to strike anywhere in the world.

The participants acknowledged that France, the largest country in the EU, and with nuclear energy providing the bulk of its power needs, is leading the world in civil nuclear energy technology for peaceful purposes.

Nathalie Dupont, Counsellor Political Affairs, Press and Communication, also shared her views with the participants regarding the need for strengthening bilateral relations, especially at the academic, and diplomatic level. The lecture was followed by an interesting and animated discussion among the distinguished audience.

Pakistan, China in pact to keep JF-17 tech away from US, India -- The News

BEIJING: China and Pakistan have a pact to keep the technology of their jointly-developed JF-17 Thunder multi-role combat aircraft away from the United States and India because of its superiority to America's F-16 fighter jet, claims the Beijing-based Sina Military Network.

The Block II variation of the JF-17, known as the FC-1 Xiaolong by China, recently entered into service for the "Minhas" No2 squadron of the Pakistan Air Force (PAF). The new and improved configuration of the lightweight fighter jet is said to include improved avionics and better software, as well as a fixed air-to-air refueling probe.

Minhas is the third PAF squadron to be upgraded to the JF-17, which is expected to replace the F-7P, a Chinese-made fighter that can be equipped with C-802A anti-ship missiles.

The JF-17 features an aerodynamic shape similar to the US Navy's F/A-18 and is powered by a high fuel efficiency Russian RD-93 afterburning turbofan. The aircraft's flight performance is said to be far superior to that of second-generation fighters, with its climb rate, maneuvering speed and acceleration making up for a relatively low top speed of Mach 1.6.

While the RD-93 is not regarded as advanced given it was originally developed for the Soviet MiG-29 fighter, the engine is considered stable and reliable, with PAF Air Commodore Khalid Mahmood, head of the JF-17 sales and marketing team, adding that they have never experienced any problems with it after more than 7,000 hours of use.

Chinese engineers are reportedly continuing to look for ways to lighten the weight and streamline the aircraft. One new advancement is pairing an RD-93 with a so-called divergent supersonic air intake, which is said to be lighter, easier to maintain, and minimises the JF-17's already low radar signals.

Recent photos of the JF-17 show the jet carrying two CM-400AKG high-speed air-to-surface missiles. Mahmood notes that the aircraft features flexible weapons stations that enable the JF-17 to be equipped with any weapon purchased on the open market.

Though the JF-17 can carry up to four SD-10 radar-guided air-to-air missiles, Mahmood states that the preference of the PAF is to use the space and weight for additional fuel tanks. The standard configuration of the JF-17 is therefore currently two SD-10s and two to three 1,000-litre external fuel tanks in addition to the 800-litre tank in the abdomen of the aircraft, he added.

According to the Sina Military report, expert comparisons between the JF-17 and the US F-16 have the Chinese-Pakistani aircraft dominating, adding that it is akin to a featherweight knocking out a heavyweight. The US has tried to get its hands on the JF-17 to analyse why that is the case but has been turned down by Pakistan because of a deal with China to never share the jet's technology with the US or India, the report added.

Shahbaz orders monitoring of rivers -- The Nations

Chief Minister Shahbaz Sharif has directed the federal and provincial departments concerned to remain alert in the wake of possible floods due to expected rain during the next few days.

This direction was made during a video conference with the Cabinet Committee on Flood and the administration of different districts at the Civil Secretariat here on Sunday. The CM also ordered round-the-clock monitoring of rivers. He said precautionary arrangements should be completed in the districts threatened by expected flood. He also directed the district administration to ensure immediate evacuation of the population in case of floods.

He said there should be proper arrangements for food, medicines and fodder for livestock in affected districts and the relevant departments should work with mutual coordination. He said the situation caused by rain should be closely watched and protective spurs and embankments should be strengthened. He directed the police to closely work with the administration and take indiscriminate action against the elements involved in illegal breaches.

The CM asked the Cabinet Committee on Flood to ensure immediate implementation of the decisions to cope with the possible flood situation and warned that no laxity would be tolerated in this regard. He said the arrangements should be effective and comprehensive in all respects and boats, dewatering sets and necessary equipment should be functional. He further directed that advance preparation should be made with regards to the possible flood in floodwater channels of Gujranwala division. He stressed the need for effective coordination between the federal and provincial departments concerned to ensure flood arrangements in this regard.

Assigning responsibilities to the ministers and secretaries in the districts to be affected in case of possible floods, the chief minister directed them to review the arrangements and preparations in the districts allocated to them. He said that timely provision of machinery and equipment should be ensured in case of any emergency and the control room should function round-the-clock.

During the video conference, the secretary irrigation gave a briefing on water situation in rivers while the PDMA director general informed about the arrangements and availability of necessary equipment. The Meteorological Department director general briefed on weather situation during the next few days.

The provincial ministers, the chief secretary and officers concerned from the Civil Secretariat, commissioners and district coordination officers of different districts attended the meeting from their respective areas through video link.

energy projects: Yu Yong, the president of a prominent Chinese company in energy sector, met Punjab Chief Minister Muhammad Shehbaz Sharif here on Sunday.

During the meeting, pace of progress on the solar project at Quaid-e-Azam Solar Park Bahawalpur under the CPEC was discussed. Chief Minister Shehbaz Sharif said China was a very reliable and sincere friend of Pakistan. He said China was playing a commendable role in the development of various sectors in the country and the people of Pakistan highly value the cooperation and friendship of China. He said China had proved to be a true friend of Pakistan by helping in energy crisis issue. He said the CPEC projects were an invaluable gift to Pakistan by the Chinese government. Shehbaz Sharif said the people of Pakistan and their future generations would never forget the historic economic package of China. He said under the CPEC, investment of 33 billion dollars was being made only in energy projects. He said a solar project of 100MW with Chinese investment under the CPEC would be completed next month while several other projects of energy production would be completed till 2017. He said a number of Chinese companies were working in Pakistan and the Pak-China friendship had turned into a strong economic cooperation. He said the economic package of billions of dollars given by China to Pakistan augurs well for a bright economic future of the country. He said every effort would be made for early completion of the projects being executed under the CPEC. Shehbaz Sharif said the people of whole region including Pakistan would get benefit from the CPEC projects. He said millions of new job opportunities would be created with the launching of various projects in Pakistan with the investment of China. He said implementation of Chinese economic package would usher in an era of progress and prosperity in the country. He said no compromise would be made on the standard and transparency of the projects. He asked the Chinese company to further accelerate the work on the power plant of solar project. President of the Chinese energy company Yu Yong said Chief Minister Shehbaz Sharif had ensured transparency, speed and a high standard in the implementation of projects, which was highly commendable. He said the people of Punjab were getting benefits from the practical measures and the development projects executed by the Punjab chief minister.

China converts \$230m loan for Gwadar airport into grant -- The News
ISLAMABAD: In a major development, China has converted the \$230 million loan for the construction of the Gwadar airport into grants, which is scheduled to be completed by December 2017, The News has learnt.

Beijing has also converted \$140 million loan for the construction of Eastbay Expressway Project for Gwadar city as interest-free and will get back only the principal loan amount from Islamabad.

"Out of the overall cost of \$3.8 billion for infrastructure projects including Gwadar airport, construction of the Lahore-Karachi motorway section from Multan to Sukkur and other projects, the interest payment on Chinese loan was slashed down from over 3 percent to just 1.6 percent," official sources in the Economic Affairs Division confirmed while talking to 'The News' after holding a review meeting on the China Pakistan Economic Corridor (CPEC) projects with Minister for Planning and Development Ahsan Iqbal in the chair here on Tuesday.

After conversion of loan into grants, the authorities concerned have stopped the bidding process for the New Gwadar International Airport as now only the Chinese companies will be awarded construction of this important airport. Beijing will select the company. It is expected that China will designate MOFCOM for undertaking the construction of the New Gwadar International Airport.

In case of possibility of cost escalation, the Chinese side will be requested to increase the size of resource envelop to complete this project within the stipulated time-frame.

When contacted, Gwadar Port Authority (GPA) Chairman Dostain Khan Jamaldini said that they had leased out 2,281 acres of land to the Chinese company responsible for operating this port.

"We have completed all required legal documents while handing over of land will take place by next month," he concluded.

On contact, Minister for Planning and Development Ahsan Iqbal said that China had brought down its loan cost in a major way in order to accelerate the progress of CPEC. Some loans were converted into grants, some were converted into interest-free so the cost of the overall basket was slashed down to benefit Pakistan, he added.

Official documents available with 'The News' reveal that under the CPEC initiative, Beijing and Islamabad had decided to spend \$786 million on different important physical projects of Gwadar.

The Gwadar Coal Power Project will be constructed at an estimated cost of \$360 million in order to produce electricity of 300MW. So, the overall investment on Gwadar will be more than \$1 billion under the CPEC, including one coal power project of 300MW. The construction of infrastructure for Free Economic Zone and Economic Processing Zones port related industries will cost \$35 million.

The construction of breakwaters will cost \$130 million. The dredging of berthing areas and channels will cost \$27 million under the CPEC over the next couple of years. The necessary facilities for a fresh water treatment plant at Gwadar will cost \$114 million under the CPEC over the next few years.

One state-of-the-art hospital having 300 bed facilities will be constructed at Gwadar at estimated cost of \$100 million. Both the sides also decided to establish a technical and vocational institute at Gwadar at an estimated cost of \$10 million.

All Day

**Gwadar-Nawabshah: Work on portion to end by December 2017 --
Express Tribune**

ISLAMABAD: Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi reiterated that construction of Gwadar-Nawabshah gas pipeline, which forms the most significant part of Iran-Pakistan (IP) gas pipeline project, would start within six months and is to be completed by December 2017.

"The 700km pipeline is to be built by a reputable Chinese company," said Abbasi during an interview with the Iranian News Agency. "Sanctions are still in place and investors are worried about their re-imposition due to legal issues. We are, however, working on it."

"As soon as the sanctions are lifted, construction of Iran-Gwadar portion of the pipeline would resume. The design is ready and we just need to order the equipment."

Abbasi further stated that the project is not an 'alternative strategy' and rather one of the main government strategies to facilitate natural gas (including LNG) imports to meet the rising demand. Other relevant projects include the TAPI (Turkmenistan, Afghanistan, Pakistan and India) pipeline project.

"We have requested a meeting with Iranian oil minister to inform him about the latest IP developments. We also look forward to Iran's cooperation in the post-sanction era."

With regards to the price of Iranian natural gas, he disclosed that the basic price has been agreed upon, under the IP contract, but the final will be mutually decided in light of the market realities, one year before the first gas flow.

"This 42-inch pipeline is dedicated to Pakistan alone and there is no room for other countries to join or rejoin the project. It doesn't have the capacity to cater to any other country. If India or China seeks Iranian gas, new parallel pipelines will need to be built."

As for the TAPI pipeline project, he added that the government of Turkmenistan had taken charge of building the pipeline. "Afghanistan is a part of TAPI pipeline route and security issues of this country have always been a concern. The cost of this pipeline is yet another issue," he remarked.

Central-Asia-South Asia Energy and Trade Corridor Launches -- Kaleej Times

The new Central-Asia-South Asia energy and trade corridor entails three main components. The first two of these are the Turkmenistan-Pakistan-Afghanistan-India, or TAPI gas pipeline, the Central Asia-South Asia-1000 (CASA-1000) electrical energy grid. Plans also include boosting trade in the region by opening all countries involved for mutual business, as well as to drastically lower tariffs, and to make transportation more cost-effective, M. Aftab writes for Khaleej Times.

The newly launched corridor is also being set up to expand the utilization of oil and gas pipelines within the area as well as to and from the region. They will link the UAE-Middle East-Saudi Arabia via the shortest route – through the Pakistani Gwadar Port of Gwadar.

The republics of Centra Asia are located to the west and north of Pakistan and China. They possess a huge untapped amount of energy reserves with potential to satisfy demand in Afghanistan, Pakistan, India, South Asia as well as Tajikistan, Kyrgyzstan and Uzbekistan.

The Central Asian republics have also agreed to enter the much larger \$46 billion CPEC project (China Pakistan Economic Corridor), which will travel from Shanghai to the west as well as south to the Gwadar Port.

Sahiwal coal power project will be functional by 2017: CM -- APP

LAHORE: Punjab Chief Minister Shahbaz Sharif on Tuesday paid a surprise visit to 1320MW coal power project in Qadirabad, Sahiwal and reviewed the pace of progress of this important and big project of power generation.

Speaking on the occasion, the chief minister said that two coal-based energy projects of 660 megawatts each are being set up in Sahiwal and it is an important project of China-Pakistan Economic Corridor. He said that the project will start energy generation during 2017.

The chief minister directed the authorities concerned for speedy completion of the project to achieve the best results. He said that Sahiwal Coal Power Project will play an important role in removing darkness from the country with the help of China.

Shahbaz said that this project comprising two power plants of 620 megawatts each is another splendid example of Pak-China friendship and will further strengthen economic and trade relations between the two countries. He said that Sahiwal Coal Power Project is of vital national importance and work is being carried out expeditiously on this 1,320 megawatts project.

The Punjab government and the Chinese company will complete this project till 2017 through collective efforts, he maintained. He said that most modern super critical power plants are being installed in Sahiwal, which are environment-friendly and meet the environmental standards. He said that every moment is precious and there is no room for delay in the implementation of the project.

The CM said that he is personally monitoring this project regularly and had come to the site of project for this reason. He said that this power plant is the biggest and first ever project of power generation with coal in Pakistan and Chinese companies have made investment in this project.

He said that China's huge investment in Pakistan is not merely an investment but a splendid gift for Pakistan, which Pakistani people can never forget. The chief minister said that Sahiwal Coal Power Project is the first drop of rain with regard to CPEC and will result in generation of much-needed electricity and elimination of darkness.

The historic economic package of China is a reflection of the confidence of Chinese president in Prime Minister Nawaz Sharif and the deep love for 20 million people of Pakistan, he remarked.

He said that the efforts for overcoming energy crisis with the cooperation of China will result in removing darkness from the country, promotion of industrial activities, generation of job opportunities, besides poverty alleviation. He said that the journey of progress and prosperity of Pakistan started with the cooperation of China will be continued and Pakistan will achieve its goal.

The chief minister was informed during a briefing that the machinery of coal power project has started reaching Karachi Port and steps are being taken for its speedy transportation to the site of the project. He was further told that work is in progress expeditiously on the project and it will be completed within stipulated period.

Pak-China ties to attain new heights: Enovy -- The Nations

ISLAMABAD - Chinese ambassador to Pakistan Sun Weidong said yesterday that bilateral relations between China and Pakistan would attain new heights to their mutual benefits.

Ambassador Weidong made these remarks while addressing a reception he hosted at the Embassy to celebrate the 66th anniversary of the founding of People's Republic of China.

President of Pakistan Mamnoon Hussain graced the reception as chief guest. More than 900 people from different walks of life including ambassadors of various countries, political leaders and senior civil and military officials attended the reception.

Ambassador Sun Weidong said that during Chinese President Xi Jinping's historic visit to Pakistan earlier this year has given new impetus to the bilateral relations to the all-weather strategic cooperative partnership as the China-Pakistan relations have entered into a new stage of grand and vigorous development.

He said that the China-Pakistan Economic Corridor (CPEC) has entered into implementation from early planning, adding that the CPEC is a long-term ongoing cooperative process requiring unremitting efforts from both sides, and will bring benefits to the people of our two countries and also help promote the regional development.

"This year is the Year of China-Pakistan Friendly Exchanges," the ambassador said, adding that Chinese Consulate General in Lahore is to be officially inaugurated while direct flights by Air China between Beijing and Islamabad will soon commence.

He continued that more facilitation will be offered to the visa application of the Pakistanis who participate in the CPEC projects and hoped that these measures will surely promote the interaction between peoples of two countries and further deepen our mutual understanding and friendship.

He emphasized that the two brotherly countries should make joint efforts to further promote the China-Pakistan friendship, realize our common dreams, and achieve the goal of the Community of China-Pakistan Shared Destiny at an early date.

Ambassador Sun Weidong also spoke about the great progress made in the development of China over the past 66 years, stressing that the Chinese economy has entered into the new phase and China continues to deepen reforms and expand opening-up.

He was confident that China is able and confident to maintain steady and relatively rapid development of its economy.

The Chinese Ambassador thanked the President Mamnoon Hussain for attending the reception.

Earlier upon arrival, President Mamnoon Hussain was warmly received by the Chinese ambassador and his wife along with other staff of the Chinese embassy. A Chinese girl clad in traditional dress presented bouquet to the President.

The ceremony commenced with playing of national anthems of Pakistan and China. On the occasion, the President cut the cake to celebrate the 66th anniversary of the founding of the People's Republic of China.

President Mamnoon Hussain extended his warm felicitations and best wishes to the Government and people of China on their National Day.

Later, the President witnessed an art performance and appreciated the skills of the performing Chinese artists.

PARC, LZU CHINA SIGN MOU FOR AGRI RESEARCH, DEVELOPMENT COOPERATION -- Pakistan Observer

Islamabad—Pakistan Agricultural Research Council (PARC) Chairman Dr. Nadeem Amjad chaired a high level meeting with Chinese Delegation from Lanzhou University-China and PARC senior scientists at National Agricultural Research Centre (NARC) to strengthen collaboration in agricultural research and development. On this occasion, Professor Dr. Wang Cheng, President of Lanzhou University (LZU) China said China playing its role in constructing the world economy. He said Pakistan and China are 24 hour friends not only at political level but this friendship is recognized and appreciated among the people of the both countries. Pakistan and China has always been enjoying long history of collaboration that is being strengthened with passage of time that's why Pakistan is an important pillar of China's "One Belt-One Road" initiative. He said PARC and LZU have long history of bilateral collaboration in agricultural research and development.

He said MoU between PARC-LZU and establishment of PARC-LZU Ecological Agriculture Centre at NARC will not only be source to strengthen this collaboration but also help to upscale this ongoing collaboration from organizational level to national and regional level through research and technological development by sharing the knowledge, expertise, scientific material and information. On this occasion Dr. M. Azeem Khan, Director General of NARC briefed about NARC which is the largest agricultural centre in Pakistan. Dr. Abdul Ghafoor gave a overview of on-going Pak-China Projects. Dr. M. Ehsan Akhtar, Senior Registrar, PARC Institute of Advanced Studies in Agriculture (PIASA) gave presentation about PIASA.

Prof. Ruijan Long, Director Research of LZU gave a detail overview about Lanzhou University-China. He said the LZU was ranked 74 of best university in Asia and 26 in China and 453 of best global university.

SCO membership – a potential trump card for Pakistan -- The Express Tribune

ISLAMABAD: The process of granting Pakistan full membership of the Shanghai Cooperation Organisation (SCO) got under way in Ufa during Prime Minister Nawaz Sharif's visit in July this year and the country is expected to win the status in January 2016.

This will provide Pakistan an opportunity to play its cards strongly with conventional development partners like the United States and multilateral donors including the World Bank, International Monetary Fund and Asian Development Bank. There is a common perception that the US uses these multilateral forums for political gains globally.

The SCO summit in Ufa, Russia once again outlined its status as an important and effective multilateral forum that discusses actual problems of international policy, economy, regional stability and security. These four elements have been very important in stimulating investment.

Read: Pakistan set to join SCO security bloc

The influence of this forum is consistently growing. After Iran enters it and the number of observer countries and dialogue partners increases, the SCO will definitely transform itself from being a regional "hub club" to a powerful cooperation forum that deals with economy and security issues on a wide geographical area from eastern Europe to Southeast Asia.

The permanent SCO membership for Pakistan will ensure greater access to resources and energy import projects within the grouping's framework. It would not have to wait for long, just the start of the membership process will give Pakistan a trump card in dialogue with traditional donors, particularly the US, who always tries to use its economic support as a pressure tactic.

Look at the Iran-Pakistan (IP) gas pipeline project. In this case, Pakistan has faced mounting pressure to shelve the scheme and move towards liquefied natural gas (LNG) imports from Qatar. Even the US Agency for International Development (USAID) has engaged a consultant to assist Pakistan in inking a commercial deal for LNG supply with Qatar.

Economic cooperation

Pakistan's membership of the SCO will significantly strengthen the country's position in the region and the world over and will have a positive impact on several major issues pertaining to military and technical cooperation between Russia and Pakistan and on huge communication projects with China.

With plans under way to connect the Silk Road Economic Belt with the Eurasian Economic Union, the role of Pakistan in regional economy and infrastructure projects will definitely increase because the Kashgar-Gwadar project between Islamabad and Beijing is part of the Silk Road belt.

Federal Commerce Minister Khurram Dastgir Khan, in a recent meeting of SCO commerce ministers in China, offered them to use Pakistan's ports once the China-Pakistan Economic Corridor was completed to get access to trade routes through the Arabian Sea.

He said Pakistan's trade strategy focused on developing linkages with neighbours, leveraging the country's geographical location and capitalising on regional connectivity initiatives. Cross-border land trade is especially important for landlocked countries and Pakistan and SCO members will benefit substantially from greater integration through energy, commerce and transit trade.

Read: Opposition ticks off PM Modi for Ufa rendezvous

He added CPEC was a landmark initiative under the umbrella of "One Belt One Road" and it envisaged connectivity and expansion of trade and investment through a network of roads, rail, fibre optic cables and energy pipelines. This was the vision that Pakistan and China were following to enhance trade by connecting the region, he said.

Word of caution

However, experts caution that things could get complicated if Pakistan tries to use the SCO forum to resolve its issues without paying attention to the interests of other member states. SCO definitely has the potential of mediating and resolving varying problems, but such attempts could prove counterproductive.

However, western countries, though critical about the SCO, have a growing understanding that the grouping has already consolidated its place as one of the key forums of international cooperation and it is almost impossible to ignore it. Pakistan could also use it effectively by looking at multiple options in order to deepen economic cooperation because economic development is the best remedy to the threat of terrorism.

The writer is a staff correspondent.

China to construct \$2.5 billion Gwadar -- The News

ISLAMABAD: In a positive bid to cope with the burgeoning energy crisis, the process to award the contract of \$2.5 billion to China Petroleum Pipeline Bureau (CPPB) for erecting LNG terminal at Gwadar and laying down 711 kilometres long and 42 inches diameter pipeline from Gwadar to Nawabshah will be completed in November this year.

Both the components of the project will come on stream in December 2017. To this effect, the technical bid here on Wednesday opened as per the tender toing the spirit of PPRA Rules.

"The Chinese state owned company — CPPB — has under the government-to-government arrangement deposited its technical and commercial bids for the \$2.5 billion project, and we have examined and screened all the documents relating to the technical bid. However, the commercial bid will be opened in November once the evaluation of the technical bid gets completed," Mubeen Saulat, Managing Director of Inter-State Gas System (ISGS), told media persons after the technical bid was opened.

However, the international consultant will also minutely examine the documents of the bids. The said Chinese company will not only construct the LNG terminal with a capacity to handle 500 million cubic feet gas per day with modern floating re-gasification and storage unit (FRSU), but also lay down 711 kilometres pipeline from Gwadar to Nawabshah with a capacity to carry 1.5 billion cubic feet gas per day.

"Both the components of the project will cost \$2.5 billion," Saulat said, adding that the said Chinese company will provide 85 percent investment and the government of Pakistan will provide 15 percent. The Chinese company will manage the loan from China Exim Bank and Pakistan will pay off the loan in 20 years' time from the revenue of the project.

To a question, he said once the international sanctions on Iran are lifted, then this Nawabshah-Gwadar pipeline will be extended backward by 70 kilometres in six to eight months time from Gwadar to MP 250, a point at the Pak-Iran border, for the import of Iranian gas.

And then the whole pipeline of 781 kilometres will be branded as the Iran-Pakistan (IP) gas pipeline.

From Iran, Pakistan will initially get 750 million cubic feet gas per day which will be increased up to 1 billion cubic feet gas per day. However, through LNG terminal, system will get 500 mmcgd gas per day which means that the gas pipeline will be carrying 1.5 bcfd gas in toto. Saulat claims that the project is a part of China-Pakistan Economic Corridor (CPEC) initiatives and it will be included in the early harvest projects.

According to Saulat, the Chinese company will be bound to get 30 percent component of the total project completed through Pakistani companies which are to be approved by the Pakistan Engineering Council (PEC).

Pakistan's security agencies will be providing security to both LNG terminal and the pipeline. However, for the inside of Chinese officials and workers camp, Chinese security agencies will be responsible for the security.

PM lauds China role for promoting peace in region -- APP

UNITED NATIONS: Pakistan appreciated China's "proactive role" for promoting peace and prosperity in Afghanistan and the region.

Addressing the 70th session of the UN General Assembly, the Prime Minister also welcomed China's vision of "One Belt, One Road".

“The China-Pakistan Economic Corridor, announced during President Xi Jinping's visit to Pakistan earlier this year will spur regional economic integration and bring prosperity to the entire region and beyond,” Nawaz Sharif added.

He termed it an inspiring model of South-South cooperation and said it needed to be emulated.

Pakistan is building an ambitious trade corridor to link China's Xinjiang province with its Gwadar Port, providing a linkage to China with the Middle East, Central Asia and South Asia.

China to gift 1MW solar power project for Pak parliament -- The News
ISLAMABAD: Acting Speaker National Assembly Murtaza Javed Abbasi said that Pakistani and Chinese political leadership are determined to further strengthen the all-weather and time-tested Pak-China friendship and also let it be known to the world.

He said this while chairing a high level meeting with Chinese delegation regarding Green Parliament Project at Parliament House on Thursday.

The Acting Speaker said establishment of 1-MW Solar Power Generation system by the Chinese Government is the first major project under China Pakistan Economic Corridor (CPEC) that reflects the continuation of Chinese resolve in supporting Pakistan in its socio-economic development.

He said that this project would add a new chapter to the existing cordial relations between Pakistan and China. He praised the commitment and untiring efforts of China in this regard and said that Parliament of Pakistan would hold the distinction of being the first Parliament in the world to go green. He stressed the need for replicating the model in other government buildings to address the prevalent energy constraint.

The Acting Speaker felicitated China on its National Day and expressed his wishes of continuous prosperity and development of China.

The Chinese delegates said that China attaches great importance to the maintenance of an extremely close and supportive relationship with Pakistan.

They said that China-Pak Friendship is all weather and the solar power generation system for the Parliament of Pakistan would be a gift from China that will be a state-of-the-art development to be completed within shortest possible period and Chinese Embassy will take every measure to ensure the high quality of this project. The meeting was attended by senior officials from both countries including First and Second Commercial Secretaries from Chinese Embassy and Additional Secretary Economic Affairs Divisions and officers of National Assembly Secretariat from Pakistan.

CPEC will create new job opportunities for youth: President -- Radio Pakistan

Mamnoon Hussain says development projects do not belong to any particular party or group but will serve entire country.

radio

President Mamnoon Hussain has urged all strata of society to reject any obstacle in the way of completion of mega development projects launched by the present government.

He was addressing the members of parliament of Balochistan in Quetta on Tuesday.

He said these projects do not belong to any particular group or party but will serve the entire country.

Referring to the China-Pakistan Economic Corridor (CPEC), the president said this will generate economic activity in the country and create hundreds of thousands of new job opportunities for the youth.

He said the CPEC project envisages several projects of motorways and energy as well as development of port and international airport at Gwadar.

Referring to Zarb-e-Azb operation, the President said the operation against terrorists is heading towards conclusion while Karachi operation is also showing positive results.

President Mamnoon Hussain also held a meeting with Governor Balochistan Muhammad Khan Achakzai at Governor House in Quetta on Tuesday.

They discussed matters pertaining to development of the province with particular focus on the development of Gwadar port.

Earlier, on his arrival, President on a two day visit to Quetta, the President was received by provincial Chief Minister Dr Abdul Malik Baloch, provincial ministers and other government officials.

During the two day visit, the president will meet various delegations including parliamentarians and journalists in Quetta.

Linking Pakistan with Central Asia is govt's priority: PM -- The News
ISLAMABAD: Prime Minister Nawaz Sharif announced on Wednesday that linking Pakistan with Central Asian Republics (CARs) through a quality road network is the government's top priority.

"Gwadar is being upgraded as a modern sea port to provide access to the landlocked CARs," PM Nawaz told Asian Infrastructure Investment Bank (AIIB) president designate Jin Liqun, during a meeting at the PM House in Islamabad.

Read: Winds of change: G-B CM hails prime minister's speech at UN

The prime minister claimed that the government has invested a lot of resources in energy and infrastructure projects with the help of the Chinese government.

Further, PM Nawaz highlighted the government's economic policies and informed the AIIB president that the country's economists are committed and focused to providing a conducive economic environment to the private sector. "The economy of Pakistan is turning around and we have good economic growth rate," he added.

Liqun thanked the prime minister for Pakistan's support in establishing the AIIB. "The bank is specifically established to assist the Asian countries and they are also among its major shareholders," the AIIB president designate said.

Read: Workable solution: PM urges India to end proxy war in Pakistan

"AIIB will assist Pakistan in infrastructure projects and other economically productive projects in a cost efficient and effective manner," Liqun added.

Second phase of FTA with China: MoC urged to cut 'fair' trade deal -- Bremen, Germany

Pakistan's industrial stakeholders have reportedly urged the Ministry of Commerce (MoC) to negotiate "Fair Trade Agreement" instead of under-negotiated Free Trade Agreement-II (FTA-II), allowing import of raw materials not finished products, well informed sources told Business Recorder. This was the crux of the recent consultative meetings between the Commerce Ministry's team and industry representatives held in Islamabad. The second phase of China Pakistan Free Trade Agreement (CPFTA) will be held on October 14, 2015 in Beijing.

The FTA inked between the two countries on November 24, 2006 is currently undergoing a review to finalise phase-II. In the phase-I Pakistan had offered market access to China namely on machinery, organic and inorganic chemicals, fruits & vegetables, medicines and other raw material for various industries including engineering sector, intermediate goods for engineering etc. In phase-II, both parties are aiming to eliminate tariff on no less than 90% of the products both in terms of tariff lines and trade volumes.

In view of mixed reaction to phase-I of the FTA, Ministry of Commerce is working to address the concerns of Pakistan's industry and trade on this agreement. During the review of phase-I, the discrepancy in reported figures between the two countries has been a major source of concern for the policymakers and the trade and industry representatives. For example, in its report on Pak-China FTA, Pakistan Business Council (PBC) has quoted figures of exports from China to Pakistan at \$11.019 billion in 2013. However during the same period, Pakistan recorded imports of only \$6.626 billion. This has created an 'unaccounted for' gap of \$4.393 billion. Similarly, recorded exports of Pakistan to China are \$2.652 billion while during the same period i.e. 2013, China recorded imports of \$3.196 billion giving a gap of \$544 million. One of the reasons for such discrepancies in trade figures is massive under invoicing and smuggling of goods from China.

Commerce Minister Engineer Khurram Dastgir, who is searching for "bright" officials for the Ministry, is seriously concerned about unaccounted for gap of about \$5 billion. He recently met with his Chinese counterpart and urged him to resolve this issue. During the 4th meeting of negotiation of 2nd phase of CPFTA held in Beijing from 31st March to 1st April, 2015 Pakistan shared its concerns regarding insufficient utilisation of concessions given by China to Pakistan and competition faced by the local industries due to cheap imports from China. It was agreed that the tariff reduction modalities of 2nd phase would be designed in a way that all the genuine concerns of the two countries are adequately accommodated.

During the review sessions, which the MoC has conducted, common concern shared by the domestic industry has been massive hemorrhage because of unfair advantage that Chinese goods have in Pakistan against the local industry. Support of Chinese government for its own industry through financial and non-financial measures, huge economies of scale that Chinese industry enjoys and lack of implementation of tariffs and import procedures at Pakistani borders are some of the major contributing factors that are disadvantaging Pakistani industry. Pakistan's economy is uncompetitive vis-à-vis China due to lack of essential infrastructure, such as gas, electricity and exorbitant cost of other services.

The industry representatives raised serious concerns over allowing further reduction in tariff at a time when Pakistan has been unable to enjoy any increase in exports that can specifically be linked to FTA with China. On the other hand, many industries in Pakistan such as steel, ceramics, paper and paperboard, footwear, electric and electronic goods suffered badly into face of cheap Chinese imports. Footwear, tiles and ceramics, electric and electronics goods have virtually perished. Analysts argue that Pakistan steel industry is strong enough to meet the local market demand but due to low cost of value added steel from China along with an increase in tariff of raw-materials used by our local manufacturers has placed them at a disadvantageous position. Similarly, tile industry in Pakistan is meeting the demand of local market but lower declared values of imports along with lower import tariff and under-invoicing is causing massive hemorrhage to the local

industry. In case of paper and paperboard industry, imports from China have increased by 563% in last five years (2010-14). This has virtually crippled the local industry. Due to a huge surge in imports, many units in this industry have closed down while those still operational are struggling for survival.

The minister has been giving a patient hearing to all sectors and the negotiations are planned to continue through next week, giving the Pakistani side insight and material to negotiate a better deal this time.

Emerging theme behind reducing sensitive list during discussion on second phase of Pak-China FTA is to allow import of those products of different sectors that are not being manufactured locally. However, potential of such products to be produced locally in future is also being discussed. It has been realised that by allowing these products to be imported at a lower or no tariff, the future opportunity for producing locally will be lost. Emerging theme seems to be to allow import of raw-materials in FTA while placing finished/ semi finished product in 'no concession list'.

Industry is eagerly looking forward to a favourable outcome of these negotiations, as the future of manufacturing in Pakistan will depend on the success of Pakistan's negotiating team. In essence, the negotiating team from Pakistan and the industry are looking for "Fair Trade Agreement" instead of 'Free Trade Agreement' so that country's interest may be protected in term of gains of trade.

Pakistan's major exports to China are cotton yarn/fabric, rice, raw hides & skins, crude vegetable material, chemical material, fish and fish preparations and crude mineral etc. While major imports from China are machinery (all sorts) and parts, fertiliser manufactured, chemical element, yarn and thread of synthetic fiber, iron and steels, chemical material and product, vegetable and synthetic textile fiber, road vehicles and their parts, non-ferrous metals, tyres and tubes of rubber etc. Pakistan secured market access on products of immediate export interest like cotton fabrics, blended fabrics, synthetic yarn and fabrics, knit fabrics, home textiles, minerals, sports goods, cutlery, surgical goods, kinnow, mangoes, industrial alcohol, etc.

During the first three years of implementation of phase-I, both sides reduced tariffs on almost 36% tariff lines to zero duty. The phase II was supposed to start from the sixth year of the entry into force of the agreement and by the end of 2nd phase both sides would have to reduce tariffs on 90% tariff lines to zero percent duty. The FTA covers more than 7000 tariff lines at HS Code 8 digit level.

According to sources, review of the first Phase of CPFTA has revealed that Pakistan could not utilise the concessions granted by China. Pakistan could only export in 253 tariff lines, where avg. export value was \$500 or more, which is around 3.3% of the total tariff lines (7550) on which China granted concessions to Pakistan. Pakistan mainly exported raw materials and Intermediate products such as cotton yarn, woven fabric, Grey fabric etc. Value-added products were missing. Some of the value-added products like garments are included in the concessionary regime.

Pakistan, China Finalize 8-Sub Construction Plan -- Defense News

ISLAMABAD — Pakistan has finalized its long-negotiated submarine deal with China, with four to be built in China and four in Pakistan. Analysts believe the submarines will go a long way toward maintaining a credible conventional deterrent against India, and also largely secure the sea-based arm of Pakistan's nuclear triad.

Minister for Defence Production Tanveer Hussain announced the news last week while opening a new exhibition center at the Defence Export Promotion Organization.

Construction is to be undertaken simultaneously in both countries, but Hussain did not say when construction would commence or what type had been selected.

Most analysts believe the subs will be the air independent propulsion (AIP) equipped variant of the S-20, which is an export development of China's Type-039A/Type-041 class diesel-electric submarines.

Though Chinese submarine technology is reported to have improved considerably, Tom Waldwyn, research analyst in the Defence and Military Analysis Programme at the International Institute for Strategic Studies, said, "the capabilities of Chinese submarines are not something which can be easily determined as it benefits countries on both sides to keep this a secret.

"The export version of the Type 039A, the S20, is believed to be AIP optional and should the Pakistanis opt for this capability it would give them greater operational flexibility through increased endurance. Other than being AIP optional, it is currently unclear what other differences there would be between a Chinese Navy Type 039A and an export version," he said.

Pak embassy stalls in China pull big crowd -- BR

ISLAMABAD - The Pakistan embassy in Beijing set up stands at the seventh international charity sale held in the city's National Stadium yesterday to support and pay tributes to teachers in rural areas of Yunnan province of China. The charity sales attracted 97 embassies and representative offices of international organizations, as well as domestic and foreign enterprises, and individuals to participate, said a statement issued here.

The fair was hosted by Qian Wei, wife of China's Foreign Minister Wang Yi. This year's theme was to pay a "Tribute to Rural Teachers in Yunnan Province" of China. Qian Wei in her inaugural speech said that the funds raised this year would go to school teachers in Jinping and Malipo counties of Yunnan province, "so as to encourage the teachers to make more contribution to the cause of education." She also hoped that the funds raised would also brighten the future of the children of these counties.

At the Pakistani stands, handicrafts, jewellery, ornaments, home decoration, clothes, as well as, on-the-spot henna hand printing and traditional Pakistani cuisine was available to the delight of visitors.

The shoppers visited stalls to purchase from the variety of displayed items—crafts and food. The Pakistan stalls also attracted the crowd at the fair. The booths were artistically decorated and depicted traditional Pakistani culture.

These were also visited by Foreign Minister Wang Yi, his wife Qian Wei, Ambassador Masood Khalid and his wife Sonia Masood Khalid. Ambassador Khalid also showed the Chinese Foreign Minister Wang Yi the Pakistani booths. Sharing his views on the day, Ambassador Khalid commended the idea saying that the charity over the years had rendered public welfare in poverty stricken areas and was indeed a noble cause to support teachers in far flung rural areas and thereby help improve the provision of education.

Launched by Le Aimei, Chinese honorary ambassador for poverty alleviation and wife of State Councilor Yang Jiechi, it was first held in 2009 to raise funds for needy people through charity sales.

PAK DELEGATION TO CHINA GETS BRIEFING

An eight-member women delegation led by eminent PML-N leader Fouzia Memon visited the Sichuan Provincial Federation of Trade Union. The delegation, which is visiting various parts of China as part of the Pak-China people-to-people exchange programme, was in Chengdu on special invitation from the Chinese government. The delegation was also feted by Sichuan Provincial People's Association for Friendship with Foreign Countries (SIFA). Women from all walks of life are part of the delegation including politicians, entrepreneurs, working women.

On the occasion, Fozia Memon addressed the audience. Ji Xiaoling from Sichuan Provincial Federation of Trade Union introduced the work of Sichuan, saying that the trade union has done a lot to improve women and children's status. She said that Sichuan is building an all-round system to guarantee the gender equality. In terms of legislative means, the government carries out laws regulating women's welfare and provides legal aid from grass-root villages to the provincial level. In terms of public facilities, she requested for all public places to be equipped with separate room for breast-feed and encourage the whole society to help the pregnant women. In terms of aids, they provide the women with free re-education, financial aid as well as psychological help.

In the party, Luo Yubin, President of SIFA, said that China and Pakistan are time-on partners. They sincerely welcomed the delegation and hopes our communication and cooperation will flourish in the future.

PAK-CHINA STRATEGIC PARTNER TO BENEFIT PEOPLE Salim Ahmed Wednesday, October 14, 2015 - Lahore—The University of Engineering and Technology, Lahore Vice-Chancellor Prof. Dr. Fazal Ahmad Khalid met with the Chinese Consulate General at Embassy of the Peop -- Pak Observer

The University of Engineering and Technology, Lahore Vice-Chancellor Prof. Dr. Fazal Ahmad Khalid met with the Chinese Consulate General at Embassy of the People's Republic of China in Lahore. He said, China would strengthen good-neighborly friendship with neighboring countries, and would strengthen mutually beneficial cooperation so that China's development could benefit more neighboring countries.

Pakistan as China's strategic partner, would benefit most from China's development. Language was an important bridge to promote friendly exchanges and pragmatic cooperation between China and Pakistan. The establishment of Chinese Education Association would help mobilize Chinese language teaching resources. He said that we would establish Chinese Language Centre and provide teaching staff at UET, Lahore.

Prof. Dr. Fazal Ahmad Khalid said that establishment of Chinese Education Association was one of remarkable achievements over the past year in cultural exchanges, and he expected it would help promote bilateral relations to higher levels in the New Year.

Thermal Power Project China and Pakistan enjoy an all-weather friendship and all round cooperation. The growth momentum of the China-Pakistan Strategic Cooperative Partnership has become more and more powerful.

Our two Governments have reached important consensus on planning and development of the China-Pakistan Economic Corridor. The Chinese government encourages credible and competent companies to invest in Pakistan, and requests them to complete their projects on schedule, with high quality, quantity and safety.

China is introducing advanced technique and management experience to Pakistan. Thermal Power Project is based on a world leading technology called supercritical coal-fired power generation technology. The Chinese equipment has advantages of high efficiency, high quality and low power heat consumption.

All Day

‘Pakistan connected China to the rest of the world’ -- Express Tribune

KARACHI: Pakistan helped connect China to the rest of the world by operating the first international flight from Karachi to Beijing, said former federal minister Dr Javed Jabbar.

Before that, China did not have international flights, said Jabbar during a lecture on ‘Pak-India Relation: Issues and Prospects’ on Thursday at Karachi University. In the year 1971, Pakistan facilitated America’s secret link to China, claimed Jabbar. This allowed the then communist state to get United Nations’(UN) membership, he said.

Hostile relations

Pakistan is termed as a security state, but in Jabbar’s opinion, it is the most insecure state. “At the time of its creation, Pakistan was the most insecure state of the region,” said Jabbar. Its two neighbouring countries, India and Afghanistan, were not willing to accept its existence, he said.

“The Indian leadership in 1947 claimed that Pakistan will not survive more than six months,” he recalled. On the other hand, Afghanistan opposed the membership of Pakistan in UN, he said. “When one of your neighbours is making statements against your survival and the other is not ready to accept your existence, naturally you will seek some form of security.” This is why Pakistan felt the need to seek military aid from United States of America, he added.

Understanding 1971

“People use the example of 1971 to point out that it signifies the failure of the Two-Nation Theory,” said Jabbar. However, they need to realise that Bangladesh did not join India, he claimed. “Now it’s two nations and three states.”

When asked who should be held responsible for the 1971 events leading to the break-up of the country, Jabbar said that Zulfikar Ali Bhutto was adamant to rule and his ‘aggressive’ behaviour escalated the violence. But his stance was legitimate, he claimed.

Soviet invasion

Speaking on the Soviet invasion of Afghanistan in 1979, Jabbar said that till today, Pakistan continues to suffer from its effects. Due to the invasion, 15 million refugees came to Pakistan, claimed Jabbar. “More than two million continue to reside here.” He said that no such example could be seen in rest of the world.

“Afghans have complete freedom to buy land, use transport, health and education facilities in Pakistan,” he said. A few years later Afghans will become our brothers in blood, he said.

Pakistan leveraging US and China's interest in the region -- The Express Tribune

Another important strategic objective was to support the landlocked Central-Asian republics and Afghanistan connect with the sea ports of South Asia. PHOTO: FILE
Another important strategic objective was to support the landlocked Central-Asian republics and Afghanistan connect with the sea ports of South Asia. PHOTO: FILE
ISLAMABAD: The consensus of the US and China on the economic and trade integration in this region has created optimism among policy circles in Pakistan to upgrade its dwindling infrastructure in order to leverage the strategic location for trade and transit.

The China Pakistan Economic Corridor (CPEC) would bring much-needed investment and would connect mainland China with the Gwadar port via a 3,000-km road and railway link in Pakistan. China has two important strategic reasons to commit to this initiative.

China's interest

China is looking to develop an alternative maritime link with Asia and Europe to reduce its reliance on its present maritime link through straits of Malacca in the South-China Sea.

'Pak-China have survived the test of time'

This route would also considerably reduce time for goods to reach the European markets and the east coast of the US.

China is also looking to develop its western region which is economically less developed. The connectivity through Pakistan would make export-related manufacturing goods, which is the mainstay of the Chinese economy, financially viable for the Chinese industry.

US working on similar lines

The US is also embarking on an ambitious initiative through multilateral donor agencies for funding infrastructure projects and facilitating the creation of regional trade blocs with the policy objectives of creating economic opportunities to bring stability in the region.

An uncertain future

The US policy surfaced in 2011 through the policy vision called the 'New Silk Road' where US was envisaging political and economic stability in Afghanistan, after its troops withdraw from the region.

Another important strategic objective was to support the landlocked Central-Asian republics and Afghanistan connect with the sea ports of South Asia so as to provide them options other than relying on Russia for trade.

US companies show interest in Pakistan

The Chinese policy is advocated through the policy vision of 'One Belt One Road' where connectivity to Gwadar port is an important component. The vision envisages China's road connectivity through Central Asia, West Asia, Middle East and Europe. China will also develop maritime linkages of Chinese sea ports with Africa through Suez Canal.

Competing for influence

The analysts believe that other than trade and energy security needs, an important motivating factor for China has been its exclusion from the Trans-Pacific Trade Agreement (TPP) which is seen as a US-led initiative to deepen its economic integration in the Asia Pacific region. According to recent media reports, the TPP

negotiators have reached a consensus in implement the free trade agreement which would create one of the biggest free trade areas in the world and would constitute 40% of the world's GDP and one third of global trade.

Progress: CPEC hailed as key to the future

Whether 'One Belt One Road' was in response to America's push for TPP or vice versa, some experts see it as a new great game.

However, the recent public statement made by US policymakers saying that the New Silk Road should not be seen as a competition to China's 'One Belt One Road', but rather as a partnership initiative, should comfort policymakers in Pakistan, since the country enjoys close relationships with US and China.

It is important for Pakistan to facilitate these upcoming initiatives and for which the most important factor is ensuring security.

US keen to invest in economic corridor projects

Pakistan government's commitment to ensure security for the development of CPEC clearly reflects the clarity of vision to leverage these opportunities.

On the regulatory framework, it is important for Pakistan to improve its trade facilitation measures in order to compete with regional ports.

Recently, the transit business from Pakistan has shifted to the ports of Iran due to increase in transit costs for Afghan traders. The Chabahar port in Iran, located 70km north of Gwadar, is the main competitor.

CPEC- a window of opportunity for Pakistan

Iran and China have also contributed to the development of Chabahar port that now caters to substantial volumes of Afghan transit trade that were previously coming from Pakistan. A recent study by the Asian Development Bank on trade facilitation on Border Customs Posts (BCPs) at Chaman and Torkham which are included in the Central Asia Regional Economic Cooperation (CAREC) trade corridors does not portray an encouraging picture as Chaman and Torkham land border stations were below the regional border stations on goods clearance time. Pakistan has recently acceded to the WTO's Trade Facilitation Agreement. Pakistan has also acceded to the United Nations transit convention (TIR convention). These two international instruments provide benchmarks for trade and transit facilitation.

The timely implementation of these conventions would improve Pakistan's trade and transit facilitation and improve its competitiveness, which would help realise the policy vision of Pakistan as 'hub for trade and transit in the region.'

'Pakistan, China committed to safeguarding common regional interests'
-- BR

Chinese Ambassador to Pakistan, Sun Weidong has said that China and Pakistan were committed to safeguard their common interest in the region.

Talking to APP after a seminar titled "Strategic Stability in South Asia and East Asia: constructive role played by China", the Chinese Ambassador said that regional peace was key to economic and social development on the South Asia. "We have decided to uplift our strategic and economic co-operation and our bilateral relations will reach new heights".

"This year is Pak-China friendship year and mutual exchange of delegations of students, think-tanks, cultural troupe will further strengthen between the two countries," he added.

He said that China was ready to cooperate with SAARC to safeguard common interests. He said that China and Pakistan were committed to bring peace process back to Afghanistan.

He said promoting peace and stability in neighbouring countries including South Asia was core of China's foreign policy, adding peaceful South Asia was in the interest of China".

He said that China treated every country equally on basis of mutual trust and confidence irrespective of its size. He said that co-operation between China and South Asia was also important to cope with various challenges and alleviating poverty from the region having 3 billion populations.

Ambassador Sun Weidong said that China was the biggest investor in Pakistan and it wanted to further deepen its relations with South Asian countries.

For financial assistance and local development in the regional countries, he said China had set up Asian Investment Bank. "We have to work together for common security challenges and disputes should be resolved through dialogue to overcome wider challenges", he added.

He said China advocated joint efforts to help promote regional development goals.

Ambassador Sha Zukang, President, China Arms Control and Disarmament Association (CACDA) in his address said that China was a main force and pillar for peace and stability in South Asia. He said that China was working for peace and stability of the world.

In his address, he gave historical background of China relations with neighbouring countries like Russia, North and South Korea and Japan. He said that Pakistan was all weather friend of China not an ally.

Director General, Institute of Strategic Studies (ISSI)

Masood Khan said China was a great and steadfast friend of Pakistan. Both the countries had passed through difficult times and seen many transitions, but our friendship remained constant, he added. "Strong ties with China are the keystone of Pakistan's foreign policy", he said. He said China was working with its neighbours to promote peaceful development by investing in infrastructure, energy and industrial development. Its momentous decisions were shaping the strategic and economic landscape of the Asia Pacific region, he added. "Its overriding doctrine is peace, not war; defence not offence; co-operation not confrontation. China upholds the principle of security for all".

He said Pakistan had propounded a Strategic Restraint Regime in South Asia comprising nuclear restraint, conventional balance, and conflict resolution. As a responsible nuclear weapon state, Pakistan supports the objectives of nuclear disarmament and non-proliferation, he said.

Masood Khan said China had always played a constructive role in South Asia. Pakistan and China had a great partnership in the United Nations and other multilateral forums. Pakistan and China also work together to strengthen the Biological Weapons Convention and Chemical Weapons Convention regimes, he added.

AIR CHINA TO LAUNCH FLIGHT OPERATION IN ISLAMABAD FROM OCT 26 -- Pak Observer

Luxury planes with luxurious services

National flag carrier of China, Air China which has been operating in Karachi (from Karachi to Beijing) for last 22 years is now all set to stop over in Islamabad and take passengers from here too. On October 26, the Air China's new "Air Bus" will be arriving in the airs of Islamabad to take passengers on way to Karachi and then Beijing. This will be the second time the Air China plane will be landing in Islamabad this year as earlier in April, China's President Mr Xi Jinping also visited Pakistan by Air China flight.

For Islamabad, initially, three flights are schedules: Monday, Wednesday and Friday and later with the growth of business activities and exchange of workers contractors and businessmen owing to momentum of work on the China Pak Economic Corridor (CPEC) more flights may be scheduled. This was announced by the General Manager of Air Chin Islamabad station, Mr Hu Hi Tao at the formal launch of the Air China operations from Islamabad. General Manger Air China Karachi Station Hao Yu Dong was also there to extend full moral support to his Islamabad's counterpart.

Defence Minister Khawaja M Asif, Chairperson Benazir Income Support Programme Marvi Memon and a friend of Pakistan Ambassador of China Sun Weidong were also there to witness a new chapter of enhanced business activities between the two countries. Khawaja Asif referring to the CPEC termed the Air China's decision to start flights from Islamabad a good pragmatic step. I can foresee a large number of passengers travelling between the two countries in the days to come as the work on economic corridor picks up momentum, he said. China is Pakistan's trusted friend and both the countries have stood the test of time in all odds and unpredictable conditions.

Air China, the national flag carrier of the People's Republic of China keeping the strong friendly ties between the two countries in mind has initiated the major step and I on behalf of the government assured the company full support. We shall facilitate you in all possible ways in making your endeavours successful, said Defence Minister. "We are embarking on a journey of economic development with the start of Pakistan China corridor, he concluded. Ambassador Weidong also appreciated Air China for including Islamabad in its flight route. Air China is a world-class service and meets all the standards of top international flights. I sincerely wish them best of luck and hope Air China's operations will result in increased bilateral investment and enhance trade and travel, said Chinese envoy.

Speaking on the occasion, Air China, GM Islamabad Hu Hi Tao said new airplanes Air Bus 330-200 is being introduced instead of old narrow Air Bus 320. The new airplanes have 30 business seats and 207 Economy with total 360 seats. About Air China, he told it operates all over the world and is a competitor among the top-ranking airlines of the world. Later talking to Pakistan Observer, a representative of the Air China said in the past we had agreement with PIA to take our passengers from Islamabad to Karachi but now we shall cater to them ourselves. He however did not rule out any future agreement with the Pakistan's national flag carrier Pakistan International Airlines.

Ground-breaking of LNG pipeline project: Putin likely to visit in February -- BR

Pakistan and Russia have not yet decided many important financial components of the \$2 billion government-to-government deal signed on 16 October to lay an LNG pipeline from Karachi to Lahore including tolling fee and capacity charge, informed sources told Business Recorder. According to a senior official of the Petroleum Ministry associated with handling of the project, the two countries will finalise all the remaining issues within the next few months.

He added the pipeline would be laid on Build, Operate and Transfer (BOT) basis. The Russian company would transfer it to Pakistan after 25 years. As per agreement, Pakistan will provide 15 percent equity, whereas 85 percent funding will be provided by the Russian firm.

The official said that Pakistan has formally invited Russian President Vladimir Putin to visit Pakistan for the groundbreaking ceremony and the Russian energy minister has confirmed Putin's visit. "Putin is likely to visit Pakistan in February 2016 to perform the groundbreaking of the pipeline project, for which Prime Minister Nawaz Sharif had handed over the framework to the Russian President in Ufa earlier this year," the official added.

The financing for the LNG pipeline comes as a prelude to Russia's offer to sell LNG to Pakistan. Russia is the second-largest producer of natural gas in the world, and is seeking to diversify its export markets after its "annexation" of Crimea last year and the ongoing insurgency in Ukraine.

According to a senior official of the Inter State Gas Systems (ISGS), the government is seeking to sign the commercial agreement in the next three to four months, adding that a bid document was being prepared by ISGS which would be handed over to the Russian firm. Russian firm RT Global Resources will lay the 1,100-km-long pipeline with a capacity of 12.4 Billion Cubic Metres (bcm) per annum to supply the commodity from LNG termini in Karachi to Sui-Northern Gas Pipelines Limited's (SNGPL) network in Lahore.

Pakistan is also working on a similar model with China, under which a Chinese firm would lay Gwadar to Nawabshah 700kilometers long LNG pipeline and build LNG termini with a capacity to handle 12.4 Bcm of imported gas at a cost of \$2.5 billion. The Gwadar-Nawabshah pipeline would also be utilised to transport gas under the Iran-Pakistan Pipeline project, after adding 70km pipeline to connect it with the Iranian side of already laid pipeline.

The pipeline will be built in two phases; the first phase of the project will be completed by December 2017 and the second phase in 2018, with a total investment of \$2 billion. The North-South gas pipeline project would be built by Russian company RT Global Resources - a part of Russian state corporation Rostec.

The government of Pakistan constructed the first LNG terminal at Port Qasim Karachi with a capacity to handle up to 600 Million Cubic Feet per Day (MMCFD) of LNG, while another terminal will be completed by 2017 with a capacity to handle 500 MMCFD of LNG. The objective of these termini is to deal with the severe gas shortage in the country. Total gas demand in Pakistan stands at 8 BCFD against total demand of 4 BCFD. The government is managing the gas supply to different sectors through a gas load-management plan, according to which in winter gas supply to industrial, fertiliser and CNG outlets remains suspended in Punjab, while in Sindh 3 days-a-week gas is being supplied to industrial and CNG outlets.

Pakistan To Get \$178 Mn ADB Assistance On Easy Installments - See more at: <http://www.geo.tv/latest/99872-pakistan-to-get-178-mn-adb-assistance-on-easy> -- Geo Tv

ISLAMABAD: The Asian Development Bank (ADB) will extend financial assistance of 178 million dollars to Pakistan on easy installments for 20 years.

The agreement in this regard was signed between Secretary Finance and Country Director ADB here on Thursday.

Speaking on the occasion, Finance Secretary Salim Sethi said the amount will be spent on the construction of Gojra-Shorkot motorway.

He said the motorway's 62 kilometer section is part of the Pak-China Economic Corridor.

Salim Sethi said the construction of Gojra-Shorkot motorway will cut by half the travel duration of Islamabad-Toba Tek Singh and Lahore-Toba Tek Singh. - See more at: <http://www.geo.tv/latest/99872-pakistan-to-get-178-mn-adb-assistance-on-easy-installments#sthash.autFaVJr.dpuf>

Pakistan, Russia sign Karachi-Lahore pipeline deal -- Daily Times

ISLAMABAD: Pakistan has awarded Russia with a \$2 billion contract to build a 1,100-kilometer pipeline from Lahore to Karachi, aptly named the North-South pipeline.

The contract with Russia is another step forward for Pakistan's energy needs, economy and real estate.

Earlier in the year, the nation hosted the Chinese president and signed more than a dozen agreements securing an additional \$1.6 billion for the \$46 billion, 3,000km China-Pakistan Economic Corridor (CPEC).

Such deals have already benefited the local real estate immensely. Properties in the port city of Gwadar, one of the China-Pakistan Economic Corridor terminal cities, have doubled since the project's inception in 2013.

Lamudi.pk Country Director Saad Arshed said, "Property prices in certain areas of Gwadar such as Singhar, Ganz and Mouza Shabi have already gone up. In addition, the searches for Gwadar, ever since the launch of this project, have increased massively by around 200 times on Lamudi's portal, pointing the rising interest of Pakistanis in this future investment goldmine."

While it is not clear through which cities the Russian pipeline would extend, experts at Lamudi Pakistan predict that the project would have similar positive effects on the cities between Lahore and Karachi as the Chinese pipeline has had on Gwadar.

Rs 228.93 billion budgeted: only Rs 22.14 billion released for 90 energy projects so far -- BR

The federal government has so far released only Rs 22.14 billion for 90 energy projects against a budgeted allocation of Rs 228.93 billion for financial year 2015-16. According to latest data released by the ministry of planning, development and reforms, the government has so far released only Rs 20 billion for two projects out of 63 projects of power sector.

As many as Rs 10 billion for each 1,200 MW LNG-based power plant Balloki and 1,200 MW LNG-based power plant Haveli Bahadurshah, has been released out of the budgeted allocation of Rs 22.5 for each project. The government has so far not released funds for mega projects including Neelum Jhelum hydro power project (969 MW) (China, Kuwait, Saudi Arabia, IDB and Opec), for construction of Diamer-Bhasha Dam project (4,500 MW), Dasu hydro power project stage-I (2,160 MW) (District Kohistan, Khyber Pakhtunkhawa), Tarbela fourth extension hydro power project (1,410 MW), refurbishment and upgradation of generation units of Mangla

power station (310 MW), pre-feasibility - installation of 300 MW coal-fired power plant at Gwadar and for many other projects of power distribution enhancement.

The government has released Rs 2.14 billion for nine energy projects out of total 30 projects relating to water sector out of budgeted allocation of Rs 16.64 billion for financial year 2015-16. According to data, a total of Rs 260 million has been released for construction of small storage dams in different districts of KP, Rs 200 million for Darwat dam, Jamshoro Sindh, Rs 40 million for Gomal Zam dam (17 MW) (South Waziristan), Rs 400 million for Nai Gaj Dam, Dadu Sindh, Rs 200 for raising of Mangla dam project and Rs 10 million for Chiniot Dam project, etc.

The government has not yet released funds for construction of 100 delay action dams in Balochistan (Package-II, 26 small dams) (multiple districts), construction of Mujahid Dam Rawalpindi, construction of Mangi Dam, Quetta, Ghabir Dam, Chakwal Punjab, Kurram Tangi Dam, North Waziristan, Mohmand Dam project Charsadda, construction of Basool Dam, Tehsil Ormara, district Gwadar, construction of a small dam in district Mansehra, Papin Dam, Rawalpindi and for construction of small dams in Tehsil Khaliqabad, etc.

All Day

WB report : CPEC helps increase investment in Pakistan -- Daily Times
ISLAMABAD: The investment in Pakistan is expected to increase to 15.4% of GDP by 2017 as a result of operationalisation of the China-Pakistan Economic Corridor (CPEC) projects related to energy and infrastructure development, says a World Bank (WB) report.

While the government, under the leadership the Prime Minister Nawaz Sharif, has doubled its efforts to attract maximum foreign direct investment (FDI) following the signing of CPEC projects, the reports says that many countries, including European Union, Canada, the United States and Australia, have shown interest in investing in Pakistan's economy.

CPEC is a landmark project, which would connect Pakistan's deep sea Gwadar port with China's Xinjiang region, emerging as new business and trade hub following the launch Silk Road by China.

The economic corridor, with a total investment of \$46 billion, is a glaring example of the close friendship between the Pakistan and China. The 2,100-kilometre corridor would include special economic zones, a railways system and a model city, airport as well as a free port at Gwadar.

AIOU establishes Chinese Language Center -- Pakistan Today

The Allama Iqbal Open University (AIOU) will soon set up a Chinese Language and Culture Centre with the academic support of Open University of Beijing.

A three-member Beijing University's delegation will visit Islamabad within next few weeks to undertake feasibility study for formally launching the Chinese language classes at the University's main campus, said Vice Chancellor Dr. Shahid Siddiqui while addressing a lecture-series seminar on rising China.

Project Director AIOU Eng. Dr. Attaullah Shah was the key-speaker at the seminar who briefed the participants about his recent visit to China's Fujian province. During his 20-day stay there he had the opportunity to represent Pakistan at international conference on Planning and Development of Cities and Towns in China. Engr. Hafiz Ehsan, newly elected Chairman Institution of Engineers of Pakistan (IEP)

Rawalpindi-Islamabad Center was the chief guest on the occasion.

Dr. Shahid Siddiqui said the AIOU being the Mega University in public sector wished to positively respond to China Economic Corridor project (CPEC) by further bringing the people of two countries closer each other through language and culture support. "We need to take benefit of towering Sino-Pak ties through maximum academic exchange programs."

The CEPC, he said has provided them an opportunity to further consolidate their people-to-people contacts. The Educational Institutions, he said need to play their role in this connection and to create awareness about its fate-changing impact on country's socio-economic development.

Currently, the AIOU has bilateral cooperation with three major Chinese Universities. The two sides have identified many areas of bilateral interest for promoting educational pursuits in academic, technical and scientific fields.

Dr. Shahid Siddiqui further said Pakistani people and the intelligentsia are proud of their friendship with China that is now emerging as Number one economic power. "We can learn a lot from Chinese development model to realize the dream of prosperous Pakistan.

Dr. Attaullah Shah gave detailed presentation on China's fast and impressive development in various sectors.

MPs body recommends CPEC western route as dual carriage way -- The Nations

ISLAMABAD - The Parliamentary Committee on CPEC Monday unanimously recommended to the government that the western route should be built as a dual carriage way at the outset and, eventually, there should be a motor way linking Gwadar with the rest of the country along the western route.

The decision came in a meeting of the Parliamentary Committee on China Pakistan Economic Corridor (CPEC) which met here under the chairmanship of Senator Mushahid Hussain Sayed.

Members of the committee were given a comprehensive briefing by the Chairman NHA Shahid Tarar and DG FWO, Major General Mohammad Afzal.

The focus of the briefing was on infrastructure projects under the CPEC with particular priority to the western route as already decided by the All Parties Conference held in Islamabad on May 28, 2015.

The Chairman NHA and DG FWO told the committee that the western route which starts from Gwadar and goes to Kashgar in China via Balochistan, KPK and Punjab was being built on priority basis and most of its sectors would be completed by December 2016.

After detailed discussion, the committee unanimously recommended to the federal government that the western route should be built as a dual carriage way at the outset and, eventually, there should be a motor way linking Gwadar with the rest of the country along the western route as after operationalisation of Gwadar Port, traffic on the western route will increase substantially.

It may be added here that the CPEC is a 15-year project between Pakistan and China spanning 2015-2030, while the western route is among the Early Harvest Projects which have to be completed by 2018. Senator Mushahid Hussain said that the Parliamentary Committee on CPEC would preserve, promote and protect the rights and interests of the smaller provinces, particularly less-developed and remote areas of Balochistan and Khyber-Pakhtunkhwa.

Senator Mushahid said that CPEC is a long-term national project, which is above politics, province, party or any government, as it has a 15-year life span from 2015-2030.

The Parliamentary Committee was also briefed by the Secretary, Ministry of Water & Power, Younas Dhaga, on the Suki Kinari power project as well as coal deposits in the provinces of Balochistan and KPK, while the Additional Secretary, Planning & Development briefed the committee on the development of agricultural sector under the CPEC.

The Chairman of the Parliamentary Committee on CPEC informed the Committee that in November, the Committee would be given a briefing by the Minister for Water & Power on the energy projects under the CPEC and the Committee would pay a site visit to Gwadar as well as the western route to monitor progress of the construction and related development there.

Govt-to-introduce-ferry-service-to-iran -- The News

KARACHI: The Federal Minister for Ports & Shipping, Senator Kamran Michael, while chairing a meeting here on Thursday, said that two passenger ferries have been shortlisted for operations between Karachi and Chahbahar (Iran) and Karachi and Ormara/Gwadar.

He further said that the ferry service will reduce the cost of journey for the Zaireen and would be a safe and secure alternative to travel by road.

The minister said that the ferry, with a capacity for around 250 to 400 passengers and with a speed of 28-30 knots per hour, would reach Chahbahar (Iran) in 14 hours. The minister announced that this ferry service will operate under the name of Makran Ferry Service Company Limited.

The meeting, which was held at the Pakistan National Shipping Corporation head office in Karachi, was attended by government stakeholders, including the Secretary of Ports & Shipping, the Commander Karachi (Pak Navy), the DG of Ports & Shipping, the Chairman of PNSC, the Chairman of KPT, the Chairman of PQA as well as officials from Immigration, FIA, Customs, Anti-Narcotics and entrepreneurs from the private sector.

The minister stated that this subject ferry service additionally will provide cargo service between Karachi and Gwadar. This will improve the overall shipping industry of Pakistan. Suggestions and recommendations were put across and the meeting concluded with an announcement of formation of the Makran Ferry Service Company Limited subject to policy approval.

Gwadar, Chabahar seaports to operate as 'sister ports': PM --

HELLENIC SHIPPING NEWS WORLDWIDE

Prime Minister Muhammad Nawaz Sharif said the Chabahar and Gwadar seaports would work as 'sister ports' and their operational activity would complement each other. The Prime Minister expressed these views while talking to Rear Admiral Ali Shamkhani, Secretary Supreme National Security Council of Iran here at the PM House.

The Prime Minister said Pakistan and Iran are brotherly countries and share deep historic and cultural ties. He mentioned that Pakistan had rendered invaluable sacrifices in war against terrorism and Operation Zarb-e-Azb was yielding very positive and fruitful results.

Iranian National Security Secretary Ali said terrorism has no boundaries and it is a common enemy of both the countries. He said a stable Afghanistan is in the best interest of both Iran and Pakistan. The two sides expressed grief and sorrow with each other over the tragic incidence of Mina, Saudi Arabia where the citizens of both countries lost their lives.

Gwadar to be made weapon-free city -- Pak News Service

Gwadar will be made a weapon-free city and special measures will be taken for the security of CQUETTA / GWADAR: Gwadar will be made a weapon-free city and special measures will be taken for the security of Chinese investors, engineers and experts working on different projects in the port city.

This was decided at a meeting attended by security officials from both Pakistan and China in Gwadar on Friday.

The meeting was attended by Major General Azhar Naveed, provincial Home Secretary Akbar Hussain Durrani, Brigadier Shahzad Iftikhar Bhatti, Brigadier Saqib, Director General of the Gwadar Development Authority Dr Sajjad Hussain, Deputy Director General of China's Ministry of Public Security Q.U. Jainging and senior officials of China's foreign ministry Ms Lili and Zhang Maoming.

Security of Gwadar and its surrounding areas has already been handed over to the Pakistan Army. Army troops have established checkpoints at all entry points of Gwadar town.

Senior officials briefed Chinese officials about measures taken for ensuring security of the port city and its surrounding areas. They said that under the plan Gwadar would be made a weapon-free city where special arrangements would be made for the maintenance of peace.

The meeting was informed that special measures were being taken for the protection of Chinese nationals working on different projects in the city.

Development of the social sectors also came under discussion during the meeting and the participants gave various suggestions in this regard. It was decided that maximum facilities would be provided to local people and measures would be taken for improving their standard of living.

The meeting was informed that residence cards would be issued to local people of Gwadar and people coming to the city from other areas would have to register at entry points. Record of outsiders would be maintained.

Commissioner of Makran Division Bashir Ahmed Bangulzai, Deputy Commissioner of Gwadar Abdul Hameed Abro, Gwadar SSP Tariq Khilji and officials of the Gwadar Port Overseas Holding Company also attended the meeting.

Pakistan To Deploy 10,000 Army Personnel For Safety Of CPEC Workers - See m
<http://www.geo.tv/latest/7187-pakistan-to-deploy-10000-army-personnel-for-saf>
-- Geo News

ISLAMABAD: In order to ensure security of projects under \$46 billion China-Pakistan Economic Corridor (CPEC), Islamabad is going to apprise Beijing authorities that special security force of 10,000 personnel will be in place and become operational till December this year, The News has learnt.

The 5th Joint Coordination Committee (JCC) under CPEC between Pakistan and China is scheduled to meet in Karachi from November 9 to 13, 2015 to review implementation on early harvest programme (EHP), scheduled to be completed in first phase till December 2017.

There are 5 major agenda items and one of them is ensuring security of CPEC projects for which Pakistan Army has taken responsibility by placing one Major General as head of the special force to ensure foolproof security. Partially, the security force is in place but for whole Pakistan starting from Gwadar to Karakoram Highway (KKH), it will become operational within next couple of months.

"Pakistan is going to request in the upcoming JCC with Chinese authorities to include establishing of transmission lines along with energy projects and it is yet to see how the Beijing is going to give its response," the agenda of upcoming JCC available with The News disclosed on Sunday.

Islamabad will also request Beijing for inclusion of Dera Ismail Khan to Sohrab road as dual carriageway under CPEC during the upcoming meeting which will help government resolve controversy over construction of western route in accordance with the desires of certain political forces belonging to KP.

In the upcoming JCC meeting, Pakistan and Chinese delegates will also visit Gwadar during which handing over of over 2,000 acres of land will be given to Free Zone and China's public sector company COPHCL. Both sides will also sign Master Plan for Gwadar port and ground breaking ceremony for construction of state-of-the-art School in the area. Both sides will also sign framework agreement on water supply project at Gwadar and inclusion of solid waste disposal and sanitation project at Gwadar.

Pakistan and China will also evolve consensus on inclusion of LNG terminal/transmission line project in Gwadar priority category, Gwadar coal power project, social sector projects (vocational and hospital grant status update), making Gwadar port operational and its update plan and Master Plan for Free Zone.

On energy side, the coming JCC will deliberate on Sahiwal power project, Port Qasim power project, Engro Thar Coal project, Hubco power project, SK Hydro project, transmission lines (if possible), adjustment of projects in the priority category and new projects if both sides evolve consensus on any initiative.

For transport sector, the coming JCC will deliberate upon Thakt-Havelian road, Multan-Sukkur motorway section, Gwadar Eastbay Expressway, New Gwadar International Airport, finalisation of Monographic Study on Transport Planning, consensus on CPEC long term plan, minutes of Transport Infrastructure JWG meeting - 13 Aug 2015 and new projects including Basima-Gwadar and dualisation of road DI Khan to Surab. Both sides will discuss long term plan under CPEC in details during the upcoming JCC meeting.

Federal Minister for Planning and Development Ahsan Iqbal told on Sunday, that special security force in consultation with Ministry of Interior would be in place till coming December/January in order to ensure security of CPEC projects.

He said that Chinese had agreed to increase power generation from Thar Coal and other projects. "We will ensure checklist to ensure completion of Early Harvest Projects under energy and infrastructure projects till December 2017," he added.

Transnational gas pipeline project to be launched next month -- Daily Times

Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi on Wednesday said that the groundbreaking ceremony of the long-awaited transnational gas pipeline, dubbed as Turkmenistan-Afghanistan-Pakistan-India (TAPI) project would be held next month.

Highlighting the TAPI project as one of attractive opportunities for investment in the country's oil and gas sector here at the Pakistan Investment Conference organised by the Board of Investment, he said that the pipeline, which would carry around 3.2 billion cubic feet (BCF) gas, would be laid in four years.

He said that the government was working on all fronts to meet the country's growing energy needs, and it had adopted policies in this regard with attractive incentives, including high return, for investors. He said that Pakistan's upstream sector also had many opportunities for service provider companies and investors could consider participating in ventures in select high growth areas such as drilling and seismic acquisition.

He said that numerous projects were being pursued in the oil and gas sector with special focus on exploration and production fronts and all these offered handsome investment opportunities like investing in infrastructure development or service provision. He said Pakistan had natural gas shortage of over 2 BCF per day and the Ministry of Petroleum and Natural Resources was working on a multi-pronged strategy to overcome this shortfall.

He said that Pakistan would encourage investors to help maximize its local production by exploring indigenous hydrocarbon resources. Over two dozen exploration and production companies were engaged in the upstream sector, including several international ones, which were receiving good returns on their investment. The upstream sector included two majority government-owned companies - Oil and Gas Development Company Ltd (OGDCL) and the Pakistan Petroleum Ltd (PPL).

There were many joint venture opportunities for international and domestic E&P companies in existing blocks with these companies. He said that special incentives were offered for tight gas, offshore discoveries and for exceeding certain production target thresholds. He said that there were vast opportunities for investment in shale gas sector as the country, according to a survey, was rich in shale gas resources.

The companies could to investment in exploring shale gas resources. Among other opportunities for investment, the minister said three LNG-based power plants were being constructed to add around 3600mw to national grid as part of efforts to overcome power shortfall. He said the first LNG (liquefied natural gas) regasification terminal became operational this March in record time while a second LNG terminal was planned at Gwadar with support from China.

He said that the project would include a pipeline linking the terminal at Gwadar to Nawabshah. Investment opportunities existed for the setting up of additional LNG terminals. There were also opportunities for companies and investors to participate in the supply of LNG to Pakistan. He said that more LNG terminals would be constructed to import more natural gas to Pakistan.

Replying to a question, the minister said that Pakistan had almost completed its work to import gas through Pak-Iran gas pipelines and once sanctions were lifted on latter, work would start again on the ambitious project.

chinese-company-to-set-up-petrochemical-refining-complexes-at-gaddani -- The News

ISLAMABAD: In an enormously positive development, China National Petroleum Corporation (CNPC) has made up its mind to establish state-of-the-art oil refining and petrochemical complexes including petroleum related equipment manufacturing facilities at the cost of \$1.47 billion in Balochistan and to this effect, Pakistan authorities have proposed Gaddani as one of the potential sites for the said projects. The Chinese companies under the umbrella of CNPC will execute the projects.

The said initiatives will be in addition to the huge oil city that is being founded at Gwadar port. The high powered CNPC delegation headed by Wang Shihong, that is on a visit to Pakistan (November 2-4), unveiled the plan to set up oil refining and petrochemical complexes including petroleum related equipment manufacturing facilities other than the Gwadar port in a meeting held on November 3 with top officials' team headed by Federal Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi. Pakistan has proposed Gaddani in Balochistan province as one of the potential sites for the said projects, a senior official told The News.

The said meeting was factually the follow up event of the recent visit of Yan Lijin from National Development and Reform Commission (NDRC) of the Peoples of Republic of China who had met Prime Minister Mohammad Nawaz Sharif and other dignitaries with regard to setting up industrial parks including petrochemical complexes.

The petrochemical integrated complex along with urea project is likely to cost \$770 million. In addition CPNC will also install land based LNG receiving terminal at a cost of \$700 million. Moreover, CNPC will also revamp and upgrade Pak-Arab Refinery Plant.

The said industrial parks, the official said, will be very important projects under CPEC framework and could become the part of the regional production and supply hub of quality products, the upbeat official said adding,

"This will go a long way in developing Pakistan and improve the living standard of its people and help assist participation of Pakistan people and the government in the development of 'One Belt, One Road' project." And on top of that it would result in great benefits not only for Pakistan but the entire region at large.

In the meeting, Pakistan also offered CNPC mutually beneficial opportunities available in the exploration and production sector and invited CNPC to take part in exploration and production activities of the oil and gas in Pakistan either independently or through joint venture with state owned exploration and production companies such as OGDCL and Pakistan Petroleum Limited.

Gwadar to connect with Middle East, Central Asia -- Daily Times

QUETTA - Chinese Ambassador to Pakistan Sun Weidong has said that Gwadar is going to become an economic belt which would be connected with Middle East and Central Asia bringing a great boost in economy of the region.

He was addressing a gathering of businessmen, tribal elders, politicians and media persons here on Thursday evening which was organised by Balochistan Economic Forum. "This year handling of capacity of Gwadar Port has been increased due to joint efforts of Pakistan and China. It is going to become economic hub of the region which would be connected with Middle East and Central Asia," he said.

He said that Chinese companies have been working in different sectors in Pakistan including energy, fuel, establishing power generation plants, science, technology, agriculture and defense. "Chinese companies have been shifting Chinese technology to Pakistan which would provide great benefit to Pakistan's national economy," the ambassador said.

He said that China-Pakistan Economic Corridor (CPEC) would connect Pakistan with China and other parts of the world via road link. "The CPEC will also link Gwadar and Balochistan with other parts of the country," he added.

He said that opportunities would be provided for professional training in different fields in Pakistan in collaboration with China. He said that Pakistan is a close neighbor and trust worthy friend of China. "Pakistan-China friendship has historical importance which would be stronger by mutual economic relations," he said.

The Chinese ambassador said that China has second largest economy of the world which would also benefit Pakistan. "We want to see a peaceful, progress and economically thriving Pakistan," he said.

Chinese Consul General based in Karachi Ma Yaou and Balochistan Economic Forum President Sardar Shaukat Popalzai were also present.

Sun-led 7-member Chinese delegation visits Balochistan -- Daily Times

A seven-member Chinese delegation, led by Chinese Ambassador Sun Weidong, visited the CM Secretariat and held a meeting with Chief Minister Dr Abdul Malik and his team to discuss matters in connection with the development projects in Balochistan.

The chief minister informed the Chinese delegation that law and order situation has improved at satisfactory level in Balochistan and invited Chinese companies to invest in different sectors in the province including mines and minerals, agriculture, livestock and fisheries.

He said that execution of the China-Pakistan Economic Corridor project would bring progress and prosperity for the entire region, especially for Balochistan. This mega development project will put positive economic and financial support on the region and the Balochistan would be major beneficiary of it.

– Briefing on CPEC, Gwadar –

Balochistan Chief Secretary Saifullah Chatha gave briefing to the Chinese delegation on different ongoing and proposed projects pertaining to CPEC and Gwadar deep sea port. The Chinese envoy said that his meetings with the government authorities, leaders of political parties and business community were part of efforts being put to further strengthen friendship and to get consensus on joint economic projects.

He said that Chinese engineers and technical teams have been working on the project to expanding Gwadar port. The others who attended the meeting among them were Home Minister Mir Sarfaraz Bugti, provincial ministers, Nawab Mohammad Khan Shahwani, Mir Mujib-ur-Rehman Mohammad Hasni, Adviser Mohammad Khan Lehri and senior officials.

Financial bid for Gwadar LNG Terminal to be opened this week --**Pakistan Today**

After completing evaluation of the technical bid, the public sector Inter State Gas Systems Limited (ISGS) is likely to open the financial bid of the China Petroleum Pipeline Bureau (CPPB) for the construction the Gwadar LNG terminal along with pipeline network upto Nawab Shah this week.

An official source said after the approval of the financial bid the contract for the construction of the LNG terminal at Gwadar and laying down of 42 inches diameter, 711 kilometres long from Gwadar to Nawab Shah will be awarded to the Chinese state owned company. The company was nominated by China for the project. The estimated cost of the project is \$2.5 billion, out of which 85 percent investment will be provided by China while the remaining 15 percent will be shared by Pakistan. The Chinese company will manage a loan from China Exim Bank for the project while Pakistan will pay off the loan in 20 years' time from the revenue of the project, the source added.

Pakistan is aggressively working on improving its gas infrastructure and imports from abroad as 50 percent of its fuels supplies are met through natural gas. The growth in demand for natural gas has outpaced the growth in supply therefore resulting in a shortfall, this leads to curtailment of gas supplies to both power and industrial sectors, especially during the peak winter months.

As per Pakistan gas supply-demand study conducted by ILF Beratende Ingenieure GmbH over the next 17 years gas demand is projected to stand at 11.73 bcfd while domestic supplies are expected to reach the level of 4.94 bcfd resulting in a huge shortfall of about 6.79 bcfd by FY 2030. The estimate is done considering the existing and planned capacity.

The Chinese company will construct the LNG terminal having a capacity to handle 500 million cubic feet gas per day with floating re-gasification and storage unit (FRSU). The gas pipeline from Gwadar to Nawab Shah will have a capacity to carry 1.5 billion cubic feet gas per day.

The pipeline will be used for importing natural gas from Iran once the international sanctions are lifted on Iran. Only 70 km pipeline will be needed to extend it to the Iranian border from Gwadar, to brand the 781 km pipeline as the Iran-Pakistan (IP) gas pipeline.

Pakistan will initially get 750 million cubic feet gas per day from Iran which will be increased up to 1 billion cubic feet gas per day. While the pipeline will get another 500 mmcgd gas per day through the LNG terminal thus enabling it to carry upto 1.5 bcfd.

The pipeline project is part of the China-Pakistan Economic Corridor (CPEC) initiative and is included in the early harvest projects. It is estimated to be completed by December 2017. Pakistani law enforcement agencies will be providing fool proof security during the construction of LNG terminal and pipeline.

Pakistan Navy ready to protect Gwadar port, CPEC route: Admiral Zakaullah -- Daily Pakistan

Chief of the Naval Staff Admiral Mohammad Zakaullah has expressed the commitment to ensure protection of Gwadar Port "against all asymmetric threats under the prevalent precarious internal and external security environment."

According to Pakistan Navy, the admiral Saturday visited naval units and forward bases along the Makran coast, including Jinnah Naval Base in Ormara and other units in Pasni, Gwadar and Jiwani, to witness operational readiness of these units during the ongoing major maritime exercise SEASPARK 15.

During his visit to the Gwadar Port, the naval chief was given detailed briefing on the ongoing operational activities at coastal stations, a statement issued by Pakistan Navy said.

MAKRAN: Nov07 - Chief of the Naval Staff, Admiral Muhammad Zakaullah during his visit to Naval Units and forward bases along the Makran Coast-4. **ONLINE PHOTO**

The naval chief said Gwadar was cardinal to China-Pakistan Economic Corridor and sea routes connecting Gwadar with international markets were extension of the

CPEC.

He added that providing a safe and secure environment both on land and at sea was essential for smooth functioning of the Gwadar Port and accruing desired socio-economic benefits of the CPEC.

Pakistan Navy is fully ready and capable of defending these important sea lanes and one of the objectives of SEASPARK 15 is to assess operational preparedness to undertake this key task, the statement quoted the naval chief as saying.

**PROVINCIAL GOVT TO PROVIDE LAND FOR GWADAR
AIRPORT: CM -- BR**

QUETTA: Balochistan Chief Minister, Dr. Abdul Malik Baloch Monday said that provincial government had been providing land for international airport in Gwadar and establish export processing zone in collaboration with the Chinese government.

He said this while speaking to journalists in Balochistan Assembly here.

"We have made arrangements for providing land in the port town where international airport and export procession zone will be constructed in collaboration with China," he added.

The CM, however, rejected the impression that any agreement was signed between the Balochistan government and Chinese Ambassador to Pakistan during last week.

"No agreement was inked between my government and the Chinese ambassador during last week," he added.

Pakistan to hand over 2,281 acres of Gwadar's free trade zone to Chinese -- Express Tribune

In a landmark ceremony, Pakistani authorities will formally hand over 2,281 acres of Gwadar Port's free trade zone to the Chinese Overseas Ports Holding Company Ltd (COPHCL) on November 11 on a 43-year lease.

The ceremony will be held in Gwadar on Wednesday and will be attended by the Chinese delegation headed by Vice Chairman of National Development and Reform Commission Wang Xiaodao, who has already arrived in Pakistan.

Ripe for investment: Vast opportunities in AJK

The Chinese delegation comprises of all top level officials of the Chinese government and leaders of private companies. The Pakistani delegation will be led by Federal Minister for Planning, Development and Reform Ahsan Iqbal.

The event will also be attended by Balochistan Chief Minister Dr Abdul Malik and Federal Minister for Ports and Shipping Kamran Michal, said a senior official of the ministry. The government has already declared Gwadar port a free trade zone for the next 23 years.

The officer said that in this regard, a high level meeting of both authorities will be held in Karachi on November 12 to complete the formalities.

COPHCL will execute the port's affairs through its three main companies including Gwadar International Terminal (GIT), Gwadar Marine Services Ltd and Gwadar Freezone Company Ltd.

Grand scheme: Govt to spend Rs26b on Gwadar airport upgrade

GIT will also be responsible for the port's operations by handling business related matters.

Gwadar Marine Service Ltd, will look at the port's operation by providing allied services and Gwadar Freezone Company will look after affairs of the free zone area by developing and providing allied facilities to the investment companies in the free zone area.

After the formal handover of the free trade zone, all business affairs of the port will be carried out by Chinese authorities.

Grand scheme: Govt to spend Rs26b on Gwadar airport upgrade

The officer said that Pakistan has delivered its end of the bargain and now it is upto the Chinese authorities to show their commitment.

Additionally, during the ceremony, inauguration of some projects will also be held including inauguration of school and health centres established by the Chinese in Gwadar.

The scheme is part of the China-Pakistan Economic Corridor (CPEC), an ambitious \$46 billion investment plan linking western China to the Arabian Sea with infrastructure, energy and transport projects.

Three days in Gwadar

Pakistan is also raising a special security force of between 10,000 and 25,000 men to protect the port.

Earlier, Abdul Razzaq Durrani, the director general of Gwadar Port Authority, had said that land acquisition to build the economic zone had cost the Balochistan government around \$62 million.

Gwadar port was built in 2007 with technical help from Beijing as well as Chinese financial assistance of some \$248 million.

PAK-CHINA INK AGREEMENT ON GWADAR FREE TRADE ZONE -- APP

The representatives of Pakistan and China governments inked agreement to hand over 637 acres of land to China in port town of Gwadar, on Wednesday, where Chinese government and firms would establish a free trade zone.

The ceremony to sign documents was held which was attended by Chief Minister Balochistan, Dr Abudl Malik Blaoch, the Vice Chairman of National Development and Reforms Commission of China, Mr. Wang Xiaotao, Federal Minister for planning Ahsan Iqbal, Federal Minister for Shipping and Ports Kamran Michael, Chief Secretary Balochistan Saifullah Chattah, Chairman Gwadar Port Authority Mir Dostain Khan Jamaldani and others.

Speaking on the occasion, the Federal Minister for Planning Ahsan Iqbal said that China-Pak Economic Corridor (CPEC) project was being implemented in letter and spirit which include different projects including communication, rail, energy industrial development the development of other sectors.

"We have been putting serious efforts to execute CPEC in order to make Gwadar, one of best port of the world," he said, adding that the other projects pertaining to CPEC were also being implemented in letter and spirit. He said that the protection of rights of people of Gwadar including provision of jobs and all available basic civic amenities would be ensured.

The Vice Chairman of National Development and Reforms Commission of China Wang Xiaotao said that China has been giving special importance to the friendship with Pakistan.

"Chinese investor and business community would invest in different sectors in Balochistan which would help in boosting local economy," he said.

The Federal Minister for Ports and Shipping, Kamran Michael said that with the execution of CPEC Pak-China relations would be further strengthened and our economy would get boost.

"We will get great progress in connection with economic growth due to CPEC," he said.

CPEC to turn Pakistan into most important country of region: president -- Pakistan Today

President Mamnoon Hussain has expressed confidence that completion of projects under China-Pakistan Economic Corridor (CPEC) would turn Pakistan into the most important country of the region.

He was speaking at the 50th National Speech Contest held in Islamabad on Wednesday.

The President said Gwadar Sea port, Gwadar International Airport, a number of motorways, energy projects, other infrastructure and industrial ventures are components of the Corridor. Their completion would open up new avenues of economic development and employment opportunities for far flung areas of the country.

He emphasized that the CPEC is not meant for any group, part or a particular segment of the society; rather it would benefit the entire country.

Mamnoon said Pakistan is destined to progress and prosper because of the policies of the present government and hardworking people. He said there was no instance of mega corruption in the country during the past two and a half years of the present government.

Referring to the speech contest that was dedicated to martyrs and Ghazis of September 1965 war; the president said no nation can progress without appropriately remembering its heroes. He said the best tribute for those who sacrificed their lives in the defence of Pakistan would be to equip ourselves with knowledge and take Pakistan to new heights of development.

He urged participating students to focus on their education so that they are able to shoulder their future responsibilities effectively. He particularly exhorted girls not to care about any hurdles in the way of their education. Hussain said we must not follow the West blindly and make efforts to preserve and promote our national identity.

All Day

Chinese firm begins managing Gwadar Port -- The Nations

Gwadar: A Chinese firm has officially taken control of Pakistan's Gwadar Port free-trade zone. Under the agreement, China Overseas Holdings Limited will manage the free-trade zone on a 43-year lease.

The formal handover signals the Chinese side's control of all the port's business affairs. Chinese foreign ministry spokesman Hong Lei says enterprises in China and Pakistan will continue to promote development of the Port in southwestern Pakistan on a principle of equal consultation and mutual benefit.

"Chinese enterprise's taking over of the management of the Gwadar Port is a commercial program under economic and trade cooperation of China and Pakistan, and a part of the two countries' friendly and mutually beneficial cooperation", the spokesman said.

Gwadar port is a deep sea port that sits next to the Strait of Hormuz, the key oil route in and out of the Persian Gulf.

As part of the China-Pakistan Economic Corridor scheme, China plans to make Gwadar a transportation hub by building a 3,000km railway linking Xinjiang, in western China, with Gwadar.

Pak-China banking service protocol becomes effective -- Daily Times

Improvements in collaboration between banking industries of Pakistan and China became effective forthwith following ratification, issued by the Chinese Ministry of Commerce, according to a report on Friday.

The banking service protocol of the service trade agreement for the free trade area (FTA) between the two countries was signed in April when President Xi Jinping visited Pakistan. It will improve the liberalisation of the service trade of Pakistan and China, with easier financing for enterprises and ensuring the smooth running of major governmental projects such as the China-Pakistan Economic Corridor (CPEC).

The economic corridor is a planned network of roads, railways and energy projects linking southwest Pakistan's deep water Gwadar Port with northwest China's Xinjiang Uygur Autonomous Region.

On the other hand, a Chinese firm has officially taken control of the Gwadar port free-trade zone. Under the agreement, China Overseas Holdings Limited will manage the free-trade zone on a 43-year lease. The formal handover signals the Chinese side's control of all the port's business affairs.

China's Foreign Affairs Ministry spokesman Hong Lei said that the enterprises in China and Pakistan would continue to promote development of the port in southwestern Pakistan on a principle of equal consultation and mutual benefit. "Chinese enterprise's taking over of the management of the Gwadar port is a commercial programme under economic and trade cooperation of Pakistan and China, and a part of the two countries' friendly and mutually beneficial cooperation," he said.

Gwadar port is a deep sea port that sits next to the Strait of Hormuz, the key oil route in and out of the Persian Gulf. As part of the China Pakistan Economic Corridor scheme, China plans to make Gwadar a transportation hub by building a 3,000km railway linking Xinjiang, in western China, with Gwadar.

Chinese company leases Gwadar port for development Financial Spots
<http://financialspots.com/2015/11/15/chinese-company-leases-gwadar-port-for-development/>
-- Financials Pots

Wednesday's deal was widely reported in India where perceptions persist that Gwadar could be converted into a dual-use port facility by China, potentially abetting the Chinese People's Liberation Army-Navy's power projection in the western Indian Ocean. Visits such as that by General Fan offer the opportunity for course correction where necessary as well as providing a reminder to Pakistan (and its less than malleable politicians) as to who is bankrolling the exercise. Fan also met with Prime Minister Nawaz Sharif in Islamabad Thursday, with Sharif lauding Islamabad's friendship with Beijing as a "cornerstone" of its foreign policy. A high level military delegation headed by the Vice-Chairman of the Central Military Commission of China, General Fan Changlong has called upon Chief of Army Staff General Raheel Sharif at GHQ. According to an official statement, the Prime Minister emphasized the time-tested friendship between the two countries. AFP Map showing China's land access to the Arabian Sea via the Pakistani port of Gwadar. For an AFP Feature. 135 x 95 He also said that the mutually supportive cooperation in the field of defense is a critical factor in maintaining peace and stability in the region. In his meeting with Gen Sharif at General Headquarters on Thursday, Fan said, "China deeply appreciates the determination of Pakistan Army in counter terrorism and the successful operation in various fields". The nature of the relationship between China and Pakistan is swiftly evolving, all the quicker since the announcement of the China-Pakistan Economic Corridor (CPEC). Both countries are committed to its continuous process and future success. Gen Fan said, "Efforts of Pakistan Army in safeguarding CPEC security are highly appreciated". He said China would also relocate a few of its industries from China to Pakistan that would create thousands of jobs and contribute in GDP of the country. Ahsan Iqbal pointed out that it is need of the hour that Pakistan completes the projects on its side to take advantage of the economic collaboration and match the pace with China that is completing its projects on fast-track basis. Wang Shida, an expert on Afghanistan at the Beijing-based China Institute of Contemporary worldwide Relations, said China has already invested more than \$40 billion for the development of China-Pakistan Economic Corridor and Gwadar Port will play an important role in the economic prosperity of both nations. He said he was looking forward to exchanging in-depth views with leaders of Pakistan and Pakistani armed forces on the relations between the two countries and two armed forces and other issues of common interest. CPEC Western route to be built as dual carriageway -- The Nations

The government has finally decided to construct the Western route as dual carriageway and finance it from the China Pakistan Economic Corridor (CPEC) infrastructure development fund, it is learnt reliably here yesterday.

In the meeting of the 5th Joint Coordination Committee (JCC) of CPEC, held in Karachi last week, Federal Minister Planning, Development & Reforms Ahsan Iqbal pursued the Chinese delegation to include the Western route in the infrastructure/road development project of the CPEC, official sources told The Nation here on Monday.

The source informed that now the project has been included in the infrastructure development projects of CPEC.

"It has been decided that the roads on Western route will be constructed as a dual carriageway and the funds will be provided from the China Pakistan Economic Corridor (CPEC) infrastructure development fund," the source added.

CPEC is multi-sectoral project that includes energy, infrastructure/roads, Gwadar port, social projects, and industrial zones.

Although the government earlier had claimed that the Western route was part of the CPEC but actually it was a single road and was being constructed with the Asian Development Bank funds.

Ahsan Iqbal has time and again reiterated that building of the Western alignment of CPEC is the first and foremost priority of the government and the work on missing Gwadar-Quetta link of Western route would be completed by December 2016.

But the Opposition parties are contesting his claim by asserting that not a single penny has been allocated for the Western route, under CPEC, in the PSDP. The Opposition parties were also upset with the government by not following the commitment made by the Prime Minister at the APC for construction of the Western route.

The provinces of Balochistan and Khyber Pukhtunkhwa have alleged that the Federal government is giving priority to the Eastern route and ignoring the Western route.

Opposition leader in the National Assembly Syed Khurshid Shah also criticised the government for ignoring the Western route and said that "the Eastern route under the CPEC is being given priority while the Western route which is shorter is being ignored".

In a letter to the Prime Minister, Khurshid asked the government to revisit its policy regarding the developmental work on CPEC.

It is pertinent to mention here that the Parliamentary Committee on CPEC last month unanimously recommended the Federal government that the Western route should be built as a dual carriage way at the outset and, eventually, there should be a motorway linking Gwadar with the rest of the country along the Western route as after operationalisation of Gwadar Port, traffic on the Western route will increase substantially.

It may be added that the CPEC is a 15-year project between Pakistan and China spanning 2015-2030, while the Western route is among the Early Harvest Projects which have to be completed by 2018.

Gwadar will be connected to Khunjrab through multiple routes.

All Day

Groundwork laid for China-Pakistan FTZ -- Ecns News

Move will boost CPEC, 'Belt and Road' plans: experts

Chinese and Pakistani officials have laid the groundwork for a China-Pakistan free trade zone (FTZ) at the strategically important port of Gwadar in Pakistan and preliminary plans are now being finalized, according to media reports on Monday.

Specific plans for the new China-Pakistan FTZ, which will be a part of Pakistan's Gwadar Port FTZ, are still under discussion, but it will be a free port that is similar to Hong Kong, the Shanghai Securities News reported on Monday.

The report, citing unnamed sources, said that China's top economic planner, the National Development and Reform Commission (NDRC), is heading the Chinese delegation in the discussions. The NDRC did not respond to requests for comment by the Global Times as of press time.

A number of companies based in Zhuhai in South China's Guangdong Province have signed deals with the city of Gwadar worth a total of 6.5 billion yuan (\$1.02 billion) to develop the port, news portal ifeng.com reported Thursday.

Specific plans might include establishing industry parks, which are effective in facilitating investment and trade, said Chen Fengying, an expert with the China Institutes of Contemporary International Relations.

"I believe that more plans will follow, and the establishment of an FTZ at the strategically import port of Gwadar is an important step," Chen told the Global Times on Monday.

Chinese firm leases FTZ land

China Overseas Ports Holding Co (COPHC) has leased over 650 acres of land in Gwadar to build and operate the FTZ, Pakistan-based newspaper The Express Tribune reported on Thursday.

That was the first part of a deal signed between the two countries, under which Pakistan will provide a total of 2,281 acres of the Gwadar FTZ to COPHC as part of a 43-year lease, according to a separate report from The Express Tribune on Wednesday.

COPHC will operate at the FTZ through three main companies - Gwadar International Terminal, Gwadar Marine Services and Gwadar Freezone Company - according to the report.

Key move for CPEC

Experts said the new developments with the Gwadar FTZ marked a milestone in the implementation phase of the China-Pakistan Economic Corridor (CPEC).

"The new developments are by far the most important step in the implementation of the CPEC," Sun Lizhou, deputy director of the Academy of the World and China Agendas, told the Global Times on Monday.

The CPEC is a major bilateral initiative to build infrastructure facilities in Pakistan that will connect the country's Arabian Sea coast with the Himalayan border with China. The initiative was unveiled during Chinese President Xi Jinping's State visit to Pakistan in April.

With low tariffs and better coordination, the Gwadar FTZ will serve as an "entry point" for Chinese companies and products to enter the country, Sun said.

Step forward for "Belt and Road"

Because of the strategic importance of the Gwadar port, the establishment of an

FTZ there is also expected to have profound significance in the implementation of China's "One Belt, One Road" initiative, which will connect with Europe via Central Asia, Sun noted.

COPHC also noted the importance of the deal.

"On the shores of the Arabian Sea in the western province of Balochistan, Gwadar is strategically a well-located port to ensure increasing trade in the region," the company said in a post on its website.

Located at the mouth of the Persian Gulf, just outside the Straits of Hormuz, Gwadar is close to key shipping routes accommodating a flow of more than 17 million barrels of oil per day and a large quantity of cargo, according to COPHC.

Sun said that although shipments still go through the Strait of Hormuz, Gwadar could serve as a "back-up sea line" for China.

All Day

Weighing in on benefits: Implementing transit fee on CPEC routes -- Express Tribune

in a statement published on the PPI website, Kashmir Affairs and Gilgit-Baltistan Federal Minister Chaudhary Muhammad Barjees Tahir claimed that the China-Pakistan Economic Corridor (CPEC) will bring about \$70 billion annual revenue in the form of transit fee.

Reportedly, he also said that, Pakistan will be turned into a transit economy soon after the completion of this trade route based on a re-routing of Chinese exports of more than \$2 trillion.

This figure of \$70 billion may be highly speculative for the scope of Pakistan's economy, where the size of federal budget in 2015-16 was a little over \$40 billion, the level of foreign exchange reserves were less than \$20 billion and exports barely exceeded \$25 billion.

Regardless, this reported statement indicates that the Pakistani government may have considered levying a transit fee on Chinese cargo to be transported through the CPEC on Kashgar-Khunjab-Gwadar route.

Benefits to China

The CPEC is well-aligned with its strategic vision of China to enhance its access to the global market through the Indian Ocean by building a new 3,000 km road, railway, pipeline optic fiber and a new deep sea port network through Pakistan. At present, China's link with Europe, Africa and the United States, which contributes largely towards global trade, is through the Strait of Malacca in the South China Sea.

Therefore, the development of the trade corridor through Pakistan would provide an alternative route for Chinese trade to reach the global markets of Middle East, Africa, Europe and the US. Additionally, this will also enable it to secure vital oil imports which mainly originate from the Middle East. According to an estimate, the new route is likely to reduce the distance from Western China to Eastern Europe by at least 10,000 miles.

Pakistan's advantage?

On the other hand, Pakistan eyes the increased expected flow of foreign direct investment, technology, cultural linkages, loans, and know-how from China and pegged its expectation with its offer to facilitate China by providing an alternate trade route. However, these returns are subject to presence of several other supportive factors.

The transport and communication infrastructure of CPEC will be largely financed by Chinese loan – to the tune of \$11 billion – except the newly declared grant of \$230 million dollars for Gwadar International Airport. Thus, Pakistan will be ultimately paying back this loan at varying interest rates over a course of the next few years.

In the 2015-16 Public Sector Development Programme (PSDP) at least four PC-1 for CPEC transport and infrastructure sector have been included. These are, Karakorum Highway (Havelian to Thakot), Karachi-Lahore Motorway (Multan to Sukkur), Gwadar port East Bay Expressway Project, and Gwadar international airport (now converted into Chinese grant and therefore tenders have been called off). These projects will be financed by the Chinese loan with a 10% Pakistani counterpart funding.

Transit fee mechanism

Given the relative certainty about construction of transport and infrastructure network, Pakistan's government may want to consider the idea of levying transit fee more seriously. The general rationale of a transit fee is very simple. Transport corridor's purpose is to provide for efficient means of carriage of goods and services in transit with minimal damage to the goods and their quality. Where there is damage, it provides facilities for insurance surveys as well as for lodging claims. Having done so, the transit economy collects transit fees for services rendered.

More specifically, the transit fee on Chinese goods makes sense because it is a cost China will be saving each year in addition to significant reduction in time and cost of shipment. Additionally, the transport and infrastructure network is being ultimately financed by the public exchequer; therefore some return should be seen.

Pakistan has promised to provide security to the Chinese workforce for which it is deploying 10,000 strong specially raised security force.

International law states countries are not allowed to charge fee in the case of land-locked states, China is not a land-locked country.

It leads to the conclusion that levying a rational and business friendly transit fee may be the only tangible benefit that Pakistan will realize through CPEC.

It is imperative that the government should conduct detailed deliberations on signing a bilateral transit trade agreement.

**Pakistan asked China to include Diamer-Bhasha dam project in CPEC --
Pak Tribune**

ISLAMABAD: Pakistan has asked China to include Diamer-Bhasha dam in energy projects to be undertaken under the China-Pakistan Economic Corridor (CPEC).

"We have proposed to the Chinese government to include Diamer-Bhasha Dam in the next phase of CPEC," federal Minister for Planning and Development Ahsan Iqbal said on Tuesday.

He was speaking at the concluding session of the First CPEC Media Forum which was attended by journalists from both countries.

Energy projects of about \$34 billion are being undertaken as part of CPEC in the first phase. If China agrees to the proposal, the project would be included in the next phase of the energy projects under the CPEC.

The construction of Diamer-Bhasha dam is expected to cost about \$12 billion. Faced with the difficulty of finding funds for the 4,500MW project, the government had decided to divide it into separate dam and power generation projects. However, it is unclear which component of the project the government is interested in getting included in the CPEC.

The planning minister said the government was determined to perform the groundbreaking of the hydel project next year and had already completed land acquisition for the purpose. The project was first proposed in 2001, but delays have resulted in cost escalation.

He cautioned that Pakistan could face acute water shortage if work on the dam is not started next year.

Answering a question about the progress on the energy projects being executed in the CPEC's first phase, Mr Iqbal said the country would "achieve self-sufficiency in power generation by 2018".

Some 14 power generation and a transmission line projects are included in the first phase.

The minister said that wind and solar energy projects would be commissioned in about a year, and the coal power projects by 2018. The hydel projects would be ready by 2020.

Speaking on the occasion, Chinese Ambassador Sun Weidong said there was no fixed limit for investment under the CPEC and that more could be made depending on the project for which it was required.

"As CPEC progresses more investment is likely," he said, adding that the CPEC was a process rather than a project and might take more than a decade to complete.

The \$46 billion figure commonly associated with the CPEC, he clarified, was only for the first phase.

He expressed satisfaction that the first phase projects were "making smooth progress" and of the 14 power generation projects nine had already reached financial close.

Ambassador Sun said the CPEC was a "major and pilot" project of President Xi's 'road and belt' initiative and described it as a mutually beneficial effort.

Chairman of Parliamentary CPEC Committee Senator Mushahid Hussain who helped set up the Pak-China Media Forum stressed greater cooperation between the media in the two countries.

CPEC made part of China's 13th 5-year development plan: Weidong -- Pakistan Today

China has made the historic China Pakistan Economic Corridor (CPEC) initiative as part of its 13th five-year economic and social development plan for the year 2016-2020.

The leaders of the Communist Party of China (CPC) have approved proposals for the plan at the fifth plenary session of the 18th Communist Party of China Central Committee held in Beijing, Chinese Ambassador to Pakistan, Sun Weidong informed the Chinese and Pakistan journalists in a recent interaction with them.

Giving details of the CPEC initiative, he said it was a process rather than just one project. Building the CPEC needed to be based on scientific research and designed by short-, mid- and long-term planning, he added.

"As the old Chinese proverb says that a journey of a thousand miles begins with the first step. We need to make persistent efforts based on determination and diligence to achieve a sustainable development of CPEC."

He said Chinese President Xi Jinping proposed the initiatives of the Silk Road Economic Belt and the 21st Century Maritime Silk Road, or the Belt and Road initiative.

"The initiative embraces the trend towards a multi-polar world, economic globalisation, cultural diversity and regional integration. The China-Pakistan Economic Corridor is a major and pilot project of the Belt and Road Initiative. The CPEC has become the buzz word today and the focus of the media."

He said: "The CPEC is a vision. It is an important consensus reached between our leaders and the governments, and enjoys the full support of our two peoples. It will strengthen the time-tested China-Pakistan friendship, bring our two brotherly countries more closer, and lay a solid foundation for building a China-Pakistan community of shared destiny. Second, the CPEC is a platform. It is a comprehensive cooperation framework and identified the four major areas of energy, transport infrastructure, industrial parks and Gwadar Port. We also expect the fields of CPEC to be expanded to finance, science and technology, education, poverty alleviation and social development in the near future. Third, the CPEC is an opportunity. It is based on the spirit of openness and win-win cooperation."

"It faces whole Pakistan and brings benefits to the people of China and Pakistan. It is also a fusion of multiple developments, aiming to peace, prosperity and well-being of the peoples of the region and the world at large."

He said the construction of CPEC had made smooth progress. "Recently, we successfully concluded the 5th meeting of Joint Cooperation Committee on CPEC."

"The meeting has reached a number of agreements. In the energy sector, out of the 14 priority projects, Port Qasim Power Plant, Sahiwal Power Plants, Zonergy Solar Project and many others are under construction."

He said nine projects had achieved or reached the advanced stage of financial close. "We have held comprehensive and productive consultations on various infrastructure projects," he added.

"The Chinese company would speed-up the development of Gwadar Port. All these projects will definitely play a leading role in the construction of the CPEC in the future."

He said the construction of CPEC was a huge and systematic project. It required long-term efforts of governments, enterprises and people from all walks of life, he added.

Terming China and Pakistan all weather strategic cooperative partners, he said, all

weather means, no matter there was sunshine or cloud, weather it was windy or stormy, their two iron brothers were always standing together.

Ambassador Sun said China will continuously encourage Chinese companies to invest in Pakistan, adding: "We highly appreciate the Pakistan side for attaching great importance to the safety of Chinese personnel and institutions in Pakistan." He expressed the confidence that Pakistani side would continue to take all the necessary measures in this regard.

He said that he recently visited several cities in Pakistan and was happy to see that the CPEC had won support from all the parties and the peoples from Pakistan. In Faisalabad, Chinese technicians train Pakistani workers with textile technology hand by hand.

"In Quetta, I witnessed the aspiration of local government, army, media and civilians to the CPEC."

In Lahore, the newly built Pak-China Friendship Pavilion had become a new symbol of CPEC and their friendship, he said, adding these were the real sources of their strength.

"We are in the era of history-making. The CPEC forum is a favourable platform for our two media communities to make extensive and in-depth exchanges and achieve fruitful outcomes." He hoped that the media could continue to support and make comprehensive coverage on CPEC in the future.

BOOK ON PAK-CHINA FRIENDSHIP TO BE LAUNCHED ON WEDNESDAY -- APP

ISLAMABAD: Pak Institute for Peace Studies (PIPS) will host launching ceremony of a book on Pakistan-China friendship on November 25.

The book titled "You and Us: Stories of China and Pakistan" is a compilation of the stories of Pak-China friendship penned by former Chinese officials in Pakistan.

A 12-member delegation comprising former Chinese ambassadors and counselors in Pakistan will attend this special ceremony marking China-Pakistan friendship.

Copies of the book will be available at the launch. Notable Chinese and Pakistani speakers will offer their remarks on the book.

All Day

**PAK, CHINA TO INK AGREEMENT TO ENSURE
TRANSPARENCY -- APP**

China and Pakistan would soon sign an agreement aimed at ensuring transparency in the implementation of energy and infrastructure projects under the China-Pakistan Economic Corridor (CPEC) which is an important part of China's One Belt One Road Initiative. The most important projects to be completed under the CPEC initiative included Gwadar port, the second phase of the upgrading project of Karakoram Highway, motorway project between Karachi and Lahore, Thakot Havelian motorway, Gwadar port expressway, Gwadar international airport and Karachi-Sukkur motorway.

China and Pakistan will work together to make the CPEC and other bilateral development projects transparent and free of any corruption, Chinese Assistant Minister, National Bureau of Corruption Prevention, Liu Jianchao said in a recent interaction with media persons here. The Chinese minister who visited Pakistan to attend Ombudsman Conference said that he also held meetings with Chairman, National Accountability Bureau (NAB) and other Pakistani officials and shared Chinese experience against corruption. Terming the CPEC most important project in Sino-Pak bilateral relations, he said, there was a need to make all possible efforts for its success.

Liu Jianchao, who earlier had served his country as Assistant Foreign Minister and took the new assignment two months back, gave details of the ongoing efforts making the Chinese society free of corruption. For this, he gave credit to leadership of the Chinese Communist Party, especially Chinese President Xi Jinping. He said the CPEC would be a symbol of good governance, as it would be clean and transparent and added under the law, it was forbidden for any Chinese business company to get itself involved in corruption, while carrying out development projects.

However, both sides would work closely to prevent, detect and control corruption in all the projects, undertaken at their bilateral level, he added. Liu Jianchao who was serving as Chinese Assistant Foreign Minister before assuming his new assignment, said the leadership of both countries attached great importance to CPEC and wanted to make it successful at all costs. This project would contribute a lot to promote peace and development not only in the two countries, but also in the region. It was a pilot project of One Road, One Belt initiative of the Chinese Government.

The Chinese minister, while praising high the Sino-Pak friendship said that they were looking forward to have close cooperation in fighting corruption. Liu Jianchao termed corruption a great threat to security, peace and socio-economic development. His country, he said, had adopted a policy of zero tolerance against corruption. Thousands of Chinese people, found committing corruption had been punished. There were over 150 top government officials who had faced serious punishment for corrupt practices. He said there were about 600 corrupt Chinese officials who had fled abroad and the government succeeded in bringing them back and punished them under the law. The Chinese minister said that more than 230,000 corrupt people were investigated and out of them 90 percent were punished during the last three years.—APP

Pakistan to collaborate with USA and China for Afghan reconciliation process -- Pak Tribune

Pakistan announced on Tuesday that it was making a renewed effort, in collaboration with the United States and China, to revive the stalled Afghan reconciliation process.

"Pakistan... would like to make renewed efforts to resurrect the peace and reconciliation process. Since it has to be an Afghan-led process, we are confident that the Afghan government and the Taliban would step forward with concrete ideas and proposals and engage in meaningful reconciliation talks."

"Pakistan is prepared to extend its full support and assistance in promoting any such initiative," said a statement issued by the Foreign Office and attributed to Prime Minister Nawaz Sharif.

Although the statement called for "a quadrilateral initiative to restart the reconciliation process", it emphasised the role of the US and China as "vital partners".

It has long been known that Pakistan has been working with the international community for the resumption of the dialogue for peace in Afghanistan, but this is the first formal statement that Pakistan is about to launch a fresh effort for salvaging the dialogue that was stalled after the disclosure about Mullah Omar's death in July.

The US and Pakistan had agreed last month to expedite the resumption of the reconciliation process during Army Chief Gen Raheel Sharif's visit to Washington.

The government is expecting that "a common roadmap" for the resumption of the dialogue would be agreed during President Ashraf Ghani's trip to Islamabad on December 9 for attending the Heart of Asia ministerial meeting being jointly hosted by Pakistan and Afghanistan.

According to sources, confirmation of President Ghani's visit came following meetings between Prime Minister Sharif and Mr Ghani on Monday on the sidelines of the Paris Climate Change Summit. The trip was earlier in doubt because of the strains in bilateral ties caused by events following the disruption in the reconciliation process.

Mr Ghani was encouraged by Britain and the US to accept the invitation for the Heart of Asia Conference.

The government also used the good offices of Pakhtun leaders to ease some of the bilateral tensions. A delegation of Pakhtun leaders led by ANP leader Asfandiyar Wali Khan had visited Kabul before Mr Sharif left for Paris.

The Pak-Afghan rapprochement following a brief breakdown is predicated on the understanding that both countries would deny sanctuaries on their soil to terrorists, improve border coordination and coordinate closely at the political, diplomatic, military and intelligence levels.

A source described President Ghani's coming visit as very important, which would help improve ties after the recent strains. "The improvement is essential for all other things to happen including reconciliation," he said.

The source said that some confidence-building measures were expected to be announced during President Ghani's visit. He, however, would not elaborate on what measures were expected.

About the reconciliation process, the source said a breakthrough would take place only after the Afghans actually owned and led the process instead of wavering on it with every change in political situation in their country.

Meanwhile, Gen Sharif is expected to visit Kabul in the next few weeks to discuss

the reconciliation initiative.

The dates for his visit were being finalised, a source said adding that it was unlikely to happen before the Dec 9 trip by President Ghani.

Digital age: Pakistan, China agree to develop e-corridor -- Express Tribune

Pakistan and China have agreed to develop an e-corridor to establish greater connectivity, keeping in view the importance of the China-Pakistan Economic Corridor (CPEC).

The agreement was reached during a meeting of a high-level Chinese delegation, led by China Investment Promotion Centre Chairman Yan Lijin, with Minister of State for Information Technology and Telecommunications Anusha Rehman.

Going strong: Pakistan, China celebrate another year of friendship

The minister apprised the delegation of the potential of Pakistan's IT and telecom sector and how the ministry was working to reap this potential in an optimal way. "We believe in a 'Digital Pakistan' and Chinese cooperation and collaboration will help us to materialise this vision of accelerated digitisation," she said.

"We are awarding the 'Tech-city' project on January 7 next year. It is an incubation project meant for the training of young entrepreneurs. Likewise, we intend also to establish a research and innovation centre of international standard."

She said the ministry was already collaborating for the development of an 'e-commerce gateway framework' so that online commercial ventures could flourish further and consumers and companies could get more confidence in online payment systems. "We would like to invite international companies to establish their setups here in Pakistan as well," she added.

China is now the top foreign investor in Pakistan: minister

The delegates appreciated the vision of the government and hailed initiatives being taken by the Ministry of IT for uplifting the sector and agreed to work with the government in establishing IT parks on the ministry's land in Karachi.

Pak-China have a shared future: Chinese FM -- The Nations

ISLAMABAD: Prime Minister Muhammad Nawaz Sharif met Chinese delegation led by H.E Mr Wang Yi, Foreign Minister at PM House today. The Chinese Foreign Minister said that China and Pakistan have a shared future and China Pakistan Economic Corridor (CPEC) is the largest comprehensive project with any foreign country.

'Pakistan and China are partners in comprehensive cooperation. Implementation of CPEC projects is in full swing. Success of CPEC will make a big difference in the region. Pakistan has played an important role in the 'Heart of Asia' conference. We appreciate the leadership of the Prime Minister in leading the war against extremism and terrorism', said Mr Wang Yi.

The Prime Minister stated that Pakistan appreciates the support of Chinese leadership.

'Chinese leadership played a key role in laying the foundations of CPEC. Pakistani nation is grateful to the Chinese leadership for taking the bilateral relationship to the highest level. We thank Chinese leadership for especially supporting Pakistan in energy and infrastructure sector', said the Prime Minister.

Pak-Netherlands agreement for institutional building of TDAP -- The Nations

Pakistan and Netherlands Wednesday signed a Memorandum of Cooperation for the institutional building of Trade Development Authority of Pakistan (TDAP) and capacity building of other business support organizations (BSOs) in Pakistan and to provide export coaching programme to SMEs to meet the requirements of GSP-Plus.

The agreement was signed between the Trade Development Authority of Pakistan and Center for Promotion of Imports from Developing Countries (CBI) in The Hague, Netherlands for the institutional building of TDAP and capacity building of other BSOs Business support organizations in Pakistan and to provide export coaching programme to SMEs to meet the requirements of GSP-Plus, says a message received here from Hague.

Federal Minister for Commerce, Engr. Khurram Dastgir Khan also witnessed the signing ceremony. Khurram Dastgir also held a meeting with the Dutch Minister for Trade and Development Cooperation Ms. Ploumen in Amsterdam and urged Dutch companies to invest in dairy, horticulture and agriculture and livestock research. The Minister said that Pakistan is the largest producer of milk in the world and wants to benefit from the expertise of Dutch dairy sector.

In horticulture sector the Netherlands has developed saline resistant potato seeds and test results of these seeds have shown positive results in saline lands of Pakistan. The Minister proposed a broader feasible project be designed with joint collaboration of Dutch Government, Government of Pakistan, agriculture universities and also with the involvement of private sector.

Dastgir invited the Dutch Minister to visit Pakistan and attend the Asian Living Wage Conference(ALWC). The Conference will be an international event about realizing living wages through social dialogue in the textile sector of eight Asian producing countries.

Its main aim is to highlight the need for living wages through social dialogue in a tripartite 'plus' setting, i.e. linking governments and social partners in Asian countries to international buyers in a joint effort to realize living wages in textile supply chains. The ALWC will be a 2-day conference with around 150 participants, most notably high level government officials from the host country Pakistan, Asian countries and OECD governments as well as international brands, manufacturers, trade unions and other stakeholders.

The Minister congratulated the Government of Netherlands for holding the EU Presidency for the upcoming six months and hoped that the Netherlands will play very positive role for strengthening of Socio-Political and Economic relations with comity of nations of the world in general and Pakistan in particular.

He also thanked the Netherlands support for Pakistan with regards to award of GSP-plus status to Pakistan in 2014 and hoped that it will continue to support Pakistan's case in the EU in the future as well.

The Minister also attended the ceremony to launch the Netherlands Pakistan Business Facilitation Forum (NPBFF) in The Hague. The purpose of the Forum is the facilitate and create awareness among the Dutch Trade and Investment sectors with regards to opportunities created in the wake of GSP Plus and Pak-China Economic Corridor Investments in Pakistan.

The Minister also attended a seminar on Global Value Chains and presented Pakistan's case especially in the textile sector.

He apprised the gathering regarding efforts of the Government to improve the working conditions in Pakistan. He said that with the grant of GSP+ to Pakistan, there is a growing urgency amongst the businessmen to know and implement good manufacturing practices to make workplaces more safe and accountable.

Government of Pakistan and ILO have been partnering for many years to bring meaningful measures into the place.

Recently Pakistan has developed Gender Sensitive Inspection System (GSIS) in the form of a web portal which provides database for compliance to about 70 laws. The system is aimed at assisting the Labour Inspectors in their routine inspections by providing measurable indicators for gauging progress against gender-inclusive target.

PM announces Rs20 mln grant for Mastung Cadet College -- The Nations

ISLAMABAD: Prime Minister Nawaz Sharif has announced Rs 20 million grant for Mastung Cadet College.

The announcement was made during a meeting of students of Mastung Cadet College with prime minister today. Speaking on the occasion, Nawaz Sharif vowed to further speed up development activities in Balochistan.

He said peace has gradually been restored to the province and law and order situation has improved. Nawaz Sharif said today's Balochistan is far better as compared to previous years. He said that a coalition government is working in the province and federation is giving all necessary resources to the province to carry out the development activities.

Emphasizing the need for promoting the environment of brotherhood, the Prime Minister said several road infrastructure projects are under construction from Gwadar to Khyber Pakhtunkhwa.

He said, Balochistan is as dear to him as any other area of the country and quality education institutions, including medical colleges and university will be constructed in the province.

Prime Minister said he himself is overlooking the ongoing development work. Highways are being constructed from Gwadar to Khyber Pakhtunkhwa that will enhance contacts among these areas and people as well, Nawaz added.

Two week Pak China exercise started -- Pak Tribune

RAWALPINDI: A two-week long joint training exercise 'YOUYI 5' between special forces of China and Pakistan started in Qingtongxia city of China's Ningxia Hui Autonomous Region on Tuesday.

According to ISPR, the impressive opening ceremony was attended by senior military officers of special forces of Pakistan and People's Liberation Army (PLA). National anthems of both countries were played on the occasion.

The joint exercise as part of Year of Friendship 2015 will focus on anti-terrorist operations, hostage and rescue, cordon and search operations. The joint exercise will enhance and further strengthen already deep military ties between Pakistan and China.

The YOUYI 5 is being carried out in extreme weather conditions of northern China to impart and share Pakistan Army's experiences in war against terrorism.

All Day

**After TAPI: Pakistan and Turkmenistan negotiating another project --
Express Tribune**

After the groundbreaking of TAPI gas pipeline, Pakistan and Turkmenistan are now negotiating for a second project, which would pass through the Afghanistan-Iran border to connect with the Gwadar port.

Balochistan, long marred by insurgency and political unrest, could now potentially see a massive increase in employment.

PM inaugurates TAPI gas pipeline project in Turkmenistan

An official familiar with the development said the Interstate Gas Systems (ISGS) had submitted a concept paper to Turkmenistan around two months ago, discussing the laying of an additional gas pipeline.

The official said that work on this proposal was under way to implement the project.

He said the TAPI pipeline would be able to provide 3.2 billion cubic feet of gas per day, while any additional gas supply from Turkmenistan would be transported through another pipeline.

"The Pakistan government would set up an LNG re-gasification plant at Gwadar Port to convert this gas into LNG," the official added.

Turkmenistan begins work on TAPI pipeline

"The proposal of a second pipeline was also discussed during the sidelines of the meeting at Ashgabat, Turkmenistan when Prime Minister Nawaz Sharif visited for the groundbreaking of TAPI project."

Turkmenistan had already committed to 85% investment to implement the TAPI gas pipeline project. The remaining equity would be equally shared by Afghanistan, Pakistan and India.

China will also provide a concessional loan for the Gwadar LNG pipeline project.

Meanwhile, Russia, which is already importing gas from Turkmenistan, has also offered to lay a gas pipeline. Pakistan and Russia have recently signed a government-to-government deal to lay a \$2-billion LNG pipeline from Karachi to Lahore.

Pakistan, Turkmenistan to give big push to TAPI project

"Pakistan has two new proposed gas pipeline projects – one from Turkmenistan and the other from Russia," official said, adding that Prime Minister Nawaz Sharif has directed to pursue these two gas pipeline projects to meet domestic energy needs.

The cost of the Gwadar LNG pipeline project, including its terminal, and TAPI amounts to \$12 billion. Pakistan would have to finance only \$500 million from its own pocket to implement these two projects.

For the record

Pakistan would import 1.3 bcfd of gas through TAPI gas pipeline, whereas 600 mmcf of LNG would be imported through the terminal at Gwadar.

Pakistan, starved for energy, would be able to bridge a huge amount of its shortfall through these two projects. It will import 1 bcfd through the Iran-Pakistan (IP) gas pipeline project.

The Gwadar Development Authority (GDA) has also placed a request for 100 mmcf of gas to meet requirement of the city.

All Day**CPEC body wants agri sector to be part of Corridor -- The Nation**

Parliamentary Committee on China-Pakistan Economic Corridor (CPEC) Monday proposed to add agricultural sector as part of CPEC and also asked the government to define the role of railways in CPEC.

Chairman Parliamentary Committee on CPEC Mushahid Hussain Syed, presiding over the 7th meeting of the committee, said the western route of the Corridor will be completed by December 2016.

The committee was briefed by the secretary Ministry of Planning, Development and Reforms regarding the 5th meeting of the Joint Cooperation Committee (JCC) on CPEC. It was informed that the JCC, which is the apex decision-making body on CPEC between China and Pakistan, has adopted the updated list of prioritised and actively promoted energy projects. The committee was briefed in detail about decision taken on 15 different items which include energy, road projects and Gwadar.

The committee members discussed various aspects of the projects, their progress with reference to Gwadar which is the starting point of CPEC. Chairman parliamentary committee assured the members that "all the reservations of the local inhabitants of Gwadar would be addressed and resolved and the rights of the people of Gwadar as well as the people of Balochistan would be fully promoted and projected".

Senator Mushahid said that the "CPEC is a strategic national project, the most important in the country's history since the nuclear programme and vital for Pakistan's future prosperity by knitting the federation together through progress in the smaller provinces particularly the less developed areas". He welcomed the representatives of Gilgit-Baltistan, who attended the meeting as special invitees. The committee was briefed that in Phase-I, there was a security and development plan being developed in Gwadar at the cost of Rs 3.4 billion and the committee directed the Ministry of Planning and Development to furnish details of the plan and the breakup of the cost in various sectors.

Chairman committee also briefed the parliamentary committee about the CPEC Media Forum which was held in Islamabad on November 16, an effort to develop the CPEC specific website as well as his meeting with Sardar Akhtar Mengal, former chief minister of Balochistan. Sardar Mengal has invited the chairman of the parliamentary committee on CPEC to attend the all-parties conference on Gwadar to be held on January 10 next year.

Senator Mushahid further told that the first quarterly report of the committee was ready for presentation in parliament and he requested Minister for SAFRON, Lt-Gen (r) Abdul Qadir Baloch to present the report in the National Assembly on behalf of the committee.

The committee also directed the Ministry of Water and Power to respond to the queries raised by PTI leader Asad Umar by December 21.

Mushahid Hussain said the committee members visited Gwader on November 28-29 to witness the progress undergoing on western route. He said every province would be visited eventually. Earlier, the committee members visited Talar, Ghoshab and Turbat in Balochistan. He said the committee had also decided to visit Sindh next month to inspect the power projects in Thar and The Port Qasim.

As per plans the committee will also visit Peshawar to meet the KP Chief Minister Pervaiz Khattak to brief him about the CPEC projects on December 31. He said the committee was briefed by Chinese ambassador on December 2 and next year they were going to visit China on their invitation.

All Day**Pakistan, China PMs agree to further strengthen ties in diverse fields -- APP**

ZHENGZHOU, China: Prime Minister Muhammad Nawaz Sharif and his Chinese counterpart Li Keqiang on Tuesday agreed to further strengthen bilateral relations in diverse fields, particularly in economy and energy sectors.

Both leaders discussed bilateral relations and regional situation as they met on sidelines of the 14th SCO Heads of Government meeting here.

Implementation on Economic Corridor Project and energy and infrastructure development projects in Pakistan also featured during the meeting.

Punjab Chief Minister Muhammad Shahbaz Sharif, Minister for Planning, Development and Reforms Ahsan Iqbal and Special Assistant to the Prime Minister Tariq Fatemi were also present on the occasion.

Prime Minister Muhammad Nawaz Sharif expressed satisfaction with the progress on China-Pakistan Economic Corridor Project and said Pakistan wanted that all the projects under the CPEC, be implemented in a timely and efficient manner.

He said the Pakistan-China Economic Corridor Project would prove a game-changer in the region.

He said Pakistan considers friendship with China as central pillar of its foreign policy.

He said that cooperation between Pakistan and China was reflection of close friendship between the two countries and the new projects would change to destiny of people of the region. It will create new opportunities for employment and end poverty, he added.

Nawaz Sharif said Pakistan would like Chinese side to allow Pakistan to open a trade cum visa office in Urumqi to facilitate the CPEC projects implementation and people to people exchanges.

He said the progress achieved by handing-taking over of Gwadar Port Free Zone is a good beginning for initiating the process for building the economic zone.

The Prime Minister informed his Chinese counterpart that the operation Zarb-e-Azb in FATA and National Action Plan in the country are being successfully implemented.

He assured his counterpart of the security for Chinese workers and for this purpose a Special Security Division had been set up while Gwadar security force has already been mobilized under the command of a Brigadier.

Both leaders also discussed the Afghan reconciliation process and the recently held Heart of Asia Conference in Islamabad in which a Steering Committee comprising Pakistan, Afghanistan, China and US was set up which will supervise the process of peace and reconciliation in Afghanistan and coordinated efforts in this regard.

The Prime Minister also apprised the Chinese Premier of his recent meeting with Indian Prime Minister Modi in Paris and Indian Foreign Minister Sushma Swaraj's visit to Islamabad and said it has yielded encouraging results.

He said both the countries have agreed to resume the comprehensive bilateral dialogue process, which is a welcome sign and development.

Prime Minister Nawaz Sharif said Pakistan and China are celebrating 'the year of friendly exchanges' and next year will be the 65th anniversary of the establishment of bilateral diplomatic relations.

He said both the countries wanted to further promote people-to-people contacts.

The Prime Minister thanked China's support for Pakistan being accepted as full member of the SCO.

The Chinese Prime Minister on the occasion said that the relationship between Pakistan and China is deep-rooted between the two peoples.

He said that China supports a strong and stable Pakistan and desires for a much more strong relationship in the future.

All Day**Parliamentary body meets: western route to be completed by December 2016 -- BR**

Chairman Parliamentary Committee on China Pakistan Economic Corridor (CPEC) Mushahid Hussain Syed has said the western route of the Corridor will be completed by December next year. The 7th meeting of the Committee, since its formation on September 15, 2015, comprising 15 members, was held here on Monday. The committee members discussed various aspects of the projects, their progress with reference to Gwadar which is the starting point of the China Pakistan Economic Corridor (CPEC).

Senator Mushahid Hussain in his remarks assured the members that "all the reservations of the local inhabitants of Gwadar would be addressed and resolved and the rights of the people of Gwadar as well as the people of Balochistan would be fully promoted and projected".

Joint corporation committee (JCC) which is the apex decision making body on CPEC between China and Pakistan has adopted an updated list of prioritised and actively promoted energy projects. The committee was briefed in detail about the decisions taken on 15 different items including energy, road projects and Gwadar. Senator Mushahid said the "CPEC is a strategic national project, the most important in the country's history since the nuclear programme and the CPEC is vital for Pakistan's future prosperity by knitting the federation together through progress in the smaller provinces particularly the less-developed areas". He also welcomed the representatives of Gilgit Baltistan, who attended the meeting as special invitees.

The committee was briefed that in Phase-I, there was a security and development plan being developed in Gwadar at the cost of Rs 3.4 billion and the committee directed the Ministry of Planning and Development to furnish details of the plan and the break-up of the cost in various sectors.

He also briefed the parliamentary committee regarding the CPEC Media Forum which was held in Islamabad on November 16, 2015, an effort to develop the CPEC-specific website as well as his meeting with Sardar Akhtar Mengal, former Chief Minister of Balochistan who has invited the chairman of the Parliamentary Committee on CPEC to attend an All-Party Conference on Gwadar which Sardar Mengal has convened in January 10, 2016 and which the chairman accepted.

The Senator further said the first quarterly report of the committee was ready for presentation in parliament and requested Minister for SAFRON, Lieutenant General Abdul Qadir Baloch (Retd) to present the report in the National Assembly on behalf of the Parliamentary committee on CPEC.

The committee also directed the Ministry of Water and Power to respond to the questions raised by PTI leader Asad Umar, MNA, by December 21, so that the interest of the Parliamentary committee on CPEC is fully promoted. Mushahid said the committee members visited Gwadar to observe the progress undergoing at the western route. Earlier, the committee members visited Talar, Ghoshab and Turbat in Balochistan. He said the committee has also decided to visit Sindh next month to inspect the power projects in Thar and Port Qasim.

As per plans, the committee will also visit Peshawar to meet Chief Minister KP Pervaiz Khattak to brief the projects' summary on CPEC on December 31. He said the members of committee proposed to make agricultural sector as part of CPEC. Railways, too, will require a new definition under the CPEC. As per documents, out of 14 projects under a prioritised list, 2 projects have already achieved financial close and 5 projects have started construction from sponsor equity and 2 hydro power projects are also at advanced stages.

Following projects to be taken up in 2016 for transport infrastructure and Gwadar segments includes Khuzdar-basima (110 KM), KKH-Phase-II (280 KM) Raikot-Thakot section, D.I. Khan-Quetta (533 KM), Expansion of Multipurpose terminal including breakwater and dredging, eastbay Expressway II and Fresh water supply, Wastewater treatment plans for Gwadar city.

The next meeting of Gwadar joint working group is expected soon to speed up Gwadar projects like water and energy, technical and vocation training institute and development of Gwadar port city smart plan as well as finalisation of the second phase of CPEC projects.

Talking to Business Recorder, Asad Umar said that the committee has so far not been able to bring the financial statement of CPEC budget in black and white. He raised the questions regarding the equity, debt and financial close with respect to the CPEC, adding that committee should allocate Rs 34 billion categorically which are meant for the energy projects. He also inquired about the foreign and other modes of the investment along with the government guarantees returns and terms on which the borrowing has been made.

All Day

OVER 80 PERCENT INVESTMENT UNDER CPEC TO COME THROUGH PRIVATE SECTOR: AHSAN -- BR

Minister for Planning Development and Reforms Ahsan Iqbal Thursday said that 80 percent investment under China Pakistan Economic Corridor (CPEC) would come through private sector investment with no debt implication on national economy.

Addressing a conversation on the 'Promise of China-Pakistan Economic Corridor (CPEC)' organized by Institute of Policy Reforms (IPR), he said that the projects would help in rapid socio-economic uplift of the region.

He said US\$ 46 billion CPEC project was not a grant or any part of budgetary support programme of the government but it was a project based initiative of both the countries.

The minister said out of the total investment of US\$ 46 billion, US\$ 38 billion would be spent on energy related projects which was on independent power producer (IPP) mode and would not increase burden of national debt.

He said energy generating projects were designed by focusing coal and hydro electricity generation potential of the country where as clean energy production was also given due attention.

The coal based energy projects was based on super critical technology to protect the environmental hazards in the country adding that Thar coal reserves would be mined and used for cheap electricity, he added.

He said Gwadar Port was the second main component of the project which would make the Balochistan a hub of commercial activities adding that health, education, water and technical institutes would also be constructed in that areas.

Ahsan Iqbal said that Pakistan and China were following three principles included scientific planning, step by step method and taking the easiest path for swift completion of the projects.

In first stage of infrastructure development, it was decided to connect the port with existing road links, adding that work on Gwadar-Sohrab was under progress and would be completed by December 2016.

He said that CPEC would help to enhance the local GDP by 7-8 percent besides significant increase in tax to GDP ratio and change the fate of over 3 billion people of the region.

Speaking on the occasion, Chairman IPR, Humayun Akhtar Khan urged for elaborating upon project completion timeliness, their financing plan and strategy for effective implementation.

He said that connection between markets, both within the country and with the region would change the fundamentals of doing business in Pakistan and in the region.

In an overview of CPEC, Ashraf Hayat, Executive Director IPR, welcomed the China Pakistan Economic Corridor project. CPEC, he said has the potential for fundamental changes to the Pakistan economy.

Looking at the broader "One Belt One Road initiative", he said that it would connect about 60 countries through a complex network of roads, rails, ports, and oil pipelines.

General (R) Sikander Afzal, briefed participants on the security arrangements for CPEC and said between 17,000 and 32,000 additional security personnel would guard over 14,000 Chinese workers in Pakistan.

The army has a four-layer programme to provide security for CPEC projects and the

workers. The army is setting up a special security division with 12,000 additional personnel.

Number of security personnel will increase while six additional wings of the Frontier Corps with 5,700 personnel will be added in Balochistan, he added.

In Punjab, 3,500 police officers, 900 Rangers, 4,100 private security guards and 740 Askari Guards would protect various projects of the economic corridor, he added.

Deputy Chief of Mission of the Chinese Embassy in Islamabad reiterated the commitment of the Chinese government for completing the project with in time and with cost effective measures.

He said this bilateral relationship will further deepen and strengthen Pakistan and the region.

Dr. Hafiz Pasha, Managing Director IPR, elaborated on the macro-economic and operational implications of CPEC implementation.

All Day

Turkmenistan to Gwadar: government's decision to lay another gas pipeline welcomed -- BR

Former President FPCCI Senator Haji Ghulam Ali has said that business community fully supports the government's decision to lay another gas pipeline from Turkmenistan to Gwadar to convert it into LNG. He asked the government to prefer Russia for \$12 billion project as it is already working on Karachi-Lahore LNG pipeline and inclined to invest heavily in Pakistan.

He welcomed groundbreaking of TAPI gas pipeline which will reduce the current gas shortfall by 25 percent, said President Pakistan Businessmen and Intellectuals Forum (PBIF) Mian Zahid Hussain. They further said that US has imposed sanction on sale of Iranian gas but it has not imposed any restriction on Pakistan to complete its part of the pipeline which must be expedited. Mian Zahid Hussain said that gas pipeline would not only bridge energy shortages but also ensure peace and prosperity in the country.

He lauded the Nawaz government for initiating work on \$10 billion pipeline which will also help Pakistan earn up to \$250 million as transit fee. He said that financing TAPI is a challenge for which all four countries should try to lure foreign investors immediately.

All Day

Work on CEPC route from Khunjrab-Gwadar continues: NA told -- APP

State Minister for Parliamentary Affairs Sheikh Aftab Ahmed Thursday apprised the National Assembly that the construction of China-Pakistan Economic Corridor (CPEC) route from Khunjrab to Gwadar is underway adding that its the Northern Alignment (Khunjerab – Raikot Highway (335 KM) had already been constructed with Chinese assistance.

Replying to various questions during Question Hour, he said that the CPEC route consisted of a network of highways and Motorways and the government has allocated amounts for its various alignments including northern, eastern and western in the Public Sector Development Programmes (PSDP) 2015-16.

Giving a break-up, he said that an amount of Rs.20,500 million was earmarked for Thakot-Havelian 120 km (Phase-1), Rs.2300 million for construction of Burhan-Havelian Expressway (59.1 km), Rs 50,250 million for Multan-Sukkur Section (387 Km), Rs.20,000 for Lahore-Abdul Hakeem Motorway, Rs.10,000 million for Islamabad-Mianwali-D I Khan section, Rs.2000 million for rehabilitation of D I Khan Mughalkot (50 Km), Rs.3000 Zhob Mughal Kot (81 km), Rs.2500 widening and improvement of N-85 Hoshab-Nag-Basima-Surab Road (459 Km) and Rs.2800

Gwadar-Turbat-Hoshab section, Gwadar-Ratodero Road, Khuzdar Shahdakot-Ratodero.

To a supplementary question, Aftab Ahmed said that Karachi-Lahore Motorway would be completed in 30 months and Prime Minister Prime Minister would inaugurate the project on December 19.

Chinese govt to give grant of Rs 94 million for KP -- Pak Tribune

The Chinese government will grant Rs 94 million funds to build additional facilities in Baffa Tehsil Headquarters hospital and Government Higher Secondary School, Khyber Pakhtunkhwa.

In this regard, a memorandum of understanding (MoU) was signed between Earthquake Reconstruction Rehabilitation Authority (ERRA) and Anhui Construction Company. ERRA acting deputy chairman and Chinese Embassy Economic and Commercial counsellor witnessed the ceremony. ERRA Acting Deputy Chairman Brigadier Abu Bakr Bajwa thanked China for Rs 94 million funds to build additional facilities in Baffa hospital and school. He also recalled the Chinese government and its people strong support after October 8 earthquake.

He said that China has always been on forefront for helping people of Pakistan at the time of calamity. China was the first country after 2005 earthquake, which provided huge support to Pakistan in rescue and relief operation.

At the signing ceremony, Chinese Embassy Economic Counsellor Li Shaoton reiterated his government commitment to continue support for the reconstruction and rehabilitation of quake affected areas in Khyber Phaktunkhuwa and Azad Kashmir. He said that China government soon after devastated earthquake played its due role for building two grand facilities in Baffa, Mansehra, which included fully equipped 40-bed Tehsil Headquarters Hospital with a cost of Rs 412.5 million. He said the Chinese government also built Higher Secondary School at Baffa, which cost Rs 487.5 million to impart education to 720 students.

ERRA acting deputy chairman appreciated the Chinese government for Rs 94 million aid to carry out additional work, which included waste water treatment unit, medical waste burning facility at hospital, drainage for the hospital, provision for voltage stabiliser in hospital and provision for voltage stabilizer in school as well.

Gwadar real estate gets boost through TAPI pipeline -- Pakistan Today

The groundbreaking of the Turkmenistan-Afghanistan-Pakistan-India (TAPI) pipeline, also known as the Trans-Afghanistan Pipeline, will bring property values in Gwadar to unprecedented heights, claims a real estate website.

The Gwadar real estate has already received a huge boost this year with the initiation of work on the China-Pakistan Economic Corridor (CPEC). The CPEC is a 46-billion-dollar mega-project intended to provide much-needed highways, railways and pipelines between Pakistan's Gwadar and China's autonomous Xinjiang region.

The TAPI pipeline will have a compounding effect on the value of Balochistan port city's real estate. It will be the third such international infrastructure deal for Pakistan after the CPEC and the Russia-backed "North-South" pipeline which will connect Lahore to Karachi.

Pakistan's real estate experts are already seeing big increases to Gwadar's property values. Faysal Al Zarooni, Chairman of the Faysal Al Zarooni Group, has remarked that the city was an "investment goldmine" and that investors who realised this now were likely to profit greatly.

MoU to promote Pak-China bilateral trade signed -- APP

Pakistan: China Xinjiang Kashgar Chamber of Commerce (KCC) and Islamabad Chamber of Commerce and Industry (ICCI) have signed a Memorandum of Understanding (MoU) to work jointly for promoting bilateral trade and economic relations between Pakistan and China.

The signing ceremony was held at ICCI. Abdujilil Halil President, Kashgar Chamber of Commerce and Atif Ikram Sheikh, President, Islamabad Chamber of Commerce and Industry signed the MoU.

Both Chambers agreed to enhance mutual cooperation for exploring business and investment opportunities for their respective members in the China-Pakistan Economic Corridor (CPEC) that extends from Kashgar to Gwadar, said a press statement issued here.

KCC will facilitate ICCI members in grant of visas to frequently visit Kashgar for exploring business opportunities in Guangzhou New City's Special Economic Zone and ICCI will reciprocate same cooperation to KCC members for exploring investment possibilities in Pakistan.

Both parties agreed to establish a joint working group comprising 5-6 members from each side to work on mutually agreed agenda for promoting economic interests of both countries.

They shall exchange information about trade opportunities and facilitate participation of each other's members in trade fairs and exhibitions in their respective countries for promoting bilateral trade, investment and joint ventures.

Both Chamber shall cooperate for exchange of business delegations to promote business linkages and explore new avenues of mutual cooperation.

Speaking at the occasion, Abdujilil Halil, President, Kashgar Chamber of Commerce said that Chinese investors were taking great interest in Pakistan for investment and joint ventures and hoped that MoU between KCC and ICCI would help in exploring business partnerships between the private sectors of both countries.

Atif Ikram Sheikh, President, Islamabad Chamber of Commerce and Industry said that CPEC would start a new era of business and investment opportunities between Pakistan and China and it was high time that more and more Chinese investors should come to Pakistan to explore investment and joint ventures in energy and infrastructure development projects envisaged in China-Pakistan Economic Corridor for early materialization of this historic project.

All Day

Transport project with China could boost economy -- Asia Nikkei

The China-Pakistan Economic Corridor initiative, a planned \$46 billion network of transport links, appears to be gaining momentum, which is good news for Pakistan's sluggish economy. Still, security and funding issues remain an obstacle.

The CPEC project, agreed to by Chinese Prime Minister Li Keqiang and his Pakistani counterpart, Nawaz Sharif, in May 2013, would connect the Arabian Sea port of Gwadar in southwestern Pakistan with the Xinjiang region of northwestern China upon its scheduled completion in three years.

The corridor is part of China's "One Belt, One Road" initiative to establish a network of transcontinental land and sea routes. China views Gwadar as a potential hub for trade with the Middle East, Africa and Europe. The project is also aimed at promoting development in Xinjiang and Tibet.

Gwadar, a deep-sea port that is widely expected to become Pakistan's biggest, started container ship operations in May.

Claude Rakisits, senior fellow at the South Asia Center of U.S. think tank the Atlantic Council, said the project could be good for Afghanistan, too. "If peace eventually does come to Afghanistan, CPEC will help that country integrate more closely economically with Pakistan and Iran," he said. "And, of course, it will provide direct access to western China and its hinterland ... a vast and fast-growing region in need of development."

Added Rakisits, "Needless to say, with better roads and railroads, the huge Pakistan market will be easier to access for foreign investors."

Aiming too high?

However, some question the Pakistani government's ability to complete the project given its persistent financial difficulties.

"CPEC is a very ambitious and expensive project, and both [Pakistan and China] appear very keen on making it work," said Michael Kugelman, senior associate for South and Southeast Asia at the Woodrow Wilson International Center for Scholars, a U.S. think tank.

But is it too ambitious? "Many of the projects [planned under the CPEC] are in a holding pattern," Kugelman said. "China is supposed to fund Pakistan's side of a new Iran-Pakistan gas pipeline, but until the U.S. releases sanctions on Iran, I doubt this funding will materialize. Also, many of the energy projects associated with CPEC are focused on coal, but Pakistan appears to be scaling back its earlier plans to develop its indigenous coal resources."

All Day

Liquefied natural gas: Govt seeks to negotiate Gwadar pipeline cost -- Express Tribune

The government has constituted a price negotiation committee in an attempt to seek a further reduction in the cost estimated by a Chinese company for laying the Gwadar liquefied natural gas (LNG) pipeline and setting up a terminal, an official says.

This project will work as an alternative to the Iran-Pakistan (IP) gas pipeline project and will be executed by the government in cooperation with the Chinese firm on a government-to-government basis.

Gwadar-Nawabshah: Work on portion to end by December 2017

Under the plan, the LNG pipeline will be laid from Gwadar to Nawabshah and the terminal will be set up at Gwadar port.

The price of steel, which stood at \$1,300 per ton when the engineering consultant ILF gave the cost estimate, has come down to \$900-\$1,000 per ton. The consultant put the total cost of the pipeline and terminal at around \$2.5 billion because of the fall in steel and compressor prices.

"However, the Chinese company has offered to develop the project at a cost standing below \$2 billion in the financial bid opened by Interstate Gas Systems (ISGS)," a senior government official said, adding a price negotiation committee had been set up to negotiate a further reduction in the cost.

"The bid was much lower than expected," the official said. Earlier, ISGS had expected the cost of 700 km of LNG pipeline from Gwadar to Nawabshah at \$2.5 billion.

Gwadar's 'string of perils'

He said the pipeline would be connected to the Iranian border at a cost of \$200 million after sanctions against Tehran were lifted.

State-owned distribution companies – Sui Northern Gas Pipelines Limited (SNGPL) and Sui Southern Gas Company (SSGC) – will also get a share in pipeline construction as the Chinese company, China Petroleum Pipeline Bureau, is bound to award 30% of work to them.

"This is a significant development that shows Pakistan is serious about kicking off work on the IP pipeline, but its implementation hinges on lifting of global sanctions against Iran," ISGS Managing Director Mobin Saulat told The Express Tribune. ISGS is working to develop gas import projects.

Initiating the bidding process for the Gwadar pipeline indicated that Pakistan was truly interested in pushing ahead with the IP project.

Iran deal fuels tussle for gas pipelines in Pakistan

China Petroleum Pipeline Bureau, selected by the Chinese government to lay the LNG pipeline and set up the terminal, had submitted the technical and financial bid for evaluation.

The company is already working on pipeline projects stretching over 8,000 km in different countries including Myanmar, Bangladesh, Russia and other nations. It has also laid pipelines from Turkmenistan to China.

"This is the first project under the China-Pakistan Economic Corridor for which the technical and financial bids have been opened," another official said.

The Chinese government would provide a cheap loan covering 85% of the project cost and the Pakistani government would contribute 15% of funds.

The Chinese firm will build the new terminal – a floating storage and re-gasification unit (FSRU) – which will be owned by ISGS. The terminal will have the capacity to handle imports of 600 million cubic feet of LNG per day (mmcf/d).

The LNG pipeline, which will be of 42-inch diameter, will be laid on the IP pipeline corridor from Gwadar to Nawabshah.

All Day

Govt planning to supply water from Sawad Dam to Gwadar -- The Nations

To overcome the acute water shortage problem, the government is planning to supply 6.5 MGD water from Sawad Dam to Gwadar and its adjacent areas. "The dam is three to four times bigger than the Ankara Dam being used currently for water supply to the city," an official of the GDA claimed. "Sawad Dam is about 57km from Gwadar area and work on the dam is near completion," the official said, adding: "We just need to float tenders for the pipelines and pumps and hopefully it will be operational in next two years."

Talking to The Nation, a senior official of Gwadar Development Authority said the project will cost Rs3 billion which will help mitigate water crisis in the city. The current daily water requirement of the city is about 4.5 MGD and the supply of 6.5 MGD will help resolve the crisis, the official added.

A severe shortage of drinking water has hit Gwadar area during recent month. The shortage occurred because water supply from Ankara Dam was suspended as the dam has dried up due to no rain in its catchment area over the past three years. The Ankara Kaur Dam built in 1993 and stretching over an area of 17,000 acres and was the sole source of water supply to the city and adjacent areas. Gwadar city has a population of around 1,00,000 while Gwadar town and Jawani, constituting 50 per cent of the total population of Gwadar district, was relying on the Ankara Kaur Dam for all their water needs.

Ankara Dam used to supply 3 MGD of water to Gwadar and adjoining areas, including Jewani, Peshkan, Sur Bandar, Ganz and Bal Nagor. On temporary basis the Gwadar Public Health Department was supplying water from Suntsar but the supply is not adequate to cater to the needs of people, the official said.

"We have dug ten water wells in the Suntsar area, for the supply of water to Gwadar but seven of them are functional while three are not operational," the official said. These well can provide 5 MGD water to Gwadar, the official added. Besides, the provincial government had provided Rs15 million for water supplying through water tankers.

The development of Gwadar will be useless if no proper long term arrangements were made for the reliable water supply to the area, the official maintained.

The government installed a desalination plant at a cost of Rs1 billion in the Karwat area of Gwadar but it does not have the capacity to purify sea water in large quantity to meet the city's requirements. The desalination plant at Gwadar is providing only 0.6 MGD instead of its original installed capacity of two million gallons per day, the official informed.

When asked how the government will ensure the smooth and uninterrupted supply of water to a prospective bigger population of the city, the official replied: "There are about 130 private housing societies to be developed in Gwadar area, and we have an agreement with them that they will install their own desalination plants." The official further said that besides Sawad Dam to ensure the supply of water to city, they are also working on Shadi Kaur Dam. In 2011-12 the Gwadar area was facing water shortage when one gallon of water was sold for Rs1,000.

PM announces Karachi-Gwadar motorway -- APP

ZHOB: Prime Minister Nawaz Sharif Wednesday said a hefty amount of Rs.150 billion to Rs.200 billion would be spent in the next three to four years in Balochistan for alleviating its backwardness.

The PM also announced his plan to build Karachi-Gwadar motorway while addressing a ceremony after performing groundbreaking of upgradation of Zhob-Mughal Kot (N-50) and Qila Saifullah-Wagum (N-70) roads.

Also read: PM performs groundbreaking of CPEC western route

The 81-kilometer N-50 project, a part of CPEC, to be completed at the cost of Rs 8.80 billion by 2018. The 126-kilometer N-70 project will cost Rs 7.50 billion and it would also be completed by 2018.

He said there was no precedent in the history of Balochistan that construction work on massive roads network continued on such fast track basis.

He said as part of China Pakistan Economic Corridor, 194 kms road from Gwadar to Khushab would be inaugurated next month whereas Khushab- Panjgur -Basima 454kms road be completed by December 2016 by the Frontier Works Organization (FWO).

Khuzdar-Wanguhil-Shahdad Kot, 243kms road would also be completed by the next year, he announced, adding all these projects were being funded by the government of Pakistan out of its Public Sector Development Programmes (PSDP).

He praised the Director General FWO Maj. Gen. Muhammad Afzal and NHA chairman Shahid Ashraf Tarrar for their hard work and commitment.

The Prime Minister also referred to Kalat-Quetta-Chaman and Kharan phase-1 roads which would be completed in the next year while feasibility work on Zhob-Jandola road was being done.

He said uplift of the province was the top priority of his government as it would benefit the entire country.

"The project would open up opportunities of trade and business for the whole region and help in removing backwardness of the province. Soon, there will be dawn of prosperity of which Balochistan would be the major source of fast track progress," he added.

The Prime Minister also appreciated the national leaders who were at hand today for jointly laying foundation of the two road projects.

He expressed the hope that all the political parties would collectively work for the national prosperity and against terrorism and play their due part for the durable peace and prosperity.

He said that individually, he could not perform such tasks and thanked the political leaders accompanying him for their support. - Samaa/APP

Will Pakistan Land a Deal With US for New F-16s? -- Defense News

Pakistan continues to talk to the US about purchasing a new tranche of F-16 fighters, but analysts here warn that it is unclear if or when such a deal could close.

Air Chief Marshal Sohail Aman, head of the Pakistani Air Force, was quoted in local media here Monday saying Pakistan was "in talks with US defense officials to get some [of the] latest F-16s but the deal may take some time." He spoke at an event to mark Pakistan Aeronautical Complex having manufactured its target of 16 JF-17 Block II for 2015.

That follows reports from mid-October that Prime Minister Nawaz Sharif would use

a visit to Washington to push for the sale of eight F-16s for his military.

Pakistan currently operates a number of F-16 variants, so the addition of eight more jets is unlikely to have much impact on the local power balance between Pakistan and India.

However, the US Congress has historically been skeptical of arms sales to Pakistan, in no small part due to Indian lobbying, and any discussion of defense deals naturally must take this into account.

But circumstances could now be in Pakistan's favor. In addition to the Washington's speculated desire to maintain influence in Pakistan, there is a need to keep the F-16 production line open, which in the absence of domestic US orders can only be achieved through exports.

Despite the usual obstacles in the path of a deal, Brian Cloughley, an author, analyst and former Australian defense attache to Islamabad, says there is now a stronger chance that a deal could be struck.

"The India lobby in Congress is quite powerful and might help to block such sales to Pakistan, but the defense production lobby is much more influential," Cloughley said. "On that basis, it's likely such a sale would get through."

Author and analyst Kaiser Tufail, who flew F-16s among other aircraft during his Air Force career, said that if negotiations really are serious he does not "see any reason why the US would be secretive about it."

He also questioned whether the US would use the possibility of more F-16s to maintain political ties with Pakistan at a time when China is strengthening its ties with the Asian nation.

"Under the ongoing Pak-China strategic cooperation, there must be great urgency in US quarters to retain influence in Pakistan. Any rumored offer of military hardware should be seen in that light," he said.

Lockheed Martin is represented in Pakistan by Kestrel, which also represents a number of other US firms such as Sikorsky, Gulf Stream, Hawker Beechcraft and L3 Communications. However, no comment was forthcoming from the firm about details such as the potential timeframe for a deal.

"There is no doubt that the F-16C-52 is the world's best single-engine fighter. Since we already operate a squadron of this type, its additional induction would be smooth," Tufail said.

David McKeeby, a spokesman for the State Department's Bureau of Political-Military Affairs, declined to comment on a proposed sale until it has been formally notified to Congress.

However, McKeeby noted that, "When provided in the past, Pakistan has used US-funded equipment and US-provided technology to significant effect in their counter-terrorism efforts. Pakistan's F-16 is one key example of how US support has improved Pakistan's precision strike capability and capacity to combat terrorist elements in North Waziristan."

Those operations, he noted, are "in the national interests of both Pakistan and the United States."

Modernization Efforts

More F-16s would certainly speed up Pakistan's modernization efforts and Aman also stated the intention to replace the older generation of jets, such as the Mirage III/5 aircraft, by 2020.

DEFENSE NEWS

JF-17 Still an Option in Egypt-Pakistan Defense Cooperation Drive

First in line for replacement has been the Chengdu F-7P, of which small numbers are still operational. According to PAF officials the more advanced double-delta winged F-7PG is likely to remain as a point defense interceptor for the time being.

Even if the F-16 sale does not materialize, however, the JF-17 program is on course, and a spokesman for the Air Force said production would be increased to meet export orders. Though no official confirmation has yet been forthcoming, Myanmar is considered by analysts to have been the first export customer.

Four Pakistani Air Force squadrons are now equipped with the JF-17 and the number will grow as China and Pakistan signed a deal in April for the delivery of 50 aircraft in the coming three years.

Some parts of the JF-17, such as the rear fuselage, are still manufactured in China by Chengdu.

Even without further F-16s, Tufail believes the JF-17 can easily replace the remaining F-7P and Mirage III/5 fleets in the desired timeframe.

"We should have no problem as it is a well-planned and a phased program. The JF-17 production capacity of one squadron (16 aircraft) per year fits in well with the plans to complete the replacement by 2020."

All Day

Economic corridor to raise investment-to-GDP ratio by 2.8 percent -- BR

The China-Pakistan Economic Corridor (CPEC) will attract \$40 billion worth of investment which is projected to raise investment-to-GDP (Gross Domestic Product) ratio by 2.8 percentage points as well as increase indirect investment. According to documents available with Business Recorder, financial resources flow of around \$40 billion till 2020 would imply around Rs 800 billion per annum or 2.8% of current GDP every year thereby augmenting domestic investable resources.

Industrial Park will enhance exports by \$1-1.5 billion per annum in the short-run and boost export prospects in the long-run as well. The documents further reveal that the interface of Chinese investors with Pakistani businessmen will improve business sophistication and support technological transfer in the country. This investment will spur economic activity and given employment elasticity will create around 2 million new jobs.

The investment in hard currency will also support exchange rate stability in the country and stabilise the balance of payments situation. Potential GDP growth will be adjusted upward from existing 5% to 8% and thus will help reduce poverty by boosting per capita income in the country. The investment-to-GDP ratio will be jacked up from existing dismal 14% of GDP to 20% plus.

Additional benefits for Pakistan economy under CPEC include vast amounts of foreign exchange in transit fees, alleviation of the country's energy crisis, boost to Pakistan's trade, investment entailed in network of roads, rails, mass transit systems and energy routes that would modernise Pakistan's economic infrastructure and lead to transfer of technology and new business processes. The regional integration will bring peace and tranquility in the region and peace dividend would be the greatest benefit for the people of the region.

China and Pakistan have signed many bilateral agreements, like Free Trade Agreement, Bilateral Investment Treaty, Double Taxation Agreements, Customs related agreements/ procedures, Pak-China Joint Investment Company, bilateral contracts, currency swap arrangements and MOUs in various fields and other agreements. The existing arrangements along with new CPEC would work as catalyst in boosting economic activity in crucial areas.

China Pakistan Economic Corridor (CPEC) will link remote areas of Sindh, Khyber Pakhtunkhwa (KP), Balochistan, Gilgit-Baltistan and Punjab. The economic potential of these areas is under-exploited and projects like Optical Fiber line, digitalisation and infrastructure will open window of opportunity in these areas. This digitalization will add half a percent to GDP growth and enable the country to fully reap the benefits of 3G and 4G. The infrastructure projects will enhance connectivity and enhanced mobility will create economic value. The underemployment and unemployment in these areas will be cured as a result of these projects in poorest areas.

Special Economic Zones and Investment would allow economic corridors along major transport and communication networks to fully harness the physical and human resources of the country, contribute to the value chain of finished products in the region, enable relocation of industry to utilise the abundant labor at lower costs and utilise the abundant savings in the region for higher return investment in a saving deficient developing country. Trade Facilitation will clear the impediments in the free movement of transport, goods and people for reducing the costs of logistics. Establishment of Havelian Dry port as a multi modal transportation of goods to facilitate the trade and investment in the country will feed in to prospective economic zones in the corridor.

Operationalizing Gwadar port will make it a regional hub and gateway of South Asia, Middle East and Central Asia. The port offers a strategic toehold in the energy rich Central Asian region and provides an alternative trade link to China's western provinces. Modern infrastructure development in the Gwadar city will make it a modern town, thereby creating thousands of employment for Baloch youth. Karachi airport will also get benefit from interlinkages between the two ports. Investments

under the framework in regional infrastructure including transport, communications and energy are expected to benefit both Pakistan and China. Pakistan's regional infrastructure investment needs till year 2020 are estimated to be \$179 billion.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

China, Pak naval ships complete drills in East China Sea -- BR

The Chinese and Pakistani navies today concluded their two-day naval exercises in the East China Sea in which two ships each from both sides took part.

This is the first time navies of both the countries conducted exercises in the East China Sea which separates China and Japan, official media here reported.

Two missile ships from each of their fleets took part in the exercises, state-run CCTV reported.

The exercises included anti-submarine drills, air defence, anti missile and mock confrontations. Commanders of China and Pakistan gave instructions in rotation.

The Pakistani naval ships Shamsheer and Nasr arrived in Shanghai on December 28 to take part in joint naval exercises in a bid to boost defence cooperation with their Chinese counterpart.

"It is a very significant exercise which will enhance the interoperability and cohesion between the two navies," Bilal Abdul Nasir, Commander of Pakistan's 25th Destroyer Squadron told state-run Global Times.

A total of 591 officers and soldiers are on board in the two Pakistani vessels.

Pak Navy raises special marines to protect Chinese engineers at Gawadar Port -- APP

Pakistan Navy has increased all-round surveillance at Gwadar Port with the commencement of China-Pakistan Economic Corridor project.

This was stated by Pakistan Navy spokesman while briefing newsmen, who undertook an extensive tour of Gwadar site.

He said a special Marine Battalion had been raised for security of Gwadar, Chinese engineers and delegates visiting the port.

He said Gwadar, the main destination of the CPEC, will be linked with China's western region through a rail and road network.

Terming the Gwadar Port 'backbone' of CPEC, he said Pakistan Navy is making strenuous efforts for ensuring comprehensive security as well as for the welfare of local people.

All Day

Navy ready for new challenges after Gwadar becomes functional -- Pakistan Today

Pakistan Navy is ready and capable of providing security to all the maritime traffic likely to be generated once the Gwadar port is made functional under the China-Pakistan Economic Corridor (CPEC) in about six month's time.

"Despite the arms race started by India, Pakistan will maintain a balanced fleet but we will maintain minimum credible deterrence to face any threat," Pakistan Navy Vice Admiral Syed Arifullah Hussaini said while briefing media personnel on the preparedness of the Pakistan Navy. "We are quite capable of facing any challenge from any side. We are ready and we are geared up," he added.

Briefing a 45-member media delegation, Hussaini said that with CPEC reaching operational stage soon, it was time Pakistan focused on the emerging opportunities and challenges.

The vice admiral said that the focus must be on the development of Maritime industry to meet future needs as CPEC would generate abundant business opportunities in near future.

Hussaini said that Pakistan had a 1,000 km long coastline where entrepreneurs could exploit the potential of seafood which could be worth around \$2 billion.

"Pakistan currently has only nine merchant ships. Due to shortage of ships, we pay \$4.5 billion each year to foreign ships. We can save a significant amount of money if we get more merchandise ships," he added.

He said that since Pakistan now had a deep sea port at Gwadar so there was a need for building new shipyards at Gwadar and Port Qasim.

He said that like the department of Homeland Security of the US, Pakistan had established Joint Headquarter, taking on board all maritime stakeholders. He said that ship breaking industry also needed up-gradation as it was on the decline despite initial success in the recent past.

Pak-China to build 1,200 acre eco-friendly industrial estate -- Pakistan Today

Punjab Board of Investment and Trade (PBIT), Shandong Yulong Real Estate Group and Roshan Packages (Pvt) Limited on Wednesday signed a Memorandum of Understanding (MoU) to establish a 1,200 acre green industrial estate near Lahore.

PBIT Chief Executive Officer Amena Cheema, Shandong Yulong representative Sunato and Roshan Packages' Tayyab Aijaz represented their respective organisations.

According to the MoU, the estate will house up to a hundred industrial units and PBIT will facilitate in identification of land, while Shandong and Roshan Packages will invest all the capital. Major Chinese businesses will be encouraged to set up their units there.

Roshan Packages in partnership with Shandong is all set to establish an eco-friendly paper mill with \$40 million initial investments as soon as the land is identified.

"Green projects need to be encouraged and PBIT will provide all the possible facilitation to both the parties to set up the project," PBIT CEO Amena Cheema said.

The idea of developing an eco-friendly industrial estate was conceived by PBIT and proposed to Shandong back in May 2015. This agreement is a follow up of the MoU signed back in May. Both parties also agreed to provide all facilitation to promote

trade between China and Punjab, to generate investment and to organise trade fairs and seminars to bring together investors from both sides.

Such partnerships and endeavours were taking Punjab into a new era of creativity and growth, Cheema added.

Pakistan and Iran to have railway track between Gwadar and Iranian port -- Pak Tribune

Pakistan and Iran have decided to lay railway track to connect Gwadar with the Iranian port city of Chabahar.

The decision was taken at a meeting between Balochistan Chief Minister Nawab Sanaullah Zehri and a 22-member Iranian delegation led by the governor of the Iranian province of Sistan-Baluchestan, Aaq Hashmi, in Gwadar on Sunday.

Balochistan Chief Secretary Saifullah Chattha, representatives of the Gwadar Port Authority and other officials concerned attended the meeting which discussed border security, drug trafficking, illegal crossing of border and other issues.

According to official sources, the Balochistan government delegation raised the issue of border violations by Iranian security forces.

The meeting decided to take up plans for border trade, new shipping service and flights from Gwadar to Iranian cities and towns.

A committee has been set up to monitor border security and related issues.

The meeting was informed that a border commission had already been formed that would look into border-related issues between the two countries.

Under another decision, Iran which is supplying 70 megawatts of electricity to Makran division will increase it by 30MW, besides providing 1,000MW to Pakistan's national grid.

Mr Zehri said at the meeting that Pakistan and Iran enjoyed strong brotherly relations and shared the affinities of culture, faith and customs. Balochs living on both sides of the border spoke the same language.

He expressed the hope that the governor of Sistan-Baluchestan would play an active role in speedy implementation of various projects.

Mr Zehri said Pakistan was against terrorism and condemned wherever it took place. The border commission, he hoped, would resolve security issues.

He said he would visit Sistan-Baluchistan.

Aaq Hashmi said the main purpose of his visit was to strengthen ties between the two neighbouring countries which shared traditional values. He said he hoped that border security issues would be resolved.

Meanwhile, a number of delegations of representatives of different local sectors called on Mr Zehri and apprised him of problems faced by them. The chief minister assured them that his government would take all possible steps to solve their problems.

He said work on the Sodh and Shadi Kour dams was under way and would soon be completed. The government was working to solve the problem of shortage of drinking water in Gwadar and address other issues.

The chief minister said a fully operational Gwadar Port and completion of the China-Pakistan Economic Corridor would usher in an era of development and prosperity in the region and local people would be its main beneficiaries. He also said that local people would be given preference in development projects in Gwadar.

Establishment of Gwadar's EPZ is at initial stage, NA told -- Pakistan Today

Parliamentary Secretary for Industries and Production Rao Muhammad Ajmal Khan said on Wednesday that the establishment of an Export Processing Zone (EPZ) at Gwadar was at preliminary planning stage and 1,000 acres of land had been leased by the government of Balochistan in 2006 for the project.

He was responding to a question asked by Shahida Rehmani regarding EPZ Gwadar and said that the PC-II for appointment of consultant had been approved while the EPZA had advertised notice for appointment of consultant for planning and designing of Gwadar EPZ.

Answering another question, he said due to energy crisis the industries were facing power shortage and efforts were going on to overcome the problem. Regarding Pakistan Steel Mill (PSM), he said, during the last two years the PSM had suffered losses due to interrupted supply chain of raw material and insufficient funds resultantly caused low production.

He said the federal government had written a letter to the Sindh government for taking charge of the mill but the provincial government had not replied yet, adding that Rs 50,500 million losses had been recorded during the two years. Rao Ajmal said due to losses sustained by the corporation and severe financial crises, the Economic Coordination Committee (ECC) of Cabinet in its meeting held in 2014 approved the summary submitted by the Privatization Commission of Pakistan on 'restructuring option of PSM'. He said the mill took 45 days to start but due to insufficient gas supply it was not working.

Jinnah Naval Base – Navy expands strategic outreach to West Coast, Persian Gulf -- Pakistan Today

While China and Pakistan endeavour to develop Gwadar Port as a commercial hub for the entire region, Pakistan Navy is gearing up to new face challenges and threats which might come its way after the port become functional; the navy has fully operationalised its strategic Jinnah Naval Base near Gwadar Port at Ormara, Balochistan.

India has increased its naval strength in recent years and aims at transforming itself into a 'blue-water navy' within the next 10 to 15 years. By 2022, the Indian Navy will have 50 warships including three aircraft carriers, five nuclear submarines, 22 conventional submarines and a number of long range maritime patrol aircraft.

India acquired a nuclear submarine (Akula-II) from Russia in April, 2012. A second nuclear submarine of the same class will be inducted soon. Moreover, the sea trials of its indigenous nuclear submarines are also in progress. Pakistani defence establishment is looking at this induction of nuclear submarines in Indian fleet as a cause of great concern.

With minimal budgetary allocations, Pakistan Navy is quietly relying on minimum deterrence to counter any external threat. Jinnah base may just be the answer to Pakistan's prayers.

The base is situated 350 km west of Karachi and 285 km east of the Gwadar Port, and has been connected with China-Pakistan Economic Corridor (CPEC).

"With the development of this base, Pakistan has acquired the capacity to secure naval trade in these waters. Moreover, we have expanded Pakistan naval forces' outreach towards the west coast into the Strait of Hormuz where all the oil traffic flows in and out," an officer at the base told Pakistan Today during a recent visit to the base at Ormara which is otherwise restricted for media.

"Karachi would remain our focus for the foreseeable future. However, Jinnah base would reduce reaction time of Pakistan Navy to six to 8 hours in case of any adversity," the officer said, adding that the base had a berthing facility "for anything

from warships to submarines and from heavy ships to warplanes”.

Asked whether or not Gwadar would also act as a naval base for Pakistan, the officer said that Gwadar would act purely as a commercial base.

“Though Pakistan Navy has a small base at Gwadar, its main focus would be security of Gwadar. Jinnah base, on the other hand, would be a purely naval base which would help maritime forces monitor the entire coastal area from Ormara to the Gulf waters,” the officer said.

Rear Admiral (r) Pervez Asghar, an expert on naval defence, told Pakistan Today that Pakistan Navy had developed four bases along the coastal areas of Balochistan including Ormara, Pasni, Jewani and Gwadar which had helped expand its ‘strategic outreach’ towards the west coast.

“In the past, we only had one [naval] base at Karachi and our military installations were vulnerable to any Indian adventure. However, with the development of these new bases towards the west coast, not only do we have alternative options to defend our positions, our reaction time has also decreased significantly in case of any attack,” the retired naval admiral said.

He said that the navy now also had a submarine base at Ormara. “We have developed Pakistan marine corps to thwart enemy designs of amphibious landing around the coastal areas,” he added.

“Pakistan Navy is now well placed to secure all sea lines of communications (SLOCs) emanating from the Persian gulf towards Pakistan. Moreover, the naval infrastructure including Radars and communication gadgets, have now been able to overlap each other – a capability we had severely missed in the past,” he added.

He said that the new bases had also helped secure Gwadar Port as there was no military presence on the port due to its being commercial in nature.

“Now, navy’s special forces are better placed in Ormara to secure Gwadar Port and nearby sea routes. Moreover, Ormara base would also help neutralise the enemy’s narrative that they would be able to block Karachi’s harbour in case of a showdown,” he added.

Asghar said that Pakistan had also developed a jump-off base for Pakistan’s maritime aircraft at Pasni.

He said that Pakistan Navy had recently raised another naval station at Turbat, namely PNS Siddiq for P-3c Orion aircraft.

“These P-3cs are capable of flying over 14 hours nonstop without refueling. They have stealth technology and can fly below the radar and strike India’s Eastern coast. Pakistan Navy has also developed Naval Base Jewani, about 60 km from Iran to help expand its outreach into the Gulf waters,” he added.

Jinnah base would act as an alternative option for Pakistan Navy to Karachi where all the logistic and technical support for berthing navy’s ships and even submarines were available.

“We have developed the required facilities for technical repair of ships and submarines at the base. It is an alternative arrangement to the Karachi base and can easily meet our defence requirements. However, Karachi dockyard would still be the center for major overhaul or repair,” the Jinnah base officer said.

The officer said that during the next five years, navy plans to develop huge workshops at Ormara, which would also have the ability to overhaul submarines and warships.

He said that the Jinnah base’s positioning provided cover against natural calamities and enemy’s advances as it was covered by sea on two sides and a 2 km wide hill

stood on the third.

On the top of the hill, called 'Hammer Mountain' due to its shape, Navy's surveillance unit RDS-Mianwali is stationed to help the officers keep an eye on movements taking place in and around the area.

Since the Karachi coast has become a hub of commercial activity, making it difficult for the Navy to perform its tasks and the industrial waste in Karachi's waters has been damaging the Navy's assets and reducing the life of the ships, Ormara is a better option for future Naval operations.

The law and order situation in the entire coastal belt is far better than other parts of the restive Balochistan province as well as Karachi where Rangers along with other paramilitary forces is involved in a clean-up operation.

Jewani, with a population of around 100,000 people and approximately 90 km away from Gwadar Port City, serves as a main surveillance point for Pakistan Navy to keep an eye on all the maritime traffic in the Arabian Sea.

Due to proximity of the area with Iran, many inhabitants of the area are dual nationals and can freely visit Iran on a mere permit from the deputy commissioner.

But navy has also reached out to the locals in the area to win hearts and minds of the Baloch people. It has set up educational and health facilities, many of which provide free of cost services to the local people. Under Chief of Naval Staff's scheme 'Adopt A Child', navy officers are paying educational and other expenses of 100 children in the area. The navy also provides jobs to locals in their facilities.

The navy operates a PN Hospital in Ormara which contains facilities like emergency department, trauma center, intensive care unit, labour room, operation theatre and a pharmacy.

A Navy Cadet College has also been set up the area, where 50 per cent of the admissions are offered to candidates from within Balochistan under a district-quota system. The other 50 per cent seats are offered to candidates from other provinces of the country.

A Bahria Model School is also working in the area to impart education to Baloch children. The school runs on donations and financial support of the provincial government.

CHINA KEEN TO SET UP OIL REFINERY IN PAKISTAN -- Pak Observer

Islamabad—China Huanqiu Contracting and Engineering Corporation (HQC) subsidiary of China National Petroleum Corporation (CNPC) interested to setup oil refinery in Pakistan preferably at Gwadar and Karak, Khyber Pakhtunkhwa. Wang Guobin, President, China Huanqiu Contracting and Engineering Corporation (HQC) subsidiary of China National Petroleum Corporation (CNPC) along with seven-member Chinese delegation expressed this during meeting with Minister of State and Chairman, Board of Investment (BOI) Dr. Miftah Ismail here on Thursday.

Wang Guobin informed that there group has specialized in Oil and gas exploration and oil refinery. He further said that they were interested to setup oil refinery in Pakistan preferably at Gwadar and Karak, Khyber Pakhtunkhwa. China Huanqiu Contracting and Engineering Corporation subsidiary of China National Petroleum Corporation (CNPC), is an intelligence-intensive, technology intensive and technology-oriented state-owned backbone enterprise. It takes technology as the guide, design as the lead, engages in such diversified business as consultation, R&D, engineering, construction management, equipment manufacture.

Dr. Miftah informed that government encouraging the private sector for setting up of oil refineries in Pakistan. Recently UAE company had also shown interest to establish oil refinery in KPK. There is no tax for a period of 20 years in this sector, Laws have been tailored to safeguard and ensure protection of investments. The foreign investment is fully protected under the Foreign Private Investment (Promotion & Protection) Act, 1976, and Protection of Economic Reforms Act 1992, he highlighted. Miftah Ismail also discussed with Chinese delegation of investors about the available opportunities in Pakistan. The Chairman highlighted the investment potential and opportunities available specific for Chinese investors and companies in Pakistan.

Pak-China trade swells from \$9.3b to \$11.8b in one year -- The Nations Chief Minister Punjab Mian Shahbaz Sharif has said that China is the most reliable friend, has always stood with Pakistan and helped it in all respects.

He was speaking at Pakistan-China Business Opportunities Conference jointly organized by the Lahore Chamber of Commerce & Industry, Punjab Board of Investment & Trade (PBIT). A 100-member Chinese delegation also attended the Conference while LCCI President Sheikh Muhammad Arshad, Senior Vice President Almas Hyder, Vice President Nasir Saeed also spoke on the occasion while Consul General of China in Lahore Yu Boren, Chairman Pak-China Friendship Association Sha Zukang, Provincial Minister Ayesha Ghous Pasha, Chairman Punjab Board of Investment & Trade Abdul Basit, former LCCI Presidents, Senior Vice Presidents, Vice Presidents and Executive Committee Members were also present in the Conference.

Chief Minister Punjab said that China is a very important partner in Pakistan Economic Development and Bilateral trade. The involvement of Chinese enterprises both in term of technical and financial assistance in several development projects is reflective of our cordial relations based on mutual trust and sincerity.

Shahbaz Sharif termed the China-Pakistan Economic Corridor as an energy and infrastructure program with the investment of \$46bn in Pakistan. He said that \$ 46 billion is the biggest investment ever made by China in any foreign country. This program, he said, when completed would help end power outages in the country, and ensure seamless connectivity between China, South and Central Asia. He said that investment climate is getting better with every passing day due to best policies of Punjab government and all possible facilities are being provided to foreign investors.

The LCCI President Sheikh Muhammad Arshad said that both the countries not only share border but also have unanimity of views on various political & economic issues. He said that two countries have a combined market of more than 1.5 billion people but the trade volume needs to be pushed up. He said that China-Pakistan Economic Corridor Project will change the destiny of Pakistan. He said that most of raw material is being import for the projects under CPEC. He suggested that Pakistani material approved from Pakistan Engineering Council should be used for CPEC projects. He said that Chinese technological advancement could help Pakistan overcome economic challenges in a short span of time. He also announced to set a "China Desk" at the LCCI to provide necessary information to the investors. He said that informed the participants of the Conference that the Lahore Chamber of Commerce & Industry is making all out efforts to bring the private sector of the two friends closure. He said that the LCCI is also organizing Chinese language courses for its member so that they could interact with their Chinese counterparts quite easily.

The LCCI Senior Vice President Almas Hyder said that Chinese investment in energy projects will certainly solve the issue of energy shortage in Pakistan. He invited the Chinese businessmen to enhance their investment in priority sectors including Oil and Gas, Mining, Infrastructure, Power and IT & Telecom etc. He said that though trade has been increased from \$ 9.3 billion in 2013 to \$ 11.8 billion in 2014 but still there is a lot of room for enhancement of trade and economic ties. Chinese Consul General Yu Boren said that both Pakistan and China had huge potential to increase the bilateral trade as the existing volume of two-way trade between the two countries is very small when it is compared with the total Chinese business. He said that incentive package and China-Pak Economic Corridor is enough to make the point that China gives top priority to Pakistan in terms of business and trade.

Chairman Pak-China Friendship Association Sha Zukang spoke highly about Pakistan and said that CPEC would further cement trade and economic ties between the two countries. He said that China-Pakistan relations had become an example of state to state relations. He said both countries looked forward to have further exchanges of visits, to have more high level contacts to promote mutual friendship and cooperation in various fields including politics, economy and people to people contacts. He said China Pakistan Economic Corridor would be further promoted, particularly cooperation in trade, investment, energy and communications would be strengthened.

Pak-China Sign Letter Of Exchange On Gwadar Master Plan -- Daily Capital

ISLAMABAD: Pakistan and China have signed a Letter of Exchange on Gwadar Master Plan to make it one of the best cities in the world.

Secretary Commerce Tariq Bajwa and Chinese Ambassador to Pakistan Sun Weidong signed the Letter in Islamabad on Friday.

Under the agreement, Gwadar city will be developed on modern lines having all basic facilities.

All Day

Accord with China: Deal inked on funding Gwadar master plan study -- Pak Tribune

Pakistan and China on Friday signed an agreement on financing a feasibility study for the Gwadar port and city master plan which envisions the port city as a regional economic hub.

Tariq Bajwa, the secretary of Economic Affairs Division, and China's Ambassador Sun Weidong signed the letter of exchange for the feasibility study of the project on behalf of the respective governments.

The government-to-government arrangement will see China provide a The Express Tribune of Rs410 million to finance the study that is expected to be completed in one year.

Under the exercise, the existing master plan for Gwadar city will be updated and integrated with the master plan for the port there.

After the port had been included in the multi-billion dollar China Pakistan Economic Corridor (CPEC) project, there had been a need to update existing plans of the city to reflect the new strategic direction.

According to a handout issued by the finance ministry, the Chinese side had last year agreed to finance the study under The Express Tribune assistance. Subsequently representatives of the Chinese Commerce Ministry and Ministry of Planning, Development and Reform of Pakistan had met in Beijing on August 25, 2015 to discuss details of the Gwadar Smart Port City Master Plan Project.

They discussed the implementation mode, objectives, scope and timeframe arrangements of the project. The feasibility study aims to identify Gwadar's competitive advantages vis-a-vis regional ports and developing a business case for the port, its contribution to export-led growth, market creation, industrialisation, tourism and revenue generation.

In addition to developing a business case for the port and city, the feasibility study will also suggest strategies to facilitate trade, tourism, community participation, public-private partnerships and industrial and economic development on a national and regional level.

Pakistan had handed over the control of Gwadar port to Chinese operators who are in the process of updating the port's master plan. In November 2015, the government had signed a 43-year lease as it handed over thousands of acres of land to the China Overseas Port Holding Company (COPHC) to develop the special economic zones in the deep sea port.

According to the planning ministry documents, the current master plan of the city was last updated in 2005 and contains two inter-dependent elements: the port, and the city of Gwadar and simultaneous development of the port and the city.

BALUCHISTAN TO RECEIVE \$7B THRU CPEC -- Pak Observer

Quetta—Baluchistan province will be receiving over US \$ 7 billion funds of its share from investment pertaining to China-Pakistan Economic Corridor (CPEC).

President, Quetta Chamber of Commerce and Industries (QCCI), Jamal Khan Tarakai said that Chief Secretary Baluchistan, Saifullah Chathha visited QCCI and assured the industrialists and traders that Baluchistan would get adequate share from investment funds to be spend under CPEC.

“Industrialist parks will be established in Zhob, Quetta, Khuzdar, Gwadar and other areas of Baluchistan where over US \$ 07 billion will be spend to build power plants and heavy industrial units which would be generate millions of jobs for local youth,” he added.

He said that the Chief Secretary told that the provincial government had started process to acquire land for construction of six-lane western route of CPEC in Baluchistan.

“Chief Secretary Baluchistan told that construction work on western route of CPEC has started and it would be completed within stipulated time,” he added.

He said that billions of rupees were being spent on the construction of Gwadar International Airport following the architecture of Beijing, China Airport where double story air bus would also land.

All Day

Govt sees 2016 as take-off year for CPEC project -- Express Tribune

The government expects 2016 to be the take-off year for the China–Pakistan Economic Corridor (CPEC) and Gwadar port, with a 100% increase in cargo-handling and start of the free economic zone.

Ports & Shipping Minister Kamran Michael stated this in a written reply submitted in the National Assembly in response to a question raised by PPP’s Mahreen Razaque Bhutto last week regarding the port’s role in the country’s development during the past three years.

Michael said that during the past two and a half years, besides handling limited government subsidised imports of urea, for the first time the Gwadar port started containerised export from May 2015.

“So far six ships have discharged 35 empty 40-foot containers and exported 25 loaded 40-foot containers carrying 675 tons of frozen fish to the international market.”

He added that during the past three years around 40 ships docked at the Gwadar port and discharged 1.6 million tons of urea.

Hard times

“Lack of railroad connectivity, unavailability of water, power and gas resources, and absence of required commercial and industrial facilities in Gwadar have hampered full utilisation of prospects of greater trade and economic development of Pakistan,” read Michael’s response.

CPEC for Punjab or Pakistan: Myth and reality

Under the concession agreement of 2013, it said a private company has been rehabilitating unused and outdated port equipment, machinery and facilities, finalising the port development plan, and enhancing infrastructure and superstructures to improve port operations.

Hope

The minister said that under the CPEC, it has been planned to construct the

Gwadar East Bay Expressway with Chinese assistance to connect the port with the M-8 motorway and N-85 highway. "Thus, Gwadar shall have its direct link to Ratodero/Sukkur and Quetta through Turbat, Panjgur and Surab."

To address water, electricity and gas issues, early harvest projects have been approved under the CPEC and would be completed within three to five years, he added.

CPEC- a window of opportunity for Pakistan

Similarly, the Gwadar Port Authority has signed sister-port relationship memorandums of understanding with the Qingdao and Zhuhai ports of China and with the Chabahar port of Iran. "The port operator is finalising the free zone master plan and it is expected to start during March-April 2016."

MoU signed for China Pakistan Investment Initiative -- Daily Times

KARACHI: At the conclusion of the visit by a delegation of companies from China, led by Sha Zukang, Pakistan, China Friendship Association, BMA Capital Management Limited, Gomtazy Capital Partners Limited and International Green Economy Association, signed a memorandum of understanding for the establishment of China Pakistan Investment Initiative (CPII).

The CPII provides for ongoing support and services to companies from China seeking to invest in or do business in Pakistan with reciprocal services to Pakistani companies. The visit, organized by the Pakistani Embassy in Beijing, in addition to presentations on Pakistan's sector based investment case, comprised B2B meetings in Islamabad, Lahore and Karachi. Various Federal and Provincial Government Ministries coordinated closely to make the visit a success. Sha Zukang followed by saying "China is very confident in Pakistan's future and hence has invested more in Pakistan than it has any other Asian country."

He further emphasized that they have come to Pakistan due to their confidence in it and will continue to keep bringing groups of private sector companies to explore opportunities. Building on what Munir Akram said Sha Zukang emphasized how concrete and tangible results with the private sector were of highest importance. To ensure the same CPII is being created, to facilitate and follow up on any projects and investments from either side." Ambassador Munir Akram thanked Sha Zukang for making it to Pakistan after many years. He spoke about Zukang's many contributions, both diplomatic and conventional, in the development of Pak China relations. He went on to say that "it is imperative that we establish a process to follow up on either side for tangible and concrete results of various MoU being signed".

All Day

China's One Belt, One Road initiative promises to be the biggest generator of Asian mega- projects -- Ajo

While the Chinese economy has slowed, mega-projects associated with the One Belt, One Road initiative are rolling ahead with no stop sign in sight.

In mid-November, China Overseas Port Holding Co. signed a 40-year lease to gain control of more than 900 hectares around the Pakistani port of Gwadar, on the Arabian Sea near Pakistan's western border with Iran. The China state-run company, which took over operations of the port in 2013, has promised to spend more than \$1.5 billion on port improvements, a new free trade zone, an airport and feeder roads, with even more ambitious plans afoot of an LNG terminal, power plants and a pipeline linking the port with western China.

The goal is to turn what is now a minor port, handling less than one million tons a year, into a major entrepot for China-related natural resources and manufactured goods. It's only one component in a \$45 billion infrastructure package Chinese President Xi Jinping officially offered Pakistan during a state visit last April. That mix of investment dollars and loan guarantees centers on a 1,800 kilometer high-speed rail planned to link the western Chinese city of Kashgar, in Xinjiang province, with Gwadar. The Chinese term the initiative the "China-Pakistan economic corridor."

That, in turn, is part of a much bigger and far more ambitious Chinese enterprise. This strategy goes by the odd name of "One Belt, One Road," made odder still by the "road" referring to the sea. It envisions a series of land and coastal infrastructure linkages, underwritten by Chinese capital, that couple China with much of Asia, the Middle East and Europe. The map draws a land route from China through Central Asia and maritime routes from China through Southeast Asia and then to South Asia, Africa, and Europe.

All Day

Navy increases surveillance at Gwadar Port -- Pak Tribune

ISLAMABAD: With the development of the deep sea port at Gwadar, the Pakistan Navy (PN) is anticipating fresh security challenges. It has thus allocated a special Marine Battalion at the port for surveillance. These marines will safeguard sea links used for communication and provide protection to trade ships routing in and out of the port in the near future.

In a recent visit to the coastal belts of Gwadar and Karachi by journalists, PN officials revealed that the new division was deployed in anticipation of trade activities through Gwadar. Trade is expected to spring up under the China-Pakistan Economic Corridor project. The battalion is an addition to the existing troops securing the coastlines of Karachi Harbour and Sir Creek areas.

Officials briefed about the operational capabilities of the force, and the scope and scale of their operations. "Most of the Indian Ocean including Pakistan's Exclusive Economic Zone (EEZ) was declared a high-risk area of piracy," said a PN official, adding that they then enhanced security. As a result, after the Contact Group on Piracy off the Coast of Somalia revised limits of the piracy High-Risk Area last year, it excluded Pakistan's EEZ.

Pakistan on the global chessboard

Apart from security measures, the navy also shed light on its 'people-centric approach' to rehabilitate people living along the coastline. These projects include running schools, hospitals and vocational training centres in major towns across the 960-km coastal belt. Moreover, the navy conducted mock exercises of boarding and unloading helicopters on one of their frigates for journalists.

Focus on forces

Given its proximity with vital international sea routes, Gwadar is likely to become a major port of the country. Located near the international sea routes leading to the Persian Gulf from where 17,500 oil tankers and 7,300 cargo ships pass every year, the navy will require major improvements in the next four to five years once the port

becomes fully operational.

Pakistan's coastline of apathy

Once trade under CPEC magnifies and Central Asian countries also join in, it would need more equipment and platforms. For this, PN is in the process of shifting some of its operations and naval assets from Karachi to the newly-built Naval Base in the strategic town of Ormara located mid-way between Karachi and Gwadar.

Moreover, owing to the hostility between India and Pakistan, Pakistan Navy has plans on maintaining a 1:5 power balance with its arch rival. According to the officials, India plans on acquiring 50 warships, three aircraft carriers and 22 submarines, of which five will be nuclear submarines, in the next 10 to 15 years.

PHOTO: Irfan Ghauri

Besides that India also envisions converting its naval force into blue water navy – a marine force capable of operating across the deep waters of open oceans – with intercontinental outreach. This in return would pose serious challenges for Pakistan Navy owing to their resource constraints. However, officials said that they want to maintain minimum deterrence and limited overseas outreach against these plans.

Fleet boosting

To keep up with the challenges, special service groups and Pak-Marines have been trained to conduct special operations on land, sea and air.

On land, the navy has two warships, Type-21 and F-22P frigates. It also has Patron Craft Squadron, small but lethal missile boats equipped to safeguard sea frontiers and deliver an offensive punch which strikes deep into enemy territory.

According to officials, the main attacking fleet includes four former British Navy Amazon-class ships, known as Type-21, which they intend on withdrawing by 2020. Four Chinese light frigates, F-22P, are also part of the attacking fleet.

Moreover, the navy owns an Oliver Hazard Perry-class frigate. To replace the Type-21s, they plan on adding another five to six of these surface warriors until new ones are built. Apart from these, the surface fleet consists of destroyers, high-speed missile crafts, gun boats, mine hunters, and training ships and boats.

For underwater surveillance, the navy has deployed the Submarines Service Force. They are a major component and aggressive command of the Pakistan Navy. Their primary mission includes commencing peaceful engagement, surveillance and intelligence management, special operations, precision strikes, battle group operations and control of Pakistan's sea borders. They also have the responsibility to protect the country's sea lanes of communication, as well as economic interests and foreign trade.

Gwadar's 'string of perils'

Currently, the navy has a fleet of five submarines, three 90B Agosta and two 70B Agosta. In the near future, they are planning to add another eight.

Lastly, the third component of Pakistan Navy's operations is its aviation fleet, comprising six squads. These carrier air wings include P3C Orion, ATR and Fokker aircrafts while helicopter units have Z9EC, Sea King and Alouette.

GWADAR FERRY SERVICE TO GENERATE ECONOMIC ACTIVITY, PROMOTE TOURISM -- APP

ISLAMABAD: All necessary preparations were being made to start Karachi-Gwadar and Karachi-Iran ferry services within two months, to provide comfortable and affordable travelling facility to the people and devotees. The services would also promote tourism and generate economic activity in the region.

Prime Minister Muhammad Nawaz Sharif, during his visit to Port Qasim Authority (PQA) on December 28 last year had directed Pakistan National Shipping Corporation (PNSC), to expedite the work on start Karachi-Gwadar and Karachi-Iran (for Zaireen) ferry services.

Following the directive, Federal Minister of Ports and Shipping Kamran Micheal has taken initiatives to launch the ferry service within two months, the Spokesperson of Ministry of Ports and Shipping told APP on Friday.

Efforts were being made to strengthen ports and shipping sector in a proper manner. The people would enjoy safe journey for religious and general purposes, the spokesperson added.

To a question, the spokesperson said that two more ships were being purchased to enhance business activity in the region.

A committee was established to ensure transparent procurement of more ships and in this regard, process of recommendation would be completed in next few weeks.

Currently, nine ships were operating in the area to carry out shipments to other ports and earning profit, the spokesperson said.

To another question, the spokesperson said that PNSC had earned Rs 800 million profit on its two cargo ships.

**China to provide Pakistan with 500 million USD for power projects --
News Tribe**

KARACHI: China will be providing Pakistan with 500 million dollars for the development of solar and air power projects. According to the sources at Alternate Energy Development Board, 2 billion dollars have been invested in alternate energy projects.

Sources say 90 percent of these investments include foreign aid provided to the country.

Sources also say that the target for the present volume of electricity produced by solar and air energy has been elevated from 300 MW to 800MW.

Officials have stated the Pak-China Economic Corridor has greatly facilitated in getting financial support from China for power projects.

FATEMI FOR ENHANCED CHINA-PAK INTELLECTUAL EXCHANGES, ACADEMICS LINKAGES -- BR

ISLAMABAD: Special Assistant to the Prime Minister on Foreign Affairs Syed Tariq Fatemi Monday underlined the need to further enhance intellectual exchanges and linkages between the academics and researchers of the two countries.

He said this in his meeting with Cai Fang the Vice President of the Chinese Academy of Social Sciences (CASS) in Beijing, said a press release received here.

Both sides also discussed ways and means to evolving an effective mechanism for enhancing regular exchanges of academia and research scholars.

During the meeting Syed Tariq Fatemi outlined the significance of China-Pakistan relations in the bilateral, regional and global context.

He described the relations as highly valuable, based on trust and on the trajectory of prosperity and growth. Friendship between the two countries dated back to ancient times and both the ancient civilizations had multitudes of people-to-people contacts, he added.

Many travelers, religious scholars, poets and philosophers brought together the two cultures which resulted in experiences that were mutually enriching for both civilizations.

He said that ever since every single generation had contributed and carried forward that tradition till the present day when deepened cooperation had touched an all time new height.

Tariq Fatemi said that growth in the China-Pakistan relationship was a strong factor for peace and stability in the region and beyond and termed the multibillion dollar mega project of CPEC as another chapter in the glorious book of sharing prosperity with neighboring countries.

Cai Fang said that CASS valued the cooperation and communication with the research institutes from the friendly country of Pakistan to intelligently support the construction of One Belt One Road.

CASS also hoped that based on Pakistan government's support, cooperation with Pakistani think tanks and research institutes would be further strengthened and deepened to work out more valuable resolutions for the construction of CPEC and contribute to the understanding of friendship between people from the two countries, he added.

He said that China-Pakistan relations, upgrading to an all- weather strategic partnership, had led the bilateral cooperation to a brand new historic period.

He also appreciated the efforts of the Pakistani government and people for CPEC.

Pakistan's Ambassador to China Masood Khalid was also present during the meeting besides other participants.

Later this evening, SAPM Tariq Fatemi also visited the Chinese People's Institute of Foreign Affairs where he was received by President Lu Shumin and his colleagues who also hosted a dinner in his honour.

PM inaugurates Gwadar-Hoshab (M-8) portion of CPEC -- THE EXPRESS TRIBUNE

QUETTA: Prime Minister Nawaz Sharif inaugurated on Wednesday the Rs13 billion Gwadar-Turbat-Hoshab Road (M-8), a part of the China Pakistan Economic Corridor (CPEC).

Army chief General Raheel Sharif drove the prime minister on the newly-constructed 193-km long highway, which will connect the western, central and eastern routes of CPEC with the Gwadar Port.

All Day

SEZ under CPEC -- Daily Times

SIR: The government of Pakistan has recently showed willingness to develop the first Special Economic Zone (SEZ) at Gwadar at a cost of \$ 46 billion under the China Pakistan Economic Corridor (CPEC).

According to sources the target is to make the Gwadar SEZ, spread over an area of 3,000 acres, fully functional by the end of 2017. It will be developed by China and would accommodate industrial units for mines and minerals, food processing, agriculture, livestock and energy. The remaining SEZs would be designed and developed on similar lines.

The Planning Commission figures show, other SEZs in Balochistan would include Lasbela Industrial Estate over an area of 1,290 acres, Turbat Industrial and Trading Estate over 1,000 acres, Dera Murad Jamali Industrial and Trading Estate over 50 acres, Winder Industrial and Trading Estate, Mini Industrial Estate Khuzdar over 50 acres and Bostan Industrial Estate over 1,000 acres.

At the moment Khyber Pakhtunkhwa is the only province with eight SEZs among all provinces followed by seven each in Punjab and Balochistan, three in Sindh and one in Gilgit-Baltistan

The development of Gwadar is only possible when the locals are taken into confidence. Before developing a SEZ at Gwadar, the government should also think of how it can benefit the residents of the city too. The question is will it be beneficial to local residents?

PM Nawaz inaugurates Gwadar-Turbat-Hoshab Motorway -- Dunya News

QUETTA - Prime Minister Nawaz Sharif on Wednesday inaugurated 193-kilometres long Gwadar-Turbat-Hoshab Motorway (M-8) in Hoshab area of Southern Balochistan.

Addressing the inaugural ceremony, he said the government is constructing a network of roads to connect all parts of the country with each other for development.

These projects will bring huge benefits for the country and it will also connect Pakistan with Central Asian Republics, China and Afghanistan, he added.

The Prime Minister said the project has great importance for the development of the country.

He said Balochistan is being given preference for development, and equal allocations are being made for the province.

Nawaz Sharif also announced three other road projects. He said Quetta-Khuzdar highway will be dualised, and work on Baseema-Khuzdar, Shahdadkot highway and Bela-Awaran highways will start soon.

Nawaz Sharif said several projects have been initiated to link Gwadar with the rest of the country. He regretted that in the past, mineral resources of the province were not properly utilized and the present government is committed to use them for progress and development of Balochistan.

The Prime Minister referred to mega projects like Diamer Bhasha dam, Dasu Dam and Bunji project and said each of them would generate 4000 mw of electricity.

Nawaz Sharif lauded Army Chief General Raheel Sharif for his whole hearted support in addressing problems of Balochistan and welfare of its people.

Later, Nawaz Sharif and the Army Chief drove in a car together to inspect the project.

Gwadar to have vocational training institute to improve skills -- Daily Times

ISLAMABAD - Gwadar Port Authority Board (GPA) has planned to start building a Vocational Training Institute (VTI) in its Free Zone to impart port and free zone related skills and training to local people.

The construction work on this Institute is scheduled during this year with grant to be provided by Chinese government. GPA has so far incurred Rs.1 million on the projects and this excludes the amount spent by Chinese Company and Chinese government. Sources at Ministry of Ports and Shipping while highlighting steps taken to develop unprivileged area/people of Gwadar on Friday said GPA has set-up a Social Sector Development Fund and was spending million of rupees on different social sector programmes.

In addition, they said GPA was also encouraging investors to provide grants to poor schools and health institutions for medicine. On two different occasions, the Chinese Embassy provided grants and gifts to students, teachers, schools, and hospitals. The sources said despite the fact that currently there are not much port operations in Gwadar Port and small revenue is earned, hopefully it will increase in future. They said GPA adopted a primary school in one of the poorest locality/income groups of Gwadar Town, renovated the school building, provided electrical items, furniture, uniform and restored source of clean drinking water facility.

The GPA was also providing annually three scholarships to toppers of Primary, Middle and Matric examinations studying in government schools in Gwadar District while Information Technology (IT) literacy was being encouraged in the very poor localities of Gwadar and so far it has provided three computers to IT centers functioning in such areas.

Moreover, the sources said GPA has also provided books to best students belonging to poor families and added with efforts of GPA and Ministry of Ports and Shipping, the Chinese government was providing solar electric systems and goods (LED bulbs, tube lights and Solar Power Generation systems) to poor families in Gwadar. The total amount of this grant is about Rs.320 million. These goods are scheduled to arrive Gwadar in March/April 2016, the sources added.

The sources said the Port Operator (M/s China Overseas Port Holding Company) has donated three school buses as part of Social Sector Responsibility through GPA to Education Department, Gwadar. The Chinese Company has also created an Education Support Funds Rs. 500,000 annually.

Training locals: Gwadar Port Authority to set up training centre -- The Express Tribune

ISLAMABAD: Gwadar Port Authority Board (GPA) has planned to start building a vocational training institute (VTI) in its free zone in a bid to impart port and free zone-related training to local people.

The construction of this institute is scheduled to begin during this year with a grant to be provided by the Chinese government.

GPA has so far spent Rs1 million on the project and this excludes the amount spent by the Chinese company and government.

Sources at the Ministry of Ports and Shipping, while highlighting steps taken to develop the unprivileged areas of Gwadar, on Friday said GPA has set up a social sector development fund and was spending millions of rupees on different social sector programmes.

In addition, they said GPA was also encouraging investors to provide grants to poor schools and health institutions for medicines.

The sources said despite the fact that currently there is not much port operations at Gwadar Port and a small revenue is earned, hopefully it will increase in future.

"GPA adopted a primary school in one of the poorest localities of Gwadar, renovated the school building and provided clean drinking water facility."

Additionally the GPA was also providing three scholarships to high-achieving students of primary, middle and matric examinations studying in government schools in the Gwadar District annually.

The sources added that due to GPA information technology (IT) literacy was being promoted in the poor localities and so far it has provided three computers to IT centers functioning in such areas.

Moreover, the sources said GPA has also provided books to exceptional students from low-income families and added with that with the efforts of GPA and the Ministry of Ports and Shipping, the Chinese government was providing solar electric systems, LED bulbs, tube lights and Solar Power Generation systems) to poor families in Gwadar.

The total amount of this grant is about Rs320 million. These goods are scheduled to arrive in Gwadar in March/April 2016, the sources added.

They also said that the port operator, China Overseas Port Holding Company, has donated three school buses as part of their social sector responsibility through GPA to the education department, Gwadar.

Norwegian businessmen invited to tap huge potential of Pakistan -- The Nations

Lahore - Pakistan is well positioned to take off as economic indicators are portraying an encouraging picture.

Growth rate is expected to reach 6 to 8 per cent in 2018 therefore businessmen of Norway should come forward and avail the opportunities through joint ventures with their Pakistani counterparts.

These views were expressed by the LCCI Senior Vice President Almas Hyder while talking to the Ambassador of Norway Tore Nedrebo here at the Lahore Chamber of Commerce & Industry on Monday.

Executive Committee Members Mian Zahid Javed and Shahzad Ahmed were also present on the occasion.

The LCCI Senior Vice President said that Pakistan is a huge market and this is high time for the foreign investors to tap huge potential and take full advantage of the investment-friendly policies of the present regime.

He said that the Lahore Chamber of Commerce & Industry is ready to extend maximum cooperation to the businessmen of Norway in this regard.

Almas Hyder said that Norway and Pakistan are well known to each other and their mutual ties range from good diplomatic, cultural and economic relations but these are not being reflected in bilateral trade.

The volume of total bilateral trade and imports of Pakistan from Norway are constantly dipping since 2012.

He said that total mutual trade volume has come down to \$ 69 million in 2014 from \$ 78 million in 2012.

He said that trade figures of last three years suggest that both countries must jointly make efforts to reverse the declining trend.

The LCCI Senior Vice President said that direct interaction between the business communities of two countries can make it possible to cause quantum jump in trade figures.

Pakistan's exports to Norway include bed linens, articles of apparel & clothing, rice, sports goods and hosiery items etc.

Pakistan's imports from Norway are limited to polymers of ethylene & vinyl chloride and some natural polymers in primary forms.

Other items include electrical equipment and scrap of iron & steel etc.

He said that Pakistan is not only interested to improve trade relations with Norway but also want to welcome Norwegian investors to Pakistan.

He said that China-Pakistan Economic Corridor (CPEC) has opened up new opportunities of trade and investment in Pakistan.

He urged the Ambassador of Norway to play role in projecting Pakistan as a good market for international buyers and investors.

Almas Hyder said that LCCI will take a delegation to Norway soon to explore trade and investment opportunities.

On the occasion, issue of establishment of Pak-Norway Business Council also came under discussion.

The Ambassador of Norway Tore Nedrebo said that a number of Norwegian companies are planning to invest here especially in power sector of Pakistan.

He asked the LCCI to help identify areas of common interest.

He informed the LCCI Senior Vice President that Norway-based company Telenor is providing employment to 4000/5000 people in Pakistan.

He said that there is a need to make more concerted and sector-specific efforts to enhance economic cooperation between the two countries and Norway is ready to take all steps to expand its ties with Pakistan for socio-economic development of the country.

The Ambassador assured his full cooperation to the Lahore Chamber of Commerce

and Industry for strengthening the existing business relations between the two Norway and Pakistan.
He also eulogized the LCCI saying that the exchange of trade delegations and trade fairs are the most effective marketing tool in this fast changing global scenario.

Pak, Qatar PMs see display of JF-17, Super Mushshak -- The Nation

ISLAMABAD - Prime Minister of Pakistan Muhammad Nawaz Sharif and the Prime Minister of Qatar Abdullah bin Nasser bin Khalifa Al Thani witnessed the scintillating aerial display of PAF JF-17 Thunder and Super Mushshak aircraft at Doha, Qatar on Wednesday.

Air Chief Marshal Sohail Aman, Chief of the Air Staff, Pakistan Air Force and Major General (Pilot) Ghanem bin Shaheen Al Ghanem, Chief of General Staff, Qatar Armed Forces were also present at the occasion.

Senior government and military officials of both countries also witnessed the aerial display.

It was a momentous occasion when PAF JF-17 Thunder and Super Mushshak aircraft presented spectacular aerial display in the skies of Qatar for the first time.

Air Chief Marshal Sohail Aman, Chief of the Air Staff, Pakistan Air Force briefed both the dignitaries about the capabilities of these indigenously manufactured aircraft. Both the dignitaries lauded the performance of PAF aircraft and later on met with the PAF contingent.

A JF-17 Thunder and 02 Super Mushshak aircraft landed in Qatar on February 7, 2016 for static and aerial display. Prime Minister of Pakistan Muhammad Nawaz Sharif and high power delegation is on official visit to Qatar. JF-17 Thunder is a combat aircraft jointly developed by Pakistan and China. This light-weight, single-engine, multi-role aircraft can be used for ground attack and air intercept role.

The JF-17 can employ variety of weapons including air-to-air and air-to-surface missiles. The aircraft is equipped with cutting edge avionics and weaponry. Super Mushshak is being completely manufactured in Pakistan Aeronautical Complex Kamra, which has been exported to many friendly countries. These air forces are not only operating this sophisticated trainer aircraft but also get training of its air and ground crew from Pakistan.

FOUR MOUS SIGNED: APP adds: Pakistan and Qatar yesterday signed four memoranda of understanding (MoUs) including a long term LNG Sales and Purchase Agreement, cooperation in the fields of Radio and Television, Health and Academic Research activities.

The signing ceremony was also witnessed by Prime Minister Nawaz Sharif and Emir of Qatar Sheikh Tamim bin Hamad bin Khalifa Al-Thani in Doha.

The first MoU about cooperation between the two countries in radio and television was signed by Special Assistant to the PM on Foreign Affairs Syed Tariq Fatemi and Foreign Minister of Qatar Muhammad bin Abdurrehman Al-Thani. The MoU on cooperation between the two countries in health sector was signed by Finance Minister Mohammad Ishaq Dar and Qatari Health Minister Hanan Muhammad Alkwari.

Both the countries signed Acknowledgement of Long-term LNG Sales and Purchase Agreement between Qatar Petroleum and Ministry of Petroleum and Natural Resources of Pakistan. The document was signed by Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi and Chairman Qatar Gas Board of Directors, Saad Sharida.

While a memorandum of understanding in academic research and cooperation activities between the two countries was signed by Pakistan Ambassador to Qatar Shahzad Ahmed and Commander of Strategic Studies in Qatar Armed Forces Staff Major General Saud Ali Alnaeemi.

Earlier, when Prime Minister Nawaz Sharif and his delegation arrived at Doha International Airport, they were given a warm welcome. Prime Minister of Qatar Sheikh Abdullah bin Nasir bin Khalifa Al-Thani warmly received the prime minister and his delegation at the airport.

Two children attired in traditional dress presented him bouquet.

Later, the official receiving ceremony was held at Diwan-e-Emiri where the Emir of Qatar received the prime minister and his delegation. Guard of honour was presented to the prime minister on arrival at the palace. Prime Minister Sharif and Qatar Emir Khalifa Al-Thani reviewed the guard of honor.

Both the leaders also held one-on-one meeting and exchanged views on regional and international issues of mutual interest while delegations level talks were held followed by signing of the MoUs.

The main focus of the prime minister's visit and interaction with the Qatari leadership is to enhance bilateral relations in various fields including energy cooperation, trade and investment, defence and increase in employment

opportunities for the Pakistani workforce in Qatar.

The Emir of Qatar paid a visit to Pakistan on March 23-24 last year. This return visit by the prime minister in a period of less than one year is a testimony of growing relations between the two brotherly countries.

Qatar hosts more than 115,000 Pakistanis, who have been contributing towards the development and prosperity of the country and act as a bridge between the people of two brotherly countries. Pakistan attaches great importance to its ties with Qatar. The two countries enjoy friendly and fraternal relations marked by close cooperation. Both sides share perception on various regional and international issues.

During the meeting with Emir of Qatar held at the Aiwan-e-Emiri, the prime minister said Pakistan is an ideal destination for investors and called upon the Qatar Investment Authority to explore the opportunities in Pakistan's oil and gas sector. Prime Minister Sharif said Pakistan and Qatar enjoy strong fraternal relations. He said Pakistan has huge manpower and Qatar can benefit by utilising the services of more Pakistanis. He said the trade and investment in all fields between the two countries must be increased.

Spokesperson to Prime Minister says contract for import of LNG with Qatar would help meet 25% gas requirements of the country. -- Radio Pakistan

Spokesperson to Prime Minister Dr. Musadik Malik says Pakistan would start receiving LNG at one of the lowest rates in the world within sixty days.

Addressing a news conference in Islamabad, he said the contract for import of LNG with Qatar would help meet 25% gas requirements of the country.

The Spokesperson said the deal would also help accelerate the pace of economic development, increase electricity generation and enhance fertilizer production.

To a question, he said the price of LNG from Qatar would be less than the price of gas under TAPI and IP gas pipeline projects. He said India too has entered into a contract for import of LNG at 35 to 37% higher rates than Pakistan.

Responding to another question, Dr. Musadik Malik said all five LNG terminals would be established in the country.

He said another terminal at Karachi would become operational by the end of next year. Country's largest LNG terminal to be built at Gwadar will have a capacity of process one billion cubic feet of gas.

The spokesperson said a pipeline is being laid between Nawab Shah and Gwadar and with its completion there would remain only 80 kilometre portion to accomplish the IP gas pipeline project.

Pakistan Railways to make joint venture with int'l firm for manufacturing of locomotives -- APP

ISLAMABAD, Pakistan: Parliamentary Secretary for Railways Syed Ashiq Hussain Shah Bukhari Friday said that Pakistan Railways was going to make a joint venture with a big international firm for manufacturing of locomotives at Risalpur Factory.

During question hour in the National Assembly, he informed that the present government has claimed the warranty and underframe of these 16 locomotives are being got replaced.

He said Pakistan has also engineers who are capable to overhaul these engines.

He said that the tender of these locomotives were float in 2012 by the government of Pakistan Peoples Party (PPP).

Ashiq said the government of PML-Q had purchased a total of 69 engines from Dongfang Company adding that most of these locomotives were cracked but no action was taken at that time by the minister of railway Shaikh Rashid against the company.

Answering a question he said Pakistan People's Party again signed an agreement with the CSR Ziyang Co. Ltd and bought 29 engines again and added if these engines were found cracked we will declared it black list too.

When government of PML-N took over the charge, it cancels all agreements with Dongfang Electric International Corporation, Chinese firm and declared it black listed.

Pakistan Railway has signed early transit projects with Pak-China Economic Corridor (CPEC) through which, he said new railway stations, tracks, would be established.

The train could be run on these tracks on the speed of 160 km/hour adding that all railway system would be upgraded through the project of CPEC.

To a question, Ashiq Hussain said that over 1.8 billion rupees foreign aid have been provided to Pakistan Railways for three projects.

He said that Pakistan Railways has not entered into any contract for purchase of locomotives from China.

He shared the details of contract agreements which were signed in 2012 for procurement locomotives from China included two contract agreements for procurement of 29 Nos. (CBU) (3000-3500 HP) and 29 (2000-2500 HP) D.E. locomotives (CBU) with M/s CSR Ziyang Co. Ltd amounting to US\$ 61.16 million and US\$ 55.69 million respectively.

Parliamentary Secretary said that all the 58 locomotives have been received and working on Pakistan Railways system.

A contract agreement for procurement of material for manufacturing of 5 locomotives (3000 HP) in Completely Knocked Down (CKD) condition amounting to US\$ 12.82 million was signed in 2013 with M/s CSR Ziyang Co Ltd. China.

After receipt of material all the five (5) locomotives have been manufactured / assembled at Pakistan Locomotive Factory, Risalpur and working on Pakistan Railways system.

PM Nawaz: Will build Lahore-Karachi Motorway, increase trade with Qatar -- Dunya News

Prime Minister Nawaz Sharif has addressed the Pakistani community in Qatar on Thursday in which he has shown his desire to increase trade and investment

relations with Qatar.

According to the details, Prime Minister Nawaz Sharif has addressed a gathering of Pakistani community in Qatar's capital, Doha. He said that Qatari leadership has acknowledged the role of Pakistani community in the progress of Qatar. He told the gathering that he was honored to hear praise for Pakistani community from the Qatari Amir.

Sharif told the gathering that his government is working on several energy projects ranging from Liquefied Natural Gas (LNG), coal, hydel, solar and wind to end energy shortage. He declared that the LNG agreement with Qatar is historic and is very vital for Pakistan, which is facing a huge gas crisis. He expressed his gratefulness for the Qatari government for providing the lowest rates of LNG for Pakistan.

The Prime Minister told the gathering that previous governments have done extreme injustice to the public. He said they are reaping the mistakes of previous governments. He said they promised before elections to bring electricity in the country and to lower its tariff. Today, he said they are going towards completing this promise.

Sharif told the gathering that today Pakistan has the highest foreign exchange reserves in the history. He said Pakistan is progressing compared to three years ago. He said that even the president of the World Bank has praised the economic performance of Pakistan.

On the security situation of Pakistan, Sharif said that today, Pakistan's security situation is better compared to three years ago. He said that his government started the Zarb-e-Azb military operation which has severely damaged terrorist networks resulting in decrease of terrorism. He expressed his government's determination to continue the operation till its logical end.

He said that they are building the Gwadar port and the world's most beautiful airport in Gwadar. He also addressed the PIA issue; said that they want to bring PIA on its foot and added the government will make PIA's quality equal to Qatar Airways.

The premier also announced that the government is going to build Lahore-Karachi motorway and a motorway from the Chinese border to Abbottabad. He said they will build an expressway, which will lead the country towards the road to progress. He said that the development projects started by his governments in the past were not completed by the preceding governments.

Pak Navy allocates Special Marine Battalion at Gwadar port -- Business Standard

With the development of the deep sea port at Gwadar, the Pakistan Navy is anticipating fresh security challenges.

It has thus allocated a Special Marine Battalion at the port for surveillance. These marines will safeguard sea links used for communication and provide protection to trade ships routing in and out of the port in the near future.

Trade is expected to spring up under the China-Pakistan Economic Corridor project, reports the Dawn.

The battalion is an addition to the existing troops securing the coastlines of Karachi Harbour and Sir Creek areas.

Most of the Indian Ocean, including Pakistan's Exclusive Economic Zone (EEZ), was declared a high-risk area of piracy.

Moreover, owing to the hostility between India and Pakistan, Pakistan Navy has plans on maintaining a 1:5 power balance with its arch rival.

Chinese ambassador for more Pak-China joint ventures -- APP

Rawalpindi Chamber of Commerce and Industry (RCCI) opened 'China Week' on its premises on Wednesday with the aim to further boost country's economic ties with China.

Chinese Ambassador HE Sun Weidong inaugurated the week in an ornamented ribbon cutting ceremony. Chairman Parliamentary Committee on China-Pakistan Economic Corridor (CPEC) Senator Mushahid Hussain Sayed also accompanied the Chinese envoy.

RCCI President Mian Humayun Parvez, Senior Vice President Saqib Rafiq, Vice President Muhammad Aqil Obaid, Group Leader Sheikh Shabbir, SM Naseem, former presidents, members of the executive committee and other industrialists, traders and businessmen were present on the occasion.

Different local as well as Chinese companies have established their stalls at the exhibition, displaying cars, motorcycles, leather products, garments and other items. School children presented colorful performances depicting Chinese and Pakistani culture and music. The whole building was decorated in Chinese national color and a small picture gallery reflecting Chinese culture and art was also displayed on the occasion.

While inaugurating the week, Chinese Ambassador said that Pakistan and China enjoyed best mutual, trade, bilateral, social and cultural relations. The government of China and its people has always shown a great affection, love and brotherhood towards Pakistan and its people. "Chinese businessmen always prefer to invest in Pakistan," he said. The ambassador also praised the RCCI for organizing China Week and offered cooperation in arranging such programmes in future.

China is Pakistan's largest trading partner and Pakistan is China's second largest trading partner in South Asia. The trade volume between the two countries has jumped up to approximately 19 billion dollars. 46 billion dollar CPEC is the key project and this shows how much importance China is giving to Pakistan. He said that this year we are going to celebrate 65th anniversary of our diplomatic ties with Pakistan and lot of activities are going on. He invited RCCI President and others to join these events. He ended his address by saying: "PAK CHEEN DOSTI ZINDA BAD" in Urdu. Later, the ambassador visited various stalls and stressed the importance of Pak-China joint ventures.

President RCCI Mian Humayun Parvez said China is Pakistan's time tested friend. He said that RCCI will hold industrial exhibitions in different countries including China aimed at further promoting the trade relations. He informed that the trade volume between both the neighboring countries has increased to a considerable level however there is a need to increase exports. "We must explore new areas of opportunities. Gem and jewelry, marble, poultry, pharma and information technology can bring a lot of investment in Pakistan."

Earlier, Senator Mushahid Hussain Sayed in his address said that Pakistan and China shared a great history of brotherly and time tested relations. He referred to CPEC project and said that this single project will change whole picture of Pakistan's economy and will set up future economic direction. This project will strengthen the federation as all provinces and Kashmir and Gilgit Baltistan will benefit from it. "This corridor will benefit all provinces and areas in Pakistan, and transform our country into a regional hub and pivot for commerce and investment", he added.

All Day

Chinese economy and dynamic CPEC -- BR

The 2015 witnessed a slow global economic recovery while most major economies are suffering the slump in growth. Global trading has been facing the most serious downward pressure since Financial Crisis as well. Under such a circumstance, the economic and trade performance of China become more outstanding. Besides, as one important part of bilateral economic and trade relationship between Pakistan and China, CPEC attracts much attention all over the world.

China remains a major driving force for global growth The domestic and international situation China faced with was extremely complex and severe in 2015. Overall, with the progress in stability, the domestic economy and commerce works keeps the medium-to-high speed of growth and has achieved hard-won fruits with all performance indicators ranking forefront in the world. China GDP growth fell 0.4 percentage points to 6.9%, which remained relatively higher than many other major

economies. China's import and export trade in goods and export value have ranked the top one in the world since 2013, and the year 2015 is not an exception. The value of online retail sales maintained the first place of the world, the total value in retail sales of consumer goods and the import and export volume in service trade stably ranked the second place in the world, foreign investment has ranked the top one among developing countries for 24 consecutive years and the investment abroad ranked the third one in the world.

There are many highlights in China's economic growth. According to a World Bank report, China's economic growth contribution to the world increased 0.8 percentage points to 26.1%. In terms of import and export, with the double-digit negative growth in global trade last year, the decrease of China fell far below the decrease of other major economies and global trade. China's share in global trade is expected to increase by a percentage point from 12.2% to over 13%. In 2015, China's global share enhanced the fastest; in terms of international investment, the foreign direct investment (non-financial sectors) in last year, reached 118.02 billion US dollars, an increase of 14.7%, which remains the rapid growth of consecutive years; in terms of attracting foreign investment, actual use of foreign investment is 126.27 billion US dollars, an increase of 5.6%, and China still ranks the top one among developing countries. Consumption's contribution to the social and economic growth has reached 66.4%, with an increase of 15.4% over 2014. That is to say, China has successfully achieved the vital transformation of economic development from investment and foreign trade based to domestic demand, especially consumption based.

"Belt and road initiative" has made positive progress "Belt and Road Initiative" is China's top-level design of the opening and economic diplomacy in the new era and China's suggestion and scheme on the cooperation development and common prosperity in the new era. Chinese President Xi actually proposed such a major cooperation initiative to promote peace and cooperation, openness and inclusiveness, mutual learning and benefits under the "Silk Road" symbol. With respect to the implementation of the "Belt and Road Initiative", it does not delineate the boundaries by ideology, development path, development model and development level or other standards, but intends for mutual benefit and win-win through exchanges and cooperation in policy, trade, currency, infrastructure, cultural and other aspects based on the principles of broad consultation, joint contribution and shared benefits. At present, more than 60 countries have given positive responses and some countries carried out strategic docking with China, and put forward specific ideas of cooperation. Just as mentioned by President Xi in his speech, The "Belt and Road" is not China's solo, but the mixed chorus of all related countries.

The implementation of "Belt and Road Initiative" achieved success in many countries like Pakistan, Sri Lanka, Belarus, Thailand, Egypt, Kenya and so on. China has established 75 overseas economic and trade cooperation zones in the world, which has created a large number of tax and employment for the host country. According to statistics, various overseas Chinese funded enterprises have paid taxes of more than 100 billion US dollars to the country in which they have invested; by the end of 2015, overseas Chinese funded enterprises have nearly employed 900,000 foreign employees.

CPEC will substantially promote economic and trade ties between the two countries Pakistan and China elevated their ties to all-weather strategic partnership in April 2015 after the Chinese president Xi's historic visit to Pakistan, which further enhanced the long time-tested friendship between the two countries. As one important part of "Belt and Road initiative", China Pakistan Economic Corridor (CPEC) will not only strengthen the economic and trade ties between both nations, but will also promote the common prosperity and development for the whole region. According to the statistics of Economic and Commercial Office of Consulate General of P.R. China in Karachi, the overall on-going and planned Pak-China related projects in both Sindh and Balochistan provinces reached 27, worth more than 12 billion US dollars, covering sectors such as power generation, resource development, roads, transmission lines, ports and so on, including Qasim coal-fired Power Plant, Dawood Wind Power Project, Thar Coal-Mining Power Plant, Gwadar

Port etc. According to related companies, Dawood Wind Power Project will be done in this September; Qasim Coal-firing Power Plant is expected to be completed within the next two years.

CPEC injects new vitality to Pakistan's economic growth. It will stimulate local industries like steel, cement, construction, logistic, travelling, security etc. According to local analysts' estimate, the start of mega development schemes and power projects under the CPEC will boost the annual demand for steel products by more than 30% to 6 million tons from 4 million tons. Besides, Pakistan & Gulf Economist expects that Cement sales in FY2016 will increase 3.5% compared to last year, reaching 36.7 million tons, domestic sales will increase 11.4%, reaching 31.5 million tons. CPEC is also a major attraction for domestic investors and international capitals that see it as catalyst for Pakistan. The huge investment from China has made Pakistan one of the central economic activists all over the world, which is also a major attraction for large foreign capitals. Moreover, CPEC accelerates the industrial promotion of Pakistan and brings more advanced equipment and techniques through industrial shift and capacity cooperation.

CPEC benefits local residents in a more realistic way. On the one hand, Chinese enterprises bring more job opportunities to the local people and offer chances for them to get more skilled education, which improves the local living standards. On the other hand, Chinese enterprises built public facilities aiming at improving people's well-being in the project region. Take MCC Sandak Copper-Gold Mine Project as an example, the Chinese company improved public infrastructures like irrigation systems, power plants as well as roads, which largely promoted the local livelihood.

We are fully confident that, based on the principle of broad consultation, joint contribution and shared benefits, the economic and trade ties between Pakistan and China will be further strengthened, and the future of Pak-China relationship is broad and bright.

CHINA'S 5-YEAR PLAN GOOD HOPE FOR PAK ECONOMY -- Pak Observer

Beijing—China 13th five-year plan that is expected to be approved by the on-going session of National Peoples Congress brings good hopes for Pakistan's economy as well as its far-reaching impact on China's own domestic growth. According to the five-year target, the economy will grow around 6.5 percent every year. "The plan will decisively overhaul, modernize and strengthen China's growth engine, laying stable foundations for further growth," said Amanullah Khan, chairman of the Pakistan-China Business and Investment Promotion Committee. "We in Pakistan see the plan as a positive development for the socio-economic well-being of their peoples." The people of Pakistan wished to see China ever-growing, since it is a source of peace and development for its neighboring countries as well and the World as a whole. Analysts said, China's 13th Five-Year Plan concerns more than just its own domestic affairs. The world should sit up and pay attention: it will have a global impact.

"China has been the powerhouse of the world for decades. In the next five years, ballooning domestic demand, investment and buying power will further vitalize the global economy," said Chen Fengying, world economy researcher with the China Institute of Contemporary International Relations. As China steers itself toward quality development in the next five years, a critical period of transition, the world should cast their eyes east, said Chen. The draft of the 13th Five-Year Plan (2016-2020), outlines policies, priorities, as well as clear economic and social targets.

"Such clear goals will serve as assurance to foreign entities as it will paint a clear picture of what measures will be taken," she said. Innovation, growth Cui Jicheng, 53, is a oceanologist. By 2019, he plans to take a manned deep-sea submersible 10,000 meters down to the Mariana Trench. Deep-sea exploration is one of the principle projects under the Scientific Innovation 2030 initiative, outlined in the plan. According to the draft, by 2020, China's R&D investment will account for 2.5 percent of GDP.

The contribution of scientific and technological advances to economic growth will rise to 60 percent. Investment into semiconductors, chip materials, robotics, aviation equipment and satellites, also aim to facilitate scientific advances. "China already leads in the fields of Internet, new energy and AI. It will be an important player in the new round of scientific revolution and reform. In the next five years, expect more surprises from China," Chen said. Statistics show China will import \$10 trillion of commodities in the next five years. It will make \$500 billion of investment. Chinese are expected to make 500 million trips abroad.—INP

**CASA-1000 PROJECT TO FURTHER BOOST PAK-TAJIK TIES:
PRESIDENT -- AP**

ISLAMABAD: President Mamnoon Hussain Wednesday said that CASA-1000 project would be a milestone in boosting bilateral relations between Pakistan and Tajikistan.

He said Pakistan was looking forward to the opening ceremony of the CASA-1000 project in May 2016.

He also noted with appreciation that a committee had been formed to prepare preliminary report for additional 1000-1200 MW electricity from Tajikistan to Pakistan outside CASA-1000.

He was talking to the Tajikistan Parliamentary delegation headed by Chairman Majlisi Namoyandagon of Tajikistan Zuhurov Shukurjon that called on him at the Aiwan-e-Sadr, said a press release.

The President said that exchange of parliamentary, business and cultural delegations would further solidify relations between the two countries and increase people to people contact.

He called for making concerted efforts for further enhancing bilateral trade between the two countries commensurate to their potential and increase the volume of bilateral trade to US \$500 million as already agreed upon by the two countries.

President Mamnoon Hussain said that Pakistan and Tajikistan enjoyed excellent relations which were deeply rooted in common history, religion and culture.

He said that the two brotherly countries needed to enhance their cooperation in the defence sector and suggested that the Tajik military officers might avail training facilities in Pakistan.

The President said that Pakistan was the worst victim of terrorism and extremism and had rendered great sacrifices in fighting this menace.

He said that operation Zarb-e-Azb would continue till elimination of all terrorists.

President Mamnoon Hussain urged for unity and cooperation amongst the Muslim countries for collective efforts to remove misperceptions about the Muslims in the West and to project the Muslims as a peace loving and enlightened people.

He stressed that peace in Afghanistan was necessary for peace, security and stability in Pakistan and the region.

President Mamnoon said that Pakistan was trying its utmost to facilitate reconciliation in Afghanistan through the Quadrilateral Coordination Group comprising Afghanistan, Pakistan, China and the United States.

He said that Pakistan was sincerely pursuing the vision of a peaceful neighbourhood and desired to have friendly relations with all its neighbours including India.

The President emphasized that resolution of the Kashmir issue was essential for improvement in ties with India.

Chairman Majlisi Namoyandagon of Tajikistan Zuhurov Shukurjon thanked the President for the warm welcome and hospitality extended during their visit to Pakistan and hoped that bilateral ties would reach new heights through mutual cooperation.

The Chairman Majlisi Namoyandagon expressed his country's keen desire for linkages with China Pakistan Economic Corridor (CPEC).

He said that projects were already underway for rail and road connectivity with the CPEC.

Zuhurov Shukurjon extended an invitation on behalf of the President of Tajikistan to President Mamnoon Hussain to visit Tajikistan at his earliest convenience.

PM INVITES CAR TO USE GWADAR PORT -- Pak Observer

Islamabad—Prime Minister Nawaz Sharif has invited Turkmenistan and other Central Asian Republics (CAR) to use Pakistan's deep sea port of Gwadar for trade with other countries.

He was addressing a joint press conference along with Turkmen President Gurbanguly Berdimuhamedov after delegation level talks in Islamabad on Wednesday.

"Our deep sea port provides shortest route to the Arabian Sea to the Turkmenistan and other Central Asian Republics and we will happy to see our brothers there using this facility", Nawaz Sharif said.

The Prime Minister said regional connectivity is part of Pakistan's vision 2025 under which the country will be made hub of regional trade. Pakistan is also closely working with Turkmenistan for improvement of basic infrastructure to enhance economic relations as well as tourism and people to people contacts.

Referring to the TAPI gas pipeline project, the prime minister said this is a mega project which will help energy starved industry of Pakistan run at its full potential. Nawaz Sharif said Pakistan will also import one thousand megawatt of electricity from Turkmenistan and the MOU in this regard was signed during his visit to the country last year. He said we have agreed to undertake this project on fast track basis. This will help us in reducing power deficit.

Nawaz Sharif said the energy projects will facilitate regional connectivity and contribute to peace and security by creating inter dependence in the region.

The two sides during talks agreed to further bolster their relations in different fields including economy, trade, culture and education. Nawaz Sharif said both the countries enjoy close cordial relations deep rooted in shared history, faith and culture and these bonds are growing with the passage of time. Nawaz Sharif said the meeting of Pakistan-Turkmenistan Business Forum on the sidelines of delegation level talks will help facilitate bilateral trade and investment. Such high level contacts will help in boosting our economic relations.

In his remarks on the occasion, the Turkmen President termed his talks with the prime minister as fruitful and productive saying these will further strengthen our brotherly relations. He said the people of Turkmenistan follow with great interests the achievements made by the Pakistan and we wish the country make more progress in days to come.

The Turkmen President said the TAPI gas pipeline project will be implemented at the earliest as it will not only contribute to socio economic development but also serve a bridge for building friendly relations amongst the regional countries.

The two countries signed a series of MOUs and agreements for promotion of cooperation in various fields. The foreign affairs ministries of two countries signed the document for future cooperation. Finance Minister Ishaq Dar and his Turkmen counterpart signed an MOU for cooperation against money laundering and terror financing. Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi and his Turkmen counterpart signed an MOU for further cooperation in the energy sector. Five MOUs were also signed for cooperation in higher education, research and information technology.

Pak-China Business Forum from 19th -- APP

LAHORE - The ministry of science and technology is organizing the 5th Pak-China Business Forum 2016 from March 19 to 22 at Expo Centre Lahore.

COMSATS University director Qaisar Abbas, while addressing a press conference here on Wednesday, said that more than 400 foreign companies will exhibit their products at the forthcoming event.

He said that the forum will bring the foreign investors together in the country where business to business meetings will also be arranged.

In the Pak China Expo, students of various Pakistani universities will also share their projects with the foreign companies.

It would be the event to explore business for our students, he added.

He said that the event will be held in collaboration with Ministry of Science & Technology, Punjab Board of Investment and Trade and NTS.

These partners are offering their tremendous support for this event.

Most importantly, 5th Pak china Forum will again welcome a delegation comprised of more than seven hundred Chinese guest this year.

Exhibitors' logistics are arriving in Pakistan to participate in 5th Pak-China Business Forum (PCBF).

Sources have confirmed that event would be inaugurated by Punjab CM Shahbaz Sharif and Federal Minister, Ministry of Science and Technology & Chancellor, CIIT, Rana Tanveer, Chief Executive Officer, Punjab Board of Investment & Trade (PBIT) and Ministers, industries experts and other dignitaries will attend the event.

PCBF was established by the COMSATS Institute of Information Technology (CIIT), a leading public sector, federally chartered, Degree Awarding Institute, in 2012 as a part of its efforts towards the socio-economic development of the country by strengthening academia-industry linkages as well as focusing on research, innovation and commercialization.

Shahbaz Sharif inaugurates 5th Pak-China Business Forum 2016 -- APP

LAHORE, Pakistan: The Punjab Chief Minister Shahbaz Sharif on Saturday inaugurated the 5th Pak-China Business Forum 2016 at the Expo Center in Lahore.

The business forum will continue for four days and is expected to attract 700 representatives of more than 400 Chinese and 150 Pakistani companies.

The business forum is being held with the cooperation of COMSATS Institute of Information Technology (CIIT). Other partners include Ministry of Science & Technology, Punjab Board of Investment & Trade and National Testing Service (NTS).

The major objectives of the Pak-China business forum were to increase foreign direct investment into Pakistan, improve export opportunities to China, develop stronger B2B (business-to-business) relations with Chinese business and enhance economic activity in the country by strengthening academia and industry alliance.

The forum provides a unique opportunity for Conglomerates, SMEs, R&D Institutions, Organizations from the Financial and Services sectors to collaborate with more than 200 participating Chinese companies from the following sectors; ICT and Electronic, Engineering and Manufacturing, Energy Resources/Solar/Renewable Energy, Associations/Chambers, Textile, Furniture and Decoration, Tourism, Automotives, Trading and Logistics, Chemicals, Medical and Pharmacy, Banking and Investment, Food Industry, Education and Research.

The event includes an exhibition to display products, business-to-business meetings as well as thematic workshops for scholarly work.

CHINA PROVIDED FULL ASSISTANCE TO TRANSPORT, ENERGY PROJECTS: SHEHBAZ -- Pak Observer

Lahore—Punjab Chief Minister Shehbaz Sharif said on Saturday that China has provided full assistance and cooperation to transport projects, improvement of infrastructure, energy projects and process of mining in Punjab.

He expressed these views while addressing the inaugural function of 5th Pak-China Business Forum at Expo Centre, here. Chinese Consul General Yu Boren, 700 delegates of various Chinese companies, Chief Executive Officers of business houses and companies, senior officials and a large number of Pakistani investors attended the function. The forum was arranged with the cooperation of COMSATS Institute of Information Technology.

Shehbaz Sharif said Pakistani nation can never forget huge investment of a great friend, unconditional support and cooperation of China in the development of various sectors of Pakistan. He said that 11 months ago, agreements on the projects under CPEC were signed during the visit of Chinese President to Pakistan in April last year and work was started on these projects in September. He said that such friendship is unprecedented.

Shehbaz Sharif said that holding of Pak-China Business Forum is a welcome step due to which process of contacts between people and traders of both of the countries will strengthen.

He said that Pak-China friendship has become an example in the world. He said that participation of businessmen in such a large number from China is a clear proof of strengthening friendship. No doubt, Pak-China friendship is higher than Himalaya, deeper than ocean, sweeter than honey and stronger than steel, he added. Chinese President openly said that we are iron brothers and he has also proved by extending unconditional support to Pakistan.

He said that reserves of iron ore have been discovered in Chiniot and Chinese company MCC has taken part in exploration of these reserves and completed this task. He said that according to initial verification of reserves of iron ores in Chiniot, there are also some spots of gold and copper. He said that a final report will soon come fore and a plan can be made for setting up a steel mill.

He said that Chinese companies can make investment under public-private partnership and this is best opportunity for them. He said that Chinese government has provided funds through Exim Bank for orange line metro train on very soft terms. He said that there is no such country except China in the world which can provide funds on such soft terms. Shehbaz Sharif said that besides coal, solar, wind and hydel power projects, communication, transport and infrastructure projects are also being set up under China Pakistan Economic Corridor.

He said that 2.8 billion dollars investment is being made on 1320 megawatt coal power project at Sahiwal whereas 1320 megawatt coal power plant is also being set up at Port Qasim with the same cost. He said that China has also invested in 900 megawatt solar power project in Bahawalpur.

He said that under CPEC, China is making 100 percent investment in energy and other projects and the management in the projects is of China and Pakistani government is only ensuring implementation of these projects, therefore, question of transparency and non-transparency in these projects does not arise.

He said that there is no need of tendering in G to G projects but Punjab government has completed the process of tendering in this project and this has happened first time in the history of the country.

Federal Minister for Science & Technology Rana Tanvir Hussain addressing the Forum said that under Pak-China Business Forum, contacts between businessmen of both the countries are increasing.

Chinese Consul General Yu Boren said that the leadership of both the countries is interested in strengthening economic cooperation. He said that Pak-China economic cooperation is increasing due to implementation of the projects under CPEC. He said that Chief Minister Punjab Muhammad Shehbaz Sharif is serving people of the province in an excellent manner.

He said that completion of development projects is being ensured through transparency, quality and speed. He said that a strong leadership like Shehbaz Sharif has become available to Punjab and due to his steps, economy of the province is improving. Representatives of Chinese companies expressing their views said that increasing economic cooperation of Pakistan and China is useful for people of both the countries. 4-day Pak-China Business Forum concludes -- APP

The four-day 5th Pak-China Business Forum-2016 concluded Tuesday; over 700 representatives of Chinese and Pakistani companies participated in the forum.

Punjab Chief Minister Muhammad Shehbaz Sharif inaugurated the Pak-China Business Forum at Expo Center Lahore on March 19. The event was held in collaboration with the COMSATS University, while the Punjab government and the relevant institutions provided support to the organisers, the Chinese and local traders and businessmen.

The forum was the biggest Pak-China business forum to date with participation of over 700 delegates from 400 Chinese and 300 Pakistani companies. The forum consisted of stalls of Chinese companies in various sectors. It offered an opportunity for Pakistani businessmen to meet their Chinese counterparts.

Punjab Board of Investment and Trade (PBIT) also actively participated in the forum by setting up a stall where the Board's experts briefed the visiting Chinese investors about investment opportunities in Punjab. The PBIT team arranged B2B (Business to Business) meetings, and meetings with various governmental organisations on behalf of numerous Chinese companies at the Forum.

National Logistic Cell (NLC) also set up a stall at the Pak-China Business Forum, where more than 20 Chinese companies held meetings with the NLC officials on issues related to logistics. During their meetings, both sides agreed to proceed further on the initial understanding and to implement mutually beneficial agreements.

Pak-China Business Forum aims to increase bilateral trade with China and help introduce middle and small sized Pakistani businessmen with their Chinese counterparts. This forum falls under the China Pakistan Economic Corridor project.

Development ties: Chinese delegation visits Gwadar -- Express Tribune

QUETTA: The Chairman of Zhuhai Port Holding Group has said that China is interested in investing in various fields in Gwadar which would further cement the long-standing relations of China and Pakistan. He expressed these views during a visit of nine-member Chinese delegation to Gwadar here on Tuesday. He said that under 'sister city relationship' China would help Pakistan in investment in civil and other sectors. Chairman Gwadar Authority Dostain Khan Jamali and Director General Gwader Development Authority Sajjad Baloch briefed the delegation about the master plan of the Gwader port, Economic Corridor, Gwadar Free Industrial Zone, Gwader Expressway and other projects. He said that the cooperation would be increased between Gwadar and Zhuhai Port under sister city relationship accord. A Chinese company has already begun the survey for Gwadar International Airport which would be stretched over 4,800 acres.

**GOVT KEEN TO COMPLETE IRAN-PAKISTAN GAS PIPELINE:
MIFTAH -- APP**

ISLAMABAD: Chairman Board of Investment (BoI) and Minister of State Dr Miftah Ismail on Friday said that Pakistan was keen to complete Iran-Pakistan Gas Pipeline (IP) and in this regard, the government was engaged in negotiation with a Chinese company for building of a 200- kilometer Nawabshah to Gwadar gas pipeline.

He was talking to media after attending Pakistan-Iran Business Forum here at a local hotel.

He said that the project of the gas pipeline from Nawabsah to Gwadar was likely to be completed within two years while the remaining 70 kilometer part of gas pipeline from Gwadar to the Iranian border would be completed within few months in the second phase.

The BOI Chairman said that after the completion of the IP Gas Pipeline, 250 million cubic feet gas would be imported from Iran during first year, while in the second year the import of gas would be enhanced to 500 million cubic feet while int the third year 750 million cubic feet gas would be imported.

Replying to a question, Miftah Ismail said that currently Iran and Pakistan had no formal trade but after the visit of the Iranian President,Hassan Rouhani along with high profile business delegation, the bilateral trade was likely to be initiated formally.

He said Pakistan would export textile, pharmaceutical products, value added agricultural and dairy products while Iran was interested to send petrochemical products, gas, steel and paper products.

Gwadar, Chabahar ports to link Pakistan, Iran with Central Asia

ISLAMABAD – President of Iran Dr Hassan Rouhani on Saturday said that wider connectivity between Gwadar and Chabahar ports would link Pakistan and Iran with the Central Asian countries.

Addressing a press conference here at the conclusion of his two-day official visit, he said more road and rail networks between the neighbouring countries would spur immense trade and business activities, resultantly leading to progress and prosperity in the whole region.

He viewed the development of Gwadar port vital for linkage with the countries up to Central Asia, besides referring to the Chabahar port as significant one in the region. He expressed his country's strong desire for intensified relations and cooperation with Pakistan in all spheres, including trade, economy, energy, education, science and technology.

President Rouhani described his visit and meetings with the Pakistani leadership as very constructive and fruitful. During the meetings, he said, the two sides held wide ranging discussions for cooperation in the areas of trade, economy and energy as well as regional and international issues of mutual interest.

About Iran-Pakistan gas pipeline, Rouhani said Iran had almost completed the work on its side of border on the pipeline and would be in a position to provide gas to Pakistan in a few months. It was now up to Pakistan to initiate work on its side, he added. He said Iran could meet all the energy needs of Pakistan.

The country was already selling 1,000 MW of electricity to Pakistan, which could be increased up to 3,000 MW. Rouhani said Iran was also interested to have connectivity between Gwadar and Chabahar seaports through roads and shipping lines for a win-win situation to both the countries. To a question about the relations between Iran and India, he said, "Whenever Iran comes closer to Pakistan such rumours are spread."

Rouhani said Iran was the first country that recognized Pakistan after the latter's independence in 1947. He also mentioned the decision made by the two countries during his visit of opening two more border crossings, which he said, would help promote trade and people-to-people contacts. About the Afghan peace process, he said both Pakistan and Iran had always held consultations and collaborated on the issue.

"During my talks with Prime Minister Nawaz Sharif, we have specifically talked about the issue," he said, adding that his country fully agreed to a proposal by the Pakistani side for holding trilateral talks among Pakistan, Iran and Afghanistan. He stressed that peace and security was vital for Afghanistan and Iran was ready to do whatever it could to help bring peace and stability there.

The Iranian president said that Pakistan and Iran were playing their parts to resolve the Afghan issue through bilateral and trilateral consultations. About Iran-Saudi tensions, he said that Iran was not interested in any tensions as it was a peace-loving country. Different Muslim countries, including Pakistan, had offered to resolve the issue, he added.

Rouhani stressed that any problem among the Muslim countries should be resolved as the Muslim world required peace, progress and prosperity. To another question, he said Pakistan and Iran had agreed for steps for more secure common borders, which would also help increase bilateral trade through setting up border market places.

Brushing aside reports about Pak-Iran ties, he termed them mere rumours, which were created whenever both countries came closer. "We are like-minded." Responding to a query, the Iranian president maintained that regional issues could not be resolved militarily and referred to Iran's nuclear deal with the world powers as an indication of peaceful tactics to sort out differences.

He said he had also talked with Prime Minister Nawaz Sharif over the issues confronted by the Muslim world. He said that the Organisation of Islamic Cooperation (OIC) should be an effective platform for bringing closeness, unity and cooperation among the Muslim world.

About Syrian ceasefire, Dr Rouhani expressed the hope that it would hold the ground, paving way for restoration of peace between the government and opposition. He urged all the parties to play their role to resolve the Syrian issue through peace.

Gwadar-Nawabshah LNG project part of CPEC -- Observer

Islamabad - Gwadar-Nawabshah Liquefied Natural Gas (LNG) Terminal and Pipeline Project is part of China- Pakistan Economic Corridor (CPEC), official documents have revealed. Interestingly, a federal minister has recently told the Parliamentary Committee on Petroleum that no RLNG terminal/pipeline project is part of the CPEC. It seems there is a communication gap between the Ministry of Planning and other ministries, as the Federal minister for Petroleum and Natural Resources had last week told Senate's Standing Committee that Gwadar-Nawabshah LNG Terminal and Pipeline Project was not part of the CPEC. Documents, related to the progress on CPEC projects, available with The Nation, have clearly shown Gwadar-Nawabshah LNG Terminal and Pipeline Project as part of the CPEC. According to the documents, negotiations for a commercial contract with China over Petroleum Pipeline Bureau are in progress. In a presentation given to the Federal Minister for Planning, Development and Reforms Ahsan Iqbal on CPEC last month, it was informed that there was one project of the Ministry of Petroleum and Natural Resources, listed among the CPEC projects, and that was Gwadar-Nawabshah LNG Terminal and Pipeline project. The minister was also informed that detailed site survey of the LNG terminal had already been conducted by CPP. "Two conclusions can be drawn from the petroleum minister's statement that he made in front of a parliamentary committee: either the minister is completely unaware of the CPEC projects or the government is intentionally trying to hide the truth," an official source said. Take the case of Orange Line Train project, which was first shown as part of the CPEC, but now the government has changed its stance which now says it is not related to the CPEC. Under the RLNG project plan, a terminal will be set up at Gwadar port and 700km long RLNG pipeline will be laid from Gwadar to Nawabshah. A Chinese firm will build new terminal – a floating storage and re-gasification unit (FSRU). The terminal will have the capacity to handle imports of 500 million cubic feet of LNG per day (mmcf). The LNG pipeline, which will be of 42-inch diameter, will be laid from Gwadar to Nawabshah. The Chinese government would provide 85 percent funds of the project, while Pakistan would contribute 15 percent of funds. This project will work as an alternative to the Iran-Pakistan (IP) gas pipeline project and after the completion of Gwadar-Nawabshah pipeline, only about 70km of pipeline segment between Gwadar and Iranian border would be left which could be constructed at the cost of \$200 million to connect to the border. The Economic Coordination Committee (ECC) has already approved construction of 700km Gwadar-Nawabshah pipeline to transport Re-Liquefied Natural Gas (RLNG). "The secretive behaviour of the federal government is making this vital national project controversial," the official said, adding the government should come forward and show the official documents of what comes under the CPEC.

Maiden MoU signed for expanding co-op between Pak, Chinese textile firms -- The Nations

LAHORE - The Pakistan Readymade Garments Manufacturers & Exporters Association (PRGMEA) and China Chamber of Commerce for Import and Export of Textile and Apparel (CCCT) have inked a memorandum of understanding (MoU) to promote and expand cooperation between Pakistan and Chinese textile and apparel companies.

The MoU signing ceremony was held during China Asia Textile Forum 2016 at Shanghai.

PRGMEA chief coordinator Ijaz Khokhar inked the MoU on behalf of Pakistan Readymade Garments Manufacturers & Exporters Association while China Chamber of Commerce for Import and Export of Textile and Apparel was represented by its chairman Jiang Hui.

Ijaz Khokhar, who was the guest speaker from Pakistan side, also made presentation on Pakistan's textile and apparel sector in China Asia Textile Forum. The forum was attended by major apparel associations and many leading Chinese garment companies from the whole Asia.

It is the first time that a Pakistani garment sector body signed such an agreement with the overseas stakeholders for strengthening mutual trade of garment and textile.

As per the MoU, PRGMEA will provide visa assistance to Chinese companies through invitation letters.

In first phase, CCCT delegation is visiting Pakistan to attend Texpo Fair being held first time in Pakistan from April 7 to 10.

PRGMEA will arrange factory visits for Chinese delegation, and B2B meetings with its members.

PRGMEA also plans to arrange a trade delegation to visit China by the end of this year.

It is expected that Chinese companies will establish their units at CPEC Economic zones through joint ventures of the local companies, with PRGMEA playing leading role after striking this deal with CCCT.

PRGMEA and CCCT have also agreed to deal with managing business contacts, seminars, business meetings, presentations, exhibitions, fairs holdings and other arrangements to make potential partners and export possibilities available in the two countries.

PRGMEA and CCCT will assist each other in small and medium size business development, provide technical assistance, search for partners for trade and joint ventures, as well as render other services of interest for business entities of the both parties.

In his presentation, PRGMEA chief coordinator Ijaz Khokhar highlighted the overall situation and development trend of Pakistan's garment sector and textile industry. He said that CCCT as part of the Ministry of Commerce is the largest textile and apparel trade agency both in China and the world.

CCCT member companies, totaling more than 12,000 and operating in 34 provinces across the country, engage in the production and export and import of textile fibers, yarns, fabrics, clothing, home textiles, industrial textiles and accessories.

Its member companies comprise the majority of Chinese textile and apparel enterprises incorporating export and import enterprises, the trade volume of which accounts for 70% of the total export and import volume of Chinese textile and apparel industry as a whole.

Ijaz Khokhar said that China is not a traditional market and have a lot of opportunities for Pakistani merchandise.

He said that MoU between the PRGMEA and CCCT would go a long way and help Pakistani value-added garments goods to find their way in Chinese market.

He said that ample opportunities exist in value-added textile sector of Pakistan and now it is the duty of the policy makers to help the garment industry make this MoU meaningful.

Pak-China to build interconnection grid for electricity -- Daily Pakistan

ISLAMABAD (Online) – The Ministry of Water and Power and State Grid Corporation of China are working to build an Interconnection Grid for electricity Between Pakistan and China which will mutually benefit both the countries by utilizing each other energy potential.

This was stated by Secretary Ministry of Water and Power, Muhammad Younus Dagha in Beijing at the occasion of Global Energy Interconnection Conference where more than 700 delegates are participating.

The Secretary Ministry of Water and Power said that the building of an Interconnection Grid between Pakistan and China will allow Pakistan to meet its energy demands when there are requirements.

It will also benefit China to benefit from the potential of clean energy in Pakistan, especially hydroelectricity on the Indus River cascade lying all along the route of China Pakistan Economic Corridor, he added.

Younus Dagha said that Pakistan is very much positioned to become energy corridor for the region and facilitate the exchange and optimize use of clean energy available in the region of South Asia, Central Asia, Middle East and China.

He said that Pakistan can play an active role in the Global Energy Interconnection.

While apprising about CASA-1000 project, Dagha said that Pakistan has a unique geographical position, strategically located at the confluence of South Asia, Central Asia, Middle East and China. We are aware of the opportunity offered by our geographical location. Working on it since past many years, we succeeded in signing an agreement on Central Asia South Asia transmission line, known as CASA-1000, with Tajikistan, Kyrgyz Republic and Afghanistan to build a 1400 km long HVDC transmission line which will bring 1300 MWs of clean power to Pakistan.

We already have Grid interconnection with Iran and plan to further enhance it. We are also working with South Asian countries to bring interconnectivity within South Asia. We have found a lot of interest in CASA-1000 in the countries of the region such as Turkmenistan, Kazakhstan and Russia.

The Secretary Ministry of Water and Power said that Pakistan has the potential and is fast becoming an energy surplus from an energy deficit country in the next three years due to the volume of energy projects initiated by the Government.

He said that when His Excellency President Xi Jinping visited Pakistan in April 2015, we initiated work on 10,400 MWs of new power generation and 660 HVDC Transmission Line with the State Grid.

He congratulated the four countries who through a Memorandum of Understanding yesterday during this Conference signed their commitment to work on Global interconnectivity.

He said that the four countries signing MOU represent more than 70% of Asia's power demands. They however, need to tap the unutilized resources of clean energy lying in the neighborhood of the proposed Global Grid, in those countries which might not have developed that much demand. Pakistan can be one of those countries, he stressed.

Although at present, Pakistan might be facing a deficit of transformed energy, especially power, but has a sizeable potential in terms of its untapped energy resources. Such untapped resources have a large share of clean energy, apart from fossil fuels.

While we hope to become self-sufficient in Power generation in 2018, we will still be left with an untapped potential of more than 60,000 MWs of Hydroelectricity Power, most of which lies right across the Pakistan-China border; also an untapped

potential of more than 90,000 MWs of Wind Power in our South and an unlimited potential of Solar power all across the 850,000 sq km of its area, with almost 300 days of bright sunshine.

At present Pakistan Produces more than 40% of its electricity from non-fossil sources, mainly Hydro-electricity. In the coming days, working closely with international players, we hope to explore the possibility of further advancement towards Sustainable energy.

Pak-China links: Logistics complex construction to facilitate trade -- The Express Tribune

KARACHI:

Construction on a logistics complex that will deepen bilateral trade between China and Pakistan began in Tashkurghan Tajik Autonomous County in Xinjiang on Friday.

According to the local government, the project covers an area of about 58 hectares southwest to the county and will use up a total investment of 3 billion yuan (\$464 million). The first stage of the three-stage project includes an Internet service administration centre, a cross-border ecommerce enterprise incubator, and a modern warehousing and logistic centre.

In the meantime, a comprehensive transportation system, especially for cross-border cold-chain logistics, will be further developed. RMB settlement will be introduced as well, reports China official news agency – Xinhua. Further stages will see the completion of a commodity exhibition centre, manufacturing and assembly factories, hotels, entertainment facilities and vehicle maintenance station.

All Day

Sino-Pak trade likely to increase by 24 percent -- BR

Trade between Pakistan and China is likely to increase by 24 percent after completion of China-Pakistan Economic Corridor (CPEC) projects especially relating to energy and infrastructure, it is learnt. According to the sources, CPEC would play a significant role in making Pakistan one of the most attractive transit trade routes in the world as the route would open immense trade opportunities for Pakistan with other regional countries as well.

Sources added that that trade route, in future, could link central Asia via Afghanistan, and gave the Central Asian countries an easier access of sea route to Far East and Australia. Most of CPEC projects relating to energy, Gwadar Port and infrastructure would be completed by end-2018 and the \$46 billion corridor projects envisage construction of infrastructure projects such as motorways, expressways and rail lines to bolster connectivity. Various power projects would also be established to help Pakistan meet its growing energy requirements.

The sources said Pakistan was also discussing Industrial Economic Zones with China which would be established along side the route of CPEC. They said a meeting of Economic Zones Joint Working Group (EZJWG) of Pakistan and China was going to hold next week of that month to discuss the matter relating to establishment of industrial zones. According to documents available with Business Recorder, the economic zones would target various sectors including food, pharmaceutical, engineering, fruit/food packing for exports, textile value addition, marble industry, minerals and cutting and polishing, industries of mosaic furniture, construction of material vendors, herbal medicine and agriculture implements etc. The Karak Special Economic Zone is also under design which would target oil and gas sector. This industry would refine 100,000 barrels of oil per day while approximate \$5 billion investment is expected. Federal government has proposed to establish 1000MW gas based power house for this sector.

The sources said the industrial zone would require energy at a time when the country was already facing shortfall of power. However, the government has launched many projects of energy under CPEC to meet the power shortfall. Source further said that China would also benefit from that economic corridor, which would greatly reduce China's trade route from 12,000 kilometres via sea, to 2,000 kilometres via land ie from Kashgar to Gwadar.

In future, the sources said China could also use Gwadar to build a naval base which would increase influence of China in the region. At present 40 percent of the world's oil is extracted from the Gulf region and its transportation is through the Persian Gulf and it is expected that all the oil shipments from the Gulf Co-operation Council (GCC) countries will be shipped via Pakistan to China.

According to media reports, Ambassador of Tajikistan Sherali Saidamir Jononove had said his country would benefit from that opportunity and would become a partner in CPEC. The Ambassador also said Prime Minister Nawaz Sharif would participate in the transmission line laying ceremony of CASA-1000 electricity project in Tajikistan in May next month. Tajikistan will export more than 1000MW hydel electricity to Pakistan under the project.

All Day

China-US alliance will have positive impact on Pak-China relations -- Pakistan Today

China's alliance with the United States and their unanimous position on international and regional issues will have positive impact on Pakistan-China bilateral ties.

This was stated by Yan Xuetong, director of the Institute of International Relations at Tsinghua University while commenting on the new phase of the Sino-US ties in the wake of President Xi Jinping's recent visit to the US.

He said that forming alliances abroad can help China smooth bilateral ties, like in the context of Pakistan, the two-countries' growing relation which are cited as exemplary the world over.

The comments are based on Yan's recent lecture "Strategies for China's rise and changing international environment." These appeared in the Global Times, a Chinese tabloid published under the auspices of People's Daily newspaper.

He believes that alignment between two powers is a solution of many conflicts. For instance, Pakistan is in alliance not only with China, but also with the US. In terms of issues concerning Pakistan, there is no divergence between Beijing and Washington. If China can ally itself with every single ally of the US, there will be far less controversies between the two. But the problem is China is not willing to ally with the US partners.

According to Yan Xuetong, some say that forging an alliance is a Cold War mindset. On the contrary, he says, it is nonalignment that demonstrates the Cold War mentality. The proposal of nonalignment was raised in 1956 by India's first prime minister Jawaharlal Nehru, Egypt's second president Gamal Abdel Nasser and Yugoslavia's then president Josip Broz Tito.

And the very first conference of non-aligned heads of states or government, at which 25 countries were represented, was convened in September 1961. The Non-Aligned Movement came into being during the Cold War, and so has a Cold War mentality, while forming alliances is simply human nature since ancient times.

The core of nonalignment is not to provide security assurances for other nations. All members from the Non-Aligned Movement are small and medium economies, and super powers have never engaged in such a thing. If China insists in nonalignment, how can they show their good will and justice?

Are we going to tell the world that China is growing increasingly stronger, but China will never protect your safety, he questioned.

"For the moment, we should consider how to face the emerging pressure that comes along with the rise of China. That's correct. Beijing and Washington are now trying to ease tensions with each other by pretending to be friends. But this strategy is obviously not working," Yan said.

"The root cause is the fact that the core of this bilateral relationship is competition, rather than cooperation. Cooperation is only a method to prevent their competition from getting worse. And it is impossible to turn competition entirely into cooperation. Hence, my suggestion is to admit that we are competitors, and guide Sino-US ties toward healthy competition," he added.

"The conflicts of core interests between China and the US are constantly growing. So far, there is no solution to the puzzle. All we can do is to prevent these controversies from escalating into war. But it is impossible to pursue a relationship without conflicts of core interests. It's like you can prevent two students from fighting over scholarship," he said.

"Yet you cannot stop them from competing for it. Instead of ideological conflicts, the major controversy that lies between Beijing and Washington is conflicts of core

interests.”

CHINESE DELEGATION INAUGURATES GWADAR PORT FREE ZONE -- APP

GWADAR: A 61-member delegation from the Chinese province of Xinjian reached here Monday and inaugurated Gwadar Port Free Zone.

The delegation was led by General Secretary of Communist Party, Zhang Chunxian. The head of the delegation inaugurated Gwadar Port Free Zone at the Port Area here.

Earlier, the Governor of Balochistan and other officials received the delegation at the airport.

On the occasion, he said that there are immense opportunities for investment in Gwadar and China is interested in the investment in various sectors.

The head of the delegation while speaking said that friendly ties between China and Pakistan were strengthening day by day.

At a ceremony regarding quality education and public health, he said that China is actively taking steps for the development of Gwadar.

The Chairman of District Council, Babu Gulab, appreciated the Chinese steps in this regard.

Zhang Chunxian provided uniforms to students of Model High School and GDA School Gwadar.

Some 3,000 students of other schools would also be provided with uniforms.

It was pointed out that higher education for 20 students of Gwadar would be arranged in China.

The delegation also visited a Chinese memorial in the precincts of Gwadar Port and placed flowers there.

The Chinese delegation also visited the Gwadar Port.

Chairman of Gwadar Port, Dostian Khan Jamaldini, said that this port would prove to be a game changer for Pakistan and serve as a gateway and centre for economic and commercial activities.

Army chief reassures China of CPEC security -- The Express Tribune

ISLAMABAD: Army chief General Raheel Sharif has reassured senior Chinese leaders that the military will ensure a secure environment for timely completion of the multibillion-dollar network of roads and rails connecting the Gwadar deep seaport with Xinjiang.

The army chief held out this assurance during a meeting with Zhang Chunxian, Member of the Political Bureau of the Central Committee of the Communist Party of China (CPC), who met him at the GHQ on Tuesday.

‘CPEC a game changer only if Pakistan tackles security issues’

He reiterated Pakistan’s commitment to ensuring a secure environment for timely completion and subsequent management of the China-Pakistan Economic Corridor (CPEC) in the best interest of a prosperous region.

According to the military’s media wing, matters of mutual interest, regional stability and measures to enhance bilateral defence and security collaboration were discussed in the meeting.

Zhang acknowledged Pakistan’s efforts against terrorism, and appreciated the successes achieved in the ongoing operation Zarb-e-Azb. He also underlined the importance of CPEC, saying the multibillion-dollar project would have significant long-term impact on the region.

Earlier, Zhang, along with the secretary (CPC) Xinjiang Uygur Autonomous Region, also met Adviser to Prime Minister on Foreign Affairs Sartaj Aziz. Chunxian is heading a high-level delegation which also visited Karachi and Gwadar port to review progress on CPEC.

The two sides discussed a wide range of bilateral issues such as trade, investment, economic cooperation, including CPEC, people-to-people contacts, culture, education and science and technology, the Foreign Office said in a statement.

Aziz emphasised that friendship with China was the cornerstone of Pakistan’s foreign policy. The all-weather strategic cooperative partnership between the two countries is an anchor for regional peace and stability.

Thanking Aziz for the warm hospitality, Zhang said Pakistan and China were ‘iron brothers’ joined by land, mountains and rivers.

Pakistan Army to establish HQ in Diamer district to ensure CPEC security

Reiterating China’s unflinching support to Pakistan’s sovereignty, national security and territorial integrity, he lauded Islamabad’s efforts against terrorism and recognised the sacrifices made by its people in this campaign.

Expressing commitment to CPEC, he said it was a flagship project of President Xi Jinping’s ‘One Belt-One Road’ initiative to which the Chinese leadership was attaching great importance.

Zhang emphasised that CPEC would yield economic benefits to the people of China and Pakistan as well as the region.

Pak, China take space collaboration further -- pak observer

Islamabad—Pakistan Space and Upper Atmosphere Research Commission (SUPARCO) signed a contract with China Great Wall Industry Corporation (CGWIC) for the development and launch of Pakistan Remote Sensing Satellite (PRSS-1) system.

Minister for Planning and Development Ahsan Iqbal and President of CGWIC Yin Liming inked the historic agreement.

PRSS-1 will be the first remote sensing satellite of Pakistan with multiple applications that will significantly assist the socio-economic and infrastructure development activities in the country. The project assumes greater importance in the backdrop of the ongoing gigantic China Pakistan Economic Corridor project. It will also be utilized to help in various aspects of disaster management such as floods forecasting and damage assessment. Its use will also be expanded into the areas of mapping forestry and urban development. Besides socio economic benefits, the PRSS-1 will also serve the needs of the national security especially in the context of security and border surveillance.

PRSS-1 will be a high resolution Electro Optical Earth Observation Satellite having a life of more than seven years. The system contract consists of one satellite, two ground control stations and a comprehensive know-how transfer program. The satellite will be launched in June 2018 from China. An indigenously developed experimental satellite by SUPARCO will also be co-launched with the PRSS-1. The cooperation between Pakistan and China in the space domain will open new vistas of socio economic and scientific cooperation giving boost to the historic interstate cordial relations in other fields.

China had helped Pakistan in launching Pak-sat IR from Xichang Satellite Launch center in south west Sichuan province, which replaced Pak-sat 1.

PTCL to make investment in Gwadar -- The News

QUETTA: The Pakistan Telecommunication Company Limited (PTCL) will make massive investment in Gwadar in order to provide facilities to local and foreign investors, PTCL Business Zone South) Executive Vice President Raza Hasnain said on Wednesday.

Talking to newsmen, he said that the PTCL plans to execute infrastructure project in Gwadar in order to make investment-friendly environment for the companies.

Two major data centres of PTCL were already functioning in Lahore and Karachi, he said, adding that Gwadar telecom infrastructure would be connected with Karachi data centre.

Presently, PTCL has been running international internet cable service through four submarines under deep sea water and has planned to expand its international internet service to neighbouring countries, including China, Hasnain said.

Two-year course in China : CM encourages students to enhance value of green passport -- Daily Times

LAHORE: Punjab Chief Minister Shahbaz Sharif has said that young generation is guarantee to a bright future of Pakistan, adding that provision of resources for equipping the youth with modern knowledge is a useful investment and the government would provide all out funds for this purpose.

Addressing first batch of 66 students selected for two-year Chinese language course on Wednesday, he said that the government has made a programme to send 500 youth to China for learning Chinese language. "First batch of 66 students will leave for China today (Thursday). China has become the second biggest economic power of the world and has proved its mettle across nations," he added.

Shahbaz said that political, diplomatic and economic importance of China is there for everyone to see, adding that learning Chinese language is the need of the hour. No doubt, he said, this programme would increase the friendship, economic cooperation and relations between the two countries.

Chinese Consul General Yu Boren, additional chief secretary, Higher Education secretary, vice chancellors and other officers concerned were present on the occasion. The chief minister told the students that they are the ambassadors of the country and they have to earn a good name through hard work, discipline, punctuality and high character in order to enhance the value of the green passport. He said that the students not only have to learn Chinese language during two years' course but also get knowledge about history and culture of China. He assured that all out resources would be utilised for the bright future of the country and the nation.

"Youth are equipped with courage and knowledge and they have to make their country prosperous. Punjab government will bear all the expenditure in this regard," he said, adding that those who would show outstanding performance in the course would be provided with jobs in universities and colleges.

He said that Saudi Arabia, Turkey, Iran and a number of other countries are also friends of Pakistan but Pak-China friendship is unprecedented, adding that friendship and economic cooperation with China is important in many respects.

Shahbaz said that judges, generals, policymakers, judiciary, traders and all segments of society would have to play due role in the uplift of the country. Referring to merit policy of Punjab government, Shahbaz said that culture of merit and transparency has been promoted in the province during the last eight years. He said all recruitments in education, police and other departments have been made on merit. Besides, selection of girl and boy students visiting China has also been made on merit. He said that merit is only way to development of the country therefore, merit has been promoted at every level.

Replying to the questions of students, the chief minister said that Pakistan is more for the poor than for the rich, adding that Pakistan would become the country of Quaid and Iqbal only when the gulf between the rich and poor is eliminated. If we ensure merit, the disappointment of common man will change into hope and he will consider Pakistan as his country and the confidence of the youth will be restored," he added. Chinese Consul General Yu Boren said that it was an honour for him to participate in the ceremony. He said China and Pakistan are good neighbours, friends, partners and brothers and the friendship between both the countries is strengthening with the passage of time. He said that role of the chief minister is commendable for enhancing Pak-China friendship and economic cooperation.

The Chinese consul general would remain in contact with the university in Beijing and extend all out facilities to the students participating in the course in Chinese language. The chief minister also gave laptops to the students going to China.

NUML holds Chinese exhibition of Muslim customs -- Daily Times

ISLAMABAD: Minister for Information, Broadcasting and National Heritage Pervaiz Rashid on Friday inaugurated "one belt, one road", a photo exhibition on Muslim customs in National University of Modern Languages (NUML).

The embassy of Peoples Republic of China, Ningxia Islamic Friendly Council and NUML arranged the exhibition. The Chinese charged d'affaires Zhao Lijian and Ningxia Islamic Council Head Hei Liangji were also present on the occasion.

While talking to media after inaugurating the exhibition, the minister said that the holding of this exhibition in the federal capital not only reflected the deep cultural ties between people of the Pakistan and China but also a testimony of Chinese government's policy of ethnic equality and religious freedom under which Muslims enjoy equal rights. He said that this exhibition is a message as the two countries celebrate the 65th anniversary of diplomatic relations between Pakistan and China. He said that our people are connected with strong bonds of friendship and brotherhood. The minister congratulated Ningxia Islamic Friendly Council for their efforts to highlight the tolerance and harmony in the Chinese society adding that these exhibitions help promote people to people contact and cultural cooperation which deepens existing friendly relations between both the countries.

The minister said that the China Pakistan Economic Corridor (CPEC) is being constructed along the Silk Route, which has expanded the Pak-China relations by providing it solid economic foundations and dynamism. The minister further said that these relations can now be termed as both corporate and cultural strategic partnership adding that the Pak-China relations are rooted in the will of people of both the nations and such exhibitions would bring the people of both the countries more closer.

Pakistan-China Economic Corridor – a mutually beneficial project -- The Nations

SANA BATOOL - China-Pakistan Economic Corridor is a strategic cooperative partnership between Pakistan and China.

It is an under-construction development program to connect Gwadar Port in southern Pakistan to China's northwestern autonomous region of Xinjiang via highways, railways and pipelines to transport oil and gas.

The Pak-China Economic Corridor program was inaugurated in Islamabad on August 27, 2013.

Pak china economic corridor is termed as the game changer as it would usher in a new era of economic progress and prosperity for both countries.

China-Pakistan Economic Corridor has the potential to turn Pakistan into a hub of regional cooperation; it is of immense importance for the revival of its economy, resolution of energy crisis and strengthening the Federation through development and infrastructure.

Chinese government announced that it will finance Chinese companies to build \$45.6 billion worth of energy and infrastructure projects in Pakistan as part of CPEC.

China has promised to invest around \$33.

8 billion in various energy projects and \$11.

8 billion in infrastructure projects which will be completed by 2017 at most.

The deal includes \$622 million for Gwadar port.

Under the CPEC agreement, \$15.

5 billion worth of coal, wind, solar and hydro energy projects will add 10,400 megawatts of energy to the national grid of Pakistan.

According to the BMA capital analysis of impact of CPEC on national economy CPEC will increase GDP growth rate at 1.

5 per cent in next three years.

Moreover, it will also enhance the private investment due to positive environment, economic opportunities, improved infrastructure, stable economy and generation of much needed energy.

Private investment will add 0.

5 per cent to the GDP of country.

Cumulative impact of investment would be 02 per cent during 2016-2018.

Apart from the importance of CPEC for Pakistan, it also has a special significance for China and its future role as great power at global level.

Experts believe that it is not only a trade or economic initiative but also a plan for the expansion of China's role in the world.

China is building its leading role in Asia and beyond for economic and political cooperation through "One Belt One Road".

CPEC serves as a primary gateway for trade between China and the Middle East and Africa.

Oil from the Middle East could be offloaded at Gwadar, which is located just outside the mouth of the Persian Gulf, and transported to China through the Balochistan province in Pakistan.

Such a link would vastly cut the 12,000-kilometre route that Mideast oil supplies take to reach Chinese ports.

Even if China uses PCEC only for 50% of its current level of oil supplies, it will save around \$6 million every day, almost \$2 billion every year.

China will be able to make attractive financial returns from projects initiated under CPEC.

The projects would help Chinese firms and labor as machinery used in the infrastructure projects would be procured from China and the projects would also employ a large number of Chinese labor.

Because of its unique geography CPEC is not only significant for the two countries but also for the entire region; Uzbekistan Turkmenistan Tajikistan- land locked countries- will get access to international waters for Oil and Gas exports and other imports.

For Iran, CPEC will provide the country with much needed accessibility to the east and also the decades-old dream of the Iran-Pakistan gas pipeline can now be fully realized.

Many more companies in the world from various countries would be setting up their businesses to take the advantage of State of the art port the best in the region, with cheap labor and close proximity to the huge Middle East market.

UAE alone is committed to investing \$30 Bn.

United States has also expressed interest in investing in CPEC projects.

According to world bank report The investment in Pakistan is expected to increase to 15.

4% of GDP by 2017 as a result of operationalization of CPEC.

Analysis of facts and figures shows that CPEC is not only critically important for both countries but also a fate changer for the entire region .

Pakistan needs it to overcome its economic, development, social and energy problems.

China needs it to expand its periphery of influence, consolidate its global presence and securing future supply routes of energy and trade goods .

It's a win win situation for both countries.

World needs it because of its geo strategic location .

Pakistan should embrace this huge opportunity and use it wisely to be able to reap the economic benefits of this corridor and enhance its regional power and prestige.

Balochistan govt considers tax amnesty for investors in Gwadar -- The Nations

QUETTA: The Balochistan government has planned to introduce a tax amnesty scheme for national and international investors to attract investment to the port town of Gwadar.

Provincial Minister for Planning and Development Dr Hamid Khan Achakzai said this while addressing a press conference along with Additional Chief Secretary (Planning and Development) Nasib Ullah Bazai here on Tuesday. He said that work on several development projects pertaining to the China-Pakistan Economic Corridor (CPEC) in Balochistan was under way. "Work on Zhob-Mughal Kot N-50 and Qila Saifullah Road N-70, Gwadar-Hoshab and Hoshab-Sorab N-85 was under way," he said. He said that these road projects would be completed before and by 2018.

He said that work had been started on the Rs 14.06 billion East Bay Express project along the coast from Gwadar to Karachi. He said that Rs 4.70 billion were allocated for this project in the Public Sector Development Programme (PSDP) 2015-16. He said that funds had been allocated for road projects such as Gwadar-Karachi, Gwadar-Basima and Basima-Jacobabad-Khuzdar. He said that Rs 1.01 billion were being released in this regard.

Achakzai said the Balochistan government had achieved 95 percent of the target with regard to implementation of 2,250 development schemes of the provincial Public Sector Development Programme 2015-16 and 140 development projects of the federal PSDP 2015-16. He said that action would be taken against the officials if PSDP funds lapsed. He said the Rs 54.5 billion provincial PSDP 2015-16 had 2,250 schemes — 940 of them were ongoing and 1,310 were new. He said that Rs 19.5 billion were allocated for ongoing schemes and Rs 31.57 billion for new projects. "About 95 percent of funds for the ongoing schemes have been released within seven months," he said, adding that 97 percent of the PC-1 of the new development schemes had been approved and 95 percent of funds allocated for them have been authorised.

The minister said the Rs 44 billion federal PSDP for Balochistan had 140 development schemes, adding that 102 federal PSDP schemes were being executed by the federal agencies and 38 by the provincial departments. "About 60 percent of the funds earmarked for the federal PSDP schemes for Balochistan have been authorised and the remaining 40 percent will be authorised soon," he said.

The additional chief secretary said that 98 percent of progress on implementation of the federal PSDP projects had been achieved. He said that Rs 440 million were allocated for 88 schemes involving the Millennium Development Goals. "At least 87 PC-1 of the Millennium Development Goal schemes were made and 50 percent of work on them had been completed," he said.

He said that donors had increased financial assistance for foreign funded projects in Balochistan from US \$70 million to \$90 million and this amount would be included in next year's budget. He said that water projects worth billions of rupees had been completed with the cooperation of the World Bank and the Asian Development Bank. He said that Rs 5 billion were allocated for flyovers, by passes and underpasses in Quetta under Prime Minister's Package. He said that Quetta would be supplied water from Pat Feeder Canal and dams.

He said that Prime Minister's National Health Insurance Programme had been initiated in four districts of

Balochistan on an experimental basis, adding that the federal government and the provincial government would give Rs 25,000 and Rs 50,000, respectively, for the treatment of each poor patient.

Achakzai said that missing facilities were being provided to 900 state-run schools. "Three new medical colleges, three new universities, seven cadet colleges and five residential colleges were being built. At least 800 primary schools have been upgraded to middle and 400 middle schools to high schools," he said. He said that

486 small dams had been built with 50 balances and a project of 100 dams was part of the PSPD 2015-16. He said that new provincial budget of Balochistan would have 5,000 check dams and 600 live Karez in 32 districts of the province.

CPEC is a symbol of Pak-China all-weather friendship, says Nawaz Sharif -- <http://www.dnd.com.pk/>

ISLAMABAD, Pakistan: Prime Minister Nawaz Sharif said on Wednesday that China-Pakistan Economic Corridor (CPEC) is a symbol of all-weather friendship between both the countries.

In a meeting with the Chairman Shandong Hi-Speed Group Ltd Sun Liang in Islamabad on Wednesday the prime minister said that the CPEC is not only a road and rail network but also includes investments in trade, energy, transport, infrastructure and industrial estates.

Warmly greeting the Chairman Shandong Group, the premier appreciated his interest to explore investment opportunities in Pakistan.

The prime minister invited Shandong Group to invest in various projects especially in road, rail, power, dams, pipelines, airports and the financial sectors of Pakistan.

"We will provide all possible help to your investment plans," Prime Minister Nawaz Sharif.

Sharif said that government's economic team has worked assiduously during the last three years to achieve the economic turn-around which is being well acknowledged by all the international institutions.

The prime minister said that gross domestic product (GDP) growth rate of our economy is rising and Inflation has been brought down to single digit. He added that the stock exchange has shown considerable increase and foreign currency reserves are highest in history.

In his remarks, Sun Liang greatly appreciated the economic policies of the government and attributed the Pakistan's economic turnaround to the sound economic vision of the prime minister and strict financial discipline of the government.

Sun Liang expressed keen interest to explore new opportunities to invest in Pakistan.

Gwadar port to be operational this year -- Gulf News

Islamabad: Gwadar port, a key component of the \$46 billion (Dh168 billion) China-Pakistan Economic Corridor (CPEC) project, will be operational by the end of 2016, Pakistan President Mamnoon Hussain said on Wednesday.

Speaking at the convocation of a university here, the president said CPEC would make Pakistan a major hub of economic activity in the region.

The president said that CPEC includes several energy initiatives including coal, oil, solar and nuclear projects, adding that upon completion of these projects — by 2018 — the country will be rid of its power shortage problems.

He called upon students to acquire knowledge and skills in the fields of information technology, banking and commerce in order to meet the requirements of the mega corridor project.

The president said Gwadar, on the southwest Arabian Sea coast in Balochistan province, is an important part of CPEC.

Officials say an expressway linking Kashgar of China's Xinjiang region and Gwadar is under construction and will be completed in 2017, and a railway link is also planned.

An international airport is to be built at Gwada, along with various infrastructure projects.

Gwadar Port Project Reveals China's Regional Power Play -- NBC

GWADAR, Pakistan — A 30-by-45-foot Chinese flag draping the port authority building here projects an unmistakable message: Pakistan and China are now self-declared "iron brothers" and "all-weather friends."

Underpinning this relationship are some \$46 billion in Chinese investments and loans to build energy and infrastructure projects that will be part of the so-called China-Pakistan Economic Corridor.

According to officials, new roads will help open up routes for goods from China's landlocked and underdeveloped Xinjiang province, through Pakistan, into the Arabian Sea and then onto the Middle East and Europe.

Image: A Chinese flag hangs on the Gwadar Port Authority building

Under the 10-year plan announced in 2015 by President Xi Jinping as a part of Beijing's "One Belt, One Road and New Silk Route," China will also get a free trade zone and ownership of Gwadar Port.

The massive project is about more than simple trade — its backers hope that once finished, it will bolster Pakistan's economy and potentially give China's navy access to the Indian Ocean. The plan would also strengthen both countries' positions versus India, Pakistan's arch-enemy and China's strategic rival, and hedge against U.S. influence in the region.

Situated on a barren, hammerhead-shaped peninsula in the south of insurgency-ridden Balochistan — and just northeast of the strategically important Straits of Hormuz — Pakistan's generals and China's politicians predict the development of Gwadar will be a game-changer.

Gwadar "is poised to become one of the most important and modern cities of the Middle East, West Asia and the South Asia" as a "gateway port for Pakistan and ... a world-class maritime hub," according to a Chinese handout at a networking seminar held in Gwadar recently.

So the few dozen Chinese engineers holed up in the Pearl Continental — the only five-star hotel in the vicinity — could be poised to help reset the balance of power in the region.

But creating this "great monument of Pakistan-China friendship," as the local authority calls it, won't be simple or straightforward. Building the corridor of roads, railways and pipelines from northwest China to Pakistan's Arabian Sea coast will be a huge challenge in a country where Islamist militants and separatist gunmen are a constant menace.

At the moment, Gwadar is a fishing city of 120,000 that's closer to the Iranian coast than it is to any major Pakistani city. It has little gas and no water, few buildings more than one story in height.

"HOW CAN WE EXPECT TO BUILD SUCH A BIG PROJECT WITH SUCH A SECURITY PROBLEM?"

Locals aren't all sure that the plans crafted by Pakistan's generals and China's politicians will help improve their lives.

In the city's old fishing harbor, angry fishermen huddle every evening under a concrete shed strewn with nets. They smoke hashish and debate what Islamabad and Beijing are thinking, and what cost they will have to bear in this barren peninsula.

"Will they let us keep our land? Will they build us a new harbor once they build a highway here, like they plan to? What will happen to our generations-old tradition of living where you fish?" asked Mehran Mehdi, the head of the local fishermen's

group.

"Our boats are rotting and are wallets are empty and our water pipes are dry," he said as he smoked a smuggled Iranian cigarette and toddlers played with stray dogs in Gwadar's East Bay behind him. "Development is good, China is our great friend, this CPEC thing sounds amazing, but don't forget that this is our land, first."

Image: Fishermen in Gwadar

Lt. General Amer Riaz, the powerful military commander who watches over Balochistan, is tasked with ensuring that Gwadar, CPEC and Pakistan's Chinese benefactors survive security threats. He tried to assuage these concerns.

"There is going to be no deprivation of the locals," he said. "Folks here have the first right to everything. We must ensure that there is transparency and justice in this very critical and expensive project."

Still, security is a nagging issue.

For decades, separatist groups have waged an on-again, off-again violent campaign in Balochistan, where Gwadar is located, saying the state has failed to develop the impoverished region and instead plundered its natural resources.

The CPEC's western branch passes north through the province, where ethnic Baloch rebels are opposed to the project and chafing under a military crackdown. It also skirts the Afghan-Pakistan border where Islamist militant groups, including the Pakistan Taliban and al Qaeda, have long been based. And it takes in Peshawar, scene of some of the worst insurgent attacks of recent years.

Image: A paramilitary soldier stands guard at Gwadar Port

So Pakistan is throwing men and weapons at the project.

The main responsibility for securing the corridor, vital to Pakistan's long-term prosperity, lies with a new army division established in the last few months and numbering an estimated 20,000 troops.

Outside the port authority's office, Pakistan army soldiers with Chinese-made Type-56 submachine guns and U.S.-made Harris radios protect Chinese engineers who arrive daily at the single runway airport.

Pakistani businessmen — many of them land developers from the country's business capital of Karachi some 700 miles to the east — on the lookout for the next big opportunity in Gwadar worry that their country won't be able to deliver on its side of the bargain.

"The army will do what it does, which is to protect the Chinese," said Aftab Ali, a land developer with interests in Dubai and Abu Dhabi as he chomped on cigars and spring rolls in the Pearl Continental's marble lobby.

"The Chinese will do what they do, which is to make a killing and some great infrastructure. But the government can't even put up a website about CPEC or manage to get more than three flights a week here," said Ali, who was with his 20-something son to teach him the family business. "It's us businessmen who will ultimately make this place, but the government is already getting in the way by not doing much."

Image: Pakistan serviceman stands guard near Gwadar

A Pakistani serviceman is silhouetted while standing guard at a hilltop position near Gwadar on April 11. Anjum Naveed / AP

And there are still questions about how much the project will help Pakistan's economy. Pakistan's Planning Ministry does not yet have specific estimates on how many jobs the CPEC will create in the country, although officials believe it could

generate hundreds of billions of dollars over the long term.

Companies from China's violence-prone far western region of Xinjiang signed deals worth about \$2 billion with Pakistan earlier this month during a visit to Pakistan by Xinjiang's top official, who sought to cement ties with an important security partner.

So hope and fear surround the huge project.

Liu, a Chinese engineer working a short drive from the Pearl Continental in the West Bay that is to become a constellation of residential projects and resorts, also said he was hopeful but worried both about timelines and security.

"Look at these men," he said pointing to around 15 security personnel deployed to guard some 30 local construction workers and the Chinese contractors.

"They are all OK," said Liu, who did not want to share his last name. "The army keeps me safe, the police keeps the locals safe, but how can we expect to build such a big project with such a security problem? And if I finish this school by June, like I'm supposed to, will the children who study here be safe?"

All Day

Xinjiang-based Chinese companies to make heavy investment in Gwadar -- pak observer

Beijing—Five Chinese companies based in Karamay Xinjiang region have pledged to make heavy investment in Gwadar port for its rapid development, according to Karamay's publicity department, reports China Daily on Tuesday. The senior representatives of these companies recently paid five-day visit to Gwadar and entered into agreements with the Gwadar's Development Authority.

According to the report, the five enterprises and Gwadar reached initial cooperation agreements in hotel construction and management, concrete supply, sale of building materials, agricultural planting technology services, and marine products trade. Gwadar, a superior deep-water port and Karamay city in Xinjiang Uygur autonomous region have been sister cities since April 21, 2015.

Meanwhile, a Forum of Chinese Think-Tank at its recent meeting held in Karamay urged entrepreneurs from the both countries to undertake socio-economic projects for the implementation of China-Pakistan Economic Corridor (CPEC). It called for proactive cooperation for their mutual benefits. It was decided that the Forum will act an interactive platform for the business community and Think-tank to share information, explore cooperation opportunities, and to actively launch mutually beneficial cooperation in such fields as infrastructure, information technology, electricity, energy, agriculture, aquaculture, e-commerce, education, vocational training and climate change.

It emphasized that the two countries should promote the smooth flow of new production factors such as science and technology, capital, management expertise and talent, and information, and implement international cooperation covering joint research and development (R&D), technology transfer, commercialization of R&D results, standardization and promoting innovation through exchange of ideas and experiences. The Forum also called for close collaboration between the city of Karamay and Gwadar port. Karamay is the only city in the world named after its oil fields, a city established in the response to the needs of times. Gwadar Port is a city in the world named after its wind, a city came into existence as the situation requires.

The corporation of both cities will make them the model of cities in various fields, and will be recorded in the written history of both countries and drawn worldwide attention. It was pledged that Karamay, Xinjiang Forum will continuously offer enormous opportunities, abroad development space as well as solid people's welfare for the implement of China-Pakistan Economic Corridor and the Belt and Road Initiative.—INP

Senate body seeks execution of CPEC Western route -- The Nations
QUETTA - The Standing Committee of Senate of Pakistan on China-Pak Economic Corridor (CPEC) has demanded of the Federal govt to ensure timely releases of funds for execution of Western route of CPEC which would pass through Balochistan to connect port City Gwadar.

A meeting of the Committee held with its Chairman, Senator Daud Khan Achakzai in chair, here on Sunday which was also attended by its members including Senator Osman Khan Kakar, Senator Rozi Khan Kakar, Senator Inamul Hasan and senior officials.

Secretary Communication, Khalid Rauf and Member, National Highway Authority, Muhammad Yousaf Barakzai gave briefing to the Committee on alignment of CPEC and Zhob-Mughal Kot Road project.

Later, talking to journalists, the Chairman of the Committee and the member Senators said that they welcomed the likely visit of Prime Minister Mian Muhammad Nawaz Sharif to Quetta.

They said that the Prime Minister should play his pivotal role for timely release of funds for execution of Western route of CPEC.

It is need of hour to timely release funds for initiating construction work of western route of CPEC which would pass through Balochistan to connect Gwadar, they said.

They said that although the Federal govt had announced giving special priority to Balochistan in execution of uplift schemes, adding, that but the govt should also ensure release of development funds for Balochistan timely.

They said that the CPEC was game changer in the region which would bring economic revolution.

First phase of Gwadar port operational, NA Committee informed -- Daily Pakistan

GAWADAR (Web Desk) – A meeting of National Assembly Standing Committee on Ports and Shipping chaired by Syed Ghulam Mustafa Shah was held in Islamabad.

The Committee was informed that the first phase of Gwadar port with three multipurpose berths having a total quay length of 602 meters was now fully operational.

Sources said that the second phase is longer and mainly includes the development of port-related infrastructure projects, which cannot be carried out without the active support and participation of the private sector.

There is a need to mobilize the private sector by announcing attractive incentives and improving the security situation in Balochistan.

Minister for Defence Production Tanveer Hussain said other phases of the Gwadar port project would be functional by next year.

As a future trading hub in the region, Islamabad has already extended tax exemptions and tax holidays at the industrial zones and duty-free economic zones in Gwadar.

All Day

Pakistan, China ink agreements worth \$4.2b -- Express Tribune

ISLAMABAD:

Pakistan and China have signed financing agreements valued at \$4.2 billion for the construction of two main road projects of the eastern alignment of the China-Pakistan Economic Corridor (CPEC), thereby removing the last obstacle in starting the construction process.

The agreements were signed last week during a visit of Minister for Planning, Development and Reform Ahsan Iqbal to China, according to the ministry officials.

China's AIIB to co-finance first project with ADB in Pakistan

As per the contracts, China would provide a concessionary loan of \$1.3 billion for the 120-kilometre long Thakot-Havelian section of Karakoram Highway-II (KKH-II) and \$2.9 billion for the 392-kilometre Multan-Sukkur section of the Lahore-Karachi motorway.

The loan agreements were signed after clearance was given by the State Council of People's Republic of China. After the signing of the agreements, the contractors have been moved to the construction site, said an official of the National Highway Authority (NHA).

Both projects fall on the eastern alignment of the CPEC and are critical for connecting Beijing with the port city of Gwadar. The Economic Coordination Committee (ECC) of the Cabinet has already approved giving the contracts of the engineering design, procurements and construction to the Chinese firms.

Since China is providing concessionary loans for both projects, the contracts have been awarded on a government-to-government basis, waiving the condition of international competitive bidding.

Out of the \$46 billion CPEC investment package, roughly \$11.5 billion is reserved for the road and railways infrastructure. China has promised to give concessionary loans for four infrastructure projects. Two of these projects will get interest-free loans.

Pakistan, China divided over tax exemptions

The composite interest rate of the four projects is over 1.6%, while the interest rate of eastern alignment projects is over 2%.

The CPEC is one out of six arteries that China has planned under its 'one-belt one-road' project and, according to the National University of Science and Technology's (NUST) Chinese Studies Centre Director Syed Hasan Javed, this one-belt-one-road project has been at the planning stage for the last 20 years.

He proposed setting up a constitutional authority to monitor progress on CPEC projects – a suggestion that has already been given by the military to the government.

Javed, who is also a former ambassador, said that a clear implementation mechanism of the CPEC projects was missing and urged Islamabad to remove the obstacles on a fast-track basis.

China is also reportedly upset over the slow progress made in awarding the \$2-billion commercial contract that includes laying a gas pipeline and setting up an LNG terminal in Gwadar.

According to a report, a Chinese firm had submitted the commercial bid for the contract; it had not been opened yet.

The China Pipeline Bureau (CPB) was designated by the Chinese government to implement the project.

China, Pakistan ink \$820m Thar coal agreement

The issue of Gwadar LNG pipeline and terminal project was also discussed during last-week's visit of the planning minister to Beijing, said the ministry officials. They said the project was facing delays due to financing issues.

Ahsan Iqbal proposed to the Chairman National Development Commission of Reforms (NDRC) China to make this project part of the CPEC framework.

They said that the purpose of making the Gwadar pipeline and terminal project part of CPEC was to address financing issues. After its inclusion in CPEC framework, the Chinese financial institutions would give it 'high priority.'

"China is considering Pakistan's proposal," said the officials.

The issues related to CPEC have been largely addressed and now provinces are on board for its implementation, said the CPEC Planning Commission Cell Project Director Major General retired Zahir Shah.

Linyi-Gwadar freight train begins operation -- BR

The international freight train "Linyi," which travels from Linyi in Shandong province to Gwadar Port in Pakistan via Kashgar in the Xinjiang Uygur Autonomous Region, has been put into operation, Peoples Daily in a report said on Tuesday. The city of Linyi has over 130 specialised wholesales markets, with its total trading volume reaching 300 billion yuan in 2015. Kashgar is also an important trade port in western China.

In recent years, the cargo trade volume between the two cities has continually increased. In 2015, over 400,000 tons of cargo from Linyi was transported to western Asia via Kashgar. Lian Maoyong, Deputy General Manager of Shandong Asia-Europe International Logistics Company, said that the plywood, hardware and other commodities from Linyi are popular in the West Asia market. Cargo gets transported to Kashgar by train and then transported to Gwadar Port by truck. The whole journey is over 8,000 kilometres and takes 10 days. Compared with sea transportation, the highway-railway combined transport can save both time and money. The Linyi freight train is expected to reach an annual freight volume of 400,000 tons and realise a trade value of 2 billion yuan, according to the newspaper.

Pakistan, China agree to build Gwadar-Nawabshah gas pipeline -- The News

ISLAMABAD: In a major breakthrough, Pakistan and China have initialed an agreement to build 700 kilometers gas pipeline to be laid down from Gwadar to Nawabshah at the cost of \$1.35 billion after Price Negotiation Committee (PNC) has finalised the cost of the project.

And to this effect Inter-State Gas System (ISGS) on behalf of Pakistan and China National Petroleum Corporation (CNPC) on behalf of China on Thursday initialised the agreement.

The project will be constructed with 85 percent financing from Chinese company and 15 percent from government of Pakistan, and the price at which the gas line will be laid down is much below the estimated cost, top sources of the Ministry of Petroleum and Natural Resources told The News. The government of Pakistan will arrange the financing of Rs15-12 billion for the project from the head of GIDC (Gas Infrastructure Development Cess).

When contacted, Minister for Petroleum and Natural Resources Shahid Khaqan Abbasi confirmed the development saying both the sides initialised the agreement for building the pipeline. "We are now in the process of making summary for ECC approval and once the approval is accorded, the ISGS and CNPC would formally sign the agreement and after which the construction work would kick off. The pipeline will be constructed and commissioned by December 2017." To a question, the minister said that since the GIDC amount would be involved in the project therefore, the Ministry of Petroleum and Natural Resources had sent the PC-1 of the project to Planning Commission for approval.

However, the sources said that the project was to be built by CNPC that would arrange the commercial loan for the project. The CNPC would be given the contract on EPCF (engineering, procurement, construction and financing) basis. The impression that the project would be completed under CPEC umbrella was not correct, rather the said project would be materialised out of the CEPC initiative and it would be completed as a commercial transaction.

According to the sources, earlier Chinese side had come up with the offer to build the pipeline with diameter of 42 inches at the cost of \$2 billion, but after hectic meetings of Price Negotiating Committee (PNC) in a row, the price of the pipeline had been finalised at close to \$1.35 billion which was too much below from the expectations. Sources said under the agreement basically the pipeline of 700 kilometer would be built and another 12 kilometer portion of pipeline would also be constructed from LNG terminal to main pipeline and that particular portion would be part of LNG terminal. Once the pipeline was completed, Pakistan would extend the same pipeline with three compressor stations by 81 kilometer backward from Gwadar to Iranian border as part of IP gas line. The pipeline when it is connected with Iran will economically become more feasible as the said pipeline will transport the gas of 750 mmcf from Iran and 500 from LNG terminal. Later on Iran will increase the gas export up to 1 billion out of which 250 mmcf gas will be earmarked to cater to Gwadar.

However, the sources said, LNG terminal with 12 kilometer pipeline will be built at Gwadar port with capacity to handle LNG of 500 mmcf by the same Chinese company on BOOT (build, own, operate and transfer) basis. And to this effect Price Negotiating Committee (PNC) will start working on price of LNG terminal. The sources said that the cost of the LNG terminal at Gwadar port would be at higher side as there was no supporting infrastructure to build the LNG terminal, so one had to construct the terminal from scratches meaning by that the project would bear the cost at higher side.

Chinese offer to finance whole \$2b LNG project -- Express Tribune

ISLAMABAD: It appears that the Rs184 billion the government had collected to finance gas infrastructure projects will never be used for their intended purpose, as Chinese have agreed to finance the whole LNG Gwadar terminal and pipeline project.

Originally, the Chinese side was to provide 85% of the financing for the \$2 billion project while the remaining 15% (\$300 million) was to come from Pakistan's side. For that purpose, Gas Infrastructure Development Cess (GIDC) was to gather the needed funds for the project.

Pakistan, China ink agreements worth \$4.2b

Under the cess, Rs184 billion was collected, which translates to around \$1.8 billion, far exceeding the \$0.3 billion needed to finance the project.

The Express Tribune previously reported how these funds had already been spent on projects like Metro and Orange Line, according to officials.

When the Chinese pressed, the finance ministry stalled. The reluctance to even release the token money for the project, gave away the truth: funds were no longer available.

After having weighed Pakistan's inability to pay for the infrastructure project, the Chinese asked the government to apply for a loan – an expensive and burdensome alternative but better than nothing. But the government continued to drag its feet as it wanted to have Project Cycle-1 (PC-1) approved from the Planning Commission beforehand.

China irked by delay in Gwadar project

Left with no alternative and irked by government's inability to even apply for a loan, the Chinese have agreed to finance 100% of the project, instead of the original 85%.

All the chain of events beggar the question, if Chinese were to indeed be allowed to finance the whole project, what of the Rs184 billion cess?

History

At a time when gas shortage was becoming less of a probable scenario and more of an imminent threat, Pakistan conceived Gwadar-Nawabshah pipeline dream.

It was originally proposed as an alternative to the Iran-Pakistan pipeline, since US sanctions on Tehran at the time meant Pakistan was to surrender its own energy interests.

China-funded LNG project to turn into Iran-Pakistan gas pipeline: petroleum minister

The project is to be developed under a government-to-government agreement with the Chinese side responsible for project implementation alongside financing.

Published in The Express Tribune, May 14th, 2016.

Correction: In an earlier version of the article, the amount collected to finance the project was stated as Rs183.86 billion. The error has been corrected and is regretted.

1000 acres land acquired to set up Export Processing Zone at Gwadar -- APP

Islamabad—The Senate was informed on Friday that one thousand acres of land has been acquired for the establishment of Export Processing Zone at Gwadar. Minister for Industries and Production Ghulam Murtaza Khan Jatui told the House during question hour that a consultant has been hired for the planning, designing and operation of PC-1 of the project. He said PC-II for appointment of consultant had been approved and EPZA had hired the services of M/s. Techno Consultant International for Planning, designing and preparation of PC-I for Gwadar EPZ. Jatui further told the House that the Utility Stores Corporation (USC) was operating 5455 stores throughout the country, providing daily use commodities to masses at affordable level.

Answering a question in the Senate the minister said in Punjab there 2993 stores in Sindh 671 3, Khyber Pakhtunkhwa 1312 4, Balochistan 294, AJK 80 and in Gilgit-Baltistan 105 retail outlets. He said out of 5455 stores, 4472 stores were regular stores of the Corporation being operated by Corporation itself and 983 were functioning as franchise stores. He said the data relating to complaints of the stores was being maintained at regional level.

Answering another question, the minister said an Rs 4,246.21 million subsidy was provided to Utility Stores Corporation under Ramazan relief package during the last three years. He added subsidy on sugar procured through Trading Corporation of Pakistan (TCP), Ministry of Commerce was discontinued in pursuance of ECC of the Cabinet's decision. However, he said a quantity of 204,978 Metric Tonnes already procured by TCP for USC was provided from 2014 to May, 2016.

He said the government provided Rs 15, 965. 558, Rs 10,447.828 and Rs 1,433.675 million subsidy on sugar during in 2013, 2014, 2015, respectively. He said the Ministry of Industries and Production was implementing 23 ongoing PSDP projects in various districts of all the provinces during current financial year. He said out of the total portfolio, Ministry of Industries and Production was sponsoring 12 projects worth Rs. 5.740 billion and allocation of Rs. 313.893 Million during CFY 2015-16 for development of infrastructure and establishment/promotion of industries in less developed areas of Balochistan, KPK and Sindh.

While Minister for Planning, Development and Reform Ahsan Iqbal replying to a question relating to his ministry said at present there are a number of Chinese working on various projects in Pakistan. However, in view of security considerations, he added it would be appropriate not to make the number public. He said security of Chinese working in Pakistan on various projects lies with M/o Interior, being the focal agency responsible for security of the Chinese. He said a Special Security Division (SSD) has been raised comprising 9,000 Army personnel and 6,000 civil armed forces, which would be deployed to ensure security of Chinese working on CPEC projects.

Gwadar to become game changer: Dastagir -- APP

QUETTA: Federal Minister for Commerce Khurram Dastagir has said that Gwadar is going to become game changer for the entire region.

He was addressing a launching ceremony of Pak-Iran Joint Chamber of Commerce and Industry, here on Monday. He said that the federal government would construct warehouse in Taftan and Expo Center in Quetta, respectively.

He said that the nation had pinned hope on mega projects of China-Pak Economic Corridor (CPEC) and Gwadar Deep Sea Port which would boost national economy, adding that Gwadar would be proved a game changer for the entire region.

The minister said that most of funds were allocated for power production projects to be executed under CPEC. He said that bright future of the region linked with CPEC and Gwadar projects.

He said that the federal government has planned to construct a warehouse in border area of Taftan and Expo Center in Quetta to strengthen local and national economy and to support trade activities. "If the Balochistan government provides land, the federal government will construct warehouse in Taftan and Expo Center in Gwadar," he said.

Dastagir said that Pakistan wanted neighboring countries of Iran and Afghanistan to extend their fully cooperation for strengthening mutual trade relations. "Around US \$ 35 billion will be spent on power production projects in the region," he said, adding that several road projects would also be executed under CPEC and other mega projects.

Others who spoke among them were former federal minister Aijazul Haque, Balochistan Assembly Speaker Raheela Hameed Khan Durrani, Iran's Consul General Majeed Sadiq and Provincial Minister Sheikh Jaffar Khan Mandokhel.

**Quetta-Gwadar section of western route to be operational by Dec --
Observer**

ISLAMABAD - Federal Minister for Planning, Development and Reforms Ahsan Iqbal said on Monday said that apart from investment in physical infrastructure, CPEC would integrate the economies of China and Pakistan and industrialise Pakistan by turning it into a trading & manufacturing hub of the region.

Speaking at a seminar titled, 'Symbol of immortal friendship - icon of iron brotherhood', organised by the Ministry of Planning and Development in connection with 65th anniversary of Pak-China diplomatic relations, he said, "Pakistan is investing in CPEC projects from its own resources, and alongside it, it is seeking monetary assistance from multilateral financial institutions under the CPEC framework.

" He said that China jumped to top foreign investor position in Pakistan after CPEC, whose first phase would be completed in 2018.

Ahsan described the holding of the event at his ministry as a testimony to the fact that bilateral relations had entered into geo-economic orbit.

"When the prospects were not promising for Pakistan, China reposed confidence in Pakistan by promising investments in CPEC, when foreign and local investors were reluctant to come forward," the minister said, and added: "CPEC should not be construed merely as a bilateral agreement, but it should be seen in a broader context.

" Ahsan said future of CPEC depended on business enterprises in both China and Pakistan.

"Business enterprises in both countries will take over as they will realise the real potential of CPEC in the coming years" he prophesied.

Ahsan said that Quetta-Gwadar section of the western route would become operational by December 2016 that will provide Afghanistan and Central Asian states access to the Gwadar port city.

He informed that DI Khan and Burhan sections of the western route would be completed by June 2018.

He pointed out that due to CPEC, for the first time, the neglected treasure of coal Thar would be utilised for power generation.

The minister expressed the optimism that CPEC would trigger economic activities in far flung areas of Balochistan.

Addressing on the occasion, Chinese Ambassador to Pakistan Sun Weidong said that CPEC had uplifted bilateral relations to strategic economic partnership, and added that economic diplomacy now played an active role in relationships between states.

He congratulated Ahsan on playing a key role in CPEC

Both Ahsan and Weidong also jointly cut the cake of 65th anniversary of diplomatic relation between China and Pakistan.

DEVELOPMENT IN GWADAR WILL INCREASE WITH COMPLETION OF PROJECTS UNDER CPEC -- Radio Pakistan

Development in Gwadar will increase with completion of projects under CPEC

Planning Minister Ahsan Iqbal says steps have been taken to attract Chinese and other foreign investors to invest in Gwadar. In an interview, he said the pace of Development in Gwadar will increase completion of projects under China-Pakistan Economic Corridor. He said Pakistan's exports will increase after completion of Gwadar Port. The connecting roads with other parts of the country will be completed at the end of this year. Ahsan Iqbal said besides other incentives, the government has declared Gwadar tax free zone for twenty-three years. Country has been put on the right track with economic indicators showing positive trend. The economic performance has also been appreciated by the world's leading financial institutions. Meanwhile, President Mamnoon Hussain has China-Pakistan Economic Corridor is not merely a bilateral project but the entire region will benefit from it. Pakistan will emerge as a hub of international trade with completion of this mega project. Central Asian states have already started planning projects to connect with the CPEC. The project will create hundreds of thousands of new jobs and the youth should get themselves prepared to seize opportunities. Under CPEC, Gwadar deep sea port will be made functional by the end of this year.

Finance Minister Ishaq Dar stresses the need for making joint efforts to stabilize economic gains

Finance Minister Ishaq Dar has stressed the need for making joint efforts to stabilize economic gains. Addressing a pre-budget seminar in Islamabad, he said the opposition members need to sit with the government and evolve a charter of economy so that fundamental economic policies are not changed with change of government to ensure speedy development. The Minister assured that no new tax burden will be put on the existing taxpayers in the next budget. He, however, said the government will specially target the non tax filers in a bid to force them to come into the tax net. Government would enhance development expenditure while no new burden would be put on the existing taxpayers in the budget for 2016-17. The Finance Minister said during last three years, the Pakistan Muslim League-Nawaz government's prudent economic policies had managed to stabilize the dwindling economic condition as had been endorsed by the major international rating agencies. When the PM-N government came into power in May 2013, it had inherited a dwindling economic condition and international financial institution were declaring Pakistan as a macro-economically de-stabilized country. International financial institutions like IFC and ADB had closed their doors for business with Pakistan. There was some 18-hour load shedding in rural areas and 16-hour electricity breakdown in urban areas, he said. Present government took bold decisions to stabilize the national economy and saved the country from a possible default. Government took power the budget deficit was 8.8 per cent which had now been brought down to 4.3 per cent and Dasu hydel project to overcome the energy crisis. US \$ 46 billion China Pakistan Economic Corridor (CPEC) initiated with the help of China would bring prosperity in the country. If Pakistan stayed on course it could become the 18th largest economy by 2050.

Pakistan trade caravan makes final stop at Dushanbe

Pakistan Trade Caravan, which held successful trade shows in Almaty, Kazakhstan and Bishkek, Kyrgyzstan, has now reached Dushanbe, Tajikistan on its final leg. The two-day caravan was jointly inaugurated by the Tajik Deputy Minister for Economic Development, Secretary Trade Development Authority Pakistan (TDAP) Rabiya Javeri Agha, and Pakistan Ambassador to Tajikistan Tariq Iqbal Soomro. Addressing a news conference, the Ambassador said the two countries have vast business potential, which needs to be tapped. About forty different companies from Pakistan exhibited their products and expertise.

SECP reduces company formation fee to encourage corporatization

With the aim to bring the non-corporate businesses into the corporate fold and incentivise existing companies, the Securities and Exchange Commission of Pakistan (SECP) has decreased the fee for the formation of a company as well as for the filing of returns being charged under the Sixth Schedule to the Companies Ordinance, 1984, effective from May 31, 2016. The corporate sector regulator issued an SRO notifying a reduction of 60 per cent fees in the first slab of capital fee for new incorporation cases to Rs1,000 for online and Rs2,000 for offline submission from Rs2,500 and Rs5,000, respectively. The fee structures for other slabs of the capital fee too have been rationalised. SECP has also made significant reduction in filing fee for returns, particularly for small sized entities, by introducing capital based filing fee starting from as low as Rs250 for online and Rs500 for offline submission replacing the existing structure of fixed filing fee of Rs600 and Rs1,500, respectively. In order to further incentivise the corporate sector, the SECP will also provide a set of certified copies of all incorporation documents free of cost on its registration. There are around 60,000 companies registered with the SECP, but the officials expect that the number could jump several folds only if tax relief is provided to the business opting to form a registered company.

Funds for Gwadar Safe City project released -- Daily Times

QUETTA: Balochistan Chief Secretary Saifullah Chhattah said that the federal government had released funds from the Federal Public Sector Development Programme (PSDP) for implementation of Gwadar Safe City project.

"The provincial government has also finalised arrangements to start construction work in this connection," he said in a meeting which was held with Balochistan Chief Minister Nawab Sanaullah Khan Zehri in chair here. The meeting was also attended by Home Minister Mir Sarfaraz Bugti, Inspector General of Police Ahsan Mehboob, Home Secretary Dr Akbar Harifal and divisional commissioners.

He said that the federal government had released funds for Gwadar Safe City Project and work on the project would start soon. He added that a Chinese ship loaded with machinery for Gwadar Port had reached Gwadar and berthed at the port. "Two more Chinese ships from Shanghai, China will reach Gwadar soon," he said.

The chief secretary said that a team of Chinese engineers and technical experts would reach Quetta to prepare feasibility report for the Mass Transit Train which will run between Kuchlak and Quetta to provide traveling facility to local people.

Saifullah said that during the chief minister's recent visit to China, the Chinese and Pakistani officials agreed that China would extend its collaboration to make feasibility report on Quetta Mass Transit Train System. "Therefore a team of Chinese engineers and technical experts will reach Quetta on May 25," he added.

**Pakistan considering to link Gwadar with Chabahar: Sartaj Aziz --
Express Tribune**

ISLAMABAD: Prime Minister Nawaz Sharif's top aide Sartaj Aziz on Thursday said Pakistan was considering linking Gwadar with Iranian harbour Chabahar.

"Pakistan welcomes projects of regional connectivity which have the potential to generate economic activity," Aziz said while responding to a question during a press briefing.

The adviser hinted at a proposal of declaring Gwadar and Chabahar as "sister ports" and said Pakistan was also constructing a road to the Iranian port being developed by India, Iran and Afghanistan.

Chabahar port — the new game changer?

"A number of proposals for regional connectivity are on the cards and even China is pursuing routes other than China-Pakistan Economic Corridor (CPEC) in the region."

War against terror

In response to a question regarding the country's losses in the war against terrorism, Aziz said, "Pakistan has suffered 60,000 casualties of which about 10,000 are those of security personnel."

The foreign affairs adviser said the war against terror had also caused a \$110 billion loss to the country's economy, adding it was not justified to equate the US financial assistance to Pakistan as "aid" because it was a "reimbursement" of what the country had lost to fight militancy.

"We don't want to meet our losses through American aid. We want an overall cooperation by the United States which is more important for the region," he said.

Commenting on the implementation of Pakistan's anti-terror programme, Aziz said it had been successfully implemented followed by the on-going National Action Plan (NAP).

Iran, Afghanistan, India sign three-way transit accord

"We have the ability to deliver better when facing challenges," the adviser said when asked about Pakistan's strategy to cope with the current challenges.

He said being a nuclear power and a stable economy, Pakistan would sail smooth and move forward by overcoming the current issues.

China to build mega oil pipeline from Gwadar to Kashgar -- The Nations
ISLAMABAD - Work on Gwadar-Kashgar oil pipeline that would carry one million barrel per day (1MMBD) Middle Eastern oil to China will start in 2017, it is learnt reliably.

Another milestone in the Pak-China relation is nearing as China is getting ready to shift around 17 percent of its oil import to Gwadar-Kashgar oil pipeline, official sources told The Nation here. The five-year project is likely to start in 2017 and will be completed by 2021, the source added.

It is the part of the Chinese policy of revival of silk route as the pipeline will be built along this ancient trade route. The project will be funded by the Chinese government and Frontier Work Organization (FWO) will execute the project for them, the source maintained.

Silk route was rebuilt by the FWO and Chinese want them to utilise their previous experience in the laying of oil pipeline, the source added. The FWO has already given its presentation on the project to the ministry concerned and is likely to embark on the project in 2017. The final length, route and cost of the project are yet to be finalised.

Gwadar is near the Persian Gulf and close to the Strait of Hormuz, which holds two-thirds of the world oil reserves and from where an estimated 17 billion barrels of crude oil passes daily. The port opens up a 3,000km-long trade corridor that will connect Gwadar to Kashgar, in China's western Xinjiang region, via roads, railways and pipelines to transport oil and gas.

The Chinese Overseas Port Holding Company (COPHC) took over the Gwadar Port in 2013 for 40 years. Beijing and Islamabad signed \$46 billion China Pakistan Economic Corridor (CPEC) which includes, energy projects, building of new roads, railway lines and a network of oil pipelines to connect Kashgar to Gwadar.

The new 3,000km (1,500 mile) network of highways, rails, and oil pipelines will give China quicker access to Europe and the Middle East. Currently, china is importing around 6 million barrel oil per day from different countries of the world via sea route, and the Gwadar-Kashgar pipeline is likely to take around 17 percent of the share of total Chinese import.

The existing sea route being used by China passes through the risky South China Sea, Pacific Rim, the Strait of Malacca and Sri Lanka, and Chinese ships have to cruise about 10,000 kilometres for reaching its final destination. The Gwadar Port will reduce the sea distance to 2,500 kilometres and land distance for Kashgar to 2,800 kilometres because Kashgar is 4,500 km from the main Chinese port of Shanghai. The CPEC related projects will not only save China time but also millions of dollars.

The overland route, via Pakistan, eliminates the need to ship crude through Malacca Strait. Chinese will establish a massive Industrial Park at Gwadar, which will house an oil city and petroleum refining zone beside dozens of other technical and logistical installations. This will help China meet its energy needs.

All Day

'CPEC is most important agreement in history of Pak-China cooperation'

-- **Daily Times**

ISLAMABAD: Federation of Pakistan Chambers of Commerce and Industry (FPCCI) President Abdul Rauf Alam on Tuesday said that China Pakistan Economic Corridor (CPEC) was the most important agreement in the history of Pakistan and China cooperation which would not only strengthen Pakistan's economy but it would also be an impregnable line of defence.

The economic corridor would push bilateral economic, political and cultural relations to new heights which would be beginning of a new era of prosperity which is not acceptable to some countries.

Speaking at 11th China-South Asia Business Forum, he said, "Friendship with China is our most precious asset while CPEC is a game changer project which cannot be compromised at any cost." The FPCCI president said Chinese impressive progress had amazed whole world which proved that their economic model was one of the best and that now time had come that private sector of both countries use each other expertise to excel in various fields including energy, infrastructure, tourism and mining etc.

He said, the Corridor for Pakistan was the strongest pillar of economic, commercial and cultural connectivity between Pakistan and China and its regional impact would be very positive.

The network of roads, railways and industrial parks would herald a new era of development and prosperity to benefit three billion people, he added. He said, it would bring China's financial and industrial capacity and technological ability with Pakistan's plentiful resources, hard-working labour and market.

Rauf Alam said, it was a matter of few years when China would become world's greatest economic power which would also help Pakistan's economy. "CPEC is a significant part of the 'Belt and Road' initiative," which is not only a domestic strategy of China to open up its central and western regions, but also a highly laudable regional and international development proposal," he observed.

He said China had assured Pakistan that any change in the international political scenario would not impact the CPEC plans which is very heartening. Pakistan and China, he said, were best friends while Beijing had always unconditionally supported Pakistan. "China has played very vital role in development of Pakistan and we will not compromise our brotherly relations at any cost," he added.

The cordial ties between two countries had reached new heights with the launch of CPEC as for the very first time economic relations had gained more importance than then political ties. He said, the project would be completed well in time while Pakistan was providing enhanced security to Chinese nationals working for the \$46-billion project as the country's domestic and foreign nations were using "extreme means" to sabotage the ambitious project.

All Day

Pak, China agree to boost cooperation in agriculture sector -- Pakistan Today

Minister for Commerce Khurram Dastgir Khan met the Secretary of Communist Party China of Yunnan Province Li Jiheng in Kunming, China.

The two leaders expressed satisfaction over the successful fourth China-South Asia Expo, especially with regards to Pakistan's active participation with the largest country pavilion.

They exchanged views on the current status of economic and commercial ties between the Chinese province and Pakistan. The two leaders also agreed to focus on ways and means to further promote ties between the countries in a comprehensive manner.

The commerce minister said that bringing Pakistani agricultural products like rice and fruits to Yunnan could be an important step in this direction.

The Secretary of Yunnan Party agreed that the two sides needed to work closely in this area.

In addition, it was also agreed that concerted efforts will be made to enhance people to people contacts and cooperation in important fields of science and technology, culture, tourism and education.

The minister is visiting Kunming to lead Pakistan's delegation to the fourth China-South Asia Expo being held from 12th to 17th of this month.

All Day

Pak-China road to prosperity -- Pak Observer

Recently China has been emerging as an economic power by not only spreading its wing over Asia and South Asia, but encapsulating under its influence the Western countries as well. Where Pak-China ties have been withstanding the tests of time, they have been pursuing projects of regional harmony and the ones fortifying their bilateral relations. Including such deals was the China-Pakistan Free Trade Agreement signed between the two countries in 2007 according to which the trade volume between them increased from \$13 billion (2013) to \$20 billion (2015). However, last year in April 2015, the two countries signed another major agreement, which began the work on the China-Pakistan Economic Corridor, worth \$46 billion. This agreement has been the cornerstone for reviving Pakistan's economy and enhancing the trade between Pakistan and China. Also part of the OBOR is agreement to construct the Maritime Silk Road or the 21st Century Maritime Silk Road. The goal of this initiative is to bolster alliance in various regions of Oceania, North Africa, and Southeast Asia via key maritime areas, which are the India Ocean, the South China Sea, and the South Pacific Ocean. Where China's investment in Pakistan will uplift its economy and provide it with initiatives for job creation, it will also create opportunities for infrastructural development in areas where extremist factions reside, hence reducing their threat, and bringing development in those areas. Therefore, reforms are likely to occur in Balochistan and Khyber-Pakhtunkhwa. Despite assurances from Islamabad and Beijing, the success of CPEC cannot be guaranteed as Pakistan remains an agriculture country, its manufacturing sector has been stagnant, and it does not value innovation, while the political influence remains hovering over all its sectors and decisions.

Moreover, Pakistan may not be able to stay at par with China's economic progress and the degree of innovation it houses in its many sectors. Furthermore, Pakistan must assure that China's recent investments in Pakistan must reach the stakeholders and should not be concentrated in the hands of the few – the ones who have been reaping fruits of such deals in the past.

India's pursuit to gain regional hegemony in South Asia might take a back seat with China investing heavily in Pakistan. India might try to reduce the pace of development works related to the CPEC. However, India-China ties may also face friction and therefore affect Pakistan-India relations. India's recent ambition to become part of the 48-member exclusive Nuclear Suppliers Group (NSG) may also aggravate the tension that Pakistan and India have been facing for decades. India would likely fortify its relations with US, which it has begun doing following the recent visit of India Prime Minister Narendra Modi to the US. Moreover, new US President who will take oath to office on January 20, 2017, will likely bring in new foreign policy initiatives for both Pakistan and China and it can affect the CPEC or the OBOR. However, with China already exerting its influence on South Asia, it is unlikely that Washington may be able to sway China from its primary economic objectives and plan with Pakistan.

China Petroleum cuts \$200 million cost estimate for Gwadar LNG pipeline -- Pakistan Today

China Petroleum Pipeline Bureau signed a gas pipeline deal with Pakistan at a lower price as the Chinese company, has revised the cost of laying the pipeline downwards to \$1.3 billion after negotiations with the government in Islamabad.

According to an official, Pakistan and the Chinese company had initialed an agreement for building a Liquefied Natural Gas (LNG) pipeline from Gwadar, but the company has now lowered the contract price to \$1.3 billion compared to \$1.5 billion quoted in the financial bid given to Inter-State Gas Systems.

Earlier, China had expressed concerns over the slow progress being made in awarding the contract for the LNG pipeline.

A revised PC-1 of the project has been approved by the Central Development Working Party of the Planning Commission. Now, the project has been sent to the Executive Committee of National Economic Council (Ecne) for formal approval.

According to the official, Pakistan will negotiate a loan agreement with the Export-Import Bank of China that has already made an offer in this regard.

He said the gas utilities were working on extending the pipeline network at a cost of \$1.1 billion that amounted to \$34 per inch metre, but the cost of building the Gwadar LNG pipeline was \$32 per inch metre.

The Chinese company will also construct an LNG terminal at Gwadar Port on the build-and-operate model and it will be able to handle 600 million cubic feet of LNG per day.

The previous Pakistan People's Party-led government had imposed gas infrastructure development cess (GIDC) on gas consumers for laying these pipelines and so far Rs183 billion has been collected.

However, the current PML-N government has spent the entire collection on metro bus projects and nothing is left for implementing gas import projects.

For the Gwadar LNG pipeline and terminal project, China will provide 85% of financing whereas Pakistan will contribute the remaining 15%. This is an additional burden that gas consumers will be bearing in addition to paying billions of rupees in GIDC.

All Day

Industrial zone in Gwadar to create 40,000 jobs: GPA chief -- Daily Times

QUETTA: Gwadar Port Authority (GPA) Chairman Dostain Khan Jamaldini Friday said that work on construction of an industrial free zone in Gwadar was underway and the port city alone would create about 40,000 jobs in future.

The construction of the 10 square kilometres industrial zone is underway with a total outlay of \$2 billion, where Chinese, Middle East, European and Pakistani investors have planned to establish 300 factories, said Jamaldini

"The Chinese firm is spending \$2 billion for construction of roads, provision of electricity, gas and water in the industrial zone which will be completed within stipulated time," he said, adding work on road network, railway track and communication infrastructure from Chinese province Xinjiang to Gwadar was in full swing.

Pakistan, he said, had started work on different sections of CPEC in shape of roads including Skardu-Hawalian, Multan-Sukkur, Gwadar-Hoshab, Gwadar-Rato Dero, Mughal Kot-Zhob and others

Under the CPEC, the chairman said a power plant of 300MW is being established in Gwadar which run simultaneously on coal, diesel and gas. "A LNG plant is also

being established in Gwadar to meet energy requirement of new industrial units to be set up in the port city," he said.

Jamaldini said that the CPEC infrastructure of road network would be completed by 2018 while other projects would continue till 2030.

"It is flagship project of One Road, One Belt initiative by Chinese leadership to be implemented by 2030," he said.

He said that technical and vocational training institutes were being established in Gwadar, Quetta, Khuzdar and other cities of Balochistan to provide training to youth in industrial parks being established in Balochistan as part of the CPEC.

He said work on 19km long East Bay Expressway was underway which would connect Gwadar International Airport to Gwadar Deep Sea Port Early harvest project is also being executed in Gwadar with an estimated cost of Rs 14 billion, he added.

All Day

**Chinese minister hopeful of successful completion of all CPEC projects
-- Pakistan Today**

Chinese Assistant Foreign Minister Li Huilai said that his country will provide all possible support to Pakistan ensuring success of projects under the China-Pakistan Economic Corridor (CPEC).

"We attach high importance to CPEC since it is a pilot project of China's initiative of One belt One Road," he said adding that this connectivity plan is aimed at bringing peace and prosperity in the region and the world as a whole. Pakistan, he said, is their best friend and they wished to take their decades' old relationship to a new height through frequent socio-economic interaction and people-to-people contacts.

"The Chinese government is encouraging its business community to make maximum investment in Pakistan for the success of CPEC," Li Huilai said, and added that this in an informal chat with a media delegation consisting of over 30 representatives from 18 member states, observer states and dialogue partners of the Shanghai Cooperation Organization (SCO). The visit was arranged on the occasion of the 15th anniversary of SCO.

The minister expressed his confidence that the concept of One Belt and One Road will not only raise the living standards of the people of both sides but will also positively affect the entire region. Replying to a question, he said that CPEC is the best example of growing Sino-Pak relationship.

Earlier, at the formal news briefing, Li Huilai said that Pakistan's entry into SCO will enhance the organization's status and influence to effectively address security issues, and give a boost to socio-economic partnerships among the member countries.

Welcoming Pakistan, which is set to become a full-member of the SCO, he said that it would be an important development in addressing issues of common interest in the future. Pakistan is an important country of the region and its role towards security and counter-terrorism is highly positive, he added.

The minister said that China has been supporting the expansion of the organization and attached high importance to Pakistan's role as its full member. Pakistan will be joining the organization at a time when the organization celebrates its 15th anniversary.

He hoped that the SCO's Summit, which is going to take place in Tashkent on June 23 and 24 will be a landmark event for making the organization more strong and effective, particularly to deal with the security issues. The Summit, he said would adopt a common strategy on counter-terrorism. China is willing to work with the member states to promote peace and development in the region, he further said.

Li Huilai elaborated China's contribution and support to SCO and said it was done for a win-win situation and mutual benefit. He said that they laid special focus on upholding the 'Shanghai Spirit' that aimed at achieving common prosperity and promoting socio-economic collaboration and cultural exchanges.

China being the founding member of the SCO, the minister said, is always committed to promoting better regional connectivity and economic development which could ensure better living conditions of the people.

The concept of the organization is to further promote economy of member states and enhance cooperation among them in all fields of common interest. China, being the second largest economy of the world, has the maximum foreign reserves which have been a source of better life not only in the Chinese cities but also for the people of relevant countries as a whole, he added.

Success of CPEC linked to Gwadar, says naval chief -- Pakistan Today

Chief of Naval Staff Admiral Muhammad Zakaullah said that the overall success of the China-Pakistan Economic Corridor (CPEC) hinges on the development of Gwadar port.

According to the Inter-Services Public Relations (ISPR), Admiral Zakaullah who visited Gwadar the other day was briefed regarding the ongoing operational activities and associated security aspects at the port, particularly with respect to the CPEC. He inspected the naval installations around Gwadar and inspected the operational readiness of Pakistan Navy units deployed in the area.

He expressed Pakistan Navy's resolve to ensure the seaward defence of vital maritime infrastructure and protect maritime interests of Pakistan against all threats. He reiterated that development of the Gwadar port will be the lynchpin for the overall success of the CPEC.

While talking to the officers and servicemen of Pakistan Navy, the admiral applauded their professionalism and dedication in safeguarding the maritime frontiers of the country. He expressed his satisfaction on the port security measures and operational preparedness of the Pakistan Navy in their area of responsibility.

Upon his arrival, the admiral was received by Commander Coast Rear Admiral Waseem Akram, the ISPR said. Later in the day, he held an informal interaction with navy officers and servicemen, the military's media wing added.

Gwadar airport to cost \$260m -- APP

ISLAMABAD: With construction costs estimated at \$260 million, Gwadar International Airport would be capable of handling the largest of passenger planes including the A380 Boeing jet.

The entire amount would come in the form of a grant from the Chinese government, the Parliamentary Committee on China-Pakistan Economic Corridor (CPEC) was informed in its recently held meeting here.

Additionally, the Chinese government has given a grant of \$10 million for building the Pakistan-China Vocational and Technical Training Institute to help locals acquire skills.

Gwadar Port Authority Chairman also informed the committee that the water problem of Gwadar was being sorted out with the construction of Sawad dam where water would be provided to Gwadar through a 83km pipeline and the water shortage of Gwadar would be resolved in that manner.

Gwadar airport to give boost to CPEC -- Observer

GWADAR international airport to be capable of handling the largest of passenger planes including the A380 Boeing jet is being constructed at a cost of \$ 260 million dollars, and the amount for the airport is a full grant from the Chinese friends. Since the Gwadar international airport is an important segment of the multi billion dollar game changer China-Pakistan Economic Corridor project, therefore early implementation of this project is vital to accrue full benefit from the corridor project. To make the Gwadar port fully operational and hub of regional trade, it is important that the port city's air, rail and road links are developed in a satisfactory manner as per the international standards. According to the Chinese and our government officials, the Gwadar port will be made fully operational by the end of this year, therefore, it has become all the more necessary that Gwadar airport project, which is being dubbed as the country's biggest and most modern landing field be implemented at the earliest in order to facilitate the visiting businessmen who are showing great interest for investment in the Gwadar special economic zone. The airport project will indeed serve as a catalyst for enhancing investment and development in Gwadar and catering to the requirements of a bustling industrial commercial city. We have no doubt in mind that the facility, because of its geo strategic location, will serve as a major hub for international flights operating in the region. Additionally, emphasis should also be laid on the skill development of the local population so that they could get jobs and fully exploit the economic activities to be generated by the execution of mega projects under the CPEC. While we appreciate the government for planning to establish Gwadar University for the promotion of higher education in the so far neglected area, it is also heartening to note that Chinese government has also given a grant of ten million dollars for building the Pakistan-China Vocational and Technical Institute. We expect that the government will not waste any time in the implementation of this important project, as it will make the local youth ready to take up technical jobs at the port and make it a success story.

Gwadar another Dubai emerging on world map: Chinese media -- The Nations

BEIJING: Gwadar, another Dubai is emerging on World's map, that will change the economic scenario of not only Pakistan but whole of the region, reports Chinese media.

There will be a ceremony next month marking the completion and commencement of major infrastructure projects in Gwadar that also greatly boost the city's function as an economic engine for the country.

A water dam, a hospital and a school will be put into use in August, while the construction of the Gwadar International Airport, a seaside expressway, a training center and a pipeline will begin in the meantime.

Most of the projects are financed by China and falls under CPEC, Xinhua reports quoting Gwadar Port Authority Chairman Dostain Jamaldini.

COPHC, a Chinese company managing the Gwadar port, also said it will start developing the Gwadar Free Trade Zone (FTZ) this month with an initial investment of \$ 150 million.

"First phase projects in the FTZ include a multi-function business center, a exhibition hall for Chinese goods and cold storage," COPHC Pakistan chief Wu Chunguo said.

The FTZ and the Gwadar Special Economic Zone are two areas that the Pakistani government has granted preferable policies to attract investments, with tax exemptions for companies inside the two zones for 23 years and 10 years respectively.

A town with a population of less than 100,000, Gwadar was once a territory of Oman before being purchased by Pakistan in 1958. It is gifted with a natural deep-water harbor that falls close to main shipping lanes and an anchor-shaped peninsula that acts as a breakwater shielding the harbor from the waves of the Arabian Sea.

An arid climate and isolated location once limited locals to rely on the meager income brought in by fishing.

Though development plans had been drawn up by the Pakistani government in 2002, the town remained dormant for another decade before China chose the port as one of the four focuses for its ambitious scheme to overhaul Pakistan's infrastructure.

The other three are upgrading road and railroad networks, patching up the energy sector and establishing industrial parks, all projects that stand to benefit from a prosperous Gwadar port.

Seizing the momentum brought by CPEC, the Gwadar government is hoping to develop the coastal town into a modern metropolis with a major port, industrial zones, tourist attractions, recreation grounds and high-end real estate.

It certainly seems that the town is moving in that direction, says Wu of COPHC. "We are seeing an increasing number of businesses coming for talks to invest in the port. In April we received more than 350 business representatives, a record high."

Land prices, a barometer that measures investor confidence, has more than doubled in the past two years, Jamaldini said.

An acre of land in the FTZ, which cost 3.4 million Pakistani rupees (32,000 U.S. dollars) in 2014, is now priced at more than 10 million rupees (95,000 US dollars), he said, adding land price for the most prime location on the tip of the peninsula is even higher.

Encouraged by the upcoming boom, locals are ready to move on from harvesting fish to harvesting a better life.

Dubai is the word often used when the people of Gwadar picture their future, believing the huge opportunities created by CPEC will transform their fishing town to a center of business, shipping and tourism. "What Dubai can achieve, so can we," Jamaldini said.

CPEC PROGRESSING WELL, EARLY HARVEST PROJECTS PUT ON FAST TRACK: AHSAN -- BR

ISLAMABAD: Federal Minister for Planning, Development and Reforms Ahsan Iqbal said Monday that China Pakistan Economic Corridor (CPEC) was the top priority of the government and its early harvest projects would be completed at fast pace.

Chairing a high level fortnightly review CPEC meeting, the minister directed the authorities concerned to execute work on the Western passage with full thrust and provide update in each fortnightly meeting.

Minister further directed that the timeline of each project must be specified and pursued for timely completion.

He expressed satisfaction over the progress of ongoing CPEC projects and urged for finalizing Long Term Plan (LTP) of CPEC at the earliest.

The Federal Minister directed for speeding up work on all infrastructure projects and also directed that since Gwadar was in focus, so some of its projects should hit ground breaking in the month of August with the independence day celebrations.

He directed for carrying out the work on Gwadar International Airport and Gwadar seaport projects on fast track basis.

Meeting reviewed the progress on projects in energy, road infrastructure, railway and Gwadar under CPEC framework.

The minister directed for maintaining the momentum in the construction work on CPEC projects to ensure their completion in stipulated time frame. He said that construction work on various projects of different sections of Western route should be completed as per the timelines to operationalize it at the earliest.

While reviewing the energy projects the Ministry of Water and Power appraised that work on Port Qasim Power Plant, Thar Power Plant, HUBCO coal Project, Sahiwal Power Plant and other hydro power projects is on track and these would be completed as per the schedule.

He said fast track work on these projects is necessary to tackle the energy crisis and power needs of industrial zones in future under CPEC.

Ahsan Iqbal said that provincial governments should play proactive role to attract foreign investment in respective provinces as this is not only for the interest of projects, but also necessary for the economic growth and development of provinces.

China attaches high priority to CPEC, says Zhao Lijian -- The Nations
ISLAMABAD: Deputy Chief of Mission, Chinese Embassy Zhao Lijian said his country attaches high importance to the Corridor Project that meant to improve the living conditions of the people and overcome problems like power shortage.

There are thirty China-supported infrastructure and energy projects and five more would be added under CPEC's framework this year. "Eight coals, solar, wind and hydro-power energy projects are also under construction to meet the energy requirement of the country," he said at a function held here at Chinese Embassy in connection with teachers' training program.

Chinese companies are also implementing two mega projects including Thakot-Havailian section of Karakurm Highway (KKH) and Sukkur-Multan section of Lahore-Karachi motorway at a cost of \$ 3 billion.

Zhao Lijian said, prior to signing of CPEC between China and Pakistan in 2013, China was at number 16 in terms of Foreign Direct Investment (FDI) in Pakistan, adding, now China is largest investor in Pakistan after initiating multi-billion dollars project under the CPEC framework.

He said, this project would not only change the life of people of Pakistan in days to come but also prove beneficial for the whole region. Referring to the celebrations of 60th anniversary of Pak-China Diplomatic Relations, he said, the relations between the two brotherly countries are touching new heights after the signing of CPEC.

"The flower of China-Pakistan friendship will become more beautiful in future," he commented.

CPEC to make Pakistan gateway for Central Asia and beyond: Gen Janjua -- Daily Times

ISLAMABAD: National Security Advisor, Lt. Gen. (Retd) Nasser Khan Janjua said on Monday that China-Pakistan Economic Corridor (CPEC) provided Pakistan a great opportunity to become a gateway for Central Asia and beyond. "We see a greater fortune here as Pakistan is going to become a gateway for the Central Asia and ultimately to Russia through this mega project", Nasser Janjua said while addressing a meeting of Islamabad based senior members of the Supreme Central Committee of 101 Friends of China here.

The meeting was attended by intellectuals, economic experts, former ambassadors and former secretaries. Speaking as chief guest of the event, Gen Janjua said where there were opportunities, there were always challenges to be faced. General Janjua said China was heading towards becoming the leading economy of the world which was not acceptable for some dominating world economies.

He said two trends of international power politics prevailed these days - first of which was the containment of China and the second was to prevent resurgent of Russia as a big power, Gen. Janjua said. He warned, these two trends would affect Pakistan the most.

He said the economies of existing allies of the United States were already saturated, therefore it (the US) was looking towards India as emerging economy in a bid to contain China. He said the \$46 billion CPEC would help China and Pakistan change the fortune of the people of both countries as well as the region as it was going to be a trade corridor.

Addressing the event, Chairman 101 Friends of China, Zahid Malik announced that the Secretariat of the Think Tank was all set to mark a beginning of opening its chapters in all the cities and towns of Pakistan. "Even small villages in distant areas would have these chapters," he said.

He also announced the launch of the enrollment of its members and the target of membership for the year 2016 had been set as 100,000. Meanwhile, the 101 Friends of China also put a Resolution expressing serious concern over the escalation of tension in the South China and alarm over the military build up in the recent weeks in the region, which was adopted unanimously.

Expressing solidarity with China, the resolution stressed that the Permanent Court of Arbitration should conduct business strictly within its jurisdiction and that its rulings should not be used as an instrument to fuel tensions and disputes. He said China wanted to resolve the issue of South China Sea peacefully through negotiation with its neighbouring countries, including Vietnam and Philippines.

Pakistan working on Gwadar-China oil pipeline -- Express Tribune

ISLAMABAD: Pakistan is working on a plan to lay an oil pipeline from Gwadar to China for the export of crude and has given the task to state construction firm Frontier Works Organisation, say officials who are aware of the development.

The pipeline will run from Gwadar Port to western China and will allow Beijing to diversify and speed up import of crude oil. Prime Minister Nawaz Sharif had floated the idea of constructing the oil pipeline during a visit to China.

China irked by delay in Gwadar project

According to the officials, Pakistan would have surplus oil in the future as Pak-Arab Refinery Limited (Parco) has decided to revive the \$6-billion Khalifa Refinery project that was shelved by the United Arab Emirates (UAE) during the previous government of Pakistan Peoples Party (PPP).

Parco will set up the refinery in Balochistan that will have the capacity to process 250,000 barrels of crude oil per day. In Parco, the UAE holds 40% shares whereas the government of Pakistan has a 60% stake. China Huanqiu Contracting and Engineering Corporation has also expressed interest in setting up an oil refinery in Pakistan, preferably at Gwadar.

The refining capacity of Byco, Pakistan's largest refinery, has jumped to 155,000 barrels per day (bpd) after completion of work on its second unit of 120,000 bpd.

Previously, Parco was the biggest refinery with production capacity of 90,000 bpd, followed by National Refinery with 68,000 bpd, Pakistan Refinery with 48,000 bpd and Attock Refinery with 45,000 bpd.

Chinese offer to finance whole \$2b LNG project

The planned oil pipeline from Gwadar to China could be extended and connected with Iran that has already offered to build a pipeline for the supply of crude oil to Gwadar, the officials say.

Iran had also expressed the intention to set up an oil refinery of 400,000-barrel-per-day capacity at Gwadar Port during the previous PPP government. However, the project could not be pushed ahead because of international sanctions on Tehran and failure to reach an agreement on the proposed incentives.

The project can be implemented in future after the Chinese take operational control of Gwadar Port. Gwadar is quite close to the Persian Gulf from where nearly 40% of the world's oil passes.

According to the officials, China meets 50% of its oil demand through imports from the Middle East. Oil supplies come via Dubai-Shanghai-Urumqi route covering over 10,000 kilometres.

Gwadar port to be operational by 2017: Chinese official

The crude oil processed and refined in Pakistan can be exported through the shortest possible Dubai-Gwadar-Urumqi route – a distance of about 3,600 km. This can be achieved by laying an oil pipeline through the energy corridor up to western China via Karakoram Highway and Khunjerab Pass.

Hurdles in the way like the high altitude, freezing temperatures and a difficult terrain can be overcome with the help of advance technology.

Many countries have successfully completed similar pipeline projects under extreme conditions and at high altitudes such as the Atacama gas pipeline, Trans-Alaska pipeline and Trans-Asia gas pipeline.

PM says personally overseeing CPEC projects -- Express Tribune

LAHORE: Prime Minister Nawaz Sharif on Tuesday said he was personally overseeing the progress of China Pakistan Economic Corridor (CPEC) projects which had the potential to change the lives of millions of people living in the region.

The prime minister expressed these views in a meeting with a delegation, led by Sheikh Nahyan bin Mubarak Al Nahyan, Chairman Warid Telecom International and chairman of the Abu Dhabi Group, Union National Bank and United Bank Limited at his Raiwind residence.

PM Nawaz returns home after successful heart surgery in London

The prime minister said the \$34billion project would connect the entire region through construction of a quality road network and railway tracks. He said his administration had made choices to put the country on track to attain durable peace, sustainable economic growth and massive infrastructure development. The Ranger-led Karachi operation was carried out in consultation with all stakeholders which helped a great deal in restoration of peace in the mega city.

Premier Nawaz expressed his satisfaction over the success of Operation Zarb-e-Azb to wipe out terrorists from the country. He said his government had ensured uninterrupted power supply to the industrial sector and vowed to overcome energy shortage in the country by 2018. Also, he said the transparent agreements for LNG would help overcome gas shortage by next year.

The premier recalled that he had made Islamabad-Lahore motorway in the 1990s and at present, 13 more motorways were under construction with an investment of Rs900 billion which would cross Rs1 trillion mark by the year's end.

PM convenes cabinet meeting to discuss situation in held Kashmir

Sheikh Nahyan bin Mubarak Al Nahyan extended his heartfelt congratulations on the successful surgery and consequent recovery of the prime minister. Appreciating the leadership role of the prime minister, Sheikh Nahyan said Pakistan had shown tremendous improvement in almost all sectors of the economy over the last three years.

He said Pakistan was fast becoming an ideal destination for foreign investors owing to the transparent, fair and incentives-based investment policies of the government. "Your leadership has enabled Pakistan to witness rapid economic growth and attract foreign investment. You have greatly helped your country in achieving its true image worldwide", he said.

Other delegates included Chief Executive Officers (CEO) of VimpelCom Ltd, Mobilink, Alfalah Bank and members Board of Directors Abu Dhabi Group.

CPEC'S SECURE COMPLETION TO ADD NEW DIMENSIONS TO PAK-CHINA FRIENDSHIP: NISAR -- BR

ISLAMABAD: Minister for Interior, Chaudhry Nisar Ali Khan on Thursday said Pakistan's expanded cooperation with China in counter terrorism, security and trade domains would arguably be a defining partnership in 21st century.

He expressed these views during a meeting with visiting Minister for State Security of China, Geng Huichang. Officials from China's counter terrorism, technical and intelligence divisions were also part of the Chinese security delegation.

The meeting covered a broader scope of discussion for increased coordination between security establishments of two countries in intelligence sharing, counter terrorism coordination, and security of China-Pakistan Economic Corridor (CPEC).

Ch. Nisar said, "Secure and successful completion of CPEC would add new dimensions to our friendship cementing our economic as well as strategic bond."

He said CEPC would also help Pakistan and China expand their trade footprint in region and beyond.

"CPEC is not only flagship project between the two countries but also focuses on strategic depth in Pak-China relationship," the Minister was quoted as saying by Spokesperson for the Ministry.

He said both sides must be cautious about regional and global powers who do not want to see CPEC for their own interests and reiterated that Pakistan, at all levels, is committed to thwarting all conspiracies against CPEC.

Ch. Nisar said two sides should exponentially enhance intelligence sharing precisely in fight against terrorism, extremism and countering violence.

He remarked that Pakistan would continue its fight against all terrorist groups who create disturbance and generate violence in Pakistan.

Pakistan is committed for not allowing any group to use its territory for violence abroad, he added.

Commenting over ongoing fight against terrorists groups, Ch. Nisar said operation Zarb-i-Azb dividends have started reaping its benefits.

About security of Chinese citizens working across Pakistan in different development projects including CPEC, the Minister pointed out that a Special Security Division is already working under Pakistan Army to secure their lives.

Meanwhile, Mr. Geng Huichang appreciated efforts of Pakistan in fight against terrorism, specially the gains achieved under operation Zarb-i-Azb.

GWADAR'S EAST-BAY EXPRESSWAY TO BE COMPLETED BY DEC 2018 -- APP

ISLAMABAD: The construction of East-bay expressway of the Gwadar Port would be completed by December 2018, according to sources from Gwadar Port Authority.

The sources informed APP that PC-1 of the project had been approved by Executive Committee of National Economic Council (ECNEC) on January 12, 2015 and it was a 19-KM six-lane expressway with 2- way railway track.

The expressway provides immediate and uninterrupted connectivity to Gwadar Port terminals with the Mehran Coastal Highway in the first phase and with New Gwadar International Airport in the second phase.

"An amount of Rs. 13.543 billion would be funded through government of China confessional loan whereas Rs. 0.519 billion would be arranged through local component", sources added.

For this project, Rs. 4.7 billion have been earmarked for the project.

The sources added that the Chinese Government had agreed to provide 100 per cent interest free loan for the project.

The selection of Chinese company was made through limited bidding under the G2G framework.

Work of the project would start during 1st quarter of 2016-17.

Due to delay in review of project cost by MOFCOM allocated funds could not be utilized.

3,000 ACRE OF LAND TO BE PROVIDED FOR EXPANSION OF GWADAR INDUSTRIAL ZONE -- BR

Wednesday, 20 July 2016 16:53 Posted by Parvez Jabri E-mail Print PDF Views: 466

imageQUETTA: Balochistan provincial government would provide 3,000 acre of land for expansion of Gwadar Industrial Zone in order to make it further functional, Secretary Industries and Trade, Noor Muhammad Jogezei said on Wednesday.

The provincial government was taking practical steps to give incentives for investors and industrialists to develop industries and enhance its activities, he said while chairing a meeting of Gwadar Industrial Estate and Development Authority.

Besides protection of the investment, the industrial would be allotted land on proper price and soft conditions, he added.

The Secretary said, the real estate activities should be discouraged in the Industrial Zone, adding, the plots allotted for setting up of industries should not be utilized for any other purpose.

He said, all the hurdles in the way of the development of the industrial zone should be removed.

Jogezei said, the industrialists should be assured that the government was in favour of development of industries and revival of sick industrial units.

He said, possible tax exemption would also be ensured for the industries, adding the development of industrial zone would help ensure employment opportunities for thousands of people which would prove a milestone for the development of the province as well as the Makran belt.

He also directed to further improve the master plan and make the Gwadar industrial zone functional aimed at speeding up industrial activities there.

It was also decided to shift the office of the industrial zone from Karachi to Gwadar to enhance industrial activities at the industrial zone.

CM says railway track to be laid under CPEC -- The News

KOHAT: Chief Minister Pervaz Khattak on Tuesday said that a railway track from Peshawar to Dera Ismail Khan would be laid under the multi-billion China-Pakistan Economic Corridor Project (CPEC).

Talking to reporters after condoling with the relatives over the sad demise of Pakistan Tehreek-e-Insaf (PTI) Kohat district president Humayun Chacha, he said that the CPEC would usher in a new era of prosperity and development in the country.

He said Jhand-Kohat road would also be developed under the CPEC project. "CPEC is a project of progress and prosperity for the entire country. All the provinces including that of Khyber Pakhtunkhwa would equally benefit from the project," added the chief minister.

Responding to a question about the repatriation of Afghan refugees, he said the federal government had extended the stay of refugees for six months and hoped that their dignified repatriation would be started after the end of the deadline accordingly.

Answering another question regarding shifting of Oil Refinery from Kohat to Karak, Pervaz Khattak maintained that formal decision to this effect had not yet been taken and the Refinery would be set up at a suitable place.

Speaker Khyber Pakhtunkhwa Assembly Asad Qaiser and Minister for Law Imtiaz Shahid Qureshi accompanied the chief minister during the visit. Earlier, they offered

fateha for the departed soul of the late party leader.

Pervez Khattak paid glowing tributes to the services of late Humayun Chacha for the party, saying the departed soul was a great asset to the party. Later, the chief minister visited the residence of PTI district leader Aftab Alam Afridi and condoled the death of his mother-in-law.

CPEC A FORTUNE CHANGER FOR GILGIT-BALTISTAN REGION: AHSAN IQBAL -- BR

ISLAMABAD: Federal Minister for Planning, Development and Reform, Ahsan Iqbal said on Wednesday that cooperation between Gilgit-Baltistan of Pakistan and Xingiang province of China can add a new chapter in China Pakistan Economic Corridor (CPEC) because of their geographic proximity.

The Minister proposed a five year plan for promoting cooperation and partnership between Xingiang and Gilgit-Baltistan in various fields.

"We need to learn from China's development experience of establishing economic zones like the Kashgar economic zone," he added.

The Minister expressed these views while having a meeting with the Chinese business and stated that economic integration and regional connectivity between Pakistan and Xingiang province is critical for making CPEC a success.

Ahsan Iqbal said that CPEC will take this friendship from higher than Himalayas to higher than stars.

He said that regional and economic integration is very significant for the success of the CPEC projects.

The Federal Minister mentioned that Mr. Zhnag Chuxian, Secretary of Communist Party of Xinjiang Province had a fruitful visit to Pakistan which laid foundation for stronger cooperation between Xinjiang and Pakistan.

He said that the success of CPEC depends on business to business and people to people contacts of both the countries.

Federal Minister said that Cooperation between China and Pakistan is not an ordinary one but we also have brotherly relations.

Ahsan Iqbal said that we need to develop a very comprehensive roadmap of cooperation in different sectors between Pakistan and China particularly between the Xinjiang province and Gilgit Baltistan.

The Minister said that cooperation between Pakistan and China would materialize in the form of solid projects and it will add colours in our friendship.

He proposed that sports and education could be possible areas of cooperation between Gilgit and Xinjiang, as GB has very young population.

The Minister also proposed that Chinese experts could visit Excellence Centre of Pakistan to create a better understanding of Chinese Economy in Pakistan.

He said that both China and Pakistan are committed and working hard on CPEC projects and all the projects would complete in stipulated time.

Yuan Jianmia appreciated the dynamism of Federal Minister for Planning, Development and Reform for his dedication and commitment with CPEC and supported the proposals of Federal Minister, extending full support.

'Pak-China Cultural Street' to be established -- APP

LAHORE: The Pak-China Joint Chamber of Commerce and Industry (PCJCCI) on Thursday called for establishing 'Pak-China Cultural Street' in different cities of the country to promote cultural harmony between China and Pakistan.

Talking to the media, PCJCCI President Shah Faisal Afridi said the cultural street would also serve as a fascinating entertainment place for people of Pakistan. He added that the cultural street could include Chinese cuisines, calligraphy, literature, martial arts, movies, theatre and dresses.

Moreover, traditional Chinese festival such as the spring festivals and mid-autumn day could also be celebrated in those streets of Pakistan, along with Pakistani local festivals such as Shindoor Mela, Mela Chiraghan, and Jashn-e-Baharaan, he said.

Faisal Afridi said the cultural links should extend beyond the traditional modes of inter-state contacts and could include student and faculty exchange programmes between universities, academic conferences and professional associations of Chinese and Pakistani experts and the civil society collaborations.

He asserted that the interactions between the Pakistani and Chinese media should also be encouraged along with joint ventures in creative arts like cinema, theatre and music, led by inter-governmental collaborations. He said that Pakistan had the potential to become the safest place of investment with collaboration with China in all fields of trade and industry.

Govt urged to start work on CPEC western route -- The News

PESHAWAR: Mustaqbil Pakistan Partysenior vice-presidentRoshan Khattak has asked the federal government to start work on the western route of the China-Pakistan Economic Corridor (CPEC) on a priority basis.

Speaking at a press conference here on Wednesday, he also called for establishment of industrial zones and other uplift projects in Khyber Pakhtunkhwa so that poverty and unemployment could be controlled.

Flanked by provincial leaders and activists of the party, he said Khyber Pakhtunkhwa was faced with terrorism since long. He said the investors shifted their businesses to other provinces due to poor law and order situation in the province.

Roshan Khattak said the federal government should give due importance to the western route of the multi-billion CPEC project and construct economic opportunity zones in different parts of the militancy-hit province. The CPEC was game-changer for the province and that it was an issue of life and death for the people of KP, he added.

"We will not allow anyone to usurp the rights of this province," he vowed.Roshan Khattak said the western route of CPEC was the shortest and more feasible way that would connect the country with the Central Asian Republics, which could boost trade with the regional states.

China happy with smooth implementation of CPEC: envoy -- Daily Times

ISLAMABAD: Chinese Ambassador in Pakistan Sun Weidong on Thursday quashed the rumours of discontent on part of the Chinese government about the multi-billion dollar China-Pakistan Economic Corridor (CPEC), saying that China was "satisfied with the smooth implementation on the corridor".

"China is satisfied with the pace of implementation of the CPEC project. The corridor is under smooth implementation, and will deliver mutual benefits to both countries as well as the people of entire region," said the envoy while talking to journalists on Thursday. The statement was crucial in the wake of a local media report, which claimed that the CPEC had been put on the backburner by the Pakistan Muslim League-Nawaz (PML-N) government with the ailment of Prime Minister Nawaz Sharif and accusations against his family in the Panama Papers.

Ahsan optimistic about CPEC progress -- The News

ISLAMABAD: China's State Council is in the process of approving grants for the Gwadar International Airport and Gwadar Expressway projects and ground breaking of these two projects would be performed this year.

"Gwadar is the gateway of the CPEC, and the ground-breaking ceremony of its two projects — Gwadar International Airport and Gwadar Expressway would be performed this year while Gwadar University would also become operational from September this year," Federal Minister for Planning Ahsan Iqbal said here on Monday.

The minister said that Gwadar city would not just be a port city but would also become the hub of socio-economic activities for the local people. He said that the CPEC would help upgrade the local fishing and ship building industries so that the people of Gwadar could get maximum benefit from this project for better livelihood.

Ahsan Iqbal expressed these views while meeting with a delegation of the Gwadar Press Club in the Ministry of Planning, Development and Reforms. The minister said over \$1.6 billion would be invested under early harvest projects including modern airport, motorways, water, power, health, education and related projects . He said that under the CPEC not only the Gwadar Seaport, International Airport, Expressway would be developed but also hospital and technical & vocational training institutes would be constructed in the port city.

He said that Gwadar would be connected to other parts of the country by end of this year as work on the western route —Gwadar to Quetta Road and Gwadar-Khuzdar-Ratodero section is being completed on fast track. The D.I Khan to Burhan Section would get completed by June 2018, he added .

Federal Minister Ahsan Iqbal said CPEC would benefit all the provinces especially the most-backward areas of the country. He said that Sindh and Balochistan will be the largest beneficiaries in energy component of CPEC, as out of total £35 billion, \$11.5 billion would be invested in Sindh, and \$9.1 billion in Balochistan.

He said that the 20th century had belonged to political ideologies but today is the era of political economy, economic stability and inclusive growth. While highlighting the Vision 2025, he said that the first pillar of the vision is regional connectivity and China-Pakistan Economic Corridor (CPEC) would benefit three billion people of the region through enhanced regional connectivity.

He said that CPEC is a 15-year-long project to be completed in 2030 with special focus on infrastructure development, Gwadar Port, energy and phases by economic zones. He said that a Memorandum of Understanding (MoU) was signed during Prime Minister Nawaz Sharif's visit to China in 2013 and it has been converted into \$46 billion investment within a short period of one year. He said that CPEC is a fusion of Vision-2025 of Pakistan and China's "One Road-One Belt" for future growth and development. He added that Orange Train project was not part of the China-Pakistan Economic Corridor (CPEC) as this project was funded by Punjab government.

He said that administrative work on CPEC is the responsibility of Ministry of Planning with the help of other ministries and departments while the Pakistan Army is responsible for providing security. The minister further informed the delegation that on instructions from the PM to the army chief, 9,000 army men were being deployed in the security force for CPEC projects. Both civil and military departments are playing their role satisfactorily and in complete harmony. Ahsan Iqbal also mentioned that Federal Government would help in establishing Gwadar Press Club building for the journalists at Gwadar.

China to establish Study Centre at UoP -- Daily Pakistan

PESHAWAR: Chinese Ambassador to Pakistan Sun Weidong said on Thursday that China considers Pakistan as one of the closest friend having common interests.

He said that during this visit to University of Peshawar (UoP) along with a four-member Chinese delegation. The Chinese ambassador handed over a partnership cheque to University of Peshawar vice chancellor Dr. Muhammad Rasool Jan for the construction of China Study and Research Centre which would become functional by September this year. The centre will focus on research, culture, language and lifestyle of the Chinese.

He said Pakistan and China were celebrating 65th anniversary of their diplomatic relations which was a true testimony to Pak-China friendship. China gave status of closest friend to Pakistan owing to their unprecedented friendship and cordial relations.

He said if China had only one friend in the world that would be Pakistan, adding his government was cooperating with the government of Pakistan in the promotion of all the sectors especially education. The establishment of Chinese Study Centre in UoP was a step forward towards this end.

About the CPEC, the Chinese ambassador said that it would play the role of a game changer in the region, as Karakoram Highway and Gawadar Seaport were being upgraded in the first phase.

Vice Chancellor Rasool Jan appreciated the cooperation of Chinese government and said friendship between the two countries was time tested which survived crucial times of history. He also expressed the hope that the study centre would provide youth a chance of research and opportunities to benefit from the experience of each other.

The centre in UoP will offer professional diploma, degree and research courses in order to raise employment opportunities in the region by creating professional work force for CPEC.

CPEC agreement is confidential, Ahsan Iqbal tells Senate -- Dawn

ISLAMABAD: Federal Minister for Planning and Development Ahsan Iqbal on Thursday said agreement of China-Pakistan Economic Corridor (CPEC) is confidential and cannot be made public.

"Agreement of the economic corridor with China is sensitive and it cannot be disclosed," Iqbal said in the Senate session.

However, the minister handed over a sealed copy of the CPEC agreement to Chairman Senate Raza Rabbani and asked the members to examine the agreement in the chamber of the chairman if they wished to do so.

Earlier Chairman Senate Rabbani, on the request of members of the Senate on Wednesday, directed the federal government to present the agreement of CPEC before the Senate, as some senators were of the view that the government is providing advantages of CPEC agreement only to Punjab.

Ahsan Iqbal said the CPEC agreement will be a game changer in the region and entire world is focusing on it.

"At the present, it will be inappropriate to make the document public."

He added that there are several agreements with China under the umbrella of CPEC and work is under process on these agreements.

CPEC strategic game-changer

Chief of Army Staff (COAS) General Raheel Sharif, in his address commemorating the 89th Anniversary of the Founding of People's Liberation Army, termed the

CPEC as “strategic game-changer for entire region”.

“Let me emphasise that CPEC is a strategic game-changer not just for Pakistan but for the entire region. It is destined to bring significant improvement in the lives of millions of people, besides further promoting mutual interdependence among regional states,” General Raheel said.

The army chief said “affinity of views between China and Pakistan” reflected their common vision and shared destiny. “This convergence of our interests and commonality of purpose make us the most important strategic players in the region,” he added.

General Raheel maintained that the CPEC was Pakistan’s “national undertaking” and assured its full security. “I assure you that we will not leave any stone unturned to ensure its timely completion and uninterrupted success,” he asserted.

CPEC: background

The CPEC is a 3,000-kilometer network of roads, railways and pipelines to transport oil and gas from Gwadar Port to Kashgar city, northwestern China's Xinjiang Uygur autonomous region, China Daily reports.

Proposed by Chinese Premier Li Keqiang during his visit to Pakistan in May 2013, the CPEC will act as a bridge for the new Maritime Silk Route that envisages linking three billion people in Asia, Africa and Europe.

An official agreement on the corridor was signed between the two countries in May this year during President Xi Jinping's historic visit to Pakistan.

A flagship project of the Belt and Road initiative as well, the CPEC intends to revive the ancient Silk Road with a focus on infrastructure, and constitutes the strategic framework of bilateral cooperation.

The project links China's strategy to develop its western region with Pakistan's focus on boosting its economy, including the infrastructure construction of Gwadar Port, together with some energy cooperation and investment programs.

It also involves road and railway construction including an upgrade of the 1,300-km Karakoram Highway, the highest paved international road in the world which connects China and Pakistan across the Karakoram mountains.

The CPEC will reduce China's routes of oil and gas imports from Africa and the Middle East by thousands of kilometers, making Gwadar a potentially vital link in China's supply chain.

GOVT DIRECTED TO BRIEF SENATE ON CPEC AGREEMENTS DETAILS -- BR

ISLAMABAD: Senate Chairman Mian Raza Rabbani Wednesday directed the government to brief the Senate about the details of agreements regarding China-Pakistan Economic Corridor (CPEC).

The Chairman Senate gave the ruling after a marathon debate on an adjournment motion of Dr Jehanzeb Jamaldin about the salient points of agreement between Pakistan and China.

He said Minister for Planning and Development Ahsan Iqbal should brief the Senate either on Thursday or Friday about it.

Earlier, Minister for Parliamentary Affairs Sheikh Aftab said CPEC was a national project and no step would be taken against the interest of any province.

Winding up debate on the motion, he said the project had not been launched for the development of a single province but its benefits would be reaped by the entire nation.

He said those who, in past, were criticizing the PML-N vision to launch the Metro Bus project or construct Islamabad-Lahore Motorway were now appreciative of those projects, which had greatly facilitated the people.

He said economic zones under the CPEC project would be built in consultation with the provincial chief ministers which would bring an era of economic development in those areas.

He said the total cost of the project was 46 billion dollars and out of which 34 billion dollars was meant for the energy projects which were taking place not in a single province but in the whole country.

This amount was not a loan rather Chinese financial institutions would assist their country's companies which could enter into joint ventures with local Pakistani companies, he added.

He said work on coal, wind and solar projects had been initiated under the CPEC and two power projects of 1320 MW would be completed by 2017. Similarly, 660MW projects in Thar and 1320 WM coal projects in Sahiwal would be completed by 2017, he added.

These projects, he said, showed that smaller provinces were not being neglected and reflected the government's sincerity to bring prosperity in all the provinces under the CPEC.

He said the hydel power project to be set up in Sakki, Mensehra would produce 870 MW. Land was being acquired for the project, he added.

He said 720MW and 1100 MW projects would be launched in Kiroth, Azad Kashmir and Kohala respectively.

He said a 400MW solar power project had been completed in Bahawalpur which was at present producing 100MW and would attain full capacity by 2017. He said in Thatta Jampur a 200MW project would be completed.

He said a route would lead from Khunjrab to Burhan, passing through five districts of Khyber Pakhtunkhwa.

He said E-35 would be completed from Burhan-Havelian which would reduce distance of Hazara to other areas of the KP province.

He said as part of the Western Route, earlier a road was to be built from Burhan but now work would start from Hakala to Dera Ismail Khan.

He said out of five portions of the motorway, contract of three had already been awarded and road from Dera Ismail Khan would lead onward to Zhob and then to Gwadar.

The project would be completed in two years.

He said railway track from Peshawar to Karachi would be dualized which would help further reduce distance.

He said currently there were three berths at Gwadar, while 80 more berths would be built.

He said the new Gwadar airport would be built at an estimated cost of Rs 22 billion, besides building two dams for water storage.

He said power plants having capacity of 300MW would also be set up at Gwadar while an LNG terminal would also be established. He said a state-of-the-art hospital would be constructed in Gwadar to provide best healthcare facilities to the people.

Regarding tax free zones, he said the government wanted to fetch foreign investment through announcing incentives.

Gwadar port ops with new firm to start by Dec -- Nations

ISLAMABAD - Gwadar deep sea port is set for commencement of operations with new Chinese port operator China Overseas Ports Holding Company in December this year, sources said yesterday.

Pakistan has granted 40-year concession to the Chinese company which is currently working implementing expansion and development plan creating cargo handling capacity upto 300 million tons a year.

The previous concession holder M/s Port of Singapore Authority International had set up a Multipurpose Terminal at the port that could handle a total of 6.329 million tons of urea and wheat since December 2008.

According to the sources in Gwadar Development Authority (GPA), the existing Multipurpose Terminal has not even been utilized to its full capacity.

On the other hand, the new operator M/s China Overseas Ports Holding Company has commenced container service on short scale loaded with sea food from Gwadar Port.

The sources said that work various projects including provision of electric power and fresh water, hinterland connectivity as well as Free Zone of the port is going on in day and night.

Although the port is ready to receive ships, its optimum operations would start once hinterland connectivity is completed, businesses are started in Gwadar, Port Free Zone and required infrastructures are in place.

The port at present is operational with 602 metres quay length Multipurpose Terminal accommodating three ships at a time each of 50,000 tons deadweight capacity, one RORO facility and one service berth of 100 metre length for marine crafts for maintenance and refuelling. East revetment of approximately 1000 metres is ready in all respect for extension of present quay.

The total length of quay wall along the east revetment will be 4.7 km accommodating 22 ships of 200 meters each in the next phase of port expansion.

More quays will be developed along the western and north western shore a total length of 17 km accommodating 51 ships of 300 meters length.

The phase of development will have special focus on construction of Container Terminals in order to capitalize on the container trade.

The Gwadar port, the sources said, will also cater for the needs of transshipment as it will largely serve the landlocked Afghanistan and central Asia, Pakistan and China.

Pak-China ties: University of Peshawar to set up dedicated China Study Centre Pakistan -- Daily Pakistan

PESHAWAR – A China based Study Centre has been inaugurated at University of Peshawar and was visited by Chinese Ambassador Sun Weidong on Thursday.

The ambassador met UoP Vice Chancellor Rasul Jan and presented a check to him at the Chinese Language, Culture and Research Centre.

The study center will encourage and promote research and study on Chinese history and culture. The center will also seek to bolster existing Pak-China friendship.

The centre will start offering Chinese language courses and degree courses for research on China from September.

“Following China-Pakistan Economic Corridor, the study centre will offer enormous help to industrialists by providing them the necessary skills in their subject of interest,” Jan said in his welcome address to the Chinese delegation.

He added UoP had academic linkages with three universities in China and would like to introduce exchange programs with more varsities.

“The establishment of a study centre at a time when both countries are celebrating 65 years of their diplomatic relations is a milestone achievement,” Chinese ambassador Weidong said.

50 Pakistani teachers left for Beijing to learn Chinese language -- The News

A group of 50 Pakistani teachers left for Beijing to acquaint themselves with Chinese language and culture on the invitation of the Chinese government.

It was the second batch of teachers visiting the China within a period one month. The visit aimed at developing communication linkages at the people-to-people level and to provide linguistic support to China-Pakistan Economic Corridor (CPEC). The group includes school, college and university teachers from various parts of the country.

It was jointly sponsored by the Chinese Embassy and China Culture Centre in Islamabad and Beijing Language and Culture University. At the saw-off ceremony held at the embassy, Chinese ambassador's wife Madam Bao Jiqing hoped that the visiting teachers would be a source of inspirations for continuation of their deep-rooted friendly relations from generation to generation.

Higher Education Commission (HEC) Chairman Dr. Mukhtar Ahmed and Executive Director of National Vocational and Technical Training Commission Zulfiqar Cheema were also present on the occasion who thanked Madam Bao for her initiative and encouragement in arranging such visits to strengthen bonds of friendship.

Madam Bao briefed the teachers' delegation about the program and purpose of the visit, hoping they will act as ambassador of Pakistan to generate further goodwill among the people of two countries. Language is the bridge between the people, stating that she herself has been a language teacher at Foreign Affairs University for over ten years, teaching English.

She noted that there has been more and more demand of Pakistani students for learning Chinese language with the progress of CPEC. The demand for the Chinese language teachers also goes up, and the Chinese Embassy in Pakistan has been promoting Chinese language teachers' training and encouraging not only short-term training but also degree study in China.

Madam Bao spoke about the growing Sino-Pak friendship, stating they are dear friends, trusted partners, good neighbours and iron brothers, weathering all the storms together and sharing all the weal and woe. China and Pakistan, she said achieve fruitfully all-round co-operations in the fields of economy, trade, culture and people to people exchanges.

The CPEC, she said is a big development in the bilateral relations, that will open numerous opportunities for socio-economic development, including news jobs and business linkages.

Madam Bao Jiqing said a good number of Pakistani students were being sent to China every year, hoping on their return home they will contribute to CPEC.

A representative of teachers and students Itrat Haider expressed heartfelt thanks to Madam Bao for her sincere desire to work in collaboration with Pakistan to promote quality education in the both countries by introducing Chinese language at a vast level.

PROJECTS WORTH US\$10BN UNDER CPEC ALREADY HIT GROUND -- The News

ISLAMABAD: Out of US\$46 billion under China Pakistan Economic Corridor (CPEC) framework, projects worth more than US\$ 10 billion had already hit the ground, while remaining schemes were in advanced stages of the pipeline.

The remaining projects amounting to US\$ 36 billion would soon be launched, according to a senior official in the ministry of planning, development and reforms here on Tuesday.

Chinese President, Xi Jinping during his visit to Pakistan in April last year, signed several memorandum of understandings and so far a huge amount of US\$ 10 billion had been invested in Pakistan, he added.

He said, a CPEC summit would be held on August 29 in the Federal Capital to further enhance business to business cooperation between the two brotherly countries.

He said, the Chinese companies were also working on two mega projects including Thakot-Havailian section of Karakoram Highway (KKH) and Sukkur-Multan section of Lahore-Karachi motorway at a cost of US\$ 3 billion.

Gwadar would be connected with Quetta in December this year while D.I. Khan to Burhan section of the road would be completed in June 2018.

Energy, road infrastructure, railway and Gwadar airport projects were being completed under CPEC framework.

The construction work on various projects of various sections of Western route were being completed as per timeline to operationalize it at the earliest.

Work on Port Qasim Power Plant, Thar Power Plant, HUBCO coal Project, Sahiwal Power Plant and other hydro power projects was on track and these would be completed as per the schedule.

The fast track work on these projects would help tackle energy crisis and power needs of industrial zones in future under CPEC.

According to a senior official of the Chinese Embassy in Islamabad, as many as five new projects, in addition to 30 infrastructure and energy projects being completed by the Chinese companies in Pakistan, would be launched under CPEC initiative this year.

"Eight coal, solar, wind and hydro-power energy projects are already under construction to meet the energy requirement of Pakistan," added.

He said, prior to signing of CPEC between China and Pakistan in 2013, China was at number 16 in terms of Foreign Direct Investment (FDI) in Pakistan, adding, now China is largest investor in Pakistan after initiating multi-billion dollars project under the CPEC framework.

He said, this project would not only change the life of people of Pakistan in days to come but also prove beneficial for the whole region.

All Day

CPEC is a gift to me from China, Nawaz told lawmakers -- Daily Pakistan

ISLAMABAD (Web Desk) – Prime Minister Nawaz Sharif has told lawmakers that the \$46 billion China-Pakistan Economic Corridor (CPEC) project is a gift from China to him.

Chairing the meeting of his party members, the primer vowed that CPEC is a gift to him, implying that there would have been no CPEC without the incumbent PML-N government.

PM Nawaz also shared the achievements of his current stint and assured his party officials that the government would bag even more success in the coming days. He asserted that party officials should not fear for upcoming elections as PML-N would achieve much to launch the election campaign.

Reportedly, the Prime minister took aim at his political foes mainly PTI chief Imran khan for his politics of agitation. Nawaz Sharif blamed him for spoiling the visit of Chinese President in 2014 due to sit in.

During the meeting, some of his party members showed resentment over the lack of availability of ministers and slow pace of development projects in their constituencies.

An interesting incident also happened during the meeting when an MNA, Asad Ur Rehman (Brother of former Supreme Court Judge Khalil Ur Rehman Ramday), tried to take the mic but was refused. He expressed that the premier should hold these type of interactions more often.

Later, talking to a local television, Asad Ur Rehman quipped:

"I just said if you {PM} keep meeting us, you will not get sick, which annoyed him"

PARTNERSHIP IN SCIENCE, RESEARCH, DEVELOPMENT CRITICAL FOR CPEC SUCCESS -- BR

Thursday, 04 August 2016 00:29 Posted by Fawad Maqsood E-mail Print PDF Views: 52

imageISLAMABAD: Federal Minister for Planning, Development and Reform Ahsan Iqbal said that scientific collaboration and sharing of Knowledge, research and ideas between Pakistan and China is critical for success of China Pakistan Economic Corridor (CPEC) and further boost the historic bilateral cordial relations.

The Minister proposed that we need to undertake joint projects for studying mountains and coastal areas of Pakistan, said in statement issued by Ministry of Planing, Development and Reforms here on Wednesday.

He expressed these views during a meeting with Chinese delegation of Academy of Sciences to have partnership in research on natural hazards like landslides, floods, debris flows and earthquake between Pakistan and China under CPEC.

While mentioning agreement between Pakistan and China in space technology, he said that bilateral cooperation between the two countries in space domain would open new vistas of socio- economic and scientific cooperation.

The Minister directed Pakistan Academy of Sciences and Higher Education Commission to co-operate with the Chinese Science Academy and organize joint workshops on scientific research under CPEC.

Ahsan Iqbal said. "CPEC will take this friendship higher than Himalayas to higher than stars."

He said that Cooperation between China and Pakistan is not an ordinary one but we also have iron brothers relations.

He said that we need to develop a very comprehensive roadmap of cooperation in science and technology sectors between Pakistan and China.

The Minister said that cooperation between Pakistan and China is materializing in the form of solid projects which will add new colors in our friendship.

He said that regional and economic integration is very significant for the success of the CPEC projects.

He said that the success of CPEC depends on business to business and people to people contacts of both the countries.

CPEC project is the fusion of Pakistan Vision 2025 and China One belt One Road Vision which will benefit 3 billion people of the region, he added.

The Minister said that CPEC offers a broad partnership in different areas between the two countries.

There is a need to learn from the development of China, and "We should adopt its model of development how it successfully blended stability, development and reforms," he said.

Marketing CPEC: Summit, expo planned to woo investors -- Express Tribune

ISLAMABAD: The Ministry of Planning, Development and Reform is organising a one-day summit and expo to mark the signing of \$46-billion China-Pakistan Economic Corridor (CPEC) programme.

The event will be held on August 29 at the Pak-China Friendship Centre, Islamabad. It is expected to be inaugurated by Prime Minister Muhammad Nawaz Sharif and will be attended by a large number of local and foreign dignitaries as well as investors, say officials responsible for organising the event.

ADB to invest in CPEC, Gwadar city projects

Its objective is to motivate and attract more and more investors to pour capital into Pakistan and help boost the national economy. It will also provide a platform for exchanging ideas and open new avenues for increasing business, trade and tourism.

The CPEC is a collection of energy and infrastructure projects that are intended to strengthen and deepen economic links between Pakistan and China. Of the total \$46-billion investment, \$35 billion has been allocated for energy projects and \$11 billion for infrastructure schemes.

So far, none of the energy projects have been completed and are at various stages of implementation. However, five projects of NHA has been completed so far.

Gwadar port to be operational by 2017: Chinese official

The projects have been split into two categories – priority and actively promoted. The schemes that come under the priority category are planned to be completed by 2018 and those under the title of actively promoted will be completed by 2025.

“The Ministry of Planning has asked relevant ministries, institutions, academia and private businesses to showcase their achievements before the visitors and guests at the upcoming expo,” an official said.

Talking to The Express Tribune, National Highway Authority (NHA) spokesman Kashif Zaman said being a major stakeholder in the CPEC, the NHA would actively take part in the summit and expo.

ADB to invest in CPEC, Gwadar city projects

He said some of the major CPEC projects, which were under construction, would be completed in the next two to three years. These included 393km Sukkur-Multan motorway (M5) costing Rs281 billion, 59km Hasanabdal-Havelian motorway costing Rs34 billion, 120km Havelian-Thakot motorway costing Rs133 billion, 281km Hakla-DI Khan motorway (western corridor) costing Rs122 billion, 62km Gojra-Shorkot motorway (M4) worth Rs21 billion and 62km Lahore-Abdul Hakim (Multan) motorway worth Rs148 billion.

Zaman said the Rs163 billion (\$1.7 billion) Hyderabad-Sukkur (M-6) section of the Karachi-Lahore motorway still needed an investor. “Hopefully, this expo and summit will help to find the interested investor,” he said.

All Day

Ahsan says Pak, China committed to make CPEC reality -- BR

ISLAMABAD: Terming the China-Pakistan Economic Corridor (CPEC) a reality, Federal Minister for Planning, Development and Reform Ahsan Iqbal said on Wednesday said that both Pakistan and China were committed to materialise the dream of an economic corridor at any cost which was beneficial for both the countries, as well as the entire region and the world.

While talking to the media after delivering a key-note address at the Pakistan-Afghanistan CARs Trade Summit (PACTS) he said, "The ghastly incidents like Quetta blast cannot reverse or delay this important initiative taken by Pak-China leadership. The enemies would be defeated."

He said that the development work was in progress at a fast pace. He added that there would be no role back or delay in its implementation. He also pointed out that the rapid pace of work on the projects under CPEC had been acknowledged by the Chinese experts as the pace of development was faster than the projects in China.

Responding to a question about the involvement of India's RAW in the Quetta blast, he said, "The investigation into the incident is under progress and those involved in this heinous crime will be brought to justice."

He also said that there was a need to be more vigilant and alert after this incident, adding, "We have to create unity among our ranks to frustrate such conspiracies." He said, "We should not be discouraged after Quetta incident as our enemies may make more such attempts but these incidents strengthen our resolve to get rid of the menace of terrorism."

He said, "We are in the state of war and we have to foster internal unity to completely defeat terrorism." He said that Pakistan would emerge as the fastest growing economy after defeating the militants.

The minister said that CPEC had drawn the attention of the world community towards Pakistan. He added that this project would not only connect Pakistan and China but also would provide connectivity between China and Central Asia and beyond this region.

He said that Asia would be the hub of the future economic growth as China, Central Asia and South Asia were considered engines of economic growth. About the importance of Gwadar Port, he said, it was important for landlocked countries of Central Asia which were interest to set up cold storages and processing zones for their products in this city.

He said, "Our future generations would reap the fruit of better economic growth and foreign direct investment in the country." He added that Pakistan was rising and no one would be allowed to create hindrance in the way of development and progress.

All Day

CPEC gateway to prosperity: Shahbaz -- The News

LAHORE: Chief Minister Shahbaz Sharif, while terming the China Pakistan Economic Corridor (CPEC) a gateway to prosperity for the country, has said any opposition to the mega project was in fact opposition to Pakistan.

He was speaking at the Jang Media Group's event titled "Breakfast with Jang" and "Pakistan China Economic Opportunities" here on Tuesday. The event started with Fateha for the Quetta martyrs and prayers for the early recovery of those injured in the incident.

Shahbaz condemned terrorism and said the entire nation was united to eliminate this menace forever, adding that prosperity was not possible without fighting terrorism. He linked economic and religious divides to growing extremism and said: "We need to bridge these divides."

On various occasions, the chief minister became emotional and said the CPEC

continuity was important whether one party or the other was in power. "Pakistan is now on the road to recovery," Shahbaz said while lamenting the indifferent attitude of successive governments vis-à-vis issues of vital national interests, especially the energy crisis. The energy deficit would now largely be met by the next year or by 2018, he said, adding that the fast work on energy projects in Punjab under the CPEC was also being acknowledged by the Chinese leadership. "Punjab's speed is Pakistan's speed," he said and added: "The credit goes to entire Pakistan and Prime Minister Nawaz Sharif and not to me." He said the military hierarchy was also providing full support in this context.

He said: "We should work with dedication for the CPEC success as such opportunities are not there always. This project will in fact empower and prosper the common man." he said and added: "The external elements will try to sabotage this project." He said the \$46 billion CPEC project was not the Chinese investment but the spirit of generosity for the people of Pakistan. "For God's sake, don't disrupt the CPEC. God forbid, if we fail to complete this mega project, the coming generations will curse us. We need to cash this wonderful opportunity," he said.

Lauding the Chinese leadership, Shahbaz said many world powers were interested in the development of Gwadar and questioned why no one except China came forward. About transparency in CPEC projects in Punjab, he said: "If anybody proves corruption of a single penny, I will go home." He said the government-to-government projects were always exempted from the tendering process in Pakistan but the Orange Line Metro Train Project under the CPEC was the only project in the 65 years history of the country for which tendering took place. "Also we were able to save a whopping Rs 80 billion after negotiation with the lowest bidder."

This negotiation could have been avoided as the lowest bidder had already got the project as per the law but "still we did our best to save as much as we could", he said, adding that the Sahiwal Coal Power Plant would be completed in a record time and would start adding 1320 megawatts of electricity to the national grid by the next year.

He said the same project in India was completed in four years while China completed it in 24 months. "We will, Insha'Allah, complete our project in 23 months." He said apart from the CPEC, the government was working on 3,600 megawatts power projects. "I have asked the prime minister to start other power projects too," he said, adding that it's good not to put all eggs in one basket.

A candid question-answer session was also held in the end in which the general public registered for the event raised various questions. To a question by a foreign journalist, Shahbaz said the CPEC was a federal project and all departments were playing their role in it. Explaining as to how the public money was wasted in the country, he said the Neelum-Jhelum project was started under Gen Musharraf's regime in 2005, but it was still incomplete. He also explained as to how a Sindh minister kept the file of the Nandipur Power Project for years and the project hit a snag for petty personal interests. He regretted no one staged sit-in over these issues but he (Shahbaz Sharif) was criticized when he sat at the Minar-e-Pakistan ground in protest against energy crisis.

He said Punjab's share in CPEC energy projects was the lowest as compared to other provinces while Sindh's was highest, but he was happy that the mega project was for the good of the entire country. "After all every megawatt produced will go to the national grid."

To a question on the role of IT in governance, the chief minister lauded the services of Dr Umar Saif, chairman of Punjab Information Technology Board (PITB), and said he would float the idea of Digital Pakistan to the prime minister.

Acknowledging the presence of some foreigners at the event, he remained bilingual, swiftly shifting between Urdu and English. Earlier, the event host - Sikandar Lodhi - and Jang Group's Sarmad Ali thanked the chief minister for sparing time to speak on an important subject. In the end, the chief minister awarded shields to the event organisers.

CPEC TO CREATE EMPLOYMENT OPPORTUNITIES FOR BALOCH YOUTH -- BR

ISLAMABAD: Minister of State for Petroleum and Natural Resources, Jam Kamal Khan has said that China-Pakistan Economic Corridor (CPEC) would create employment opportunities and help alleviate poverty in remote areas of Balochistan province.

This project would not only promote trade and commerce from Gwadar to Kashgar but also ensure basic infrastructure including roads, electricity and energy projects in the province, he said in a statement.

The Minister said, the infrastructure development being carried out under CPEC project would greatly benefit people of Balochistan and create development opportunities there.

He said, the US \$46 billion CPEC project has great importance for the province, the government has devised comprehensive strategy in all the sectors to provide its benefit at the grass root level.

Jam Kamal said, Balochistan province is full of the mineral resources and after the 18th amendment, the mineral sector has come under the administrative control of provincial government.

He said, there is a need to utilize mineral resources for the benefit of the province and its people.

He opined that CPEC and industrial development in Gwadar would also benefit the local people.

The Minister called upon the local youth to get professional training and skills as there are tremendous job opportunities for the skilled youth of the province.

Gwadar to have university -- BR

Sir: Government has taken an appreciable step to construct a university at Gwadar city. The establishment of a university is a great opportunity for the residents of the city and its adjoining areas. It is a great opportunity for the students of Gwadar to get a proper education in their city since earlier they were compelled to go for higher education to cities like Lahore, Islamabad, or Karachi. However, the decision of the provincial government provides them ample opportunities to carry out their study within the city.

Similarly, a reading culture would develop among its residents too. According to a print media report, the construction of the university is being fast-tracked, and it will be able to start the first batch in the coming fall.

We request the government to complete the construction as soon as possible.

**CPEC to open new roads to progress in Balochistan: Ahsan Iqbal --
Dunya News**

Federal Minister for Planning and Development Chaudhry Ahsan Iqbal has on Tuesday said that China-Pakistan Economic Corridor (CPEC) will open new roads to progress in Balochistan, reported Dunya News.

Addressing the inaugural ceremony of academic block in Balochistan University, Ahsan Iqbal told the students that the CPEC will help make up for the injustices that Balochistan has always been subject to. He added that the construction of the western route of CPEC and Balochistan-Peshawar train service will change the lives of Baloch people.

Ahsan Iqbal added that the injustices with Balochistan were national crimes and that this project will open new roads to progress for the province.

However, Balochistan students expressed their concerns, saying that the claims of progress in Balochistan are pointless because the real development demanded practical steps.

Despite the concerns, the economic experts believe that CPEC project would not only help Balochistan but would prove a game-changer for the entire province.

Pak to host 3rd CPEC/Silk Road Forum next year -- Pak Observer

Islamabad—The Silk Road/CPEC (China-Pakistan Economic Corridor) Forum will have its 3rd international conference in Islamabad in August 2017. According to Parliamentary Committee on CPEC, Pakistan had a representation of over 50 people delegation in Silk Road Forum held in Karamay, Chinese sister city of Gwadar.

The MoUs worth over 10 billion dollars were signed in Karamay amongst institutions and companies of Pakistan, China, Iran and Kazakhstan.

The second Silk Road Forum was organized by the international think tank, Research and Development International (RDI), in cooperation with the central government of China and the provincial government of Xinjiang, unanimously decided to hold the 3rd forum in Pakistan because CPEC is the pilot and flagship project of the One Belt, One Road initiative of President Xi Jinping.

This time, the forum at Karamay also had representatives from Iran and Kazakhstan who expressed strong interest in participating in CPEC.

Unanimous decision by these countries was a vote of confidence in Pakistan and its future role as the flagship and the pilot project of the One Belt, One Road through the CPEC, which will drive economic development in Pakistan and the region and unite the federation of Pakistan by bringing prosperity and progress to less developed regions of Pakistan particularly Balochistan, Khyber Pakhtunkhwa and Gilgit-Baltistan.

CPEC/Silk Forum, to be held in Islamabad in 2017 to consult all the stakeholders including the federal government, provincial governments, private sector as well as all relevant stakeholders for holding what will probably be the biggest and the most important conference on CPEC and Silk Road to be held in Pakistan.

Chinese team reviews Gwadar progress -- Express Tribune

ISLAMABAD: A 10-member Chinese delegation headed by a senior government official visited Gwadar and reviewed progress on various ongoing projects. The delegation visited the Gwadar Port, Gwadar Expressway, Free Zone, Pak-China Friendship Primary School, Faqeer colony and some other projects related to the development of the city.

Gwadar Port Authority Chairman Dostain Khan Jamaldini and Balochistan's Additional Chief Secretary for Planning and Development Muhammad Dawood Baraich briefed the Chinese delegation about the pace of work on the projects.

China irked by delay in Gwadar project

The delegation was informed that the completion of China-Pakistan Economic Corridor (CPEC) and the functioning of Gwadar port would bring about a positive economic impact not only on Pakistan but the entire region.

The implementation of mega projects including construction of Expressway and Gwadar International Airport would be initiated with Pak-China cooperation this year. The delegation was told that Pak-China cooperation would bring about economic revolution in the region including Pakistan.

ADB to invest in CPEC, Gwadar city projects

Speaking to the delegation at the occasion, Gwadar Development Authority (GDA) Director General said that the authority was implementing several development projects in Gwadar out of which a number of projects including GDA Hospital, GD School had been completed.

The delegation was also briefed about the Gwadar master plan.

Pak Railways poised to get massive funding from CPEC and CAREC -- Pakistan Today

After decades of neglect, a silver lining is on the horizon for Pakistan Railways as it may be able to attract multi-billion dollar investment for the upgradation as well as deployment of new railway infrastructure across the country under two regional economic unions, the Central Asia Regional Economic Cooperation (CAREC) and China Pakistan Economic Corridor (CPEC), to link Central Asia and China with Pakistani ports of Karachi and Gwadar.

An official source said that the Asian Development Bank (ADB) has started the process to assess the financial needs for upgradation of 461 km main line (ML-1) between Lahore and Peshawar, under its CAREC Railway Connectivity Investment Programme. The financing is likely to start flowing from next year.

The Ministry of Railways has already shared plans, under early harvest projects by 2020, to upgrade Karachi-Peshawar main line (ML-1) and extension of ML-2 from Jacobabad to Gwadar via Basima to both CAREC and CPEC. If financing was available, the projects would be completed in relatively short time as the Pakistan Railways has technical expertise to execute the projects, he added.

ADB will be providing multi-tranche financing facility (MFF) to make the railway system more efficient and competitive. Improved railway corridor of Lahore-Peshawar will improve Pakistan Railways' institutional efficiency. Financial assistance will also be provided for Railways' modernization, IT-based accounting system and transforming and migrating accounting data into the new accounting system.

Under the plan, 411 km railway track between Lahore-Peshawar section of ML-1 will be upgraded and dualised together with new signaling and telecommunications system, including power supply for these systems, and upgraded passenger facilities at Lahore, Rawalpindi, and Peshawar stations. A 53-km section in the hilly area from Kaluwal to Pindora will have to be realigned and dualised. Except for

realignment sections in the hilly tract, it is likely that all the work for rehabilitation and upgradation of the physical infrastructure will be limited to the PR-owned right of way.

Except for Pakistan, railways in all CAREC countries have more freight carriers than passenger tariff. CAREC railways have increased freight traffic volumes which shows the large potential for PR to freight forward to and from CAREC countries. Domestic market is large in Pakistan, Uzbekistan, Kazakhstan and China.

In the past, the railways infrastructure plans always received a cold shoulder from the government, but now the situation has changed as multilateral institutions are interested in linking Pakistani ports with China and Central Asia. Now the government wants to attract investment in railways infrastructure and China is asked to finance upgradation of strategically located ML-1 which connects major population centers in three provinces.

Under CPEC, Pakistan has shared Phase-I (Early Harvest Projects) upgradation of ML-1 (Karachi-Peshawar and Taxila to Havelian) and construction of New Dryport at Havelian (Buldher). In medium term, Phase-II upgradation of ML-2 and extension of ML-2 (Gwadar to Jacobabad via Basima) is proposed. The long term Phase-III seeks establishment of Havelian-Khunjab-Kashghar rail link.

The source said Pakistan has shared plans to link the Gwadar port Kandahar, Kabul and Dushanbe. The second plan is to link Gwadar with Quetta and onwards to China. He said Pakistan Railways has prepared plans on rail link between Gwadar port and Mastung, Chaman to Kandahar rail link and rail lines between Kandahar and the Tajik border are also planned.

PAK-CHINA CHAMBER URGES MEDIA TO HIGHLIGHT CPEC IMPORTANCE -- APP

LAHORE: The media and academics should play a positive and active role in highlighting the significance of China-Pakistan Economic Corridor (CPEC) for Pakistan and to reject misleading propaganda against it.

Shah Faisal Afridi, president, Pak-China Joint Chamber of Commerce and Industry (PCJCCI), said this in a statement here on Friday.

He said that CPEC could be a fate-changer. "China-Pakistan Economic Corridor is a centre of attention for the people, but unfortunately the enemies do not want to see it successful," he added.

Afridi said Pakistan is handling the security challenges not only at home but also playing its role for regional stability.

Faisal Afridi said that the authorities concerned have raised a special security division for CPEC. Its security would always remain a top priority of the country, he added. He pointed out that Pakistan has given a strong message to the enemy that the country is determined to implement each and every project under the umbrella of CPEC and would tackle all challenges in this regard.

Afridi was confident that personnel of the security division were vigilant enough to thwart designs of the enemies.

He said that under CPEC, Pakistan and China had proposed 29 industrial parks and 21 mineral zones across the country, which would enable Pakistan to increase its production.

CPEC to add 10,000MW electricity to national grid by 2018: Ahsan -- Pak Observer

Islamabad—Minister for Planning, Development and Reforms Ahsan Iqbal has said China Pakistan Economic Corridor (CPEC) would add 10,000-megawatt electricity in national grid till 2018.

The CPEC is a national mega project and would further strengthen the economy. A national consensus was evolved on the corridor as it would bring economic revolution and provide equal benefits to all the provinces, he said talking to state-run TV channel.

He said a Memorandum of Understanding (MoU) of CPEC was signed in 2013, but was delayed due to Pakistan Tehreek-e-Insaf (PTI) sit-in in the country. It was properly launched in April 2015.

Ahsan Iqbal said the paper work was converted into reality as China was investing \$46 billion through CPEC out of which \$35 billion would be spent in energy sector through private investor and the Pakistan government would purchase low cost electricity from private investor to meet the growing demand.

Some 1,320MW electricity would be produce through Karachi port, he added.

He said, "We are focusing to update Gwadar, overcome energy crisis and building the infrastructure to improve connectivity between Pakistan and China."

The minister said the roads from Gwadar to Khuzdar via Ratodero would be constructed in accordance to National Highway Plan (NHP). One industrial zone would be established in each province to acquire equal benefits from the zones.

He said free trade zones would be set up in Gwadar on 2,000 acre and Gwadar International Airport would be constructed in upcoming two years.

Multan-Sukkur highway was also part of CPEC that would be completed in 2018, he added.

Ahsan Iqbal said there was immense improvement in economy, law & order and energy issues. The country was moving in a right path of development.

He said there was massive investment in the country through CPEC. The world acknowledged that Pakistan was a emerging economy of the country. The security of CPEC was handed over to Pakistan army and civil government was monitoring the corridor under the dynamic leadership of Prime Minister Muhammad Nawaz Sharif.

Replying to a question, he said Pakistan was enjoying state-to-state relations with China, who always played a pivotal role to strengthen Pakistan's economy.

He said Pakistan wanted good cordial relations with all countries.—APP

PROJECTS WORTH US\$18BN UNDER CPEC BEING COMPLETED: AHSAN IQBAL -- BR

ISLAMABAD: Minister for Planning, Development and Reforms,Ahsan Iqbal said on Monday that out of US\$ 46 billion projects under China-Pakistan Economic Corridor (CPEC), projects worth US\$ 18 billion had already hit the ground while US\$ 17 billion were in the pipeline.

Talking to press attaches to be posted abroad, he said, the CPEC framework had been turned from a piece of paper into an investment of US\$ 46 billion.

He said, the CPEC initiative would not only benefit China and Pakistan but it would be beneficial for the entire region.

Ahsan Iqbal said, the CPEC was not mere a road network but it was a complete framework, adding, it was the fusion of the vision of Pak-China leadership.

He said, those initiating propaganda campaign against this vital project would miserably failed.

He said, there was a need to further improve positive image of Pakistan among the world's nations.

CPEC projects worth \$17b in pipeline: Ahsan -- The Nations

Islamabad - Federal Minister for Planning, Development and Reforms Ahsan Iqbal said on Monday that out of total \$46 billion worth CPEC projects, projects worth \$18 billion had already hit the ground while \$17 billion were in the pipeline.

Talking to the Press Officers appointed in different countries here at his ministry, the minister emphasised promotion of country's positive image.

He added that brand Pakistan was all about portraying positive image of the country to the world. "We need to highlight the strengths of our country," he asserted. He told the officers that China-Pakistan Economic Corridor (CPEC) was not just a road network, but a framework for co-operation, which consisted of industrial zones.

"It is not a bilateral project but a regional project, which will benefit 3 billion people of the region," Ahsan said, and added, "CPEC is a fusion of Pakistan Vision 2025 and China One Belt One Road Vision, and it is not a security project but an economic one."

About changes in the western route, he said that misconceptions were based on misunderstanding as there was no route agreement between Pakistan and China prior to 2013. He further added that Gwadar-Quetta route would be completed by December 2016 while Gwadar -Khuzdar -Ratodero road would also be completed on a stipulated time.

The minister said that parts of the LahoreKarachi Motorway, namely from Havelian to Thakot and Multan to Sukkur, were being completed at a fast pace.

"The road from Burhan to DI Khan would be completed by June 2018," he informed. He further said that there would be one industrial zone in every province in order to ensure equal distribution of benefits among all provinces.

Ahsan said that different energy projects, under the CPEC, would help overcome energy crisis by 2018 as \$35 billion would be spent on energy sector through private investment.

He also informed that Gwadar Airport and Eastbay Expressway, also in Gwadar, were in advanced stages and their groundbreaking would be within couple of months.

The minister said that a Memorandum of Understanding (MOU) signed on CPEC in 2013 had been converted into \$46 billion investment within one year.

"This is a record in PML-N's history of translating MOUs into reality," he concluded.

Punjab-China accord for kidney, liver transplant -- Nations

LAHORE - A memorandum of understanding was signed between Punjab government and Liver Transplant Center Beijing Friendship Hospital China at Model Town yesterday.

Punjab Chief Minister Muhammad Shehbaz Sharif was the chief guest while Chinese Consul General Yu Borne and the head of Liver Transplant Center Beijing Friendship Hospital China and his team also attended the function.

Under the agreement, the Chinese institution will extend cooperation in the project of Pakistan Kidney and Liver Transplant Institute Lahore and treatment of liver diseases.

The Chinese institution will also share its experiences and skills with Punjab government as well as cooperate in training of doctors, nurses, technicians, transplant coordinators and other staff in the treatment of liver diseases.

Specialized Health and Medical Education Secretary Najam Ahmed Shah and head of Liver Transplant Center Beijing Friendship Hospital China Prof. Zhu Zhi Jun signed the documents.

Speaking on the occasion, the CM welcomed the agreement and said that its implementation will help transfer of expertise and technology of the Chinese medical institution to Punjab.

He said China is a close friend of Pakistan and helped it in every hour of need. He said that the visit of the head of Chinese institution and specialists in the treatment of liver diseases for the accord is proof of the friendship.

Shehbaz said that Punjab government is setting a unique project of Pakistan Kidney and Liver Transplant Institute in the provincial metropolis where modern treatment facilities will be available to kidney and liver patients.

He said that cooperation of Chinese institution in the implementation of this public welfare project of great importance will be welcomed. The Chief Minister said that during his visit to China, he had gone to Liver Transplant Center Beijing Friendship Hospital China and talked about cooperation.

He said that the arrival of the Chinese team soon after his visit and signing of the agreement is a milestone in Pak-China friendship. He said that Chinese institution has expertise in the treatment of liver diseases and Punjab government will benefit from it in the implementation of Pakistan Kidney AND Liver Transplant Institute in Lahore.

He also welcomed doctors and team of experts of Liver Transplant Center Beijing Friendship Hospital China in Lahore. The Chinese medical experts will also visit Sheikh Zayed Hospital and supervise liver transplant process. Shehbaz said the government has signed agreement for a great project of public importance and it is hoped that opponents will not go to the court like the other projects. He also congratulated Punjab government, Advisor on Health, Chief Secretary and his team over the agreements with Chinese institution.

Prof Zhu Zhi Jun said that all-out cooperation will be extended for setting up of liver hospital and treatment of patients suffering from liver diseases with the experiences and technical skills will also be shared with Punjab government.

He said that China and Pakistan are Iron Brothers and the friendship between the two countries is unprecedented. Chinese Consul General Yu Boren said that due to successful visit of Chief Minister Muhammad Shehbaz Sharif to China, a memorandum of understanding has been signed between the Liver Transplant Center Beijing Friendship Hospital China and Punjab government.

He said that under the leadership of Shehbaz Sharif, work is being carried out

expeditiously on China-Pakistan Economic Corridor projects. He said that China and Pakistan are not only great friends but also great partners and there is relationship of deep love and respect between the people of two countries.

Pakistan supports China's stance: Aziz -- Aaj TV

This was stated by Adviser to Prime Minister Sartaj Aziz at a joint sitting of Senate Standing Committees on Defence and Foreign Affairs, presided over by Senators Nuzhat Sadiq and Mushahid Hussain Sayed here on Thursday.

Sartaj Aziz also said that border management with Afghanistan is necessary to stop illegal border crossings. "Pakistan supports China's stance on the South China Sea dispute," he said.

He said the US is supporting Pakistan in border management with Afghanistan, adding border management is in favour of Pakistan and Afghanistan.

"We're ensuring facilities for border crossings with valid travel documents, so that no one can cross the border without valid travel documents," he added.

He said there are several groups of Taliban in Afghanistan, of which some want talks while some of them are not ready to come to the negotiation table.

Secretary Foreign Affairs Aizaz Ahmed Chaudhry said Pakistan fully supports reconciliation process in Afghanistan towards peace in the region.

He said peaceful negotiations with Taliban and the Haqqani network are the only solution in Afghanistan, adding thousands of people cross Pak-Afghan border at Torkham and Chaman border points daily.

He said Pakistan established the gate along Afghan border on its land to check illegal crossings. He said that work on four major crossing points is under way, for which Pakistan has also talked to the Afghan government.

"Pakistan believes that there is a need for a more unified and coherent messaging from Afghanistan in favour of peace and they [Afghanistan] should seriously give a message to Taliban for talks," Chaudhary said.

The Foreign Secretary Aizaz Chaudhary said Afghanistan should give a unified and coherent message for peace and reconciliation with Taliban as military offensive is no solution to the problem.

The officials of the Defence Ministry informed the meeting that Pakistan will build all the crossing points as the World Bank has agreed to provide funds for its construction.

They officials said that Prime Minister Nawaz Sharif has directed for strengthening Pakistan's relations with Russia.

The government is also trying to improve our strategic relations with North and South Koreas. Secretary Defence told the meeting that we have 2600 kilometers-long porous border with Afghanistan and maximum work on Torkham Border management has been completed.

The meeting discussed the situation arising out of the drone strike against Mullah Mansour and the impact on the Pak-US security relations. -Business Recorder

Pakistan, China enjoy excellent ties: PM -- Nations

Islamabad, August 29 (Online): Prime Minister Nawaz Sharif has said that China-Pakistan Economic Corridor (CPEC) is the most important economic initiative for South Asia in the 21st century that will benefit the entire region.

Addressing the inaugural session of CPEC Summit at 'Pak-China Friendship Centre' today, the prime minister said that by working together we can bring peace and stability in the region through economic development for our people.

"Our region has witnessed a lot of conflict and deprivation in the past. Time has come to turn a new leaf in the history of the region by bringing peace and prosperity, and addressing the challenges of poverty, unemployment and under-development", he added.

Nawaz said that CPEC is a new concept and approach in development based on shared goals and aspirations.

He said CPEC is not merely a strategic agreement between the two countries but a culmination of decade's long brotherhood, friendship and cooperation.

Nawaz said this is the latest in the history of cooperation in all areas of bilateral and global importance. He said Pakistan and China have been together through thick and thin. He referred to the remarks of the Chinese President that Islamabad stood by Beijing at a time when it was isolated on the world stage and said that Pakistan can never forget the friendly gestures of China in developing a cooperative relationship during difficult periods.

The Prime Minister said that with the initial investment of 46 billion dollars, CPEC will become a unique model of economic development as well as a pioneering method of international economic cooperation. He said that 46 billion dollars is the economic value but the overall contribution and impact of CPEC would be much deeper and far-reaching.

He said CPEC will not only create a strong overland link between Pakistan and China but also give us the opportunity to strengthen Pakistan's own inland transportation and logistics infrastructure. More than ten billion dollars will be spent on railway projects as well as rail infrastructure in Pakistan.

Similarly, CPEC will be addressing Pakistan's energy crisis as projects worth 35 billion dollars are envisaged in Pakistan in the energy sector.

He said the CPEC project will prove to be a game changer not only for Pakistan but the entire region.

Nawaz also said that Pakistan and China will jointly send a satellite in 2018.

The Prime Minister said that Pakistan will generate 10,400MW of energy through early harvesting of projects, most of which are to be completed by 2018 and others by 2020.

He appreciated the services of Chinese Ambassador, Sun Weidong for further cementing bilateral relations between the two countries in diverse fields.

Pakistan eyeing to be gateway to Oman and China: Sartaj Aziz -- Daily Times

MUSCAT: Pakistan is eyeing to be the gateway to Oman and China as China-Pakistan Economic Corridor (CPEC) gains momentum, said Sartaj Aziz, advisor to Prime Minister of Pakistan on Foreign Affairs in Muscat.

Aziz who is on a two-day bilateral visit to Oman, was addressing the Pakistani community in Oman at Pakistan School Muscat.

"The strategic location of Gwadar port city on the coast of Balochistan, will help Oman explore opportunities in western China. Oman's close proximity to Gwadar will benefit the country as CPEC progresses. Oman is building new refineries and even if ten per cent oil is exported it would benefit Oman. It would also help Oman identify various economic opportunities," said Sartaj Aziz.

"We share cordial relationship with Oman and would like to strengthen it further by intensifying cooperation in social, political, trade, manpower, defence and security issues. Our current trade volume with Oman stands at US\$400mn and we hope to increase it by securing more long-term collaborations in various sectors" Sartaj Aziz said.

This is the first high-profile bilateral visit from Pakistan to Oman in ten years.

Aziz said that the country has suffered from terrorism in the past which left its economy crippled. But the situation has improved. "Terror attacks have gone down by almost 70 per cent. We have been successful in breaking major terrorism networks and have turned the corner. A lot of work is being done to combat terrorism. Our growth rate fell to three per cent in the previous years as a consequence of terrorism in the country. This year the numbers have climbed to 4.7 per cent and we hope to take it till about 5 per cent in the next year. The faith in the economy is restored."

Aziz will be meeting a number of Omani officials and will also attend the foundation stone laying ceremony of the Pakistan embassy at the Diplomatic Enclave Muscat. The budget for the embassy, US\$5mn, has been approved by the Pakistani government. The embassy is expected to be completed within two years.

Aziz said there are close to 250,000 Pakistanis in Oman and they remit US\$820mn.

However, the per capita remittance from Oman is higher as the majority of Pakistani expatriates here are professionals. However, there are 2mn Pakistanis in Saudi Arabia and their annual remittance amounts to US\$4bn, which is the highest by Pakistani expatriates in any country.

All Day

Pak-China in talks to have LNG terminal at Gwadar -- Pak Observer

Islamabad—The experts from China and Pakistan are currently in hectic talks for installing the LNG terminal at Gwadar for 600 MMCFD (million cubic feet gas per day) which will be built on government to government basis with the hope that the project will be completed at the cost of \$250-300 million.

The crucial talks with Chinese officials erecting LNG terminal for the last three days are underway with the hope that the cost of terminal would be finalized at \$250 million.

The same company that is to lay down the 700 kilometer LNG pipeline from Gwadar to Nawabshah will also construct the LNG terminal. The LNG pipeline will be constructed at the cost of \$1.353 billion.

Now the Price Negotiating Committee is engaged with Chinese experts on the cost of LNG terminal. The Pakistan side wants the cost of LNG terminal should be at \$250 million.

If it is finalised at the cost desired by Pakistan, then the whole cost of LNG pipeline and LNG terminal will stand at \$1.6 billion.

China Pipeline Petroleum Bureau (CPPB)—subsidiary of China National Petroleum Company (CNPC) will set up the LNG terminal.

China Pipeline Petroleum Bureau is the same company that is to lay down the 700 kilometre Gwadar-Nawabshah pipeline.

The project will be materialised with the loan at 2 per cent interest for 20 years long period to be arranged from China EXIM bank by the China Pipeline Petroleum Bureau.

To a question, the official said that the cost of \$1.6 billion of both (pipeline and LNG terminal) has been worked out without taxes and duties.

The official said that the ministry of petroleum and natural resources is trying from pillar to post to get the project included in CPEC projects list as the ministry wants the project be included in the property list of CPEC. Planning commission to this effect has taken up the issue with Chinese officials.

“In case, the project is not included in CPEC project, even then the ministry will ask the government to extend the exemption of taxes and duties and provision of special security to LNG pipeline and LNG terminal project as is being provided to all CPEC project,” the official added saying: “If the exemption of taxes and duties are granted, then the project’s cost of whole project would stay at \$1.6 billion.”

Pak-China optic fiber cable project to be completed by June 2018 -- APP

ISLAMABAD – The 820-kilometer long Pak-China optic fiber cable project from Rawalpindi to Khunjab would be completed at a cost of US\$ 44 million by June 2018.

After completion of this important project of Information Technology (IT) under the China-Pakistan Economic Corridor (CPEC) would convert trade corridor into digital corridor.

The project was being completed in collaboration between China’s Huawei and Special Communication Organization (SCO), Senior Project Manager, SCO, Muhammad Adil said.

He informed that this project would be beneficial for strategic link between both Pakistan and China.

This project would not only generate revenue but it would also the safest route of voice traffic between the two countries, he added.

Muhammad Adil said, the Pak-China fiber optic fiber cable would provide an alternate source for the world trade.

He hoped that awareness about trade, tourism and Information Technology (IT) would create economic opportunities in Gilgit-Baltistan (GB).

The foundation stone of the Pak-China optic fiber cable project was laid in May this year.

Around 18.2 kilometers portion of the optic fiber cable would pass through federal capital, 466 kilometers from Gilgit-Baltistan (GB), 280 kilometers from Khyber Pakhtunkhwa (KPK), and 47 kilometers from Punjab.

The optical fiber cable would reach Rawalpindi from Khunjrab via Karimabad, Gilgit, Chilas, Babusar Top, Naran, Mansehra and Jery Kas.

A project to expand the fiber cable up to Gawadar was in the final phase of approval which would provide an international linkage along the entire route of CPEC.

MoU signed to set up Pak businesses in China -- The Nations

Lahore - A Memorandum of Understanding (MoU) was signed between the All Pakistan Business Forum (APBF) and Zhimakaimen Economic and Trading Industrial Zone Management Company Limited, China at the Small and Medium Enterprises Development Authority's (SMEDA) Head Office here on Wednesday.

APBF President Ibrahim Qureshi praised SMEDA for providing the platform to link the Chinese and Pakistani private sectors.

He also appreciated the offer from the Chinese side and said that APBF, a representative body of diverse businesses, including manufacturing, services and trades, would benefit from this collaboration.

He further said that Pakistani businessmen were keen to develop their businesses in China, but faced numerous challenges, which, he said, could be addressed through the support of SMEDA.

The meeting held in this regard was jointly chaired by Dr Naeem Rauf, GM-Central Support and Muhammad Alamgir Chaudhry, GM-Outreach of SMEDA.

Whereas, Huang, Director Planning of the Chinese Company and Sheharyar Tahir, Head External Relations Department of SMEDA, gave briefings on their respective organisations.

In the wake of opportunities emerging from the China–Pakistan Economic Corridor (CPEC), SMEDA, as a facilitator for the small and medium enterprises, has been playing an active role in identifying potential investment opportunities and developing linkages between the Chinese and Pakistan business sectors.

Huang, Director Planning, gave a detailed presentation on the Chinese group and shared that the Chinese group had been engaged in building large business hubs in major cities of China, and planned to build shopping complexes for the countries that are along the traditional Silk Road.

In light of the agreement signed, the company shall provide opportunities to Pakistani businesses and brands to open their shops and businesses in Jiaxing city, near Shanghai.

The Chinese side informed that there was a huge demand for Pakistani products in China and special packages would be offered to the Pakistani businesses, including free value-added services, to facilitate them in China.

Sheharyar Tahir, Head External Relations Directorate, elaborated on the role of SMEDA in bringing both sides together and assured the participants of SMEDA's continued support for developing business-to-business linkages in the SME sector.

He hoped that the MoU signed between the two organisations would play an important role in bringing the business communities of both the countries closer and providing opportunities for enhancing trade.

National Board members from APBF and SMEDA General Managers M Alamgir Chaudhry, Dr Naeem Rauf and Nadia Jahangir Seth were also present on the occasion.

**Speedy work on CPEC under way in Punjab, says Chinese diplomat --
The News**

Speedy work on CPEC under way in Punjab, says Chinese diplomat
LAHORE: Chinese Consul General Yu Boren said on Friday Shahbaz Sharif was equally popular in the Chinese leadership and people as he was among the Pakistani masses. He said Shahbaz Sharif was a man of action and his vision for the uplift of the education sector was commendable. He said work was being carried out speedily on the CPEC projects in Punjab.

He was addressing a function held in connection with Chief Minister's Chinese Language Scholarship Programme. He said that 300 megawatts solar power project at the Quaid-e-Azam Solar Park, Bahawalpur, had been completed expeditiously. Similarly, he said, 65 percent civil work of 1,320 megawatts coal power project in Sahiwal had been completed and this project would be completed in the middle of 2017. He said work was also in progress expeditiously on the Lahore Orange Line Metro Train project and it was hoped that it would also be finished within the stipulated period. He said the names of Prime Minister Nawaz Sharif and Chief Minister Shahbaz Sharif would always be remembered for taking the Pak-China friendship to new heights.

Speaking on the occasion, Chief Minister Shahbaz Sharif said that under the Punjab government's vision of investing in future of the country, 50 male and female students were going abroad for PhD in the best universities as well as 130 students were leaving for China for learning the Chinese and they had been selected purely on merit and on account of eligibility.

He said these talented sons and daughters of the nation had got scholarships on the basis of their hard work and without any favouritism, collusion or bribe. He said these students on their return to Pakistan would play an active role in progress and prosperity of the country.

The chief minister congratulated the students going abroad for PhD and learning the Chinese language besides those who got outstanding marks in the 9th class examination. He gave laptops to students going to China for learning the Chinese and those going to leading universities of the world for PhD as well as to students getting more than 500 marks in the Class 9th examination. He said the first batch of 66 boys and girls was already learning the Chinese language in Beijing and the new batch of 130 students would soon leave for China for this purpose.

Similarly, he said, 33 students had been selected for PhDs in leading universities of the world, including Cambridge, Oxford, Imperial University, National University of Singapore and others. He said the expenditure being incurred by the Punjab government on these students was a useful investment for bright future of the nation. He said students who would return to Pakistan after learning the Chinese would serve as a bridge between Pakistan and China as students of other provinces of the country had also been included in this programme. He said in this way, the link between Beijing and Lahore, Quetta, Peshawar and Karachi would strengthen and the process of national progress and prosperity will accelerate. He said these students would promote CPEC, which would stay forever and more investment of billions of dollars would be made in this project.

He said that CPEC was also a part of 'One belt, one road' programme of Chinese President Xi Jinping and while there was a huge support for his splendid vision, opposition to it had also intensified. He said there was lobbying against this project in a neighbouring country and for this reason a seaport was being built in front of Pakistan's seaport. He said there was a collusion between India and some other countries against CPEC as they felt threatened by this project and the prime minister of India had spoken against Balochistan. He said he was sure that Pakistan would move ahead of India due to strengthening of its economy as a result of CPEC.

The chief minister thanked Chinese Consul General Yu Boren for extending full cooperation in issuance of visas to students and stressed upon the students to

utilise all their energies and abilities in learning the Chinese. He asked them to closely observe the progress made by China.

He said these students were ambassadors of Pakistan and they would have to prove this fact through their conduct and behaviour. He said work is in progress expeditiously on 1,320 megawatts coal power project in Sahiwal and this project will be completed by the middle of 2017.

Provincial Minister Begum Zakia Shahnawaz, while addressing the function, said that opportunities of higher education had been made available to poor but talented students through the Punjab Educational Endowment Fund.

Vice-Chancellor of the University of Education Dr Rauf Azam said Chief Minister Shahbaz Sharif had given instructions to send 500 students to China for learning the Chinese language. He said these students had been selected purely on merit and transparency.

Gwadar girls' college -- Nations

Education plays a great role in the progression of a country.

I appreciate the commissioner of Gwadar, Tofail Baloch, for his support for the females of Gwadar.

The government girls' college in Gwadar which remained closed for a long time, has finally reopened.

This has also helped the females living in adjoining areas who commute to Gwadar.

The situation can be further improved by establishing more educational institutions.

Hopefully the government will work towards this.

All Day

Pakistan, China to jointly establish TVET institutes -- APP

ISLAMABAD: Pakistan in collaboration with China will establish state-of-the-art technical and vocational institutes at strategic nodes along with the China-Pakistan Economic Corridor (CPEC) route.

Talking to APP, National Vocational and Technical Training Commission (NAVTTTC) Executive Director Zulfikar Ahmad Cheema said that China will boost cooperation with Pakistan in the technical and vocational sector and establish TVET institutes in Gilgit, Mansehra, DI Khan, Abbottabad, Quetta and Gwadar.

The National Vocational and Technical Training Commission as an advisory body to the federal government on TVET has taken vital initiatives to introduce reforms in the current technical and vocational system of Pakistan, he said.

Cheema said that the National Vocational and Technical Training Commission has initiated some new steps, including establishment of Job Placement Center and introducing competency-based training across the country.

The China-Pakistan Economic Corridor would open new vistas of prosperity and development and offers enormous employment opportunities for the people of Pakistan, he said.

The National Vocational and Technical Training Commission executive director said that the China-Pakistan Economic Corridor is a living reflection of a strong Pak-China bond and it will serve geostrategic interests of the two countries.

Both the countries should enhance their collaboration to reboot the TVET system in Pakistan, he urged.

Skilled youth is the most powerful tool for poverty alleviation and can play an important role in the socioeconomic development of the country, he said.

China has extended its full cooperation in starting a teacher's training programme, establishment of a research center at Islamabad and upgrading the existing labs equipment and institutes of Pakistan, he said.

CPEC Body members to visit Gwadar by month end -- Pak Observer

Islamabad—Members of the National Assembly's Standing Committee on Planning and Development will visit Gwadar in the last week of this month to physically inspect the progress in implementation of the China-Pakistan Economic Corridor. During the visit the Committee will review the progress of work on various projects being executed under the CPEC as well as the Public Sector Development Programme.

It will also receive a briefing from the federal and provincial authorities on the establishment of a university in Gwadar.

Gwadar is at the centre of the forty-six billion dollars CPEC project and more than one billion dollars worth of projects are to be developed around its port by the end of next year.

‘One window facilitation desk’: Gwadar airport facility for Ops --

Express Tribune

ISLAMABAD: The Gwadar Airport will have a ‘One Window Facilitation Desk’ by October this year to provide all necessary information to Overseas Pakistanis (OPs) before their departure to different countries, ensuring their safe travel. “The facilitation desk is being established on the directives of the Federal Ombudsman,” said Grievance Commissioner for Overseas Pakistanis to Federal Ombudsman, Hafiz Ahsan Ahmad Khokhar. He said the facilitation desks for OPs at eight airports had received overall 32,476 complaints since being operational, including 947 formal complaints, which were instantly resolved through a mechanism devised by the Federal Ombudsman. He said most complaints filed by the Ops were related to lost luggage and issues related to Passport and National Identity Card for Overseas Pakistanis.

Sindh trains, posts 168 ex-servicemen to guard CPEC projects -- Dawn
KARACHI: Around 168 ex-army personnel out of the planned 2,000 for the 'special protection unit' of the Sindh police have been trained and posted at various locations while nearly 500 more have been selected by the authorities concerned, it was learnt on Saturday.

Officials in the Sindh home ministry said they had recruited the first batch of the planned 2,000 ex-army personnel for the special protection unit (SPU) who had been trained and posted somewhere.

"Some 168 ex-army personnel have been trained and are on duty," said a senior official in the home ministry but he did not provide details.

He said around 487 more had been selected and their medical examination was under way. "Soon, they will be sent for training," he added.

The SPU was set up by the Apex Committee of Sindh on the directives of the federal interior ministry to provide 'seamless security' to the Chinese who are coming to Sindh for projects related to the China-Pakistan Economic Corridor (CPEC).

Interior Minister Chaudhry Nisar Ali Khan said some 2,000 ex-army personnel would be there to strengthen the capacity of the Sindh police and assist in safeguarding the CPEC-related projects.

However, leaders of the Pakistan Peoples Party, including Qamar Zaman Kaira, criticised the interior minister for violating the Constitution by interfering in the law and order issue in Sindh, which is a provincial subject.

Officials said this was not the first time that Sindh police were hiring ex-servicemen as some 1,200 retired soldiers had been recruited two years ago to cope with the security challenges and targeted operations in Karachi.

"Any criticism against the recruitment of retired soldiers for the SPU is uncalled-for as the Sindh police did it previously as well," said an official in Islamabad.

The 1,200 retired soldiers of the armed forces were recruited in line with the decision of the provincial cabinet mainly for security duties in Karachi.

Officials in the Sindh police then had said that the induction of ex-servicemen in its ranks had helped the police as the growing security challenges required a much larger force than the existing one.

They said that the benefit of hiring retired military men was that they were already prepared to join the force with immediate effect and "just need to learn the basics before being inducted".

The Sindh government said it was ready to take all measures needed to establish an effective SPU for the Chinese investors and their projects.

"The remaining vacancies [in the SPU] will be advertised soon," said an official in the home ministry.

Chairing a meeting mulling over the security plans for CPEC projects in Sindh, Chief Minister Syed Murad Ali Shah said CPEC would open new vistas of prosperity and development in Sindh like elsewhere in the country.

Officials said the Sindh government had already issued standard operation procedures (SOPs) for the security of the Chinese in the province.

They added that the federal government had also raised a special security division (SSD) consisting of nine infantry combat battalions of Pakistan Army with a force of 9,000 personnel and six wings of civil armed force of 4,502 personnel for the

security of CPEC projects and Chinese expatriates.

The provincial government is yet to give its input in the terms of reference for the SSD, under which there would be a dedicated headquarters for each CPEC project.

Officials claim that CM Shah had already directed the Sindh police chief to ensure proper security of CPEC projects and expedite the appointment of 2,000 special force personnel for the security of the Chinese.

All Day

Gwadar Port to handle 300-400m-ton load of goods annually: Chinese report -- Pak Observer

Islamabad—The Gwadar Port after coming into stream will start handle the 300-400 million tons of load of goods to be traded annually playing as a catalyst in stimulating the economy of country which is slowly growing 2-3.5 per cent for many years, reveals a Chinese report.

The port is currently handling half a million tons of load that will surge up to one million next year.

According to eminent economist of the country Dr Ashfaq Hasan Khan, Principal and Dean of School of Economics, NUST, Islamabad while mentioning the salient features of Chinese report here in a National Conference on CPEC: Marco and Mirco Economic Dividends held here on Tuesday told that the Gwadar port will alone on its completion start handling the 300-400 million tones of load of goods whereas all the ports of India have the current combined capacity of handling 500 million tones of goods a year.

The CEPEC project with Gwadar port will handle the big economies of \$4-5 trillion of western part of China, Pakistan's \$300 billion economy along with a bunch of economies of CAS (Central Asian States) and under this scenario CPEC corridor will be termed as international economic corridor meaning by that Pakistan will be part of the international economic activities. And in case Iran which has manifested its interest to become part of CPEC even in the presence of its own Chabahar Port, then this project will become a part of not only economic integration of regional but international economies.

Khan said that Gwadar port along with roads network will not only change the face of Balochistan in particular, but will also bring new wave of development across the country in general.

He said that there is no doubt that CPEC project carries paramount importance and it is really beneficial and may change the face of the country provided Pakistan successfully copes with the capacity constraints and ensures the transparency in agreements of all the projects under CPEC umbrella.

According to one estimate, CPEC is expected to enhance the economic growth at least by two percentage point by 2020 and an additional 1.5 percentage point by 2030. Higher economic growth will create additional jobs in the range of 1.5-2 million per annum that will increase per capita income and tax revenue.

Dr Salman Shah, former finance minister of Pakistan and Chairman of Pakistan Centre for Economic Cooperation said the economic integration of China and Pakistan is the key to make CPEC a game changer highlighting the grey areas which if get corrected will make it a success story.

Dr Shah said that that it is an economic imperative for China and Pakistan to increase and fortify their economic integration as the basis of increasing their regional economic power and to face the competition presented by other regional blocs. "Our goal should be to transform Pakistan's pivotal geography and its strategic relationship with China into a sustainable process of economic integration between the two countries and leading ultimately to a huge trading bloc encompassing Africa, Middle East, West Asia, Central Asia, Pakistan, China and Russia."

Shah said that Zhu Rangji, former prime minister of china and great strategic mind of china laid the foundation stone of Gwadar along with the then President of Pakistan General (retired) Pervez Musharraf. "His view was that every super power has access to the sea on all sides of its borders like the USA has an east coast and west coast. For China Pakistan is west coast. "This means Pakistan economically can be to China what California is to the USA," Dr Shah argues.

All Day

CPEC to help overcome energy crisis by 2018: minister -- Dawn

KHUZDAR: The federal Minister for Planning, Development and Reforms, Ahsan Iqbal, said on Thursday that development in Balochistan was the top priority of the government and it had launched several development projects in the last three years in the province.

Addressing a ceremony at the Balochistan University of Engineering and Technology, he announced a project worth Rs 800 million for building a hostel and laboratory on the university campus.

The government had allocated record funds for universities in Balochistan and was establishing new universities in less-developed areas of the province to expand the higher education network. The establishment of universities in Turbat, Zhob and Gwadar would provide opportunities to the local population, he added.

"The China-Pakistan Economic Corridor (CPEC) is a national project and politics on this will be an injustice to the people of Pakistan," the minister said, adding that the government was committed to completing the projects that fell under the framework of CPEC.

He said that CPEC would benefit the less privileged areas of Pakistan. It would connect Pakistan with the world and open avenues for cooperation for the people, communities and states across the region. No one will be allowed to sabotage this project, he added.

The energy projects under CPEC would help overcome energy crisis by 2018 as \$35 billion would be spent in the sector. Out of the \$35bn, \$11bn would be spent in Sindh while \$9bn would be allocated to Balochistan, said Mr Iqbal, adding that the Gwadar-Quetta road would be completed by December this year and the Gwadar - Khuzdar-Ratodero road would be completed in the stipulated time.

Mr Iqbal, who was on a three-day visit to Balochistan, chaired a meeting in Ziarat to review work on projects that formed a part of the prime minister's fund for the development of Ziarat. A master plan would be formulated for an integrated development of infrastructure, he said.

Quality educational institution being built in Gwadar: CM -- Nations
Chief Minister Shahbaz Sharif has said the Punjab government is working on the project of Khadim-e-Punjab Bahria Model School and College in Gwadar which will play an important role in providing quality education to children of Balochistan.

He said a high standard educational institution was being constructed in Gwadar for the children of this area.

He was addressing a meeting through a video link, here Tuesday, which reviewed the project of Khadim-e-Punjab Bahria Model School and College, Gwadar. The chief minister said the Punjab government had included children of all provinces as well as Gilgit-Baltistan and Azad Kashmir in its educational programmes and this step had promoted national solidarity, brotherhood and unity. He said high quality work would be ensured on the project of Khadim-e-Punjab Bahria Model School and College, Gwadar.

Provincial Minister for School Education Rana Mashhood Ahmad, Naval Commander Balochistan Coast Gwadar Commodore Akbar Naqi, Secretary School Education, Secretary Planning & Development and the authorities concerned participated in the meeting through a video link.

CPEC to change destiny of people: Chinese envoy -- The News

During the past 30 years, China has achieved rapid economic growth and sustained livelihood improvement. China has been the world's second largest economy since 2010 and created a miracle of development by "China speed".

Ambassador of China Sun Weidong expressed these views while speaking on the occasion of 67th Anniversary of founding of People's Republic of China. Sardar Ayaz Sadiq Speaker National Assembly was the chief guest.

The ambassador further said, "We pursue peaceful development. We maintain that all countries, big or small, are all equal. We advocate the opening-up strategy of mutual benefits and win-win cooperation. We develop friendship and cooperation with all countries based on the Five Principles of Peaceful Co-existence. We have made our contribution to the world peace and development."

He added, China and Pakistan are all-weather strategic cooperative partners. Since the establishment of diplomatic ties 65 years ago, China and Pakistan have always maintained mutual understanding, mutual trust and mutual support.

No matter how the international and regional situations have changed, our friendship remains unbreakable and even gets stronger than before. It has become a model of relations between countries.

Recently, when learning that some provinces of Southern China suffered from severe flood, the Pakistani government promptly provided emergency assistance of 10,000 tons of rice to China. It once again reflected the love and care of Pakistani people to the Chinese people in times of difficulty. Please accept our heartfelt gratitude to our Pakistani brothers!

He said since the successful state visit of President Xi Jinping to Pakistan last year, the all-round cooperation between China and Pakistan has maintained strong momentum with substantive advancement.

As the major and pilot project of the Belt and Road Initiative, China-Pakistan Economic Corridor has made significant progress. Up to now, among the 30 early harvest projects, 16 have been completed or are under construction, with investment of more than 13 billion US dollars.

These projects have created tens of thousands of job opportunities for the local people, and brought great vitality to the development of Pakistan.

From its very beginning, CPEC is a project designed to promote people's livelihood. The ultimate goal of CPEC is to achieve economic growth and improve people's livelihood, no matter whether they are projects of Gwadar Port, transportation infrastructure, energy and industrial cooperation, or they are educational and medical programmes. That is why CPEC has won extensive support from people of all walks of life in Pakistan, he added.

The ambassador said, like all the other projects under the Belt and Road Initiative, CPEC is an open and inclusive cooperation concept. It is neither exclusive nor against any third party. It is by no means a zero-sum game. It will make the people of this region benefit from connectivity, industrial cooperation and cultural exchanges. It will play an active role in promoting the development and prosperity of the region.

The Chinese people always advocate high morality and honour commitments. We emphasise hard work and believe that actions out-speak words. What is now under construction are just early harvest projects of CPEC.

I am convinced that in the near future, CPEC will attract more investment, bring more business opportunities and promote more exchanges just like a huge magnet. We will witness the changes and benefit from the dividends brought by CPEC.

On this occasion, I want to thank the Government of Pakistan for promoting the construction of CPEC. I want to thank the Pakistani military and law enforcement agencies for creating a safe environment for the Chinese people and institutions in Pakistan. I also want to thank the political parties, think-tanks, media and all the friends for your valuable support to the China-Pakistan friendship and cooperation.

“Today, I invited some representatives of both Chinese and Pakistani technicians and engineers. They are working on the construction sites of CPEC projects. They are: engineers working on KKH Phase II in Havelian from China Road and Bridge Corporation, engineers based in Multan of the M4 Highway (Multan – Sukkur section) from China State Construction Engineering Corporation, technicians of Sahiwal Coal-fired Power Plant from Huaneng Shandong Ruyi Energy Corporation, engineers of Port Qasim Coal-fired Power Plant from Power China Resources, engineers of Gwadar Port from China Overseas Ports Holding Company.” Let’s join hands towards our common dreams and make unremitting efforts to achieve the goal of the Community of China-Pakistan Shared Destiny at an early date, he concluded.

All Day

ECNEC approves \$2b Gwadar-Nawabshah LNG terminal -- Express Tribune

The Executive Committee of the National Economic Council (ECNEC) – the country's highest project approval authority – sanctioned the mega scheme along with five other projects. In total, the ECNEC approved six projects costing Rs281 billion. Some of the projects cost were revised upward, indicating flaws in planning and execution.

Work on Gwadar Airport to start this year

The pipeline project

The ECNEC approval for pipeline project was necessary to negotiate the terms of \$1.4 billion loan that Islamabad is keen to get from Chinese Export-Import (Exim) Bank. The terms of the loans carries implication for the cost of the project, which is currently estimated at \$2 billion or Rs203.3 billion, according to officials of the Ministry of Planning and Development.

Pakistan has hoped that the Chinese Exim Bank will provide 85% of the financing under government-to-government mode. The Engineering Procurement and Construction (EPC) contract will be given to a Chinese company.

In phase-I, the pipeline will follow the coastal pipeline corridor, which was formally established for the Iran-Pakistan gas pipeline. In phase-II, a 90-kilometre patch will be constructed from Gwadar to Pakistan-Iran border to tie the national network with Iranian system, according to the project documents.

The financial analysis of the project shows that the project will be viable, if it operates at its full designed capacity of 1,500 mmcf/d. The project is expected to be completed in two years (2016-2018), according to a handout of the Finance Ministry. It said the key objective of this project is to overcome the shortage of natural gas supply by importing LNG at Gwadar. The Economic Affairs Division has agreed to discuss the financing arrangements for this project with EXIM Bank China, said the Finance Ministry.

Iran, Saudi Arabia eager to join CPEC

Electric locomotives

The ECNEC also jacked up the cost of procurement of 58 Diesel Electric Locomotives to Rs16.3 billion. The procurement will be completed by December 2016. The proposed locos will replace 50 over-aged locomotives and will be used to haul freight and passenger services along with High Capacity Wagons fitted with air brakes and roller bearing. With the completion of the project the capacity of Pakistan Railways will improve many times, the meeting was informed.

The ECNEC approved phase three of the 100 small dams in Balochistan project at a cost of Rs7.8 billion. The project will complete in three years' time and help in managing flood flows.

The highest project approval authority also cleared Southern Punjab Poverty Alleviation Project at a revised cost of Rs4.7 billion including Rs4.1 billion foreign loan. The project will help improve the standard of life in four less developed districts of Punjab -Bahawalpur, Bahawalnagar, Muzaffargarh and Rajanpur.

The International fund for Agriculture Development has helped in the financing of the project through a soft loan of \$40.13 million. The project will help reducing poverty in the areas of southern Punjab with assistance in income generation, increasing agricultural productivity, improved livelihood opportunities, providing vocational training specially to women and building physical infrastructure to improve the quality of life. The project is expected to be completed next year.

Other projects

The ECNEC also approved the Golen Gol Hydropower project, having 106MW generation capacity, at a revised cost of Rs29.1 billion. The project is being constructed in the district of Chitral, Khyber-Pakhtunkhwa. The government is borrowing Rs10.7 billion from foreign lenders to finance the project.

ECNEC says yes to Neelum-Jhelum, CPEC road projects

The project will be connected with the national grid with a 198 km transmission line which include 132kv transmission line from Golan Gol to Timurgarha passing over Lowari pass (145km) and 132 kv single circuit line from Taimurgarh to Chakdara (53 km).

The ECNEC also allowed the Peshawar Electric Supply Company to construct 7th Secondary Transmission Line and Grid Stations at a cost of Rs20 billion. The project will be completed in five years.

All Day

China extends concession of \$50m in cost of Gwadar LNG terminal -- Pak Observer, G-8 Markaz, G-8, Islamabad, ICT, Islamabad, Pakistan

Islamabad—In a positive development, China has extended concession of \$40-50 million in the cost of LNG terminal to be constructed at Gwadar Port. The terminal, once completed, will have the capacity to re-gasify the 600 mmcf.

Earlier, Chinese company had offered to construct the Gwadar terminal at \$300 million and in latest development it has agreed to extend the concession of 40-50 million dollars meaning by that it would now build the terminal at the cost of \$250 million, one of top officials of the Ministry of Petroleum and Natural Resources told Pakistan Observer.

China Pipeline Petroleum Bureau (CPPB) will, the official said, construct the said terminal. However, Pakistan is stilling seeking more concession in the cost to be incurred on the construction of Gwadar LNG, but Chinese side is no more willing to further provide the solace to Pakistan to this effect arguing it has already provided the concession of \$40-50 million.

China Pipeline Petroleum Bureau (CPPB) is the same company which is also to lay the 700-kilometre LNG pipeline from Gwadar to Nawabshah. The LNG pipeline will be constructed at the cost of \$1.353 billion. Now the Price Negotiating Committee is engaged with Chinese experts on the cost of LNG terminal.

If it is finalised at a cost desired by Pakistan, then the whole cost of LNG pipeline and LNG terminal will stand at \$1.6 billion. China Pipeline Petroleum Bureau (CPPB)—subsidiary of China National Petroleum Company (CNPC) will set up both the LNG terminal and construct the 700-kilometre Gwadar- Nawabshah pipeline. The project will be materialised with the loan at 2 per cent interest for 20 years long period to be arranged from China EXIM bank by the China Pipeline Petroleum Bureau. To a question, the official said that the cost of \$1.6 billion of both (pipeline and LNG terminal) has been worked out without taxes and duties. The Gwadar-Nawabshah pipeline will be built on EPC-F (engineering procurement construction) with financing mode. The executive committee of national economic council (ECNEC) has ultimately approved the said pipeline with 85 per cent financing from China and 15 per cent financing to be arranged by the government of Pakistan.

All Day

Chinese furniture industry keen to further enhance collaboration with Pak counterparts -- Pakistan Today

The leader of the visiting Chinese furniture manufacturers' delegation Zuo Boyang on Wednesday said they want to further enhance collaboration with Pakistan Furniture Council (PFC) to promote furniture business and pave way for improved trade ties between the business communities of the either countries.

A high-level Chinese furniture delegation on a 2-day visit to Pakistan today visited PFC head office to exchange their expertise and experiences in regard to enhancing ties in the furniture sector. Zuo took a keen interest in various made in Pakistan furniture products and thoroughly discussed the ways and means for boosting the furniture trade especially office furniture and strengthening the existing business relations among the corporate sectors of two countries on modern lines.

Zuo Boyang, leading Chinese furniture producer, on this occasion, said Pakistan's furniture with calligraphic engraving had great demand in international markets, which seems to be the dominant one in Pakistan, therefore Pakistani craftsmen should focus on working in this particular area to earn the much-needed foreign exchange. He said Pakistan has excellent craftsmen and designers, who could virtually give life to a piece of wood. Pakistan also has the potential to capture its share of the international market because local industry in Pakistan has the finest wood available in the country.

Rita Cho, another Chinese leading furniture producer, said both the countries not only share a border but also have unanimity of views on various political and economic issues. The two countries have a combined market of more than 1.5 billion people but the trade volume needs to be pushed up. "The Chinese importers may have better prospects for Pakistani goods, particularly of furniture. "The involvement of Chinese enterprises, both in terms of technical and financial

assistance in several development projects is reflective of our cordial relations based on mutual trust and sincerity and Chinese furniture sector is willing to enhance its trading ties with Pakistan and there are many areas which can be explored with mutual enterprises in furniture sector in Pakistan.

Earlier members of the delegation were briefed by Deputy General Manager PFC Faisal Mohsin about the bright scope of the future industry in Pakistan. He said furniture sector is being promoted under the dynamic leadership of PFC Chief Executive Mian Kashif Ashfaq. He said most of the country has great scope for Pakistani Furniture, because they like Pakistani Traditional Hand-Carved furniture designs with classic finishing and similar designs can be replicated in China market, therefore efforts must be made to promote furniture exports by more regular participation in international shows.

“All this can happen if there is government’s will and a vision amongst furniture traders. Joint ventures with China through trade commissions for providing machines on a lease can bring product quality at par with highest international standards. But for this to happen, the furniture industry in Pakistan must vigorously transform from cottage or small scale industry to innovative industry through training, upgrading supplies and imports,” he added.

He said despite the massive influx of inexpensive Chinese furniture in the markets, Pakistani handmade furniture is still admired among masses for its customary designs, durability and quality .He pointed that furniture exports from Pakistan were hovering between \$8.0 million to \$12 million per annum, which did not reflect even a fraction of the actual potential of the furniture industry.

All Day

Pakistan Seeks \$1.7 Billion Bids for Southern Highway Plan -- Bloomberg

Pakistan is seeking foreign investment of \$1.7 billion to build a new highway in the southern province of Sindh to supplement a Chinese-funded infrastructure network being laid across the country.

The National Highway Authority will ask for bids next week for the 296-kilometers (184 miles) highway between the cities of Hyderabad and Sukkar, the agency's Chairman Shahid Ashraf Tarar said in an interview in the capital, Islamabad.

"Other than the Chinese, this time we expect that Turkish, Malaysians and South Koreans will come and bid," Tarar said.

Pakistan's economic growth has accelerated to almost 5 percent in the past three years after averting a balance-of-payments crisis in 2013 by submitting to an International Monetary Fund loan program worth \$6.6 billion, which ended last month. Along with an easing of inflation and as domestic security threats have abated, China announced last year it would invest in projects worth about \$46 billion in Pakistan as part of a so-called economic corridor.

To read about China's ambitions in Pakistan, [click here](#).

Infrastructure Landscape

Prime Minister Nawaz Sharif is pegging his 2018 re-election campaign on bridging chronic energy and infrastructure gaps as his administration targets a 7 percent economic growth rate within two years. The construction of a six-lane highway on the eastern route of the China-Pakistan Economic Corridor is expected to start in the first quarter of next year.

"There is big gap between the potential and the actual road network," said Mohammed Sohail, chief executive officer of Topline Securities Pakistan Ltd. in Karachi. "Investors will look into this opportunity" as the economy continues to expand, he said.

Sign Up

The highway authority has so far started over \$9.5 billion worth of projects in the past three years and is hoping to attract another \$5 billion investment in the next five, more than half of which will be pegged to upgrade the China corridor routes, Tarar said. The length of the main highway will be tripled to 1,800 kilometers by linking all road arteries with industrial zones on the route, he said.

The 3,000-kilometer-long corridor stretches from Xinjiang in western China to Pakistan's Gwadar on the Arabian Sea. Of China's planned investment, \$11 billion is allocated for infrastructure projects and big chunk of it will be spent in Balochistan province, home to the deep-sea port in Gwadar.

"The landscape of infrastructure is going to be transformed in the next three years," said Tarar. "Imagine you travel from Karachi to Peshawar on the motorway, the time and energy it'll save with security ensured. Unless you have good infrastructure the economy will drag."

All Day

Work on M9 Karachi-Hyderabad Motorway in full swing: FWO DG -- BR
KARACHI: Director General Frontier Works Organization (FWO) Muhammad Afzal has said that development work of M9 Karachi-Hyderabad Motorway is in full swing.

He added that there is no disturbance for vehicular traffic. Talking to Daily Times, Afzal said all energies and resources are being used to accelerate the work as the FWO's objective is 'Striving for Excellence'.

He said according to the agreement the existing 4 Lane Karachi-Hyderabad Superhighway will be converted into 6 Lane Motorway of International Standard, which is also a key project related to China Pakistan Economic Corridor Project (CPEC).

Afzal said the construction of M-8, N-85 and N-25 will provide a vital link between Gwadar and Quetta and Gwadar and Indus Highway, which as a complete road communication will be a game changer for the country's prosperity.

He said Karachi-Hyderabad Motorway project maintenance is in line with international practices and after the completion it would be used for over next 25 years, playing a key role by linking the port city to the whole country.

DG FWO declared that this project will ultimately play a key role in area development and progress in every sector.

China to upgrade Pakistan rail network -- Global Times

Pakistan said China's help in upgrading its railway system would help both the country and the region.

Under the China-Pakistan Economic Corridor (CPEC), a key part of China's "One Belt, One Road" initiative, China will help Pakistan upgrade its railway system, starting with the Karachi-Peshawar Railway Line, or Main Line 1 (ML1).

"The ML1 is another milestone of the China-Pakistan Economy Corridor," Ahsan Iqbal, Pakistan Federal Minister for Ministry of Planning, Development and Reform, told the Global Times in an exclusive interview.

"It will improve the railway connectivity between China and Pakistan not only for the two countries, but for the connectivity of the whole region ... It is a transformational project for the entire region."

Pakistan, which is located at the crossroads of South Asia, Central Asia and China, seeks to promote more regional cooperations.

The upgrading of the 1,700-kilometer-long ML1 will be the first phase, with a long-term plan expected to connect the southern port city of Gwadar with Khunjerab, a China-Pakistan border town.

Iqbal said Pakistan hopes the \$8 billion ML1 upgrading project is expected to be completed in five years. The Export-Import Bank of China is providing \$5.5 billion, with the Asian Development Bank covering the balance.

"Through this rail connectivity, opportunities will surface especially in transporting goods between Pakistan and China," said Iqbal. "This will have a great impact on transport efficiency in Pakistan and provide an alternate route for China to do trade with the rest of the world."

Recent years have witnessed a huge boost in China-Pakistan ties, highlighted by the collaboration on the construction of the Gwadar port.

"We feel very comfortable and very safe in engaging with Chinese companies, and the Chinese government has recommended top enterprises," said Iqbal. "These projects have become a symbol of China-Pakistan friendship."

The railway system is considered the backbone of Pakistan's economy, said Iqbal, adding a coordination meeting is scheduled for November to review the project and provide a framework for mid- and long-term projects.

All Day

Economic corridor: only two projects worth \$137 million completed -- BR

Only two projects at a cost of \$137 million under the China-Pakistan Economic Corridor (CPEC) have been completed so far out of 17 early harvest proposed projects at a total estimated cost of \$18 billion. According to the information shared with the National Assembly last week, the two CPEC projects that have been completed are Quaid-e-Azam 100 megawatts Solar Park at a cost of \$137 million and Digital Terrestrial Multiband Broadcast at a cost of \$2 million.

Ten of the remaining 15 projects that are under implementation include: (i) 10 energy projects at a total cost of \$11.186 billion to generate around 4,460 megawatts electricity by 2018; (ii) two relating to transport infrastructure at a cost of \$6.1 billion, (iii) two relating to Gwadar Port at a cost of \$0.3706 billion and (iv) one Cross Border Optical Fiber Cable at an estimated cost of \$0.044 billion.

Tentative completion deadline of two separate coal-fired projects is as follows: (i) 660 megawatts of Port Qasim Electric Company Sindh at a projected cost of \$1,980 million is scheduled for completion in 2017/2018; and Sahiwal Coal-Fired Power Plant with a generation capacity of 1,320 megawatts at a cost of \$1,600 million will be completed in June 2017.

Four Engro Thar projects with a total generation capacity of 1320 megawatts (330 MW each) at a cost of \$2 billion will be completed by 2018; surface mine in block-II of Thar coal field, 6.5mtpa, at a projected cost of \$1,470 million is scheduled for completion in 2018; Dawood 50 megawatts wind farm, Bhambore, Sindh at an estimated cost of \$125 million is to be completed by November 2016; UEP 100 megawatts wind farm, Jhimpir, Sindh, at a cost of \$250 million will be completed by September 2017; Sachal 50 megawatts wind farm, Jhimpir, Sindh, at a projected cost of \$134 million will be completed by July 2017; Suki Kinari Hydropower Station in Khyber Pakhtunkhwa at an estimated cost of \$1,802 million is scheduled for completion in 2021/2022; and Karo Hydropower Station, Azad Jammu Kashmir and Punjab at a cost of \$1,420 will be completed in 2020/2021.

Two other projects under the CPEC-Transport Infrastructure Projects worth \$6.1 billion are in the implementation stage. Karakorum Highway Phase-II (Raikot-Islamabad Section) worth \$3,500 million will be completed in 2017/2018 and Peshawar-Karachi Motorway (Multan-Sukkur Section) worth \$2,600 million will be completed in 2018. Two projects under the CPEC-Gwadar Port worth \$0.3706 billion are also in the implementation stage and are scheduled to be completed in 2018. Eastbay Expressway with a cost of \$0.1406 billion and Gwadar International Airport with a cost of \$0.230 billion would be completed in 2018.

Another project namely Cross Border Optical Fiber Cable with a cost of \$0.044 billion will be completed in 2017/2018. China and Pakistan signed a \$46 billion investment and infrastructure development programme in April 2015 during the visit of Chinese President Xi Jinping to Islamabad.

All Day

Japanese corporations should join CPEC projects: Ahsan -- Dawn

ISLAMABAD: Federal Minister for Planning, Development and Reforms Ahsan Iqbal on Thursday invited Japan to take advantage of China-Pakistan Economic Corridor (CPEC) and encourage Japanese corporations to take part in projects of transport infrastructure and power generation on Independent Power Producers model.

"CPEC is not a bilateral project but it is an inclusive project where major economies from European Union, Middle East, America and Asia are also showing their interest to join in."

He said this after holding meetings with Secretary General of Asian Productivity Organization (APO), Dr.Kanoktanaporn, Governor of Japan Bank for International Cooperation (JBIC), Akira Kondoh, Chairman, Japan-Pakistan Parliamentary Friendship League (JPPFL), Sheishiro Eto and representatives of major Japanese business corporations

Ahsan Iqbal who is on a two-day visit to Tokyo to participate in the World Marketing Summit, apprised his interlocutors that the grand CPEC Project has already taken off and bears immense potential of connecting a three billion strong region of South Asia, China and Central Asia.

The Minister shunned apprehensions relating to security concerns about Pakistan and informed of sustainable success in Security Operation Zarb-e-Azb.

When asked by Japanese media about the situation prevalent at Line of Control (LoC), he reiterated Prime Minister Muhammad Nawaz Sharif's vision of "Peaceful Neighbourhood". He stated that for development of people to take place peace in South Asia is a must.

In his meetings and media interaction, Ahsan Iqbal stated that economic indicators of Pakistan have improved considerably over the last three years. The foreign exchange reserves have more than doubled from US\$10 billion to US\$23 billion and inflation remained lowest in South Asia.

Ahsan Iqbal said that government was able to bring down budget deficit to 4.7% of GDP. He also added that Morgan Stanley declared Pakistan as one of the promising emerging markets globally.

He said, Karachi Stock Exchange has been rated as one of the top three stock exchanges of Asia. He also emphasized Pakistan's demographic dividend, saying that over two-thirds of its 200 million population is under 25 years of age.

All Day

Pak, China eyeing 'bigger economic bloc' between Asian nations -- Pakistan Today

Pakistan is quietly scrambling to form a greater economic alliance of South Asian nations with other Asian allies to outmanoeuvre the eight-member South Asian Association for Regional Cooperation (SAARC), Pakistan Today has learnt reliably.

"Yes, using Pakistan's strategic geographic location and its clout on other Asian states, Pakistan is working to form a new alliance of Asian nations for greater economic connectivity between South Asian, Central Asian, West Asian and East Asian states," a senior diplomat in the Ministry of Foreign Affairs confirmed while talking to this scribe on the condition of anonymity.

The official said that Pakistan was, while benefitting from its geostrategic location, working on half a dozen economic and energy corridors to link South Asia with Central Asian, West Asian and East Asian countries.

The source, however, rubbished the notion that the efforts by Pakistan were aimed at sidelining the South Asian Association for Regional Cooperation (SAARC). "This is childish to think that we are trying to sideline SAARC. We are just planning to explore the ways and means to avoid terrorism-hit countries like Afghanistan which is a major impediment in regional connectivity," the source said.

Asked to elaborate, the official said that since peace efforts were failing in conflict-hit Afghanistan, Pakistan and China had decided to use Kashgar as a new venue to link South Asian states with central Asian states.

"Pakistan is the shortest possible route to central Asian states. We have decided to also use the Kashgar route of China as the principal link with Tajikistan, Turkmenistan and other central Asian states through the Karakoram Highway which is not only safer but a shorter route too," the source added.

The official said that Pakistan was in close coordination with other South Asian states for the new economic bloc.

"China, Middle East, Iran and some Central Asian states have already expressed their willingness to join this larger alliance of like-minded South Asian states with central and east Asian nations," the source said, adding that this was the reason behind a flurry of high-profile visits between Pakistan and other regional powers.

"Around 15 high-level exchanges have taken place during the recent past between Pakistan and other friendly states. They are all part of the efforts by Pakistan to form a greater economic alliance," the source added.

The source said Prime Minister Nawaz Sharif had recently visited some of these central Asian states while the top dignitaries of these countries had also visited Pakistan. The official further said that the initiative also augured well for China which would be playing a key role in persuading Central Asian republics and Iran to join the new arrangement.

INDIA WELCOME TO NEW ALLIANCE TOO:

Asked whether the new economic bloc would include India, the official said India was an important regional player and Pakistan would welcome if it joined the new alliance. "Yes, why not? We are open to India's joining of the new bloc," the official said. Asked why India would be welcomed as the hegemonic designs of the Indian establishment may also turn the new alliance into a failure like the SAARC, the diplomat said that China's presence would help strike a balance.

"India would not be in a position to dictate terms on the bloc," the official said, adding that Indian involvement would be a sign that India also wanted to remain positive to reap the dividends of regional connectivity.

Meanwhile, Senator Mushahid Hussain Syed, Pakistan's special envoy on Kashmir,

also hinted at the same development during his five-day visit to Washington. He said that this group would be more effective than the SAARC.

“A greater South Asia is already emerging,” said Mushahid in one of his interactions with the media.

“This greater South Asia includes China, Iran and the neighbouring Central Asian republics.” “We want India to join this arrangement as well,” added Mushahid.

All Day

Where's CPEC in our FDI? -- Dawn

Foreign direct investment inflows into Pakistan have maintained a steady decline, from a \$5.2bn peak in 2007-08, for a variety of reasons, but chiefly due to adverse security perception, political instability and governance challenges.

But the further, more than one-third (38pc), slump in net FDI inflows for the first quarter of the current fiscal year surprised many who expected a 'ratchet up' impact due to the beginning of the China-Pakistan Economic Corridor, and the feel-good atmosphere brought about by the improved macro-economic fundamentals created by government circles.

China holds the top slot in terms of FDI contribution to Pakistan, replacing the United States and the UK.

The State Bank of Pakistan reported foreign direct investment for first three months (July-September 2016) at \$249.4m against \$403.3m of same period last year, down 38.2 pc. After adjusting for portfolio inflows and outflows, the total foreign investment in the first quarter of the current fiscal year was reported at \$368.1m when compared with \$793.2m of same period last year, showing a further decline of 53.6 pc.

This should be a cause of concern for all because FDI is not only a source of foreign capital but also a trigger to technology transfer, improvement in managerial skills and market access — all critically important for a higher growth trajectory.

This gets more alarming when other sources of foreign inflows — slowing remittances and falling exports — are also entering the danger zone and the country's debt profile is expanding. Already, the government is reported to have contracted foreign loans about \$15bn greater than targeted in three years as foreign investments and exports failed to support international reserves.

Political uncertainty arising out of repeated attempts to derail the government, volatile cities, energy shortages over a longer period, terrorist activities and the resultant adverse travel advisories for investors from western governments have a contributed to the overall investment environment.

Not surprisingly, the country slipped two points to the 138th position among 189 in the World Bank Doing Business Ranking in 2016 from 136th in 2015. According to the IMF "Pakistan's weak business climate continues to constrain private investment and economic growth" as its ranking in starting a business, getting credit, and trading across borders worsened.

Thus, lengthy procedures and high costs for opening a new business and paying taxes, limited access to credit notably for small and medium enterprises (SMEs), complex border trading requirements, constraints in accessing electricity, and weak contract enforcement continue to weigh on the country's business climate, which ranks below the South Asia average and comparative emerging markets countries, the IMF observed.

While the government is currently working on reducing procedures for opening new businesses and energy shortages have started to reduce, it is hopeful the low FDI trend would reverse soon.

Miftah Ismail, the chairman Board of Investment (BOI) is equally perplexed over the FDI numbers but believes the dip was an early and temporary phenomenon that would pick up soon as CPEC related projects take off. He hoped the FDI would end up at the very least a 35pc higher than last year.

He said it was also beyond his understanding why numbers were falling. He called a meeting with the SBP and the ministries of finance and commerce to find out if FDI was being correctly recorded or there was a problem in methodology.

He suspected the institutions concerned were only recording the flows in cash and

not machinery and equipment, as in case of Chinese projects. However, after reviewing the processes and methodology the BOI chief was convinced there was no problem.

Mr Miftah, however, said some projects like Chashma Nuclear Power Plant were developed through Chinese loans and hence accounted for as foreign debt and not as foreign direct investment. So, FDI data based on two-three months does not depict the true picture because a substantial investment in a given month, or lack of it, could swing the figures either way.

He explained that net foreign direct investment was arrived at after deducting interest payments and profit repatriations by foreign companies with at least 15pc shareholding in local companies. For example, the gross FDI last year was estimated at about \$2.25bn that fell down to \$1.28bn after accounting for about \$1.067bn of interest payment and profit repatriation.

On the other hand, the 1320MW Coal power plant of \$2.5bn and another project at Port Qasim with similar capacity and cost estimates would progress significantly during the current year and add to the FDI number. Also, a \$500m investment in Engro by foreigners will be materialising followed by about \$250m foreign investment in Dawlance as their local sponsors reduce their shareholding.

On top of that, a large multinational company was investing around \$100m in an FMCG while CocaCola was adding its investment by another \$200-300m this year. Nestle has already made some investments and half of that would also be materialising this year. He firmly believed the net FDI at the end of the current year would work out at \$1.8-1.9bn, suggesting around 50pc increase.

Responding to a question, he did not agreed that low FDI was also a question mark on the role and performance of the BOI — a one-window facility for attracting and facilitating foreign investment.

He said the BOI had basically two roles including facilitation to foreign investors and holding seminars and soft marketing of Pakistan abroad

On top of that, the BOI has now adopted a new role. For example, as chairman of the BOI he was able to resolve a longstanding dispute with Russian investors that would open up the country for more investment. "Also, we were able to author a new policy for the automobile sector, get it approved and are now working towards its implementation.

"The BOI also has played central role in the preparation of a support package for the export sector that is currently in the approval phase", he concluded.

All Day

Importance, benefits of CPEC highlighted -- Dawn

Punjab Planning & Development Department in collaboration with Ministry of Planning, Development & Reforms Pakistan Monday organised a lecture on China Pakistan Economic Corridor (CPEC) at P&D Complex.

The lecture session was chaired by Punjab Planning & Development Chairman Muhammad Jahanzeb Khan while provincial secretaries, members P&D board and other major government officials attended the session.

The lecture titled "The Strategic Importance of China-Pakistan Economic Corridor (CPEC) and Its Role in Uplifting the Economy of Punjab" was delivered by Maj-Gen (retd) Dr Zahir Shah, Projector Director/Coordinator CPEC at Ministry of Planning, Development & Reform Islamabad.

The objective of the lecture was to provide a platform to all provincial departments and stakeholders to learn about the significance and impact of this 'Game Changer' project and be aware of the core issues and various factors such as finance, economics, governance, management, etc. entailing this project.

Dr Zahir deliberated on the importance of CPEC with respect to Punjab's economy, stating Punjab was pivotal and the heart of Pakistan thus it was imperative to have a conducive business environment in the province.

He said the potential sectors such as light industry, electronic, textile, chemicals industry, IT, minerals, automotive industry and infrastructure sector which could benefit from the CPEC.

The lecture concluded with recommendations for project identification under CPEC, policy support and increased research and Development (R&D) in the context of the Economic Corridor. Dr Zahir emphasised that focus must be placed on the underlying basis of partnership and business models and strategies must be evaluated to involve other sectors as well.

Chairman, P&D Board, Muhammad Jahanzeb highlighted that CPEC was a way of building 'educational, fraternal and cultural bonds' with China.

The network was expected to bring opportunities for both sides and Pakistan needs to have a key understanding of their needs and demands. He commended the efforts of the planning commission and the provincial governments with regards to CPEC. Secretary P&D Ifthikhar Ali Sahoo speaking on the occasion said China Pakistan Economic Corridor (CPEC) was the network of logistic of all the potential centres.

convention: Pakistan Medical Association, Punjab has termed so-called convention being held in Faisalabad in the name of PMA Punjab, illegal and has no binding on PMA Punjab procedural and constitutional dictates.

This was observed in an emergent meeting of PMA Punjab held here on Monday under the chairmanship of President Dr Izhar Ahmad Ch in chair, according to a press release issued here.

Office-bearers observed that the mandate of convening PMA Punjab convention was the authority of provincial council.

The convening of this illegal PMA Punjab convention shall be undertaken in forthcoming PMA Punjab Provincial Council meeting and responsible shall be brought to book.

All Day

CPEC and regional integration -- Pak Observer

AMONG the recent developments, Iran and Afghanistan have expressed their desire to join CPEC. Afghanistan's Ambassador to Pakistan, Dr. Omar Zakhilwal said that CPEC is a great project which is equally relevant to Afghanistan, like Pakistan. Moreover, Iranian President Hassan Rouhani in a meeting with Prime Minister Nawaz Sharif on the sidelines of the UNGA session has also expressed the desire to be part of the CPEC. In response, Chinese Ambassador to Pakistan, Sun Weidong, stated that CPEC is a win-win cooperation so we are looking forward to explore the possibilities of cooperation among all the regional countries. CPEC, in itself carries the ambitions of regional integration and enhanced cooperation. As elaborated, CPEC is not just a road project but a package of port development, infrastructure, energy and transportation projects, if implemented as envisaged, would help Pakistan in achieving an economic turnaround. Recent statements by Iranian and Afghan authorities regarding CPEC show us a budding realization of the importance of this project for the entire region. Current expression of participation by both states would help present the case of CPEC as a genuine effort to develop the region, enticing more support. Rather, their prospective inclusion would help shed off the concerns of strategic exclusiveness associated with CPEC.

Pakistan and Iran have massive scope of bilateral cooperation in the field of energy, especially oil, gas and electricity. Besides, both countries can extend cooperation by enhancing the connectivity between sea ports of Gwadar and Chabahar. Development of Gwadar port is a key component of CPEC and under the framework, better connectivity between both ports can be ensured. Similarly, CPEC is of geostrategic importance for a landlocked state like Afghanistan. With the extension of CPEC to Afghanistan, the country can become a major beneficiary of this project as in future the corridor will contribute to the economic development of this country by enhancing economic activities in the area, which can bring the fragile economy of Afghanistan back to normalcy.

In order to linkup Afghanistan with CPEC, Pakistan has already pledged the construction of 256 km Peshawar-Kabul motorway which will give Afghanistan an opportunity to start economic and commercial activities. As per the plans, the western alignment of the corridor, which originates from Gwadar and runs through Khuzdar, Zhob and finally reaches Islamabad via D.I. Khan, will have an additional connectivity to link Afghanistan through Chaman. Such a link would also help boost trade links with Central Asian states. With its desire to join CPEC, Afghanistan has rightly understood the benefits; it can reap through a project of such magnitude. Pakistan and its neighbours have the potential to grow as economic power hubs, provided if make the right choices. There are challenges in way and prospects ahead which can be materialized only if all the stakeholders work on mutual grounds and interests.

Peace in Afghanistan is a pre-requisite in bringing regional prosperity and stability. Similarly, historic ties between Pakistan and Iran can mutually benefit both countries by promoting energy and defence ties. As a key element, the envisioned CPEC offers energy security alongside various other trade opportunities which is believed to ascertain the new global economic order. The energy needs in South Asia are growing exponentially which demands collaboration at regional level to meet the requirements. Such circumstances require countries like Pakistan, India and China to diversify their options and CPEC provides that opportunity for cooperation.

As Pakistan looks to expand its opportunities regionally, there is a dire need to introduce changes in various sectors internally. Pakistan despite being an ideal industrial base and achieving a remarkable growth of 6.8 percent in the year 2016 is facing decline in exports. In this regard, Pakistan needs to improve its capability to manufacture quality products for export purposes with special focus on capacity building of labor and human development. Besides, the dominant use of raw material in industrial sector and lack of technological up-gradation and innovation are other impediments, requiring attention. This joint venture of CPEC gives Pakistan an opportunity to build its capacity by working closely to an emerging global power, learning from their expertise.

CPEC will complement CAREC's regional connectivity initiatives: Dar -- APP

In his welcome address at the 15th CAREC Ministerial Meeting in Islamabad on the theme of 'Linking Connectivity with Economic Transformation in CAREC', Dar said the CPEC "offers a massive opportunity for connectivity between Central Asia, Middle East and Africa and is bound to play a defining role in the economic development of our region".

Improving transport corridor was not an end in itself but it was an investment in establishing sound infrastructure and complementary frameworks for opportunities in shared prosperity for the present and future generations of our region, Dar said.

He added that CAREC and Transport and Trade Facilitation Strategy (TTFS) provided the platform to ensure effective implementation of communications, transport and trade-related projects.

"Once the six CAREC corridors and major seaports start providing access to the global markets, they will deliver services that will be important for national and regional competitiveness, productivity, employment, mobility, and environmental sustainability", he remarked.

He was confident that the areas of collaboration and specific initiatives under the CAREC Programme would significantly improve connectivity in the region.

"The projects being implemented in the four core areas of communications, trade facilitation, trade policy and energy coupled with the economic corridor development would enable increased trade, enhanced availability of energy and improvement in quality of lives for all people in the region", he said.

Prime Minister Nawaz Sharif inaugurated the meeting, organised by the Ministry of Finance and Economic Affairs Division.

President of Asian Development Bank (ADB) Takehiko Nakao, representatives of CAREC member states, members of the Diplomatic Corps, federal ministers and senior officials attended the meeting.

'CPEC will uplift whole region': PM

Prime Minister Nawaz Sharif while inaugurating the meeting said, "CPEC will go beyond bilateral initiatives and lead to uplift and economic development of whole region," Radio Pakistan reported.

"Our transport and construction related activities will gain further momentum on the back of infrastructure and power sector development programme under CPEC," he added.

"Pakistan is committed to promote economic and social development through regional cooperation," he said.

Pakistan's focus on energy, economic revival and stabilization has resulted in remarkable and impressive economic growth, the PM claimed, adding that transportation and construction activities would gain momentum on the back of infrastructural and power sector development under the CPEC.

The premier added that Pakistan's cooperation in the CAREC reaffirmed its resolve for regional integration and provides valuable opportunity for enhancement of our ties in all four areas of focus.

Army chief reviews Pak-China joint military exercises -- Dunya News
RAWALPINDI (Dunya News) – Chief of the Army Staff (COAS) General Raheel Sharif reviewed Pakistan-China joint military exercises at National Counter Terrorism Training Centre (NCTC) in Pabbi during a visit on Thursday.

Inter-Services Public Relations (ISPR) reported that the army chief addressed a gathering in the centre after reviewing joint exercises called “YOUYI-VI 2016”.

Chief of the Army Staff said during his address that foreign countries were learning off Pakistan’s experience in war on terror and Pakistan Army considered it its responsibility to share to contribute to peace in the world.

He lauded the joint military exercises and said that the drills would help both China and Pakistan to neutralise terror threats.

Earlier today, Qatari Minister of State for Defence Affairs, Dr Khalid Bin Muhammad Al Attiyah called on the army chief in Rawalpindi.

Matters of mutual interest including defence and security cooperation were discussed in the meeting.

The visiting dignitary acknowledged Pakistan’s successes in fight against terrorism and efforts for regional peace and stability.

All Day

CPEC: Opportunities -- Pak Observer

ISLAMABAD is reaping the benefits of its close strategic partnership with China. Beijing is also cognizant of the vitality of cordial relation’s sustainability for the pursuits of its interests’ in the transforming global politics. President Xi Jinping visited Islamabad in April 2015 and signed 51 Memorandums of Understanding and announced US\$46b investment in Pakistan to build China-Pakistan Economic Corridor. Many analysts dubbed CPEC as the centrepiece, the flagship, and pilot project of the “One Belt, One Road” initiative of Chinese President Xi Jinping. Perhaps, CPEC would enhance the trade between China and Pakistan. Currently, the bilateral trade volume is around \$12b per year. It is expected that it would reach \$15b in near future.

Nothing would better promote Pakistan’s strategic future in South Asia and grand strategy toward India than its indigenous robust economic growth. The country’s economic growth is a Hercules task for the government without the foreign direct investment in both infrastructure build-up and relevant technology transfer. Ironically, despite Pakistan’s sincere cooperation in the global war on terrorism and Islamabad’s continuity of strategic dialogue with Washington; former fails to secure nuclear deal with US and attract foreign direct investment from the European countries. Conversely, Beijing has been generously assisting Islamabad to revolutionize its economic sector through infrastructure build-up and solidify its defensive fence and above all guard its national interest diplomatically at regional and global forums.

China generously offered to bear the 80 percent financial cost of two Karachi nuclear power plants of 2100 mega watt; building of Gawadar port; airport; etc. It is cooperating in building JF-17 Thunder, at Kamra and also agreed to sell eight conventional submarines to Pakistan Navy. In addition, at all the regional and international forums, Beijing has been endlessly supporting Islamabad. The consensus persists in Pakistan that ‘CPEC is a game changer’. It is because the gigantic generous \$46b (recently the figure has increased to \$51b after China committed to fund the Karachi-Lahore rail line) investment by China in the economic uplifting of Pakistan would create many opportunities for the people of Pakistan. Importantly, CPEC is not only aiming at building massive road infrastructure but also intending to develop telecommunications and energy infrastructure. In addition to massive infrastructure build-up, China is also making Pakistan a key partner in its grand economic ambitions that relate to proposed 21st century Silk Route initiative. Indeed, pipelines buildup, power plants construction and other projects collectively contribute in stabilizing Pakistan’s economy and also end chronic energy crisis in Pakistan. Since decades, Pakistanis have been cognizant to need of a second port

at Gwadar. Gwadar port not only holds enormous promise for Pakistan, but also neighbouring countries and regions such as Afghanistan, China, Central Asia and Eurasia. But due to financial constraints, Islamabad had failed to institutionalise its Gwadar port project.

The CPEC project provided Pakistan an opportunity to build as well as operationalize its Gwadar Port. The completion of Gwadar port definitely makes it the economic hub of Pakistan in particular but for the entire region in general. It would construct a strategic nexus between Pakistan, China and Central Asia, generating billions in revenue and providing shorter land routes. It would effectively establish links from the Caspian Sea to the Strait of Hormuz, and would enable Gwadar to compete with Persian Gulf ports. This massive investment plan of China in Pakistan, certainly, makes the country a regional economic hub. The completion of CPEC would facilitate Chinese access to the Indian Ocean via Gwadar and also encourage Chinese both government and private sector to investment in the planned economic zones on the CPEC routes. According to the reports, China's ship-borne trade currently amounting to \$5 trillion and it may triple over a decade, much of which will be passing through Gwadar-Kashgar route.

The Chinese investment would also attract the foreign direct investment from other countries. Consequently, the Pakistan would prosper. The CPEC money would be used to construct power projects. The investment in power sector would assist in lessening power shortages that is hindering economic growth in Pakistan. CPEC will connect economic agents along a defined geography. It will provide connection between economic hubs on certain landscapes where large amount of economic resources and actors are concentrated. Perhaps, the mega economic activities further boost bilateral relations between China and Pakistan. The successful implementation of the CPEC would provide Pakistan access to Central Asian States — Kazakhstan, Tajikistan, Kyrgyzstan — Russian Federation and Europe through China. The trucking and logistics industry of Pakistan would have immense opportunity to grow. Certainly, this unprecedented road link would have far-reaching positive geo-economic dividends for the people of Pakistan.

The CPEC infrastructure certainly boosts Pakistan's tourism industry. In addition, the completion of the CPEC project would play a significant role in inter-provincial integration. It would also bring unprecedented economic rewards for the agriculture sector of Pakistan. The cooperation in the agriculture sector would help in transferring of technology pertaining to agro-chemicals, pesticides, seeds and fertilizers, which is imperative for increasing the yield of the crops in Pakistan. To conclude, successful implementation of CPEC will change the economic outlook and financial conditions of the people of Balochistan and KP. Thus, it is imperative that Islamabad intelligently monitors and thwarts challenges to CPEC, which offers many opportunities for country.

Pak-China QCCM group to meet in Beijing on Nov 8 -- The Nations
BEIJING, CHINA : The second joint working group meeting of the Quadrilateral Cooperation and Coordination Mechanism in Counter Terrorism by Afghanistan-China-Pakistan- Tajikistan Armed Forces/ Militaries (QCCM) will be held in Beijing from Nov. 8 to 10.

During the meeting, all parties will exchange in-depth views on the specifics of their cooperation under the framework of the QCCM, this was announced by Colonel Wu Qian, spokesperson for the Chinese Ministry of National Defense (MND) here at the regular press briefing.

The QCCM aims to implement the consensus reached by the leaders of the 4 countries on strengthening counter-terrorism cooperation among regional countries, and to deepen such cooperation among the four militaries.

It is not targeting any country or international organization. The Chinese side will make joint efforts with other parties to strengthen mutual trust, deepen cooperation, and enhance capacity building in counter-terrorism, so as to push the QCCM toward substantial achievements, he added.

While replying to a question regarding recently held China-India joint military exercise in the Ladakh region along the China-India border, Colonel Wu Qian categorically stated China's position on the Kashmir issue has not changed.

"On October 19, China and India conducted a company-and-platoon-level humanitarian assistance and disaster relief (HADR) joint drill near the Moldo meeting point at the western section of the China-India border," he added.

To a question about the China-manufactured aircraft, the spokesperson said the design and manufacturing of the first domestically manufactured aircraft carrier of China is pressing ahead according to plan.

Currently, the overall design has completed and the bulk has taken its shape in the dock. Equipment and facility installation and outfitting are being conducted.

China willing to finance Pakistan's portion of IP pipeline -- Express Tribune

ISLAMABAD: With Iran coming out of decades-long global economic isolation, China has offered Pakistan that it was willing to finance the un-built portion of a multibillion-dollar gas pipeline project.

Officials told The Express Tribune that the China Petroleum Pipeline Bureau (CPPB) – currently engaged with the \$1.4 billion Gwadar-Nawabshah LNG terminal and pipeline project – was keen to work on the remaining portion of the gas pipeline from Gwadar to the Iranian border to implement the Iran-Pakistan gas pipeline project.

Other countries pull out, China increases investment in Pakistan

China was providing 85% of the total financing for the LNG pipeline project and wanted to emulate the same model for building the remaining portion of the pipeline from Gwadar up to the Iranian border.

The IP gas pipeline project had been stalled due to international curbs against Tehran. But soon after lifting of the sanctions, the United States had imposed certain sanctions against Tehran that were hindering the implementation of the IP gas pipeline project.

Officials said China had also expressed its desire to work on the remaining portion of the 80km pipeline from Gwadar to connect it with the Iranian border. China was lobbying to award the contract of this portion as per the cost decided for the Gwadar LNG pipeline.

A senior government official said Pakistan was working on LNG import projects but LNG supply was not a secured source because in case of war, this supply source could be halted.

He said this was the reason why the IP project was considered to be an essential as well as strategic project for Pakistan.

Is Pakistan really a dream destination for China?

"In case of some interruption in the supply of LNG, Pakistan will be able to get gas supply through the IP pipeline," the official added.

The other reason was that prices of steel and other material for gas pipelines had dropped over the years. During the last PPP government, Iran had decided to lay the IP pipeline by nominating an Iranian company. Iran had also pledged \$500 million financing for the project.

The offer of the Iranian company contract was \$2.8 billion. German consultant ILF had estimated the contract cost at \$1.8 billion. However, its cost had come down to \$1.6 billion since.

The official said the approved cost of the LNG pipeline project by the Executive Committee of the National Economic Council (Ecneec) was \$2 billion that included the \$1.4 billion EPC (engineering, procurement and construction) cost and \$600 million in duties to the government.

He said if the pipeline is extended up to the Iranian border, its cost as per the Gwadar LNG pipeline terms and conditions would come to \$1.6 billion.

The official added that the government was working on a plan to set up two jetties at the Gwadar Seaport to deal with 1,200 mmcf/d LNG where two floating terminals would be made operational.

The Chinese company would also work on the project as the EPC contractor and China would provide financing for it.

LEARNING CHINESE CAN OPEN NEW BUSINESS AVENUES -- APP

Thursday, 03 November 2016 16:27 Posted by Parvez Jabri E-mail Print PDF Views: 40

imageLAHORE: Pakistani citizens by learning Chinese language will be able to avail business and professional opportunities created by the China Pakistan Economic Corridor (CPEC).

President Pak-China Joint Chamber of Commerce and Industry (PCJCCI) Mr Wang Zihai said this while addressing a meeting of the all Chinese language instructors associated with the PCJCCI here on Thursday.

He informed the PCJCCI had initiated Chinese language teaching system at a time when there was very little awareness among people about significance of learning Chinese language, and now thousands of people had benefitted from this initiative which was a grand honour for the PCJCCI.

He assured of continuing this initiative with more vigour and effectiveness.

Wang Zihai also vowed to help learners of Chinese language to exploit linguistic strength in exchanging business and professions between Pakistan and China.

Salahuddin Hanif, Secretary General and a number of the Executive Committee Members of PCJCCI, also attended the meeting.

Language instructors expressed fortitude for introducing new trends in teaching system to achieve distinguished results.

Chinese investors to bring \$3 billion investment funds to Pakistan -- APP

IMF congratulates PM on Pakistan's economic achievements

ISLAMABAD: A consortium of Chinese investment companies met Prime Minister Nawaz Sharif on Friday and announced to bring \$3 billion in investment funds to Pakistan.

Expressing its satisfaction with Pakistan's progress in infrastructure, energy and development, the Chinese delegation lauded the country's economic revival and said Pakistan was fully ready as well as capable of absorbing and capitalising Foreign Direct Investment (FDI).

The visiting delegation also voiced its intent to explore the possibility of starting a new airline in Pakistan.

The consortium said it is actively pursuing investments in infrastructure, power, aviation and tourism sectors of Pakistan.

"We fully appreciate the vision of Prime Minister Nawaz Sharif which enunciates that economic prosperity is an offshoot of infrastructure connectivity and self-sufficiency in the energy sector," the delegation stated.

The delegates praised the country's liberal investment regime, saying that it offers an "ideal and investor-friendly environment."

Economic outlook

Prime Minister Nawaz Sharif said on the occasion that Pakistan's economic outlook has changed altogether in last three years, which is being acknowledged globally.

He pointed out Pakistan is among the year's global top 10 improvers in Doing Business 2017 report. He added that Standard & Poor's (S&P) has also upgraded Pakistan's ranking from B- to B.

The Prime Minister said that inflation is consistently on a downward trend and reduction in petroleum prices has also helped in decreasing inflation, with foreign exchange reserves increased to over USD 24 billion.

He said the country's investment policy has been designed to provide a comprehensive framework for creating a business environment attractive to FDI.

The Law of Special Economic Zones (SEZ) has been made to meet the global challenges of competitiveness to attract FDI, he said.

Pak-China friendship

Warmly welcoming the delegation, the Prime Minister appreciated the Chinese delegation's interaction with Ministries of Finance, Petroleum and Natural Resources Secretary Water and Power and Capital Development Authority.

On the China-Pakistan Economic Corridor (CPEC), the Prime Minister said it is a game changer that is going to transform the lives of billions of people of the region.

The Prime Minister expressed hope that the Chinese delegation would have a productive visit after the briefing on the immense potential for investment in Pakistan's infrastructure, development, energy and communication sectors.

He further expressed his gratitude to the leadership and people of China for their strong all-weather support for Pakistan through and through.

Trade convoy to open venues of CPEC in CA, EU market -- Express Tribune

Islamabad—Director General (FWO) Major General Mohammed Afzal FWO has said that FWO synchronized trade activities with Chinese exporters and initiated first ever trade convoy will open venues of CPEC activities in Central Asia and European market.

DG-FWO said despite of great challenges and over 200 lives sacrificed, thousands injured in nation building projects, FWO is committed to carry out the idea of constructing strategic Pak-China international CPEC projects to connect motorway to Pakistan's deep sea Gwadar Port and Arabian sea with utmost modesty. He said FWO for long years is playing its vital role in the socio-economic development and nation building through its unmatched contribution to infrastructure development. CPEC will transfer of technology in building many mega-projects between both countries.

Frontier Works Organization (FWO) synchronized trade activities with Chinese exporters through a Chinese firm Sinotrans agreed Chinese goods under the framework overall 150 containers dispatched from Kashgar by end October 2016. The officials have disclosed that first ever trade convoy of 45 Containers has been left via Kashgar-Gilgit to GWADAR from China at Sust. FWO & Sinotrans with the support of government security management and accommodation was a joint command centre established by FWO and Sinotrans. The sources said required additional input from Sinotrans by coordinating with local exporters through local logistic companies and Chambers of Commerce was made by FWO.

Regarding the China-Pakistan Economic Corridor (CPEC) development, first ever mega trade convoy launched to the projection of CPEC as a secure and financially viable trade route of Chinese goods via sea route of Gwadar in Central Asia. FWO made operational the western route after launching of first mega trade convoy of containers for Gwadar from Sust in a ceremony added that FWO synchronized with Sinotrans have successfully coordinated with Chinese exporter to initiate CPEC development and activities in the region.

Talking over the western rout of KP and Baluchistan provinces, he said it was a challenge through Panjgur and Turbat during construction of bridges, roads, tunnels, and dams with the support of civilians and provincial government.

These routes linking Pakistans Baluchistan and Frontier provinces with mighty mountainous ranges of Karakoram was about 870 KMs road nearby completed amazingly by the Frontier Works Organization (FWO).

Karachi-Hyderabad Motorway (M9), which was four lanes Super Highway, now converted into a 6 Lane will be completed in next year.

He said the motorway from Karachi to Gwadar linkage will further develop Pakistan with tremendous potential for commercial activities through CPEC and prosperity in the region, while the organization have changed overall situation after road infrastructure development and access of agriculture sector and restoration of normalcy to the lives of affected population due to backwardness and other law and order situation.

All Day

Gwadar-Quetta road to be completed next month -- Express Tribune

LAHORE: The development work on the China-Pakistan Economic Corridor (CPEC) was in full swing and the Gwadar-Quetta road would be completed by next month, which was ahead of schedule, said Federal Minister for Planning, Development and Reform Ahsan Iqbal.

Speaking at the inauguration of the International Business Conference and Exhibition (IBCE) 2016, organised by the provincial and federal governments as well as the University of Management and Technology (UMT), Iqbal said work on Dera Ismail Khan-Quetta road had also been initiated while the DI Khan-Burhan road would be completed by 2018.

CPEC: a positive outlook

He said CPEC would bring prosperity to backward and far-off areas of the country. "Special attention has been given to Sindh and Balochistan in the CPEC projects, as raw coal for coal-run projects can easily be provided in these two provinces," he added.

"The government is paying attention to the capacity building of students to prepare them for challenges of the modern age," said the minister.

The government had successfully tackled the challenge of terrorism and now terrorists were on the run, said the minister, adding, "we are witnessing unprecedented changes in every sector in modern times as it is the century of innovative ideas."

Iqbal said the basic rationale behind holding the IBCE 2016 was to give a boost to Pakistan's economy, highlight various dimensions of CPEC, widen government's linkages with overseas companies and business firms, bridge the gap between academia and industry, set up a link between local and foreign companies, transfer latest technology and create opportunities for the youth.

The IBCE-2016 is being organised to highlight important sectors, which include clean energy, automobile, IT and telecom, textile, services, construction and housing, manufacturing, food and agriculture and fast-moving consumer goods.

CPEC for Punjab or Pakistan: Myth and reality

Also speaking at the conference, Chief Adviser to Turkish President linur Cevik said Pakistan and Turkey shared special ties that were based on brotherly relations rather than on any strategic interests.

UMT Rector Dr Hasan Sohaib Murad revealed that they initially met with skepticism when they first took up the idea of organising an international business conference and exhibition.

Work on Gwadar-Nawabshah pipeline to be started this month: officials -- The News

ISLAMABAD: China Pipeline Petroleum Bureau (CPPB) is most likely to initiate sometime by end of current month construction work on the mega project of \$1.325 billion 700km LNG pipeline to be laid down from Gwadar to Nawabshah.

The pipeline will be having the capacity to transport 1.952 bcf/d out of which Gwadar is to be provided 100mmcf/d gas in the first phase and when pipeline starts in taking Iranian gas, the port city will also be provided gas of 150mmcf/d more. This is how in toto, Gwadar will be injected 250mmcf/d gas from the pipeline, a senior official of the ministry told The News.

Ministry of Petroleum and Natural Resources to this effect has put up the summary to ECC seeking the permission to sign the formal agreement with the Chinese company. In case ECC approves the summary, formal agreement will be inked in the same week and the ground breaking of the project will kick off by end of

November. The project will be completed and made operational by June 2018. Mobine Saulat, Managing Director of Inter-State Gas System confirmed the likely positive development. The pipeline will be having the capacity to transport the gas of almost 2Bcfd (billion cubic feet gas per day) and to this effect four compressors would be installed in the pipeline as against the earlier plan of three compressors. The pipeline will carry 1.2bcfd gas from the two RLNG terminals to be operational by the time when the pipeline will be commissioned in June 2018 and 750mmcfcd gas from Iran when the pipeline will be extended back by 81 kilometers to Iranian border.

Both Pakistan and china in May 2016, initialed an agreement to build 700km gas pipeline to be laid down from Gwadar to Nawabshah at the cost of \$1.35 billion after Price Negotiation Committee (PNC) finalised the cost of the project. And to this effect, Inter-State Gas System (ISGS) on behalf of Pakistan and China National Petroleum Corporation (CNPC) on behalf of China on May 11, 2016 initialised the agreement.

The project will be constructed with 85 percent financing from Chinese Company and 15 percent from government of Pakistan, and the price at which the gas line will be laid down is much below the estimated cost, top sources of the Ministry of Petroleum and Natural Resources told The News. The price of the pipeline had been negotiated under government to government mode at very competitive price of \$1.325 billion which is cheaper than the project of augmentation of gas network completed by both the gas companies — Sui Northern and Sui Southern.

Executive Committee of National Economic Council (ECNEC) has already accorded the approval to the LNG pipeline. The project will be completed under mode EPC-F (engineering, procurement, construction and financing).

According to the top officials, earlier Chinese side had come up with the offer to build the pipeline with diameter of 42 inches at the cost of \$2 billion, but after hectic meetings of Price Negotiating Committee (PNC) in a row, the price of the pipeline had been finalised at close to \$1.325 billion which is too much below the expectations. Sources said under the agreement basically the pipeline of 700km will be built and another 12km portion of pipeline will also be constructed from RLNG terminal to main pipeline and that particular portion will be part of LNG terminal. Once the pipeline is completed, Pakistan will extend the same pipeline with four compressor stations by 81km backward from Gwadar to Iranian border as part of IP gas line.

All Day

Chinese containers to reach Gwadar on 12th -- Dawn

QUETTA: The first Chinese trade convoy, comprising 60 containers, will reach Gwadar on Saturday with goods for onward export from its port.

The vehicles arrived in Quetta amid tight security on Tuesday from Kashgar through the western route of the China-Pakistan Economic Corridor (CPEC) and after a brief stay left for Gwadar in the evening.

Balochistan Chief Minister Nawab Sanaullah Zehri welcomed the convoy led by the chief adviser of the Xinjiang region.

The Chinese official told the chief minister that 200 containers were on way to the port.

The containers would reach Gwadar on Nov 12 and the Chinese companies would send the goods to the Middle East and African countries through ships from the port.

A representative of the Frontier Works Organisation (FWO) said products of Pakistani exporters were also included in the convoy.

He said the inaugural ceremony would be held in Gwadar on Nov 13 where political leaders, military officers and ambassadors of 15 countries would participate.

"This route will remain continuously in use after Nov 13," he said.

He told the chief minister that oil China imported from Saudi Arabia usually reached Shanghai in 25 to 30 days, while through the Gwadar-Kashgar route it would take about 12 days.

"The goods China imports through the Gwadar port will reach Kashgar in five days," the official said.

Not only would China save time by using this route but it would also be economically beneficial for both Pakistan and the neighbouring country, he added

The chief minister termed the event an important progress towards implementation of the CPEC project.

He underlined the need for promotion of cooperation between Balochistan and Xinjiang.

The chief minister will visit Xinjiang next month on the invitation of the regional government.

All Day

World Bank projects 5.4 per cent growth rate for Pakistan in 2018 -- Dawn

Pakistan's economy is set to grow by a robust 5.4 per cent by 2018 as Chinese investment from a multi-billion dollar infrastructure project flows into the country, the World Bank predicted in a new report Thursday.

Pakistan, South Asia's second-biggest economy, is growing with security improving and the International Monetary Fund (IMF) claiming in October that it has emerged from economic crisis after completing a bailout programme, though it still faces major challenges.

Pakistan recorded a 4.7pc growth in gross domestic product (GDP) for the fiscal year ended June 2016, the highest rate in eight years, and Prime Minister Nawaz Sharif has set an ambitious target of 5.7pc for the current year.

Nawaz is banking on structural reforms, the improved energy sector, taxation -- and China's ambitious \$46 billion infrastructure project, the China-Pakistan Economic Corridor (CPEC), linking its western province of Xinjiang to the Arabian Sea via

Pakistan.

The World Bank report appeared optimistic about Nawaz's plans, predicting even further growth in 2018.

"The pace of Pakistan's economic growth will accelerate to 5.4pc in fiscal 2018," the Bank report said, observing that a moderate increase in investment mainly related to CPEC projects is expected to contribute to an acceleration of growth.

The bank also noted Pakistan's efforts to address grinding poverty, including with revised ways to measure it.

"Based on the revised poverty line, the percentage of people living below the poverty line decreased from 64.3pc in 2002 to 29.5pc in 2014," the report said.

Illango Patchamutu, World Bank country director for Pakistan, said the country needs to push forward with deeper structural reforms, and that the World Bank stood ready to support such an agenda.

Over 17,000MW to be generated under CPEC projects -- APP

ISLAMABAD: As many as 17.045 megawatts of energy will be generated through energy projects spreading all across under the China-Pakistan Economic Corridor (CPEC).

Official sources said that these energy projects initiated under the CPEC project would not only help overcome the existing energy crisis faced by the country but would produce surplus electricity for benefit of the country. They said that as many as 1,100 megawatt electricity generated through these projects would be included in the national grid by 2016.

During the year 2017 about 1,650MW electricity would be included in the national grid system while projects of 3,270MW capacity would become operational by 2018. The additional projects of 2,250MW capacity would be completed after 2018, the sources said, adding the government had already initiated work on many of these projects majority of which would be completed by 2018, official sources said.

Currently work on 1,320MW coal-fired power project Sahiwal is in progress and work 1,320MW Port Qasim Coal project is also going on which would generate 660MW electricity by 2017 while the remaining 660MW would be ready for consumption by 2018.

Similarly work on 600MW Engro Thar Coal project also continues on fast track which would produce 300MW electricity by 2017 and additional 300MW by 2018. Work on 1,320MW Qadirabad Coal Project is also in progress which would include 660MW electricity in the national transmission system by 2017 while the remaining 660MW would be included in the system by 2018.

Electricity of 300MW would be added in the national grid from Salt Range Mine Mouth Power Project by end of 2018 while the Hubco would give 660MW to national grid by 2018. Work on Thar Block-I has also been initiated to produce 660MW electricity by 2018 and additional 660MW after the year 2018. The 1000MW Quaid-i-Azam Solar Park in Bahawalpur and 250MW wind power plant in Sindh are also going on which would start generation from current year.

Likewise 720MW Krote Hydro Power Project and 870MW Sukhi Kinaru Hydro Power projects of Khyber Pakhtunkhwa are also in pipeline which would be launched after 2018.

It is pertinent to mention here that many other energy projects are also part of the CPEC but these would be initiated after 2018. Other than CPEC projects China has investment in many other energy projects including Neelum-Jhelum Hydro Power Project which would generate 969MW.

Chashma Nuclear extension project would include 340 megawatt in the national grid this year while another chunk of 340MW would be included in the system 2017.

PM INAUGURATES DEPARTURE OF FIRST MEGA PILOT TRADE CARGO AT GWADAR -- Radio Pakistan

Addressing the inaugural ceremony, Nawaz Sharif says CPEC is poised to integrate all regions across Asia and Europe.

PM inaugurates departure of first mega pilot trade cargo at Gwadar
06:18 PM, 13 Nov, 2016 0
131

Prime Minister Nawaz Sharif says Pakistan will leave no stone unturned in ensuring that China-Pakistan Economic Corridor and all projects under its umbrella are materialised in time.

He was addressing a ceremony of departure of the first mega pilot trade cargo at Gwadar Port today.

The Prime Minister said Pakistan is a proud partner of China and today the dream of making Gwadar a pivot of trade is being materialized.

The Prime Minister said arrival of the Pilot Mega Trade Convoy in Gwadar from Kashgar is indeed a watershed event.

It will open new avenues of progress and prosperity for Balochistan as well as for whole of the country.

He said projects worth two hundred billion rupees will be launched next year for the Quetta-Khuzdar and Gwadar roads.

Expressing his resolve against terrorism, the Prime Minister said the coward acts like yesterday's blast at Shah Noorani shrine cannot weaken our commitment to root out the menace completely and forever.

Chinese Ambassador to Pakistan Sun Wiedong said the day is very significant for CPEC and to China Pakistan relations.

Speaking on the occasion, Chief Minister Balochistan Sanaullah Zehri welcomed the Chinese mega trade convoy and said Gwadar Port is the base of CPEC, which will bring prosperity to the country, particularly Balochistan.

Later, the Prime Minister formally saw off the first mega pilot trade cargo ship at the Gwadar Sea Port.

Chief Minister Balochistan Nawab Sanaullah Khan Zehri, Federal Ministers Ahsan Iqbal, Khwaja Mohammad Asif, Advisor on National Security Nasser Janjua, JUI(F) Chief Maulana Fazal-ur-Rehman, Chief of Army Staff General Raheel Sharif, Air and Naval Chiefs, Commander Southern Command General Aamir Riaz, provincial Ministers and elected representatives also attended the ceremony.

PAK WOMEN ENTREPRENEURS IN CHINA -- BR

KARACHI: A delegation of Pakistan's women entrepreneurs is currently visiting China to explore new avenues with their Chinese counterparts.

This is the first ever women delegation arranged by Trade Development Authority of Pakistan on a visit to China, under the directives of Prime Minister of Pakistan Mian Muhammad Nawaz Sharif, for developing business and trade ties with Chinese side in multiple fields.

The Embassy of Pakistan hosted a reception for the high level Women Delegation of entrepreneurs, said a message here Monday.

The delegation consisted of ten (10) members, headed by Secretary TDAP, Rabiya Javeri Agha. 38 Chinese companies dealing in textile, media, culture, trade and education were in the attendance at the reception addressed by Ambassador Masood Khalid.

The Ambassador welcomed the delegation and the Chinese guests and said that this is the first ever women entrepreneurs delegation on a visit to China in recent years and the timing is perfect for developing business links as we are celebrating the 65th anniversary of Pak-China Diplomatic Relations.

The Ambassador talked about a new era of cooperation between China and Pakistan in the wake of CPEC. The level of bilateral cooperation is poised to reach new heights with such growing interaction, he said.

The Ambassador highlighted the role women were playing in the socio economic uplift of Pakistan.

The Commercial Counsellor Dr. Erfa Iqbal made opening remarks.

The delegation members were introduced followed by remarks by the leader of the delegation who thanked the Pakistani Embassy for arranging such a fruitful session.

A business networking session between the Pakistani delegation and Chinese participants was held on the occasion.

PAK-CHINA IT INDUSTRIAL PARK OPEN NEW VISTA OF PROMOTING IT IN SINDH -- BR

KARACHI: Special Assistant to Sindh Chief Minister on Information and Technology, Dr Sikander Ali Shoro has said that Pakistan-China IT Industrial Park "will open new vista of promoting IT sector in Sindh.

Since world has become global village, it was the need of the hour to introduce new and latest technology, he said.

This he said while signing Memorandum of Understanding (MoU) with Ministry of Industries and Information Technology of China in China, said an official statement issued here on Monday.

Dr. Shoro said that with the help of this agreement, we will make effort to promote I.T in Sindh for the development of Information Technology.

It will also improve IT skills of youth and create IT awareness among people of the province, he added.

He said that we agreed to promote, exchange views, experiences, knowledge in the field of Information Technology and Industrial Development and strengthen the strong relations between province of Sindh and Peoples Republic of China.

MoU signed to set up Confucius centre -- Daily Times

ISLAMABAD: The Allama Iqbal Open University (AIOU) and the Beijing Institute of Graphic Communication here on Tuesday signed a Memorandum of Understanding for the establishment of a "Confucius Chinese Language Center".

The Minister of State for Education and Professional Technical Training attended the MoU signing ceremony. He congratulated the AIOU and the BIGC on establishing the "Confucius Language Center" at the AIOU.

He said, "Our friends like China, showed confidence in us throughout our journey and we are thankful to them for their great support in every regard".

Talking about the CPEC, the minister of state said: "We witnessed a historical achievement a couple of days ago when Prime Minister Nawaz Sharif formally inaugurated the Gwadar Port.

The first shipment from China has reached and the port has been made operational for the economic activities which he described as "another milestone of our friendship". "This is an economic era and we are determined to make Pakistan an economically viable country," stated the minister. He said that there were certain elements outside the country which were not happy with "our" progress and who want to disrupt the CPEC "but we have our resolve intact," he emphasised.

Moreover he mentioned that the 650-km long highway between Quetta and Gwadar had been completed in a record time which showed "our dedication and commitment towards this project".

This "Confucius Center" should focus on distance learning as the AIOU is famous for the same and it should also focus on E learning to make it more viable, suggested the minister.

He further added that "many of our workers while working with the Chinese people, faced the greatest barrier of language, so in my opinion a focus must be shifted towards spoken courses of the Chinese language for technical and vocational education here in Pakistan.

Talking about the AIOU, the minister of state said that this university had remarkable access all over Pakistan, with its 44 regional campuses around the country. He also appreciated the team of the AIOU for opening up a language centre at Gwadar.

"Establishment of this Chinese learning centre at the AIOU is our educational response towards the CPEC (The China Pakistan Economic Corridor)," said the Vice Chancellor. He added that the Chinese language was going to play a pivotal role in the near future.

China to send master trainers to teach Chinese language -- Pak Observer

Lahore—China will send its master trainers to teach Chinese language in TEVTA Institutes. These trainers will teach Chinese language classes to general public in major cities across the province of the Punjab and business sector's executives at Lahore. In this regard, Memorandum of Understanding (MoU) was signed between Technical Education and Vocational Training Authority (TEVTA) and Pak-China Joint Chamber of Commerce and Industry (PCJCCI) here at TEVTA Secretariat. Chief Operating Officer TEVTA Jawad Ahmed Qureshi and President Pak-China Joint Chamber of Commerce and Industry (PCJCCI) Wang Zihua signed the MoU. Chairperson TEVTA Irfan Qaiser Sheikh, Secretary General PCJCCI Salah-ud-Din, TEVTA Officers Aamer Aziz, Akhtar Abbas Bharwana, Uzma Nadia, Umber Chattha and other officers were also present at this occasion.

According to the details of MoU, Irfan Qaiser Sheikh said that with the establishment of CPEC, Chinese language is mandatory for all our youth and business community as well. In first phase, Master Trainers are being invited for limited time period and after that services of Chinese experts will be extended. This initiative will promote technical education and vocational training especially in economic sector across the province of the Punjab.

Chairperson TEVTA further said that as per vision of Chief Minister Punjab Muhammad Shehbaz Sharif, we are giving latest vocational training to provide best manpower in different sectors across the province of the Punjab.

Railways acquires 71 acres of land in Gwadar to expand operations -- Dawn

Minister for Railways Saad Rafiq informed the Senate Standing Committee on Railways on Thursday that arrangements were being made to pay Rs130 million dues to the Balochistan government for the purchase of 71 acres of land.

He said the government was expanding Pakistan Railways' operations under the CPEC and more land was being acquired in Gwadar for setting up railway terminals, yards and tracks.

Mr Rafiq said the railways ministry would not take decisions in haste on railways projects under the CPEC and they would be implemented after a thorough scrutiny.

The government will seek loan from the Asian Development Bank for the Main Line-1 (ML-1) project which would convert the Lahore-Peshawar Main Line -1 (ML-1) into double-track.

The project is one of the early harvest projects under the CPEC.

He said that in order to upgrade the railways system from Peshawar to Karachi, preliminary estimate showed that the project would cost at least \$8.2 billion, and in this regard negotiations were under way for investment by the Chinese.

A framework agreement was also discussed during his recent visit to China, he said.

The minister said that multiple financing was allowed under the CPEC framework, and the railways ministry was currently preparing a feasibility study for the Main Line-2 (ML-2) project which would be ready in three months.

The project would be under the CPEC and a contract for the project would be awarded on the basis of international tendering.

He said the project would either be completed on the basis of build, operate and transfer or would be a joint venture.

He informed the committee that the feasibility study on laying tracks between Gwadar and Bisma would be finalised by February next year when a technical report on the alignment of tracks would be ready.

On the issue of illegal use of railways land by the Defence Housing Authority (DHA) and a private hospital in Bahawalpur, the minister informed the committee that the Punjab chief minister had issued orders to resolve the matter.

The Bahawalpur DCO and the Punjab Revenue Board had accepted their mistake for illegally allotting the land to the DHA and the private hospital, he said.

The chairman of the standing committee, Sardar Fateh Mohammad Hasni, directed the railways ministry to ascertain from the provincial governments as to where and in which location the railway land had been encroached.

He suggested that the railways improve its system through commercialisation of its land.

Agreeing to the proposal, Mr Rafiq suggested a joint meeting of the parliament's standing committees on railways to take a decision in this regard and it would be implemented by the railways ministry.

All Day

Plan to set up five more LNG terminals -- Dawn

LAHORE: The petroleum ministry is working on proposals for the construction of five more terminals at the Gwadar and Karachi ports for handling, regasification, storage, treatment and processing of 3,000 million cubic feet per day of liquefied natural gas (LNG) it plans to import by 2018.

At present, the Elengy Terminal is being operated by Engro Pakistan at Port Qasim for regasification of 400 to 450MMCFD of LNG imported from Qatar.

Since the terminal has the capacity of 600MMCFD, the government plans to import 200MMCFD more of LNG and add it into the system by January.

"After attaining the target of 600MMCFD of LNG import and its regasification at the Elengy Terminal, another 600MMCFD will be imported by June and for its handling and regasification, the construction of the second largest terminal has begun and that will be completed by May," an official of the ministry told Dawn.

Import of fuel may reach 4,200MMCFD by 2018

"The Sui Southern Gas Company is set to accomplish next month the task of upgrading and laying pipelines for the purpose," he said.

The Pakistan GasPort Consortium, a wholly-owned subsidiary of Pakistan GasPort Limited, is establishing the country's second LNG import terminal.

The government claims that the project will reduce the country's gas deficit by 30 per cent and provide fuel for three regasified LNG power generation plants of 3,600 megawatts, being set up by the federal and provincial governments in Sheikhpura, Kasur and Jhang on a fast-track basis.

If the new proposals are approved, the government plans to build at least two LNG terminals in Gwadar and three at the Karachi ports.

China has also begun work on laying 42-inch diameter gas pipelines from Gwadar to Nawabshah for supplying LNG to new industrial estates planned to be developed along the China-Pakistan Economic Corridor.

"The LNG will also be supplied to the power sector, fertiliser and other industries, domestic and commercial sectors in view of their demand increasing fast with time," the official said.

With the proposed construction of five new terminals, the total import of LNG would be 4,200MMCFD by 2018, he said.

All Day

Gwadar to get 250 mmcf gas from RLNG pipeline -- Pak Observer

Islamabad—The Nawaz government has decided to provide 100 million cubic feet LNG per day to Gwadar from the RLNG terminals of 1.2 bcf (billion cubic feet gas per day) to be installed at the Gwadar port. And 150 mmcf gas will also be provided to Gwadar once the Iran will start exporting 750 mmcf gas to Pakistan, a senior official told Pakistan Observer.

Both the RLNG and gas from Iran will be transported to the national grid under Gwadar-Nawabshah RLNG pipeline. So Gwadar will get in to 250 mmcf gas through the RLNG pipeline and the decision has been taken on the request of government of Balochistan to cater to the energy needs of the port city.

China will install two RLNG terminals at Gwadar with the capacity to re-gasify the LNG of 1.2 billion cubic feet per day (bcfd) at just the cost of \$330 million.

Each RLNG terminal will be having the capacity to re-gasify 600 mmcf. This will increase the economic viability of the 700 kilometre RLNG pipeline to be laid down by the Chinese company from Gwadar to Nawabshah, top official sources told Pakistan Observer.

Earlier, the sources said, the government's plan to build one RLNG terminal at Gwadar with capacity of 600mmcf at the cost of \$300 million, but later on Chinese authorities' offered to build another terminal with the same capacity at Gwadar and both will cost at \$330 million.

At the very outset, the project was conceived under BOT (built, operate and transfer) basis, but now under latest scenario, it will now be erected under EPC-Financing mode.

China Pipeline Petroleum Bureau (CPPB) that has been assigned to build the 700 kilometres LNG pipeline from Gwadar to Nawabshah will also construct the two RLNG terminal.

The LNG pipeline will be constructed at the cost of \$1.353 billion. Now the Price Negotiating Committee is engaged with Chinese experts on the cost of LNG terminal.

The project will be materialized with the loan at 2 percent interest for 20 years long period to be arranged from China EXIM bank by the China Pipeline Petroleum Bureau. To a question, the official said that the cost of \$1.6 billion of both (pipeline and LNG terminal) has been worked out without taxes and duties.

The Gwadar-Nawabshah pipeline will be built on EPC-F (engineering procurement construction) with financing mode. The executive committee of national economic council (ECNEC) has already approved the said pipeline with 85 per cent financing from China and 15 per cent financing to be arranged by the government of Pakistan.

Boris wants UK firms part of CPEC activities -- The Dawn

LAHORE: Britain Secretary of State for Foreign and Commonwealth Affairs Boris Johnson has termed the China-Pakistan Economic Corridor (CPEC) a wonder project and desires UK firms to participate in its various construction activities.

"I am very excited about the CPEC idea. And I would like UK firms to participate in the construction of this fabulous venture," Mr Johnson said while speaking to students and faculty of the Government College University (GCU) here on Friday. "But this should be part of an even more ambitious vision that would revive the ancient Silk route and see the rebirth of trading caravans connecting East and West," he added.

On a day-long visit to Lahore as a part of his ongoing tour to Pakistan, Mr Johnson said Karachi was even bigger than Lahore with 23 million people, the 6th largest city in the world. "History and location suggest that Karachi should be one of Asia's biggest trading entrepot alongside Singapore or Shanghai.

Boris Johnson delivers a speech in the main hall of the Government College University.— Reuters

Boris Johnson delivers a speech in the main hall of the Government College University.— Reuters

"The only way to achieve that goal is closer economic integration. And I believe that Britain can play a part in helping you to realise this vision," he said. Appreciating development in various sectors, the British foreign secretary said Pakistan had made a huge progress in recent past. "National security has improved and democracy strengthened. This civilian government took over from another civilian government in a manner that was peaceful and constitutional. But, of course, we all know that Pakistani citizens continue to face a grave threat from terrorism. He said he felt that as a result, this nation's ambition had too often been held back by rivalry and mistrust. And coming here today, and talking to people, I am increasingly confident and that this will change. "My message to you all is that Britain wants to be with you to make this journey. I believe that bilateral trade between our two countries – just £2.7 billion – is not enough given our closeness," he said.

Mr Johnson said one reason why he was in favour of leaving the EU was that he wanted Britain to widen the horizons of our foreign policy and reinforce our ties with our friends across the world, including Pakistan. "We are not leaving Europe. We will always be part of Europe. I want a global Britain to play an even stronger role on the world stage, maximising our assets as the fifth biggest economy in the world and a permanent member of the United Nations Security Council," he said. The British secretary of state said next year he looks forward to celebrating Pakistan's 70th anniversary of independence. There is a huge interest in the British Parliament and government in making our relationship even closer. "I want a much more dynamic relationship. And I am excited by the opportunities created by trade and commerce, which should be the central pillars of our friendship, as befits Pakistan's location at the heart of Asia," he said.

Earlier, the GCU Vice Chancellor Prof Dr Hassan Amir Shah welcomed Mr Johnson, took him to a tour of the campus and apprised him about the traditions and excellence of 153 years old educational institution and its role in development of Pakistan.

Russia allowed use of Gwadar Port -- The News

Moscow to have access to warm waters; Nawaz says many countries want to be part of CPEC; half of world population to benefit from project; South and Central Asia to be connected through road and rail; PM meets Turkmen president

ASHGABAT: Pakistan has decided to accord approval to the Russian request for using the Gwadar Port for its exports as Moscow has also showed its willingness to be part of the China Pakistan Economic Corridor (CPEC).

Following Iran and Turkmenistan, Russia has also decided to use the Gwadar Port for trade to have an access to warm waters, a top official privy to the development

told The News. On top of it, Russia also wants to join the CPEC to reap the maximum dividends. In addition, Russia aspires to develop strategic defence ties with Pakistan. Islamabad has moved forward with a green signal allowing Russia to use the Gwadar Port for trade.

Prime Minister Nawaz Sharif is on a two-day visit to Turkmenistan. During an informal chat with the journalists, after meeting with Turkmenistan President Gurbanguly Berdymukhamedow, he said that many countries wanted to join CPEC as half of the world would benefit from the project.

He announced building railways, road and fiber-optic along with Turkmenistan-Pakistan-Afghanistan-India (TAPI) 1,680-kilometer-long gas pipeline to enhance connectivity between South Asia and Central Asia for the benefit of about half of the world population living in this part of the world.

Prime Minister Nawaz Sharif had a 100-minute-long meeting with Turkmen President Gurbanguly Berdymukhamedow who disregarding the protocol came to his hotel for having a meeting with him.

The prime minister in his back-to-back meetings would attend an international conference on connectivity and transport and would have meetings with the world leaders reaching here for the conference.

The prime minister is here for taking a leap forward by extending the benefits of the CPEC to the Central Asian States. He welcomed the Russian Federation's interest in becoming part of the CPEC and maintained that Pakistan would welcome participation of any country in the gigantic project. He vowed that the CPEC would guarantee the prosperity of Pakistan and assured the people that in about 10 to 15 years time, Pakistan would become an affluent country where the prosperity would become households. He said that TAPI would supply 400 billion cubic feet gas to the three member states in which Pakistan's share would be three hundred billion feet of gas.

The two leaders also reviewed progress on the TAPI and expressed hope that it would ultimately fulfill Pakistan's needs for gas and energy. He reminded that Pakistan, China, India and countries of the Central Asia and South Asia have about three billion people constituting about half of the world.

He recalled that President Gurbanguly Berdymukhamedow visited Pakistan early this year and now he had come to Ashgabat. "I have invited the president to visit Pakistan and stressed the need for alternatively visiting each other countries regularly. I have developed close personal friendship with President Gurbanguly Berdymukhamedow," the prime minister said to a query that Pakistan and Turkmenistan would have air links as soon the PIA performance was further improved.

President Gurbanguly said that Turkmenistan wanted improved road links between the two countries so that his country should be able to export through Gwadar and Karachi ports. Prime Minister said TAPI, which is the largest gas project in the region, would help meet the gas demand in Pakistan.

He said that CPEC would bring progress to the entire region. He said besides cooperation in bilateral relations, regional and international issues were also discussed during the meeting with the Turkmen president. He said friendship between Pakistan and Turkmenistan was strengthening with the passage of time. He said the top leadership of the two countries should meet every year.

Earlier, the prime minister was received by the deputy prime minister of Turkmenistan and high officials of Pakistani Embassy.

During his stay, the prime minister will attend Global Conference on Sustainable Transport being held under the auspices of the United Nations. The Conference will discuss promotion and role of sustainable transport towards achievement of the 2030 Agenda for Sustainable Development.

Prime Minister Nawaz Sharif would present his vision about connectivity and development of infrastructure. The United Nations Secretary General (UNSG) Ban-ki-Moon, Afghan President Ashraf Ghani will also be present in the conference. Adviser to the Prime Minister Irfan Siddiqui, Special Assistant to the Prime Minister on Foreign Affairs Syed Tariq Fatemi and Secretary to Prime Minister (SPM) Fawad Hasan Fawad are the part of Pakistan entourage.

Earlier the sources in Islamabad suggested that Russian desire to be part of CPEC and use Gwadar Port indicated a new alignment in relations after decades' sour ties between Pakistan and Russia.

It was being branded a welcoming development and the ice had melted to this effect in the recent meeting of spy masters of both the countries that was held in Islamabad.

Alexander Bortnikov, chief of Russian Intelligence Federal Security Services and former chief of KGB, in recent days visited Islamabad after 14 years and held meetings with intelligence and defence top officials. More importantly Bortnikov also held crucial meeting with Pakistan's spy master — ISI chief Lt General Rizwan Akhter.

While talking to journalists, Prime Minister Nawaz Sharif, who is on two-day visit to Turkmenistan, also welcomed the Russian decision to join CPEC.

However, in the meetings of Alexander Bortnikov with top officials of Pakistan requested to join CPEC and in return Pakistan gave positive signal allowing Russian to go for trade through Gwadar and to have access to warm water. In this regard the formal agreements will be signed between the two countries in the months to come.

With the desire of Turkmenistan and Iran for utilizing Gwadar Port for gas export will make the port international energy corridor.

Pakistan, the official said, would not only get the transit fee, but would also earn from the facilities such as LNG terminal. "So much so, Pakistan will also be able to get more intake of LNG, if required," he said.

"If the gas trade of both the countries through Gwadar Port gets materialised, this will boost the image of the port to new high."

Managing Director of Inter-State Gas System Mobin Saulat confirmed the development saying that the desire by both the gas producing countries was a welcoming development as in case it happened it would be win-win situation for all stakeholders --- Turkmenistan, Iran and Pakistan. Pakistan will earn a lot for giving the transit to gas of Turkmenistan and Iran. Likewise it will also earn in the case of Russia, too.

Railways to set up office in Gwadar -- The News

Pakistan Railways has decided to establish a sub-divisional office in Gwadar.

Railways Federal Minister Kh Saad Rafique chaired a meeting at Railways Headquarters, Lahore, for railway link with Gwadar Port for China Pakistan Economic Corridor (CPEC).

Saad said the project must be foolproof as the standards of the high profile project would not be compromised. Moreover, a sub-divisional office would be established in Gwadar. Double track and auto block system would be introduced in the project, he said. Manned and unmanned level crossings should be secured at any cost, he said. He formed a committee which would prepare report to secure the crossings. Ijaz Husain, consultant of Gwadar Project formulation, with other four members briefed the meeting on the feasibility study's current situation with regard to new link from Gwadar, Basima, Mastung, Basima to Khuzdar.

U.K., France, Russia Want To Join Pakistan-China's CPEC

[UPDATED] -- Value Walk

Russia is not discussing the possibility of joining CPEC with Islamabad. "The Pakistani media reports about secret negotiations between Russia and Pakistan on the implementation of projects as part of the China-Pakistan Economic Corridor (CPEC) are not true to the facts," Ministry of Foreign Affairs of the Russian Federation said in a press release.

The CPEC is apparently becoming a new association (like BRICS), as many countries are showing interest in being part of the China-Pakistan Economic Corridor. With ambitions to even become a new union (like European Union, but not limited only to Europe), the CPEC, co-created by Pakistan and China, has already attracted big international players such as Russia, the U.K. and France.

China Pakistan CPEC

The \$51 billion project has been all over the news lately, not only because it's a game-changer for China, Pakistan and Asia as a whole, but also because there's a theory that India could start a military conflict over the CPEC. But seeing how many nations are siding with the CPEC, it's very unlikely that India would start a war over it.

Interestingly, Russia's bid to join the CPEC comes as a yet another indication that Moscow, which has been India's key weapons supplier for decades, is abandoning India for Pakistan. It seems that Russia has more chances than any other country to join the CPEC, as theories about a possible China-Russia-Pakistan superpower triangle keep piling up. The CPEC may be that formal launchpad to form an alliance between Beijing, Moscow and Islamabad.

CPEC is foundation for China-Russia-Pakistan superpower triangle

But what's all the fuss about? Is the CPEC really becoming the new BRICS? It could be so.

Just days ago, Russia and Pakistan reportedly held backdoor meetings which led Moscow to formally request access to Gwadar Port and ask China and Pakistan to be part of the lucrative multi-billion-dollar project. According to sources cited by Pakistan's Daily Times, the chief of Russia's intelligence agency, Federal Security Services, made a secret visit to Pakistan.

Russian intelligence officials and Pakistani high officials reportedly discussed strengthening their bilateral defense and military ties. The two nations also reportedly expressed interest in reshaping the cooperation between their intelligence agencies. The Russian intelligence chief was also said to have visited Gwadar, which is a key point of the CPEC, a 3,000-kilometer network of roads, railways and pipelines that connects Kashgar and Gwadar.

Russian officials were also reportedly satisfied with the economic opportunities offered by the CPEC and, according to the media outlet's sources, even expressed interest in using Gwadar Port for international trade. The Russians were also said to have pledged to make investments in various sectors of Pakistan to deepen their economic ties.

Is CPEC the end of India and Russia's friendship?

Although Russia and Pakistan were Cold War-era rivals, the two have greatly amended their relations in the last two years. Their new friendship, which has been backed by military deals and joint military exercises, is attributed to the fact that with the help of Islamabad, Russia wants to get closer to China, which is Pakistan's traditional ally.

India, Pakistan's traditional and historical enemy, can't be happy about Russia's warm ties with Islamabad of late. Russia is well aware that India is a strong

opponent of the CPEC, and joining the project would probably mark the formal end of their friendly ties.

India has several problems with the CPEC and has already made several documented attempts to sabotage the project. But one of the biggest problems it has with the multi-billion-dollar China-Pakistan project is that it passes through the disputed Kashmir region. Both Islamabad and New Delhi claim Kashmir as their own territory and have already waged three wars over it. Tensions in the region were recently reignited after 19 Indian soldiers were, according to the Indian government, killed by Pakistan-based militants.

Joining the CPEC would mean Russia is serious about its intentions to turn away from India, which could eventually lead to forming a formal or informal alliance with Pakistan and China.

Is the CPEC the new EU for the U.K. after Brexit?

While Pakistan and China have yet to look into Russia's request to join the CPEC, Vladimir Putin's country is not the only nation that wants to join the lucrative project. The United Kingdom, Turkey and France have also been pretty assertive and vocal about their intentions to join the Pak-Chinese Corridor. Officials from other European countries are also reportedly in negotiations with Pakistani and Chinese officials to start projects regarding the CPEC.

But the most promising addition to the China-Pakistan project is probably the United Kingdom, which is currently in the long process of leaving the European Union. After Britons voted in favor of Brexit this past summer, the U.K. sees the need to bring its investments into non-EU projects, and the CPEC could become this very platform for investments.

U.K. Secretary of State for Foreign and Commonwealth Affairs Boris Johnson echoed his country's interest in the CPEC during his most recent visit to Pakistan last Friday. Johnson even called the CPEC "a wonder project" and expressed his desire for U.K. companies to participate in various projects of it.

"I am very excited about the CPEC idea. And I would like UK firms to participate in the construction of this fabulous venture," Johnson said while addressing the students and faculty of the Government College University in Lahore. "But this should be part of an even more ambitious vision that would revive the ancient Silk route and see the rebirth of trading caravans connecting East and West."

Boris Johnson invites U.K. investors to Pakistan

Johnson also said that Karachi should be Asia's "biggest trading entrepot" alongside Singapore and Shanghai. The British Secretary of State also pledged that his country will "play a part" in helping Pakistan achieve closer economic integration.

He praised Islamabad for making a huge progress in recent years, noting that national security in Pakistan has improved while democracy has been strengthened. Those are the two key points to attracting investors, as they serve as an indication of stability in the country. So his words may be interpreted as a direct invitation to British firms to invest in various sectors of Pakistan and become part of the CPEC.

"My message to you all is that Britain wants to be with you to make this journey. I believe that bilateral trade between our two countries – just £2.7 billion – is not enough given our closeness," Johnson also said.

France keen on joining the CPEC

Investments from such major European countries as the U.K. could give a huge

boost to the CPEC. In fact, many other European countries such as Germany, Italy, Spain and others could follow suit to also get a piece of the lucrative CPEC-pie.

France already seems to be onboard. Earlier this month, Jean Marc Fenet, head of the Embassy of France's Regional Economic Department for India and South Asia, expressed his country's interest in becoming part of the China-Pakistan Economic Corridor. Addressing the business community at the Islamabad Chamber of Commerce and Industry (ICCI), Fenet said France views Pakistan as a huge and prosperous market for business.

Fenet added that his country is keen to further strengthen bilateral trade and economic relations between the two nations. Praising the CPEC for creating many business and investment opportunities, Fenet said that France is taking a huge interest in the South Asia country. In a message that was backed by the French Embassy's Head of Economic Department, Philippe Fouet, Fenet also said that his country has what Pakistan needs to boost its economy – the advanced technology and expertise.

CPEC is China and Pakistan's trump card

Pakistan seems to be open to welcoming others to become part of the CPEC. Last Wednesday, Pakistan Prime Minister Nawaz Sharif said his country would be happy to see any country join the China-Pakistan Economic

Pak-China research centre opens at UoS -- The Nations

SARGODHA-A joint research centre for Dry Land Agro Ecology, jointly established by Pakistan and China at University of Sargodha started functioning here on Tuesday.

Federal Secretary for Science and Technology Fazal Abbas Maken inaugurated the centre, set up by the Pakistan Science Foundation, Islamabad (PSF) and the University of Sargodha in collaboration with Lanzhou University, China.

Lanzhou University Vice President Prof Gao Xicai, PSF Chairman Prof Dr Muhammad Ashraf and UoS Vice Chancellor Dr Nazra Sultana were also present on the occasion.

Speaking at the inaugural ceremony, Fazal Abbas Maken said that China is the iron brother of Pakistan and both the countries are going to start educational, research and agricultural development programmes.

The Lanzhou University VP said that his country would provide economic, educational and research support for agricultural development in Pakistan. PSF chairman Dr Ashraf said there is extra-ordinary talent in the UoS agricultural scientist, which must be utilised for the development of agriculture. UoS VC Dr Nazra Sultana said that with the Chinese help, every project, especially those pertaining to education and research would be successful. Dean Faculty of Agriculture Dr Muhammad Afzal also address to the ceremony.

Turkey To Join Pakistan, China, Russia Superpower Bloc? -- Value Walk

Turkey has just fueled speculations about a possible superpower rectangle between Turkey, Pakistan, China and Russia. While indications that the Pakistan-China-Russia superpower triangle is becoming a reality keep piling up, other nations are expressing their interest in joining the new bloc, which could become a game-changer for Asia and the world as a whole.

Just days after his visit to Pakistan in mid-November, Turkish President Tayyip Erdogan suggested that his country should pursue joining a bloc dominated by China and Russia. Erdogan said his country doesn't need to be fixated on joining the European Union and should join forces with China, Russia and Pakistan instead. Although Turkey has had decades-long hopes of joining the EU, apparently there's an alternative for Ankara if the EU keeps stalling talks about Turkey's membership.

Turkey wants to be part of Pakistan-China-Russia triangle

If Turkey—which has just held talks with Pakistan about strengthening their economic and military ties—joins the Shanghai Cooperation Organization (SCO), it would be a clear indication that Pakistan, China and Russia are gaining a new-old friend on their team. If Turkey gives up its efforts to join the EU, we could see the rise of the Pakistan-China-Russia-Turkey rectangle, an even more powerful alternative to the Pak-China-Rus triangle.

In fact, Erdogan said he had already discussed the idea of his country joining the SCO, which is dominated by China, Russia and Central Asian nations, with Russian President Vladimir Putin and Kazakh President Nursultan Nazarbayev. Erdogan's comment that Turkey doesn't need to join the EU "at all costs" is a breakthrough development in Turkey-EU relations, which have reached their lowest in the aftermath of the failed anti-government coup on July 15.

Is the SCO the new EU after the U.K.'s Brexit?

The EU is currently reeling from the loss of the United Kingdom, which voted in favor of leaving the European bloc this past summer. Turkey's setting off on a course to joining the security bloc dominated by China and Russia is an indication that Ankara also doesn't want to put up with Europe's accusations that Turkey is losing its democratic freedoms.

"I hope that if there is a positive development there, I think if Turkey were to join the Shanghai Five, it will enable it to act with much greater ease," Erdogan told

reporters on his plane while traveling back from a visit to Pakistan and Uzbekistan.

The SCO, which was formed in 2001, is a regional security bloc that consists of China, Russia and four Central Asian nations: Uzbekistan, Kazakhstan, Kyrgyzstan and Tajikistan.

Another indication that Turkey is seeing a prosperous future if it sides with Pakistan, China and Russia is the fact that Turkish investors have expressed an increased interest in the China-Pakistan Economic Corridor (CPEC). If Turkey becomes part of the CPEC, it would be a game-changer for Ankara as well as Beijing and Islamabad, co-founders of the project.

Pakistan and Turkey reaffirming their friendship

Turkey and Pakistan have recently seen a huge boost in their bilateral relations. During his visit to Pakistan nearly two weeks ago, Erdogan said Ankara and Islamabad should strengthen their strategic partnership and drive bilateral trade up. Turkey and Pakistan have enjoyed close cultural, historical and military ties for decades, and Ankara's support of Islamabad in its decades-long conflict with India serves as the foundation of their growing strategic partnership.

China, Pakistan's closest ally in the region, is also enjoying close economic and military ties with Turkey. Ankara is also one of Pakistan's key weapons sellers, while it also purchases arms from it.

Turkey, China and Russia favor Pakistan over India

From a diplomatic point of view, China, Russia, Pakistan and Turkey are already manifesting signs of forming some kind of a bloc, or superpower rectangle, if you may. While Ankara supports Pakistan's position on holding a plebiscite under the United Nations to decide if the disputed Kashmir region should be part of Pakistan or India, Erdogan's country went far beyond that.

At a Nuclear Suppliers Group (NSG) meeting in November, Turkey supported Pakistan's membership in the group, which regulates international nuclear commerce, while rejecting India's bid. China and Russia also sided with Ankara and rejected India's bid to join the NSG.

Interestingly, neither India nor Pakistan has ever signed the Nuclear Non-Proliferation Treaty (NPT). But Turkey, China and Russia apparently see that it's safe to accept Pakistan while rejecting India's bid to join the group that regulates trade in atomic material. If that's not an indication of friendship and commitment to have each other's back, then what is it?

Pakistan to buy super-fast vessels from Turkey and China

To further strengthen ties with both China and Turkey, Pakistan already has plans to purchase super-fast vessels from Beijing and Ankara to form a special squadron to be positioned at the Gwadar port in Balochistan, according to the Hindustan Times.

"A squadron may have four to six warships," an unnamed Pakistan Navy official said during the IDEAS 2016 defense exhibition in Pakistan, according to the media outlet.

The official added that the super-fast ships would be purchased "soon" because Pakistan sees an urgent need to have a powerful fleet positioned at Gwadar to secure the deep sea port. The official also revealed that two warships have already been deployed at the seaport.

China has already agreed with the Pakistan Navy to send its naval vessels to safeguard Gwadar and trade under the CPEC.

Pakistan-China-Russia-Turkey rectangle: Is it happening?

Interestingly, Erdogan has previously expressed interest in joining forces with China and Russia in the SCO. But the Turkish president has always stopped short of formally requesting to join the bloc because it would disrupt Ankara's long-standing EU membership bid.

In November 2015, Erdogan seemingly gave up his plans to join the SCO after his country's air force downed a Russian warplane over Syria, which resulted in tensions between the two nations. But a lot of water has passed under the bridge since then, and during their latest meeting in August, Erdogan and Putin expressed mutual interest in restoring their once-close ties.

While Russia and Turkey are still catching up and amending their relations, China and Pakistan are enjoying very close and prosperous ties with Ankara. But if the four nations decide to formally show the world their intentions to stand by each other – and form the Pakistan-China-Russia-Turkey rectangle – it would be a diplomatic, military and economic game-changer for the whole world.

Pak-China direct rail and sea freight service launched -- The Nations
BEIJING - China and Pakistan have launched direct rail and sea freight service, linking southwest China's inland Yunnan province and Pakistan's largest port of Karachi, Chinese state-run media reported on Thursday.

The freight line will cut transport cost by over 50 percent compared with past services, Xinhua news said in a report.

A cargo train loaded with 500 tonnes of commodities left Kunming, capital of Yunnan, for Karachi on Wednesday, marking the opening of the new route.

"The route helps locals businesses connect with the world market," a representative from the New Silk Road Yunnan Limited said.

The new rail, sea freight will cut logistics cost, including that of transport, by 50 per cent compared to past services, the news agency reported. The service is a part of China's Maritime Silk Road initiative, of which the China-Pakistan Economic Corridor project (CPEC) is an extension. Pakistan and China kicked off first trade activities under CPEC in October as over a hundred Chinese containers arrived at the Sust port in Hunza, following clearance from customs.

CPEC & significance of maritime security -- Pak Observer

WHOEVER rules the waves, rules the world, wrote Mahan, who believed that national power and prosperity depended on control of the seas. His thesis was true then and it stands true today. Sea routes have been used by mankind for trade and commerce for over 3000 years. Sea-ward wars and battles have also been fought to protect those naval routes to enhance economic hegemony and shape geopolitics. The significance of seas can be gauged from the fact that two-thirds of the world population lives on coastal regions. 90 percent of international trade is seaborne. Transportation via seas is approximately 10 times cheaper than rail, 45 times cheaper than road and 163 times cheaper than air.

The importance of the CPEC project along with the Gwadar Port at its apex have been addressed to and discussed by experts and political gurus all round the globe and since all this economic activity will ultimately take place via seas and oceans, the significance of the Indian ocean and its maritime security just cannot be ignored. Apart from providing a most economical route for trade connectivity between China, Pakistan and rest of the world, CPEC (and Gwadar Port) will provide better connectivity to the energy rich Central Asian Republics (CARs) and act as transit and trans-shipment port for Central Asia. The Gwadar Port can also be used as a hub-port for the Gulf States as well.

Pakistan military has taken several notable initiatives to ensure onshore and afloat security of the CPEC and Gwadar Port. The security of Gwadar port, Chinese personnel working there and all the included infrastructure have been entrusted into the capable hands of Pakistan Navy. According to open sources, the Pakistan Navy is adopting a multi-pronged approach to tackle all the challenges. Those steps include increasing the overall security apparatus of Gwadar Port, conducting security patrols and conducting coastal exercises. Pakistan Navy is also enhancing its Maritime Domain Awareness and engaging in Collaborative Maritime Security which as the name suggests is in association with regional and extra regional navies.

The Navy has also created a separate force consisting of Pakistan Marines for the protection of Gwadar Port and Chinese personnel. The name of the force is Force Protection Battalion (FPBn). The size of this force is subject to increase as related activities on the port will increase. Apart from the conventional threats, Pakistan Navy is also preparing its defences regarding any asymmetric threats to Pakistani ports and coast.

Constant surveillance and monitoring of maritime area of interest is being done by Pakistan Navy at all times and for this purpose, the Navy has deployed state-of-the-art radar networks, electro-optic sensors and pickets. This not only helps to fill any gaps that might be left in conventional means of protection but also generate timely and well-coordinated response if any threats are mitigated by non-state actors.

Pakistan Navy, to strengthen maritime and coastal security setup has also established Coastal Watch Stations and Joint Maritime Information Coordination Centre (JMICC). This not only helps the navy to gather and compile valuable information but also enables it to synergize coordinated operations by different security agencies in maritime domain.

No country in the world can face the challenges posed in the realm of maritime security due to the given nature of modern maritime challenges and for that reason Pakistan Navy regularly collaborates with navies of different countries and engages in different activities to improve interoperability and handle maritime crimes (such as joining 2004 US-led multinational Task Force-150). This not only keeps Pakistan Navy up to speed regarding modern challenges in the maritime domain but also keeps the navy a finely tuned and oiled war machine that is ready to face any regional and extra-regional challenge to national security. Pakistan Navy is fully cognisant that navies are also responsible for fostering a country's foreign policy objectives and to this end the Pakistan Navy is constantly striving to foster stronger relations with the regional and extra-regional navies to create a safer security environment where economic activity can take place without any threat or risk.

The whole world has realised the immense significance of the CPEC project and Gwadar Port. Regional and extra regional states desperately want to get in on this project to benefit from its exploits. Countries and powers who are trying to sabotage CPEC and Gwadar port through direct and indirect means should be mindful of the fact that Pakistan and its Armed Forces are fully aware of their designs and are also capable and prepared to destroy anyone who dares to cast an evil eye on the

security of these projects and the overall national security of Pakistan.

Uzbekistan eyes Gwadar to reach World Market, urges direct access to Pakistan -- DND

TASHKENT, Uzbekistan: The Chairman of Uzbekistan Senate's Foreign Policy Committee Sodik Solihovich Safoyev said that Gwadar Port was an Uzbek ambition to reach at, and stressed capitalizing potential of Pak-Uzbek bilateral relationship.

In an exclusive interview with Dispatch New Desk (DND) news agency Chief Editor Agha Iqrar Haroon in Tashkent, Sodik Safoyev said that Pakistan and Uzbekistan were regional allies, and they had enormous opportunities to cooperate in the fields of economy, culture and security.

"Cooperation with Pakistan is one of the highest priorities of Uzbekistan's foreign policy," Sodik Safoyev said.

Sodik Safoyev, who was the Minister of Foreign Affairs of Uzbekistan from March 2003 to February 2005, said that though Pak-Uzbek bilateral relationship had great potential to flourish and in this regard, several bilateral meetings took place between the top leadership of both the Countries in the past.

However, he added, certain reasons such as unavailability of direct access to each other was causing hurdles in strengthening of bilateral cooperation.

"The potential of Pakistan-Uzbekistan bilateral relationship is yet to be capitalized," he said.

agha-iqrar-haroon-interviews-sodik-solihovich-safoyev
sodik-solihovich-safoyev-with-agma-iqrar-haroon

The Uzbek Senate's Foreign Policy Committee Chairman said that opening and development of trade routes between Pakistan and Uzbekistan would help facilitating the linkages between these two potentially very promising markets.

Sodik Solihovich Safoyev said that multi-billion dollar China-Pakistan Economic Corridor (CPEC) could help Uzbekistan to reach World Market via sea.

"We are pleased to hear that CPEC, connecting China with Pakistan, has begun functioning this year," Sodik Safoyev said.

Sodik Safoyev said that Tashkent had already been working with Beijing to build a direct rail link between Uzbekistan and China, adding that CPEC would open up new opportunity for connecting us.

"Since Uzbekistan is a land-locked Country; therefore seaport like Gwadar would help Uzbekistan to have access to the World Market," he noted.

Sodik Safoyev said that in the future, Gwadar would be the closest port for Uzbekistan and it was one of the ambitions of Uzbekistan to get access to Gwadar port.

In reply to a question regarding Parliamentary relations between Pakistan and Uzbekistan, Sodik Safoyev said that parliamentarians could play a very constructive role in not only boosting Pak-Uzbek cooperation but also fulfilling Tashkent's ambition to have access to Gwadar port.

The Uzbek Senate's Foreign Policy Committee Chairman said that he visited Islamabad in August 2016 and during talks with Pakistani Parliamentarians, both sides agreed that in contemporary world, bilateral relations couldn't be limited only to government-to-government contacts.

"It is not the monopoly of their ministers of foreign affairs," he said.

Sodik Safoyev said that without incorporating the role of Parliamentary diplomacy,

the bilateral relationship would not have a full Character.

“Parliamentarian contacts provide kind of a depths to their relationship,” Sodik Safoyev was of the view.

Firstly, we required creating a legislative framework of our contacts to harmonize our laws and to make business-friendly environment, he said adding that it would create some incentives for investors and businessmen to trade and create joint ventures.

Secondly, it's very important for region to region contacts. Lastly, Parliaments in most countries were playing more active role in controlling the governments for the sake of people's desires and hopes, and controlling the implementation of international laws.

“I think Parliamentarians can do a lot for activating our bilateral relationships in all dimensions,” Sodik Safoyev said.

In reply to a question about prospects for Pak-Uzbek ties in next decade, Sodik Safoyev said that since both Pakistan and Uzbekistan shared common desires of strengthening of bilateral cooperation, both the countries needed to pursue common goals.

“We are living in a very challenging era as a lot of uncertainty and unexpected events are happening throughout the world. It is very difficult for anyone to make long-term or medium-term prognosis but yet there are certain fundamentals which cannot be avoided,” he said.

Sodik Safoyev said that both Pakistan and Uzbekistan wanted to cooperate, and they were so close to each other historically, ideologically and by aspirations of their people.

Sodik Safoyev said that Pakistani people wanted to visit Bukhara and Samarkand, and at the same time Uzbek people always dreamt to visit Pakistan and had an access to their brothers over there.

For this, he added, we required to do three things. Firstly, we needed security in our countries and region as its' fundamental for our cooperation.

“Unless we are at peace situation in the region, all the talks about our wonder projects will be mere proclamation rather than pragmatic plans,” Sodik Safoyev said.

Sodik Solihovich Safoyev, who is also a former Special Advisor of Uzbek President on Afghanistan, said that we all should have struggled for security and eradicating transnational threats like terrorism, extremism, drug trafficking, organized crime etc etc.

Secondly, he said, we needed direct linkages and development of transport corridors for connecting us.

“We need peace in Afghanistan which will allow us to build up railroads and pipelines which will bring energy to Pakistan and Pakistani goods to Central Asian Countries,” said.

Sodik Safoyev further said that in a bid to intensify Pakistan-Uzbekistan relations, both the Countries should also have started exploring common Islamic heritage of great philosophers and thinkers who used to live in these two Countries.

China's Shanghai Electric to invest USD 9bn in Pak upgrades -- Business Standard

China's Shanghai Electric plans to spend USD 9 billion overhauling electricity infrastructure in Karachi, a minister said, just months after the multinational revealed it was buying a Pakistan power company.

China is ramping up investment in its South Asian neighbour as part of a USD 46 billion project unveiled last year that will link its far-western Xinjiang region to Pakistan's Gwadar port with a series of infrastructure, power and transport upgrades.

In a presentation made to Pakistani authorities, Shanghai Electric said it would invest an average of \$700 million a year until 2030 to increase capacity, improve cabling and target bill defaulters.

"The investment would be utilised in distribution, generation, transmission" and training, Miftah Ismail, minister for state and chairman of Pakistan's Board of Investment told AFP on Wednesday.

The investment would also aim to tackle widespread electricity theft and other losses that cost about \$269 million a month in the city, partly by replacing above-ground grid stations with underground ones.

Shanghai Electric announced in August it would buy a majority stake in K-Electric, which is owned by Abraaj Group of Dubai, for USD 1.7 billion, which would be Pakistan's biggest ever private-sector acquisition.

First-ever Chinese Ambassador Scholarship established at QAU -- BR
Chinese Ambassador to Pakistan, Sun Weidong here on Thursday inaugurated the Chinese Ambassador Scholarship program for undergraduate and MPhil students at the School of Politics and International Relations (SPIR), Quaid-i-Azam University (QAU). In this connection, an agreement was signed by the ambassador Sun and QAU Vice Chancellor Dr Javed Ashraf. The ambassador also handed over a cheque of dollar 29,500 to the University for implementing the program.

Speaking on the occasion, the Ambassador said the scholarship was the "first of its kind" offered by the Chinese Embassy to students of a public sector University in Pakistan. In an academic year, each of the ten selected students enrolled in the under-graduate and MPhil degree programs will receive an amount of Rs 150,000 on need and merit basis. The Scholarship was established with the aim to help the University's students overcoming their financial difficulties to undertake their future study and promote academic activity under the Pakistan-China friendship program. It also meant to encourage talented students, enabling them to play their role in the country's socio-economic development.

Eulogizing the growing Sino-Pak socio-economic partnership, the Chinese ambassador said that the two countries are like iron brothers, who always trusted and supported each other. This friendship is deeply rooted in the hearts of their people.

Referring to China-Pakistan Economic Corridor (CPEC), he said, it elevated their friendship to a new height. "This friendship has entered into a new stage of ground development in the form of CPEC under which 17 major projects have been started across the country. These projects would bring a major change in socio economic development of Pakistan, offering enormous employment opportunities, fulfilling the dreams of the skilled youth," he added. Dr Ashraf thanked the ambassador for selecting Quaid-i-Azam University, initiating the ambassador scholarship program. Dean Faculty of Social Sciences.

Pakistan Navy's special 'Task Force-88' set up to guard Gwadar port's sea lanes -- Dawn

Pakistan Navy's special 'Task Force-88' (TF-88) was established Tuesday for maritime security of Gwadar port and protection of associated sea lanes against both conventional and non-traditional threats.

An International Maritime Conference on the China-Pakistan Economic Corridor (CPEC) was held at Gwadar today to commission the TF-88 force.

The creation of the special maritime force has been necessitated by the operationalisation of CPEC, which is expected to lead to a surge in maritime activity at Gwadar — the nodal point for CPEC — and the sea lanes. This has in turn increased the maritime susceptibilities there.

TF-88 is to comprise ships, Fast Attack Craft, aircraft, drones (unmanned aerial vehicles), and surveillance assets. Additionally, marines would be deployed at sea and around Gwadar for security operations, according to a senior Navy official.

Chief of Army Staff Gen Qamar Javed Bajwa, Chief of Naval Staff Admiral Zakaullah and Chief of Air Staff Air Chief Marshal Sohail Aman, Chairman Joint Chiefs of Staff Committee Gen Zubair Hayat, Balochistan Chief Minister Nawab Sanaullah Zehri attended the conference.

Prime Minister Nawaz Sharif was to attend the conference but his flight from Lahore was delayed due to dense fog, Admiral Zakaullah said.

All Day

PM Nawaz to inaugurate Global Conference in Gwadar today

Prime Minister Nawaz Sharif will visit Gwadar on Tuesday to inaugurate the Global Conference.

According to details, the premier will also go to Turbat, Pishin and Quetta. Balochistan Chief Minister Sanaullah Zehri will host dinner for the PM at Pishin.

Nawaz Sharif is expected to visit Turbat, where he will inaugurate Hoshab Road.

Gwadar is an extremely crucial city which has a vital role to play in the China-Pakistan Economic Project, an economic corridor which links China's Xinjiang province to the port city in Balochistan.

Chinese goods will be shipped from Gwadar and exported to all parts of the world from the deep sea port.

All Day

CPEC, GWADAR DEVELOPMENT WILL PROVE TO BE GAME CHANGER FOR ENTIRE REGION: PM -- Radio Pakistan

He was speaking at the inaugural ceremony of Hoshab-Pangur-Sorab road at Turbat on Wednesday. The 448 kilometer road, which is important component of the Western Corridor of CPEC, has been completed at a cost of over 22 billion rupees to link Gwadar Port with National Highway network. It will also provide shortest link to Afghanistan and Central Asian Republics.

The Prime Minister described completion of this vital project as making of new Balochistan and new Pakistan. He expressed the confidence that its completion would create enormous economic and commercial activities and help overcome the challenge of poverty, backwardness, ignorance and unemployment in the region.

Mian Nawaz Sharif regretted that Balochistan remained neglected in the past but the present Government is fully resolved to bring it at par with other province. He said development and progress is right of people of Balochistan and it is duty of the Government to give them this right.

The Prime Minister said Balochistan has been bestowed with immense natural resources exploitation of which cannot only change fate of the province but also the country. He said CPEC and development of Gwadar would prove to be game changer for the province, the country and the entire region.

Prime Minister Nawaz Sharif said on Wednesday developmental activities are visible in each and every corner of the country. A number of motorways, highways and roads besides bridges and other infrastructure projects are being undertaken in different areas.

He said a number of power plants are coming up and as a consequence the country would get rid of the menace of load-shedding.

The Prime Minister said his Government is pursuing the path of economic development while its opponents are only indulging in negative politics. He said people of Pakistan would make a decision on the basis of actual work in 2018 general elections.

On this occasion, the Prime Minister announced construction of Hoshab-Awaran-Lasbela road, to be jointly financed by the Federal and the Provincial Governments.

PAKISTAN, CHINA TERM NEW CHANDELIER AT QUAID'S TOMB A 'SYMBOL OF STRONG SINO-PAK FRIENDSHIP' -- BR
ISLAMABAD: Pakistan and China have termed the installation of new chandelier gifted by the latter for the mausoleum of Quaid-e-Azam as a "symbol of strong bond between the two countries".

President Mamnoon Hussain in his message on the installation of the new chandelier, which he is going to inaugurate on Saturday, has expressed confidence that the symbolic significance of the chandelier would always remind the importance of Sino-Pak relationship.

"The installation of new chandelier, a masterpiece of its own kind, at the last abode of Quaid-e-Azam Muhammad Ali Jinnah is a great occasion for the nation," he said.

President Mamnoon said during the construction of Quaid's mausoleum some 45 years ago, China had gifted a beautiful chandelier.

"During the whole four-and-half-decades, the chandelier had been illuminating the mausoleum as a symbol of Pak-China friendship," he said.

He said due to environmental pollution and corrosive atmosphere of Karachi, the chandelier had lost its shine with the passage of time and the government of Pakistan decided to change it.

For this purpose, he said, a request was made to the Chinese government to assign some experts for this job, but the Chinese government decided to do it on its own as a goodwill gesture.

The President thanked the Chinese leadership and especially Ambassador Sun Weidong for the chandelier.

Adviser to Prime Minister on National History and Literary Heritage Irfan Siddiqi in his message said the bond between Pakistan and China is unbreakable.

He said the friendship that the two countries have forged is beyond the spheres of defence, security, economy, trade, communication and nuclear power.

"Pakistan and China turned a new leaf when their friendship became more about cultural traditions," he said.

He mentioned that when the time came to replace the existing chandelier, China, a true friend proposed to replace it and bear all costs from production to installation.

"The offer is a reflection of the indestructible bond between the two countries," he said.

Irfan Siddiqi said he believed that the chandelier at the tomb would continue shedding light on the great bond between the two countries for generations to come.

Chinese Ambassador Sun Weidong said the chandelier shows the utmost respect for Quaid-e-Azam by the Chinese people and the deep-rooted affection between two countries spanning more than half a century.

He said the year 2016 marks the 140th anniversary of the birth of Quaid-e-Azam and 65th anniversary of China-Pakistan diplomatic relations.

"In this regard, the government of China has decided to provide a new chandelier to Mazar-e-Quaid with assistance gratis," he said.

He said with the help of best designer and producer in China, this chandelier is now refurbished with brighter lightening and energy-saving technology, while retaining its original shape.

"The new chandelier represents the light of friendship, mutual-trust and cooperation shining in our peoples' hearts," he said.

The Ambassador said the chandelier would serve as the inexhaustible sources of momentum for our future relations and would continue to be a beacon shedding light for a path towards a community of shared destiny.

Submarine cable landing station to be set up in Gwadar -- The Nations
ISLAMABAD - The National Telecommunication Corporation (NTC) has planned to establish submarine cable landing station at Gwadar to provide alternate route to the existing network.

This was revealed on Thursday during a signing ceremony between the NTC and the Telecard Limited. Both the companies will cooperate on developing business and providing support solutions in the ICT for Government Sector under the Telecom Policy 2015. Supernet Ltd is a wholly-owned subsidiary of Telecard Limited providing services to customers, which include satellite, radio and fiber optic base managed WAN services. Shamsul Arfeen, CEO Telecard Ltd endorsed that the partnership would add value to the NTC portfolio as their business partner to provide latest satellite technologies such as the O3B services, i-direct service and low-cost satellite-based broadband services for the NTC customers. NTC Managing Director Brig (retired) Viqar Rashid Khan, while speaking on the occasion, briefed the audience that the NTC was the first operator to establish the Cloud-Based National Data Centre in the public sector.

He said that the corporation NTC had completed over 85 per cent of its ADP projects in a record one year.

It also extended its services from 54 districts/cities to 87 districts/ cities including 13 districts in Sindh and six districts in Balochistan.

Overall Fixed Lines telephone growth observed was six per cent despite the decline in its general use, which then saw growth of over 36 per cent in broadband.

Over 45 per cent networks have been shifted from the TDM to IP-based Next Generation Network, the managing director said.

Bankers for issuance of multi-currency CPEC sukuk -- BR

Bankers have proposed issuance of multicurrency Sukuk for financing of China Pakistan Economic Corridor (CPEC) infrastructure projects. Addressing a roundtable session on "Islamic Finance Opportunities in CPEC and Beyond" conducted by IBA Centre for Excellence in Islamic Finance on Friday at IBA City campus, Ghulam Abbasi, Director of Islamic Banking Department, State Bank of Pakistan (SBP) said that Islamic finance in Pakistan faces a major issue of liquidity development, for which CPEC is a golden opportunity especially for Sukuk.

He emphasised on building a platform where specific action points can be discussed and accordingly implemented. On behalf of SBP, he assured full support saying that the regulators will always support the new products, however it should be maximised as per the potential and an action plan needs to be properly developed. Dr Sulaiman Liu, Senior Partner from Al-Sadiq Consulting Limited spoke about Islamic financing options and opportunities that are necessary in order to give the Corridor the necessary push. Showing the overall geographical terrain, Dr Liu explained how this was an opportunity for Pakistan to increase international and local opportunities from other parts of the world, especially Honk Kong and Dubai.

He also mentioned a summit which will be held in China next year and would be an opportunity to develop ideas for Pak-China Islamic Banks, Takaful Companies and so on. He also mentioned how Hong Kong, even though not a Muslim country has been issuing Sukuk since 2014, and another in 2015, both of which are oversubscribed. They have been offering Islamic Financing since 2007.

Abdullah Han Senior Partner from Al-Sadiq, spoke about how the 30 million Muslim population of China was devoid of any Shariah-compliant alternative to banking in China due to regulatory challenges. He also pitched the idea of gaining a liquidity pool for Sukuk from Islamic capital markets like Dubai and Kuala Lumpur. Ahmed Ali Siddiqui, Director of the Centre for Excellence in Islamic Finance talked on the CPEC and the role of Islamic Financial Institutions. He also appreciated the work being done for the economic development in the region.

He remarked that sessions like these between Pakistan and Chinese industry partners should continue in future, so that we can have a practical action plan for gaining maximum benefit. He invited the Chinese guests to a further event to be hosted in January to discuss the Islamic Finance opportunities in CPEC. He said the idea of issuing multicurrency Sukuk to finance CPEC infrastructure projects was very attractive, with the added advantage of avoiding foreign currency risk for both Pakistani and Chinese investors.

Irfan Siddiqui, CEO of Meezan Bank, spoke about the corridor and how China has allocated \$46 billion and asked for a further \$6 billion to be invested. He also spoke about Gwadar and how it became extremely necessary to develop cohesion between the two nations.

Meanwhile, CEOs and heads of departments of a number of Financial Institutions, regulator and academic institutions including Nasir Ali Syed, CEO Pak Qatar Takaful Limited, Muhammad Shoaib Ibrahim CEO First Habib Modaraba, Ashraf Bava CEO Nael Capital, Adnan Fasih Group Head IBD of Habib Metropolitan Bank and others also attend the round table session.

Pakistan-China to revolutionize IT sector -- Tech Juice

Pak-China Joint Chamber of Commerce and Industry (PCJCCI) is planning on revolutionizing the information technology in collaboration with China under China-Pakistan Economic Corridor (CPEC).

A three-member Chinese delegation from BODA software solutions, Sichuan, China, led by Qiu Ziynn met with PCJCCI President Wang Zihai, in order to strengthen the bilateral ties between two countries in IT sector. The delegation was sent by Chinese Government in order to inform the Chinese stakeholders investing in CPEC about the IT opportunities present in Pakistan. Also, China is interested in outsourcing IT work to Pakistan companies.

Information Technology is the need of the hour. PCJCCI Secretary General M Salahuddin Hanif mentioned Pakistan Government's efforts in this regard. He informed that the IT and Telecom ministries are collaborating to form 'e-commerce gateway framework' to open more opportunities in online commercial ventures. He also said that Pakistan's mobile gaming and animation industry earns millions per month by developing and exporting mobile applications.

Wang Zihai briefed the delegation about thousands of IT companies working in Pakistan which develop high-end software solutions for some of the largest companies in the world. Also, Pakistan has won many international IT awards.

They discussed that currently, CPEC is focusing on energy and infrastructure development. Now, the both governments will step forward to jointly revolutionize the IT sector by developing an e-corridor for greater connectivity and development.

Established in 2012 under Trade Organization Ordinance 2009, PCJCCI works on the economic integration and mutual benefits by enhancing the bilateral trade between Pakistan and China.

Pakistan Turns to China in Energy Binge -- Wall Street Journal, 1025 Connecticut Ave NW # 800, Washington, DC 20036, USA

KARACHI, Pakistan—When Prime Minister Nawaz Sharif came to office in 2013, rolling power outages across the country were plunging homes and businesses into darkness for up to 12 hours a day.

Now the Pakistani leader is betting on a \$21 billion Chinese-backed splurge on energy projects to boost the economy—and his re-election bid.

More than 10,000 Chinese workers are now building at least 10 partly Beijing-financed energy projects across Pakistan that are set to grow the country's energy output by 60% within two years in the first major boost to supply in two decades. Mr. Sharif's government plans to inaugurate a nuclear plant this month and a pipeline network in January that will carry large-scale gas imports upcountry.

"Never in the history of Pakistan has there been such a big package of electricity plants in the pipeline," said Syed Akhtar Ali, in charge of energy at the Planning Commission, the ministry tasked with long-term development.

RELATED

China's Growing Role in Pakistan's Power Struggle -- The Numbers

Mr. Sharif's promise to solve the electricity crisis propelled him to office at a time when the energy deficit was knocking some 2 percentage points off growth, economists say, stifling industry and leaving school children to study by candlelight.

Pakistan's economic growth has risen to almost 5% annually under Mr. Sharif and his government set a 7% target for the years ahead. That, his government hopes, will boost the moribund private sector, reduce unemployment and provide youth with more alternatives to extremism.

The energy plan is a centerpiece of that economic aspiration. Mr. Sharif is racing to fulfill his pledge and become the first incumbent to be re-elected in a country whose voters—or the interventionist military—have long ousted its leaders for their poor performance. Mr. Sharif, who led Pakistan twice before in the 1990s, hasn't previously even completed a term in office.

"Electric power is going to be the swing factor in the election," said Shahid Khaqan Abbasi, the minister for petroleum. "If we don't deliver on power, we won't be seen as having delivered."

ENLARGE

Mr. Sharif's plan depends heavily on China, which is translating its long-term strategic ties with Pakistan into an economic partnership, part of a broader infrastructure push across Eurasia. China is financing many plants as commercial investments. But to expedite projects, the Pakistani government is funding some power stations in the run up to the election, including three gas-fired plants in Mr. Sharif's home province of Punjab. The eventual aim is to more than double Pakistan's current output of around 16,000 megawatts.

By comparison, Washington's multibillion-dollar civilian aid program for Pakistan has been far less ambitious, adding 1,000 megawatts to the country's power generation in recent years by enhancing existing power stations.

The plan is to add 10,000 megawatts of the new China-backed infrastructure, a mixture of coal, gas and hydro electricity, by early 2018, months before elections, at a cost of \$21 billion. The schedule is tight. The massive amounts of natural gas and coal needed for the plants require an extensive delivery system of ports, pipelines and railways. The country also needs to upgrade its power distribution network to be able to carry the extra electricity.

"My concern is that gaps in longer term planning, including much needed structural, regulatory and market reforms, will once again fall by the wayside in the euphoria of

having achieved a temporary electricity supply surplus,” said Jamil Masud, a partner at Hagler Bailly Pakistan, an energy consultancy,

The projects could become a political issue. The Chinese-financed plants enjoy a generous return guaranteed by Islamabad. Less highly populated provinces complain that Mr. Sharif’s Punjab has scooped an unfair share of the projects. Beyond the election, billions of dollars of more Chinese power projects are also planned.

At Karachi’s Port Qasim, a \$2 billion coal-fired plant is taking shape. After only 1.5 years under construction, one 400-foot high cooling tower is up and the second is almost complete. The hulking metal frames for the boilers are in place and a jetty for imported coal is taking shape. Around 4,000 people work on the site, 24 hours a day—half of them Chinese workers who aren’t allowed to step outside its boundary.

On the other side of the port, a massive tanker ship serves as a terminal for liquefied natural gas imports, which are piped across Pakistan. Three more terminals are planned by the government.

The Chinese hope that, over time, greater economic success for its Pakistani ally will act as a source of stability and help to de-radicalize society, said Andrew Small, author of *The China-Pakistan Axis*.

“If you have a more normalized Pakistani economy and closer economic linkages within the region, this will at least mitigate some of the long standing conflictual tendencies that exist there,” he said.

All Day

CHINA TO SET UP LARGE STEEL FACTORY AT GWADAR -- APP

ISLAMABAD: Acting Chinese Ambassador to Pakistan, Zhao Lijian Monday said that his country would set up a large steel factory at Gwadar to further expedite economic developments being carried out under China-Pakistan Economic Corridor (CPEC) framework.

"Both China and Pakistan would very soon sign an agreement to establish the steel factory, three times bigger than the free economic zone being set up in Gwadar city," he made this announcement while addressing participants of a day-long conference on CPEC: Potential and Prospects organized by Strategic Vision Institute (SVI) here.

He said, industrial cooperation was the fourth pillar of CPEC initiative and both the country would discuss it in the next meeting of Joint Cooperation Committee (JCC) of CPEC to be held in Beijing this month.

"After completion of energy projects, transport infrastructure and development of Gwadar Port, industrial cooperation between China and Pakistan will be the main topic at the next JCC," he added.

Zhao Lijian informed that China was working a lot for the development of Gwadar Port which was built with the Chinese government's assistance.

He said, after completion, the port was handed over to Singapore but there was no improvement even after passage of five years.

Finally, it was given to the Chinese government by Pakistan government and the port was made functional and a ship carrying Chinese goods left for Africa.

He said, a business centre, hostel for different companies, fisheries processing plant with cold storage facility had been established in the free economic zone spread over around nine kilometers.

About Gwadar airport up-gradation, he said, the new international airport would have landing facility for all the modern aircraft including A-380 Airbus after completion, adding, prior to the up-gradation only C-130 or propeller-planes could land at the old airport.

The Acting Chinese Ambassador said, a 150-bed hospital was being built for the treatment of local people while a vocational institute had been set up for imparting training of different skills especially for the fishermen.

Talking about different energy project being completed under CPEC initiative in different parts of Pakistan, he particularly mentioned about the coal-based power plants which were being built in accordance with environmental standard set by the World Bank (WB) and other concerned international organizations.

He said, China produces around 60 percent of its total power generation through coal based power stations using modern and state-of-the-art technology.

"The environmental concerns will be taken into consideration during the completion of these power stations," he added.

Zhao Lijian pointed out hydro power plant, coal based power plants, wind power plants and solar based power plants were being set up to meet the electricity shortage in Pakistan.

He informed that the Karot Power Plant was being financed by the Silk Bank established by the Chinese government.

The groundbreaking of Suki Kinari, Kohala Hydro Power Project would be held early next year, he said and added, Sahiwal Power Plant and Port Qasim Power Plant would be completed by next June and December respectively.

He said, a power plant set up at Thar coal site would also be inaugurated in next June.

He said, HUBCO power plant, one of the biggest coal-based power plant, would provide constant and stable power supply throughout the year.

PAK-CHINA FM98 DOSTI CHANNEL LAUNCHED -- BR

ISLAMABAD: Pakistan Broadcasting Corporation (PBC) and China Radio International (CRI) on Monday launched local transmission of FM98 Dosti Channel in a colourful ceremony here at Pakistan National Council of the Arts (PNCA).

PBC Director General Khursheed Ahmed Malik and CRI Vice President Hu Bangsheng signed a mutual agreement on the occasion. Senior officials of China Embassy were also present.

Addressing the ceremony, the PBC Director General said Pakistan and China enjoyed cordial bilateral relations. Their friendship was now touching the peak as work on the China-Pakistan Economic Corridor (CPEC) was in full swing, he added.

He said PBC was proud to be a close partner of CRI.

Khursheed Ahmed Malik said PBC's external service was presenting a one hour programme on Chinese language.

He expressed the hope that cooperation between the two organizations would further strengthen their cordial relations in future.

CRI Vice President Hu Bangsheng said Pakistan and China had been connected with each other through the Silk Route for last 2,000 years.

He appreciated the Ministry of Information, Broadcasting and National Heritage for extending its cooperation in initiating various cultural programmes and establishing the FM channel.

Earlier, the function was started with national anthems of Pakistan and China. Students of various schools presented the the anthems.

Later, the artists of PNCA performed the traditional dances of all the provinces, including Gilgit-Baltistan and Azad Jammu & Kashmir. A cake was also cut to mark the occasion.

Radio Pakistan proposes launching of CPEC Radio Channel -- Daily Pakistan

ISLAMABAD – Director General Radio Pakistan Khurshid Ahmed Malik has announced that Pakistan would extend every possible cooperation to China Radio International (CRI) for transmission of Dousti Channel.

Talking to visiting Vice President CRI, Hu Bengsheng here on Monday, he said CRI content is very popular in Pakistan, and launching of Dousti Channel would add a local flavour to this broadcast. He said cooperation between CRI and Radio Pakistan has been a positive experience.

According to Mr. Malik, Radio Pakistan is already broadcasting programmes in eleven foreign languages, including Chinese. He suggested that the service could further be improved by CRI training the Chinese Service staff.

CRI vice president said his organisation will provide three staff members to Chinese Service of Radio Pakistan at its own expense. The two sides have agreed on mutual training of staff members of both organisations to enhance cooperation and

understanding, and strengthen ties in the field of broadcasting.

Director General Khurshid Malik proposed setting up of a dedicated CPEC radio channel as a joint collaboration between Radio Pakistan and CRI, with its transmitters from Kashgar to Gwadar, in order to highlight activities related to this multi-billion dollar project and to promote the culture of areas through which it passes.

He informed CRI delegation that Radio Pakistan has already upgraded its stations in Gilgit and Gwadar for this purpose.

Hu Bengsheng said that such a channel could be set up in two phases. The first would be to strengthen Dousti Channel and second would be to work on the feasibility of CPEC channel. He said cooperation between two media organisations will further strengthen people-to-people contact between Pakistan and China.

Vice President CRI also invited Director General Radio Pakistan to visit CRI.Online

Moscow to host Pak, China for talks on Afghanistan -- Observer

Russia is hosting an important trilateral meeting involving Pakistan and China on 27th December to discuss the prevailing situation in Afghanistan, reflecting the importance that the three countries attach to the peace and stability of the conflict-ravaged Afghanistan.

Foreign Secretary Aizaz Ahmad Chaudhary will lead the Pakistan delegation to the trilateral talks.

The proposed talks have assumed importance at a time when there is no let-up in violence in Afghanistan in spite of the advent of winter.

As a prelude to the trilateral meeting, a working level meeting has already taken place. The deteriorating security situation in Afghanistan has raised concerns about the spillover effect due to the presence of non-state actors and other elements there.

According to a recent statement of Russian foreign ministry, the consultations are aimed at establishing a wider regional partnership on the issue.

The official had stated that it was in the interest of regional stakeholders to protect themselves from the terrorist spillover, noting that containment efforts should take the form of an 'Afghan regional' project.

**UZBEKISTAN CONSIDERING BECOMING PART OF CPEC --
Nation**

Uzbekistan's Deputy Prime Minister Ulugbek Rozukulov has said that Pakistan is a very important country, and his country wanted to enhance bilateral ties in various fields including trade.

"The government, masses and business community of Uzbekistan and Pakistan must strive to boost bilateral trade, which is well below the actual potential," he said.

While speaking to the businessmen at FPCCI's Capital House here on Saturday, the visiting dignitary said that Pakistan could resolve its energy problem with the help of natural resources of Uzbekistan and that his country was considering to become part of CPEC, which, he said, was a fate changing project.

Uzbek ambassador to Pakistan, Apex Chamber President Abdur Rauf Alam and others were also present on the occasion.

"CPEC will not only benefit the whole region, but will also positively affect the people living in other parts of the field besides promoting Pakistan's economy," he said, and added, "We should push cooperation to the new heights."

Speaking on the occasion, FPCCI President Abdur Rauf Alam said that Pakistan was exporting pharmaceuticals, leather goods, agricultural products, milk and sports goods to the brotherly country of Uzbekistan.

"Pakistan is importing cotton, yarn, clothes, iron, steel plastic, telecommunications equipment and electric items from Uzbekistan," he added.

Alam said that Uzbekistan was producing quality aircraft, cars and machinery, which were not being imported.

He demanded immediate establishment of a Pakistan-Uzbekistan Joint Business Council to promote trade and investment. An MOU for cooperation was signed between the apex chambers of both the countries and a meeting of Pakistan-Uzbekistan Business Forum was also held.

'Pakistan's aviation needs boost to capitalise on CPEC,' says Mark Goh, National University Singapore -- BR

December 26, 2016 RECORDER REPORT 0 Comments E-mail Print PDF

Mark Goh is currently a Professor at the Department of Decision Sciences and Director (Industry Research) with the Logistics Institute-Asia Pacific at the National University of Singapore, where his areas of interest include supply chain management and physical distribution management. His first book was called 'Growth triangle: problems and prospects in international business,' which studied international business from the lens of economic development in Singapore, Indonesia, and Malaysia.

BR Research recently caught up with Mark at the 32nd AGM of Pakistan Institute of Development Economics (PIDE), where he gave the Allama Iqbal Lecture on the 'role of productivity, quality and innovation in making CPEC work for Pakistan.' The following interview is the edited draft of his post-lecture discussion with BR Research. The topic, of course, is CPEC seen from the lens of Mark's area of expertise.

BR Research: Let's start off from your understanding of Gwadar; its current state and potential. Compared to other large container ports in the region such as Shanghai, Singapore, Shenzhen and Dubai, how does Gwadar fare on the different metrics such as cargo handling capacity, container yard space, cargo storage capacity, and other transportation infrastructure such as air, rail, and road links?

Mark Goh: These are very specific capital investment questions; it is difficult to compare cargo handling capacity, terminals, berths and so forth at the moment, since Gwadar is still a work in progress. For instance, if I remember correctly, the number of berths in Gwadar is in a very different order than those in Shanghai, Singapore, or Dubai, since these older ports are much bigger.

But I think Gwadar's role and potential does not lie as much as in the number of berths but in its strategic location, since it gives potential access to Central Asian states and serves as a backdoor entry to the western provinces of China. And in the case of the latter, it fits very well into China's western region development plan.

The Chinese would want to raise the overall profile and quality of life of their population, and Gwadar is an important part of their game plan. The good news for Gwadar is that it is literally starting from scratch; it therefore has the opportunity to become a state-of-the-art port.

There are four possible basic means of connectivity - the air, the port, the road, and the railways. In addition, there is the pipeline. Together, these can make Gwadar a great inter-modal transportation hub.

BRR: What are the roots of this potential?

MG: The potential is there because Gwadar is a naturally deepwater port, which means there is little need for dredging. All you have to do is to develop the hinterland, build the roads, set up the infrastructure and you are good to go. It is also important to note that Gwadar is protected from the open ocean because it is on the right side of the bay; rather than the left side of the bay, which means it is protected from strong currents while being a deepwater port at the same time.

BRR: Certain quarters theorise that Chabahar is going to give competition to Gwadar. Where do you stand on that?

MG: It depends which horse you want to favour; if you favour one horse over another, you will put your money there. As of now, it seems it is Gwadar, since it offers the shortest route, and recent developments point to the same.

There are three main considerations here: political, safety, and security. I believe Pakistan was chosen because of its unique reason and good relationship with China. And the reason why China chose Gwadar rather than the ports in Karachi is

because it is easier to develop a brand new port than improve an existing port, which may already be choked.

BRR: If that is indeed the case then why do you think that China did a cargo train test from east of China, via Central Asia into Tehran?

MG: It was to make a point to the world that after so many years of talking and negotiating across several countries, China is really following through with the plan. It was also to prove that the Chinese will put their money where their mouth is. Second, as I understand, the Chinese always look out for options. Let me give you an example of how China looks at options, and that is good for modality choices.

Most of China's oil supply goes through the Straits of Malacca, which is a very busy channel. So, they have been working on three possible options for the same oil. Through the east, they have the traditional Straits of Malacca. There they have built a by-pass as well from one side of Malaysia to another, which means oil doesn't have to go through the entire Straits; it can stop half way and the rest can be transported via another transportation means across Malaysia to its eastern side where there is also a port and terminal facilities. From there, the oil is shipped off to coastal China. This helps to cut the delivery time. They have also invested in the southern part of Myanmar, from where oil will be shipped all the way to southern part of China. And then there is Gwadar to help connect with western China. In this way, China will not be dependent on oil coming from one transport route only.

mark-goh

BRR: Do you have estimates of Gwadar's benefits to China in terms of cost and time?

MG: As I mentioned in my presentation at PIDE, it would take about four-five days to cargo goods from Kashgar to Gwadar, which will help China reduce the time compared to transporting goods through the Straits of Malacca. Moreover, in dollar terms, every one day lost in transport can probably result in a loss of one percent of trade value.

BRR: What is your assessment on Pakistan's potential to emerge as a supply chain hub, both in the context of service logistics such as warehousing, trucking, and documentation services, as well as production logistics such as contract manufacturing and assembly?

MG: It is very hard to say at the moment considering that I don't know enough about the state of these industries in your country. But suffice to say, Pakistan needs to improve its infrastructure, ensure fixed schedule of rail, road, port, and airport services, given that businesses cannot afford to lose even a day. Pakistan also needs to improve its passenger airlines sector to maximise the opportunity for better transport connectivity; and both service and production logistics need safety and security too.

BRR: Let us flip the question around. Would China be looking for service logistics in Pakistan or production logistics?

MG: Its biggest interest is in service logistics. But production logistics may also follow suit.

BRR: Given the high labour cost differential between China and Pakistan, why wouldn't China want to set up production logistics in Pakistan?

MG: Let's look at the FTC industry - which is footwear, textile, and clothing. The FTC industry is facing high labour costs in China because a lot of workers tend to go to electronics industry because they pay better compared to FTC.

But why is China relocating this industry to Vietnam rather than Pakistan, when in fact Vietnam is not cheaper than Pakistan based on the data presented in the conference earlier, and that the FTC industry is very sensitive to labour costs? One

reason is the proximity to southern China, where most of China's FTC industry is located, and the other is that the stitching skills of the Vietnamese workers are better.

The only way Pakistan can fit into the equation is when you can say, 'we not only have cheap labour but also our quality is as good as rest of the world.' This of course will have to be in addition to ensuring that infrastructure issues and power and gas shortages are resolved, which is why China is investing heavily in Pakistan's power sector. The proximity to power stations will determine the success of the special economic zones or export processing zones.

BRR: How badly do you think China needs Pakistan? Should Pakistan negotiate tightly or should it let China enter first and then negotiate strongly later?

MG: We have to look at this way - is there a downside to

CPEC to usher in 'new era of development': COAS Bajwa -- DAWN

Army Chief General Qamar Javed Bajwa on Monday expressed the hope that timely completion of the China-Pakistan Economic Corridor (CPEC) would usher in a new era of development in the region.

He was addressing the passing out parade of newly recruited Baloch personnel of the Pakistan Army in Quetta.

He said Balochistan is an integral part of Pakistan and its resources would in future open new paths of progress for the people of Balochistan.

Development in Balochistan would ensure peace and stability in the country, the army chief added.

"That is why our enemies want to hinder Balochistan's bright future.

"I am extremely pleased that the people of Balochistan... have rejected all anti-Pakistan elements."

Gen Bajwa said Pakistan's "doors are open for those brothers who have been misguided by the enemy".

He said the betterment of law and order in Balochistan is the "foremost priority of the government" and in this respect, the Pakistan Army is assisting with the training and capacity building of police and other law enforcement agencies.

"Pakistan Army, despite limited resources, has always tried to play its positive role in the educational, societal and economic progress of the province alongside other institutions," he said.

"Pakistan Army is the manifestation of national unity in which all provinces are represented approximately according to their populations."

In today's ceremony, 577 recruits successfully completed their training and were awarded certificates by the army chief.

So far, over 13,000 Baloch youths have been trained and recruited by the Pakistan Army.

About CPEC

Balochistan is a key region for China's ambitious \$46 billion CPEC infrastructure project linking its western province of Xinjiang to the Arabian Sea via Pakistan.

Security problems have mired CPEC in the past with numerous attacks, but China has said it is confident the Pakistani military is in control.

The CPEC is a 3,000-kilometer network of roads, railways and pipelines to transport oil and gas from Gwadar Port to Kashgar city, northwestern China's Xinjiang Uighur autonomous region.

Proposed by Chinese Premier Li Keqiang during his visit to Pakistan in May 2013, the CPEC will act as a bridge for the new Maritime Silk Route that envisages linking three billion people in Asia, Africa and Europe.

An official agreement on the corridor was signed between the two countries in May last year during President Xi Jinping's historic visit to Pakistan.

A flagship project of the Belt and Road initiative as well, the CPEC intends to revive the ancient Silk Road with a focus on infrastructure, and constitutes the strategic framework of bilateral cooperation.

The project links China's strategy to develop its western region with Pakistan's focus on boosting its economy, including the infrastructure construction of Gwadar Port, together with some energy cooperation and investment programs.

Pak-Russia-China talks to focus on Afghanistan, CPEC -- The News

ISLAMABAD: A meeting between Pakistan, Russia and China will be held in Moscow today to discuss regional peace and stability, including situation in Afghanistan.

Foreign Secretary Aizaz Ahmad Chaudhary will lead the Pakistan delegation at the talks. FO spokesman Nafees Zakria told a media briefing that peace and stability in Afghanistan is in the interest of Pakistan and the entire region.

Chinese, Pakistani and Russian officials say they were driven to joint action by the efforts of Daesh affiliates to establish a foothold in Afghanistan.

The Russian inclusion in the China-Pakistan Economic Corridor (CPEC) is another important agenda of the meeting. There has been no formal discussion on the subject yet, however Russia has shown intention to be included in the project and China has welcomed the request.

On the other hand, Afghanistan is unhappy over being ignored for the trilateral meeting.

"Talking on Afghanistan without consulting the country raises serious questions for the Afghan people. We are worried about what the reasons behind the meeting are and want the relevant parties to explain," said Ahmad Shekib Mustaghni, spokesman for the Afghanistan foreign ministry.

Eight industrial zones to be set up under CPEC project: Ahsan Iqbal -- SAMAA

BEIJING: Federal Minister for Planning, Development & Reform Ahsan Iqbal says CPEC will not be limited to development projects but also help to boost people-to-people contacts between the two countries.

He said this while talking to media, after the concluded meeting of two-day Pak-China Joint Cooperation Committee of China-Pakistan Economic Corridor in Beijing.

Ahsan Iqbal said the meeting expressed satisfaction that by the cooperation of the leadership of both the countries CPEC is moving ahead successfully.

He said the meeting expressed satisfaction over the ongoing work on the 8000MW power projects under CPEC.

The Planning Minister said a working group has been constituted to carry forward the work on Bhasha Dam to be built on Indus River.

He said the transport infrastructure group expressed satisfaction on two big projects including Multan-Sukkur project and Karakorum Project from Havelian to Thakot where work is underway.

Ahsan Iqbal said under the transport infrastructure, rail based mass transit projects were approved for all provincial capitals and included in the CPEC framework.

He said under CPEC eight industrial zones will be set up with one zone in each province and special areas of Federally Administered Areas, Azad Kashmir, Gilgit-Baltistan and Gwadar.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.
